## Fiscal year 1909.

The revenues of the Government for the current fiscal year are thus estimated upon the basis of existing laws:

From customs	\$270,000,000.00
From internal revenue	250, 000, 000, 00
From miscellaneous sources	62, 000, 000, 00
	206, 796, 956, 00
Total estimated revenues	788, 796, 956, 00

#### The expenditures for the same period are estimated as follows:

_	
For the civil establishment	\$153, 000, 000. 00
For the military establishment	128, 000, 000. 00
For the naval establishment	125, 000, 000. 00
For the Indian service	17, 000, 000. 00
For pensions	161, 000, 000. 00
For public works	90, 000, 000. 00
For interest on the public debt	22, 000, 000. 00
For postal service	206, 796, 956. 00
·	
Total estimated expenditures	902, 796, 956. 00
Or a deficit of	114, 000, 000, 00
Or a deficit or	114,000,000.00

## Fiscal year 1910.

It is estimated that upon the basis of existing laws the revenues of the Government for the fiscal year 1910 will be—

From	customs	\$290, 000, 000. 00
From	internal revenue	250, 000, 000. 00
From	miscellaneous	62, 000, 000. 00
From	postal revenues	223, 340, 712. 00
	•	

Total estimated revenues\_\_\_\_\_\_ 825, 340, 712.00

The estimates of appropriations required for the fiscal year 1910, as submitted by the Executive Departments and offices, are as follows:

mitted by the several Executive Department	s over the esti-	
mated revenues of the Government for the fisc	al year 1910 of_	143, 046, 796. 01

The foregoing estimates are submitted in pursuance of law. As I stated in my report of last year, I regret the necessity of submitting them, for they are for the most part problematical. I have no means of knowing what will be the amount of the appropriations at the coming session, what will be the effect of the proposed revision of the tariff upon the revenue derived from imports, nor what will be the ultimate effect upon internal-revenue collections of certain moral and economic movements which seriously affect these sources of revenue. It is little more than guesswork, therefore, to give estimates of this kind. They are submitted in this report with these explicit qualifications.

#### REPORTS OF BUREAUS AND OFFICES.

For a more detailed account of the operations of the Department for the year, attention is respectfully invited to the reports of the heads of the several bureaus and offices. Certain of the recommendations made in these reports will be made the subject of later communications to the Congress.

#### OPERATIONS OF THE TREASURY.

The receipts and disbursements of the Government for the fiscal year 1908 show a reversal of condition, as compared with the fiscal year 1907: For the fiscal year 1907 the receipts were \$84,236,586.30 in excess of the disbursements; for the fiscal year 1908 the disbursements were \$58,070,201.15 in excess of the receipts, due to business depression and increased appropriations.

Fortunately, the available cash balance at the beginning of the

fiscal year was \$272,061,445.47.

The Treasury was called upon, in the latter part of October, 1907, to render assistance in the financial panic which, starting in New York City, gradually extended over the entire country. The measures taken to relieve the situation have been set forth elsewhere, particularly in the Response of the Secretary of the Treasury to Senate Resolution No. 33, of December 12, 1907.

Through these operations the amount of public deposits with banks reached \$236,548,321.08 November 30, 1907, and on December 27, 1907, the maximum of \$259,994,271.77 was attained, after which it was decreased to \$256,920,154.70 by the close of the month. Further withdrawals were soon after begun and continued from time to time until on November 16, 1908, the amount stood at \$118,379,536.30.

In the month of January, 1908, there was a freer circulation of money than had prevailed for the previous three months. Large amounts were returned to the money centers, and some of the depositaries therein voluntarily returned to the Treasury a part of their

holdings of public deposits, in amount \$3,978,217. In the latter part of January a call was made on the depositary banks of New York City for \$8,850,000, to be paid in six equal installments, from and after January 23. The balance in the banks to the credit of the general fund at the end of January was \$226,241,418.85.

During the month of February depositary banks voluntarily returned to the Treasury \$4,770,000 of public deposits, and February 29 the balance with the banks to the credit of the general fund was 2510,748,710,18.

\$219,543,719.13. On June 30 it was reduced to \$149,004,924.29.

Transactions in the public debt show an increase of interest-bearing

debt of \$2,669,710 for the fiscal year. However, if the issue of Panama Canal bonds were excluded, a net decrease in the interest-bearing debt would be shown of \$21,962,270. The noninterest-bearing debt was increased \$27,842,500, as follows:

Matured loans, not yet presented National-bank notes, redemption account	\$3, 043, 200 24, 800, 480
Less fractional currency redeemed	27, 843, 680 1, 180
Net	27, 842, 500

The aggregate of trust funds, consisting of gold coin and standard silver dollars, held for the redemption of certificates and notes for which they are respectively pledged, increased \$139,106,000 during the year. The increase in gold coin was \$141,539,000, while standard silver dollars decreased \$2,433,000.

The monetary stock increased \$263,203,013 during the fiscal year. The growth in gold was \$151,744,391; in silver, \$17,919,395; and in national-bank notes, \$94,545,227, while there was a decrease of \$1,006,000 in Treasury notes of 1890. At the close of the fiscal year 1908 the money in circulation amounted to \$3,038,015,488, or a per capita of \$34.72. The percentage of gold to total circulation was 45.95.

The issue of United States paper currency during the fiscal year numbered 188,999,912 pieces, of the total value of \$804,326,000. The redemptions were 172,178,577 pieces, of the value of \$665,220,000. Gold certificates outstanding increased \$141,539,000, while silver certificates decreased \$1,427,000.

There was an increase of \$94,545,227 in the volume of nationalbank notes during the past fiscal year. The amount presented for redemption was \$349,634,341, as against \$240,314,681 for 1907. The expenses incurred for such redemptions were \$270,840.21, which has been assessed on the banks at the rate of \$0.90366 per \$1,000 of notes redeemed.

The United States bonds pledged to secure circulation amounted to \$628,172,130 June 30, 1908, an increase of \$69,807,470 during the fiscal

year. The United States bonds and other obligations on the same date held to secure public deposits in national banks aggregated \$180,509,419.25, a decrease of \$12,734,633.63 for the year.

The moneys presented for redemption and exchange at the Treasury and subtreasury offices during the fiscal year 1908 amounted to \$1,337,826,564, as against \$1,026,876,500 in 1907.

During the last half of the fiscal year the Treasury has been confronted with an extraordinary increase in the United States paper currency and national-bank notes presented for redemption.

There was redeemed in December, 1907, of United States paper currency, \$30,487,000; in January, 1908, \$48,327,000 was redeemed, an increase of over 58 per cent; in February, \$50,500,000; March, \$52,753,000; April, \$55,064,000; May, \$70,476,000; and June, \$69,569,000. The increase for the year was 14.1 per cent.

The same condition was experienced with regard to national-bank notes. Of these there was redeemed in December \$11,736,000; in January, \$43,425,863; February, \$29,627,000; March, \$38,949,000; April, \$42,491,000; May, \$43,212,000; and June, \$45,121,000. The increase of national-bank notes redeemed for the fiscal year was 45.4 per cent.

On June 30, 1908, owing to an entirely inadequate force of employees in the office of the Treasurer, there had accumulated for redemption purposes, of United States paper currency, \$1,465,238; of national-bank notes, \$62,277,880, as compared with \$12,377,478 at the close of the previous fiscal year, an increase over normal of 403.1 per cent. The amount of bank notes has, however, been materially reduced. On November 16, 1908, the amount was \$15,851,235, a reduction of \$46,426,645.

The Treasury holding of gold at the close of the fiscal year 1907 was \$904,691,730.14. On June 30, 1908, it amounted to \$1,004,888,682.18, an increase of \$100,196,952.04.

The redemptions from the reserve fund during the last fiscal year were, in United States notes, \$21,182,827, in Treasury notes of 1890 \$41,505, a total of \$21,224,332.

On June 29, 1907, the number of standard silver dollars in circulation was 81,710,444. During the year \$31,466,911 were distributed at Government expense, and on June 30, 1908, there were \$76,328,657 in circulation. The amount of subsidiary silver shipped at Government expense for transportation was \$31,438,830.99. The average rate for transportation was \$2.45 per \$1,000.

The available cash balance in the general fund at the close of the fiscal year 1908 was \$245,171,808.46, a decrease of \$26,889,637.01.

#### LOANS AND CURRENCY.

The changes in the amount of the interest-bearing debt during the fiscal year ended June 30, 1908, are shown in the following statement:

Amount outstanding June 30, 1907	\$894, 834, 280
Panama Canal bonds issued\$24,631,980	
3 per cent certificates of indebtedness, act of June 13,	
1898, issued 15, 436, 500	
	40, 068, 480
	934, 902, 760
Less—	
4 per cent funded loan of 1907, matured July 1, 1907 36, 126, 150 4 per cent refunding certificates, matured July 1,	
1907 22,620	
3 per cent certificates of indebtedness, redeemed 1, 250, 000	
<u> </u>	37, 398, 770
Outstanding June 30, 1908	897, 503, 990

The causes which led to the issuance of the Panama bonds and the certificates of indebtedness are referred to elsewhere in this report. The bonds were sold at an average price of 102.99 and the 3 per cent certificates were issued at par.

The issue of \$15,436,500 one-year 3 per cent certificates of indebtedness, dated November 20, 1907, and lodged with the Treasurer of the United States to secure circulation of the national banks purchasing them, matured and was called for redemption with interest to cease November 20, 1908. One million five hundred thousand dollars of the certificates had already been redeemed at the request of the owners and interest was paid thereon to the respective dates of redemption. The amount outstanding, therefore, November 9, 1908, was \$13,-936,500, of which \$620,000 were replaced by the substitution of other United States bonds for the purpose of maintaining the circulation outstanding, and the proceeds of the remainder, \$13,316,500, have been applied to the retirement of the circulation based thereon.

The amount of the interest-bearing debt outstanding October 31, 1908, was \$897,253,990, of which the Treasurer of the United States held as security for circulating notes and public deposits bonds of the face value of \$710,899,950. Deducting the \$13,936,500 of 3 per cent certificates of indebtedness which were redeemed in November, the amount of interest-bearing debt was reduced to \$883,317,490.

The changes in the amounts of the several kinds of money in the United States outside the Treasury between November 1, 1907, and November 1, 1908, are shown in the table following:

COMPARATIVE STATEMENT SHOWING THE CHANGES IN CIRCULATION.

Classes.	In circulation Nov. 1, 1907.	In circulation Nov. 2, 1908.	Decrease.	Increase.

#### PUBLIC MONEYS.

The monetary operations of the Government have been conducted through the Treasurer of the United States, 9 subtreasury officers, the treasury of the Philippine Islands, the American Colonial Bank of Porto Rico, the Banco de la Habana, the National Bank of Cuba, and 1,454 national bank depositaries.

The amount of public moneys held by the bank depositaries on June 30; 1908, including funds to the credit of the Treasurer's general account and United States disbursing officers, was \$160,356,999.70, a decrease since June 30, 1907, of \$18,384,438.82. On June 30, 1908, there were 425 regular and 1,009 temporary depositaries; 195 were designated during the fiscal year and 20 discontinued. On November 2, 1908, the number of depositaries was 1,429 and the amount of public moneys held by them was \$131,693,492.55.

SUMMARY OF FINANCIAL OPERATIONS OF THE TREASURY FROM JULY 1, 1901, TO JULY 1, 1908.

On the 1st of July, 1901, the available cash balance in the Treasury was \$178,406,798.13. The receipts of the fiscal year 1901 showed a surplus over disbursements of \$77,717,984.38. There were at that time no obligations of the United States that were, by their terms, immediately redeemable. The Government was therefore engaged in the purchase of United States bonds for the sinking fund, and during the ensuing fiscal year 1902 the purchases amounted to \$56,071,730 and the disbursement on account thereof was \$70,410,941.33.

The receipts of the fiscal year 1902 amounted to over \$684,000,000 and the disbursements to about \$593,000,000. There was a resulting surplus of more than \$91,000,000 and the available cash balance July 1, 1902, was \$212,187,361.16. During this fiscal year there was a

large increase in the volume of money in circulation, the total amount July 1, 1901, being \$2,175,307,962, with a per capita of \$27.98, and on July 1, 1902, \$2,249,390,551, with a per capita of \$28.43. The increase in circulation, therefore, amounted to \$74,082,589 and in the per capita \$0.45. During this period the increase was largely in the denominations of \$20 and under, and, inclusive of gold coin, these denominations constituted more than 80 per cent of the outstanding circulation.

During the fiscal year 1903 the total receipts of the Government were \$694,621,117.64. The disbursements for the same period were \$640,323,450.28. There was, therefore, a surplus for the year of \$54,297,667.36. Interest-bearing bonds purchased during the period were only \$16,529,600, there being an inadequate supply of bonds in the market and the prices being regarded as excessive.

During the fiscal year 1903 the Department resumed refunding under authority of the act of March 14, 1900. A circular inviting the surrender of 3 per cent bonds of 1908 and 4 per cent bonds of 1907 for exchange into 2 per cent consols of 1930 was published March 26, 1903. The refunding proceeded from that date until July 31, when it was discontinued. During that time \$16,042,700 3 per cent bonds and \$65,099,900 4 per cent bonds were retired and their place taken by 2 per cent consols of 1930. The net profit of this proceeding was \$2,768,069.06.

The volume of money in circulation during the fiscal year 1903 was again largely increased, the total July 1, 1902, being \$2,249,390,551 with a per capita of \$28.43, and the total July 1, 1903, \$2,367,692,169 with a per capita of \$29.42, showing an increase in circulation of \$118,301,618 and in the per capita of \$0.99.

The receipts for the fiscal year 1904 were \$684,214,373.74 and the disbursements were \$725,984,945.65. There was, therefore, a deficit for the year of \$41,770,571.91. During this year the residue of the 5 per cent loan of 1904 fell due and was called for redemption, the amount being \$18,607,200. There was further refunding during the fiscal year of 3 per cent bonds of 1908–1918 and 4 per cent bonds of 1907, the total being \$15,826,600, with a net profit of \$511,363.21. The volume of money in circulation continued to increase, the amount in circulation July 1, 1903, being \$2,367,692,169 with a per capita of \$29.42, and the amount July 1, 1904, being \$2,519,142,860 with a per capita of \$30.77, making an increase in circulation of \$151,450,691 and in the per capita of \$1.35.

The receipts for the fiscal year 1905 were \$697,101,269.95 and the disbursements were \$720,105,498.55. The deficit was \$23,004,228.60. No United States bonds were purchased or called for redemption during this period, nor was there a resumption of refunding operations.

The increase in the volume of circulation outstanding was less marked than in the preceding three fiscal years, the amount outstanding July 1, 1904, being \$2,519,142,860, with a per capita of \$30.77, and the amount outstanding July 1, 1905, being \$2,587,882,653, with a per capita of \$31.08, an increase of \$68,739,793 in circulation and \$0.31 in

the per capita.

The receipts of the Government in the fiscal year 1906 were \$762,386,904.62. The disbursements were \$736,717,582.01. The surplus was therefore \$25,669,322.61. No bonds were purchased during this fiscal year, but a renewal of refunding operations began October 2, 1905, and terminated November 29. The amount of 2 per cent consols of 1930 issued in exchange for 3 per cent bonds of 1908–1918 and 4 per cent bonds of 1907 was \$53,032,400. There was a very large increase in the volume of circulation during this fiscal year, the amount outstanding July 1, 1905, being \$2,587,882,653, with a per capita of \$31.08, and the amount July 1, 1906, being \$2,736,646,628, with a per capita of \$32.32, making an increase in circulation of \$148,763,975 and in the per capita of \$1.24.

The receipts for the fiscal year 1907 were \$846,725,339.62 and the disbursements were \$762,488,753.32, showing a surplus of \$84,236,586.30. During this fiscal year there were purchased and redeemed bonds of the funded loan of 1907, due July 1, 1907, amounting to \$30,326,300. A further amount of \$50,307,800 4 per cent bonds of 1907 was refunded into 2 per cent consols of 1930. During this fiscal year there was an issue of \$30,000,000 of 2 per cent Panama Canal bonds. The act of June 28, 1902, contained provision for the issue of these bonds to aid in the construction of the Panama Canal, the total amount authorized being \$130,000,000. The act, however, contained no special provision for the acceptance of the Panama Canal bonds by the Government as a basis for the issue of circulating notes of national banks. They were, therefore, only receivable for that purpose upon the same terms as other United States bonds bearing higher rates of interest—that is, circulation based thereon would be subject to a tax of 1 per cent per annum.

As already stated, the receipts for 1908 were \$792,604,781.94, and the disbursements \$850,674,983.09, leaving a deficit of \$58,070,201.15.

As the 2 per cent consols of 1930 were receivable for the same purpose with a tax of only one-half of 1 per cent per annum, the Panama Canal bonds were at an obvious disadvantage as compared with the 2 per cent consols of 1930, and an issue of the Panama Canal bonds was therefore impracticable until this disadvantage could be removed by law. Accordingly, provision was made in the act of December 21, 1905, by which the Panama Canal bonds were receivable as a basis for circulation upon the same terms as the 2 per cent consols of 1930. Up to this time there had been no apparent necessity

for the sale of the Panama Canal bonds, the cost of constructing the canal having been paid out of moneys appropriated by the act of June 28, 1902, but in the summer of 1906 the disbursements on account of the canal were so heavy that it was deemed advisable to sell \$30,000,000 of the bonds authorized for that purpose. Accordingly, proposals were invited on the 2d of July, 1906, and the bids were opened July 20 of that year. The aggregate of the bids was \$446,371,300, at prices from par up to 125. The average price offered by the successful bidders was \$104.036+, and the premium received for the bonds was \$1,210,817.95.

The volume of circulation outstanding July 1, 1906, was \$2,736,646,628, and the per capita \$32.32, and on July 1, 1907, the amount of circulation was \$2,772,956,455, and the per capita \$32.22, being an increase in circulation of \$36,309,827 and a decrease in the per capita of \$0.10.

The foregoing is a recital of the ordinary financial operations of the Department from July 1, 1901, to July 1, 1908. There were, however, certain transactions with which the depositary banks were connected which require notice. For example: During the summer of 1902 the surplus bank reserves throughout the country were relatively very low. To prepare for the emergency which seemed approaching, the Secretary of the Treasury caused to be printed large quantities of national-bank circulation, and, in September of that year, offered to accept satisfactory security other than Government bonds for deposits of public money then held by the banks, on condition that the released bonds should be immediately made the basis for circulation.

As before stated, the Sccretary also purchased bonds for the sinking fund and increased deposits in national banks to such an extent that more than \$57,000,000 was restored to the channels of trade, and national-bank circulation was stimulated to the extent of \$18,000,000. Similar assistance was rendered to business in the fall of 1903, the aggregate amount being \$27,000,000.

In the spring of 1904 payments were made on account of the purchase of the Panama Canal, amounting to \$50,000,000, \$10,000,000 of which was paid to the Government of Panama and \$40,000,000 to the Panama Canal Company for the right of way. The entire amount was paid without disturbing the money market. The payment was made by the Government and transferred to France through the medium of the clearing house and dealers in foreign exchange. Only a few thousand dollars actually changed hands, and not a dollar of gold was shipped from this country. The Republic of Panama invested most of the purchase price of her cession in the United States, and thus shipments of money to that country were avoided.

In 1906 the banks of the country, West as well as East, found themselves in the spring with surplus reserves exhausted. The foreign exchange market showed a marked decline in the value of sterling exchange sufficient to have insured the importation of gold had the banks been in position to obtain it. The Treasury Department offered to make deposits in national banks equal in amount to any actual engagements of gold for importation, the deposits to be promptly returned when the gold actually arrived. In this way approximately \$50,000,000 in gold was brought from abroad. This was accomplished without any expense to the Government, but with great benefit to the business interests of the country.

In the summer of 1906, anticipating heavy demands of money in the fall to move the harvest of that year, which promised to be very great, the Secretary of the Treasury withdrew from the channels of trade \$60,000,000. This was accumulated in part from excessive revenues and in part by deliberate withdrawals of public deposits from the national banks. Twenty-six million dollars of this amount, together with about \$50,000,000 of gold which was brought from abroad with the aid of the Department, was deposited in the national banks in the fall, and a further amount of \$18,000,000 was added to the supply of money through the stimulation of national-bank circulation.

Owing to the important bearing upon the financial situation of the treatment of the 4 per cent loan of 1907, a brief account thereof seems advisable:

In the spring of 1907 the disposal of the 4 per cent loan of 1907, which would become redeemable July 1, 1907, was an important subject for consideration. The amount of these bonds outstanding March 1, 1907, was \$111,696,300. There was an available cash balance in the Treasury of \$251,231,426.10, of which \$140,013,087.81 consisted of deposits in national-bank depositaries. As there was considerable demand for money in all sections of the country, it was determined at once to increase the disbursements from the Treasury by the redemption, with interest to maturity, of \$25,000,000 of the 4 per cent bonds. The amount actually received was \$25,088,750, leaving more than \$86,000,000 to be provided for.

The Department had the option of three methods of disposing of the bonds. First, through their redemption; second, through continuance at a lower rate of interest, at the pleasure of the United States; third, through refunding under authority of the act of March 14, 1900, into 2 per cent consols of 1930. The redemption of the loan would take from the Treasury the \$86,000,000 above mentioned, a loss which seemed to be inadvisable in view of the uncertainty then existing as to future financial conditions. Its continuance at a lower rate of interest was thought to be uncertain as to its operation and

effect. So it was decided to refund a part of the loan, leaving outstanding an amount which would easily be redeemed in July. On April 2 there was published a circular inviting the surrender of \$50,000,000 of the bonds for refunding. Under this circular the Department received, between April 2 and May 31, \$50,307,800 of bonds, and there remained outstanding for redemption \$36,121,450. These bonds were called, and matured and ceased to bear interest July 2, 1907.

The monetary situation, which had been unsettled for several months and which was gradually becoming more threatening, caused the Secretary to take steps in August designed to facilitate the movement of the crops in the various sections of the country. Beginning on August 28 and continuing each week until October 14, weekly deposits were allotted to various banks to a total amount of \$28,-000,000. These deposits were allotted in each of the 46 States, in the Territories, and in the District of Columbia. Every effort was made so to distribute this fund that it would meet actual needs in sections where business activity was at the maximum and currency was most urgently required.

In October the situation was so serious in New York City that several national banks appealed to the clearing house for the issue of clearing-house certificates. This application was quickly followed by the suspension of one of the largest trust companies after the payment of about \$8,000,000 in cash to depositors. Runs on other large trust companies were instituted, and deposits in many other institutions were seriously reduced. As the crisis approached, the Department adopted the strongest measures at its command to give material assistance. Within four days there was transferred from the Treasury to the banks the sum of \$35,000,000. These deposits and other Treasury operations in connection with the associated efforts of prominent financiers, who aided, first, by giving immediate relief to certain embarrassed institutions, and, afterwards, by providing for imports of gold, operated at a time to prevent a dangerous panic. By the middle of November the available working balance in the Treasury had been reduced to approximately \$5,000,000. It was apparent that no further relief could be given by use of the funds in the Treasury, and as the national banks were exerting themselves to increase circulation, being hampered, however, by the scarcity of bonds and the rapid advance in their price, it was determined to receive applications for subscriptions for \$50,000,000 in Panama Canal bonds, and \$100,000,000 in 3 per cent certificates of indebtedness under the act of June 13, 1898.

The direct effect of these issues was to afford to the banks the means of increasing their circulation. But, in order that the payment into the Treasury of the proceeds of the bonds should not offset the issuing of national-bank notes against the bonds, arrangements were made to permit the deposit of 90 per cent of the proceeds of the Panama bonds and 75 per cent of the proceeds of the 3 per cent certificates in the depositary banks. The relief following the announcement, which was made on November 17, was so great that ultimately it was found necessary to issue only \$24,631,980 in the Panama bonds and \$15,436,500 in the certificates of indebtedness. All of these classes of obligations, except \$91,820 in bonds, were used as a basis for increasing the bank-note circulation or securing public deposits.

#### NATIONAL BANKS.

From the date of the passage of the national-bank act in 1863 to July 1, 1908, charters were granted to 9,174 national banking associations, of which 456 were organized under the act of 1863, 6,174 under the act of 1864, 10 (gold banks) under the act of 1870, and 2,534 under the act of 1900. At the close of the last fiscal year there were in active operation 6,827 associations, with authorized capital stock of \$930,542,775. Banks to the number of 1,878 have been closed by the voluntary action of their stockholders, and 469 insolvent associations placed in the charge of receivers. Approximately, only 5 per cent of the total number of banks chartered have failed.

During the past year 400 banks with authorized capital of \$24,055,000 were chartered, of which 89 were conversions from State banks, 107 reorganization of State and private banks, and 204 banks of primary organization. The loss to the system in the year in the number of banks was 94, of which 73 were by voluntary liquidation and 21 by failure. Of the total number of liquidations, 3 were by expiration of charter, new associations being organized as their successors, and 27 were absorbed by other national banking associations; 30 were absorbed by or reorganized as State banks, and 13 liquidated to discontinue business. The aggregate capital of the banks in liquidation was \$12,715,000. The capital of the 21 insolvent banks was \$5,575,000, and their liabilities to depositors at date of latest reports immediately preceding failure were \$17,438,170. Eleven banks, with aggregate capital of \$1,665,000, suspended during the year, all of which, however, were enabled to resume business.

That the measure generally known as the "gold standard act" of March 14, 1900, in which the formation of national banking associations with limited capital of \$25,000 was authorized, the circulation franchise made more valuable by permitting the issue of circulation to the par value of the bonds deposited, and reducing the tax on circulation, resulted in an extraordinary increase in the number of banking associations, is shown by reports from the Comptroller of the Currency, in which it is stated that since the date in

question charters have been granted to 3,910 associations, with authorized capital of \$231,948,300. The number of banks chartered in this period exceeds the number of banks in existence immediately prior thereto by 293. The number of banks organized under the act of March 14, 1900, was 2,534, and their authorized capital stock \$66,020,500. The remaining banks organized in this period were formed under the act of 1864, and numbered 1,376, with authorized capital of \$165,927,800. Of the total number of banks chartered since March 14, 1900, 2,164, with a capital of \$117,400,500, were associations of primary organization; 493 with capital of \$33,195,800 conversions of State banks, and 1,253 with capital of \$81,352,000 reorganizations of State and private banks. The combined capital of the converted and reorganized banks, \$114,547,800, nearly equaled the capital of the banks of primary organization.

From tables hereinafter submitted, it will be noted that the United States bond-secured circulation increased from \$216,374,795 on March 14,1900, to \$623,250,517 on June 30,1908; that circulation, secured by deposits of lawful money on account of liquidating and insolvent national banks and those reducing their circulation, increased from \$38,027,935 to \$75,083,400, or an increase of both classes of circulation from \$254,402,730 to \$698,333,917, a total increase of \$443,931,187. Circulation secured by United States bonds reached its maximum on January 24, 1908, when it amounted to \$644,796,233.

The increase in number and capital of national banks organized since March 14, 1900, by States and geographical divisions, together with the number and paid-in capital stock of national banks on July 15, 1908, appear in the table following:

SUMMARY, BY STATES, GEOGRAPHICAL DIVISIONS, AND CLASSES, OF NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, to JUNE 30, 1908, AND THE PAID-IN CAPITAL STOCK OF ALL REPORTING NATIONAL BANKS ON JULY 15, 1908.

Bonds on deposit at the end of the year as security for circulation were in the following classes and amounts:

2 per cent consols of 1930	\$552, 863, 200
Panama Canal bonds	36, 520, 740
4 per cent loan of 1925	14, 824, 250
3 per cent loan of 1908-1918	9, 752, 440
3 per cent certificates of indebtedness	14, 186, 500

On the same date national banks had on deposit with the Treasury interest-bearing obligations of the United States to the amount of \$83,703,200 as security for public deposits; in other words, of the total interest-bearing debt of the United States, amounting to \$897,-503,990, the banks had on deposit with the Treasury as security for circulation and public deposits \$711,850,330, leaving available, if obtainable, for circulation security, United States interest-bearing bonds to the amount of \$185,653,660.

In a great measure the financial conditions that existed during the past year are reflected in the reports made to the Comptroller of the Currency by the national banks. Notwithstanding the voluntary liquidation of 73 associations and the failure of 21, there was a gradual and substantial increase in the number and capital of banks from August 22, 1907, to July 15, 1908, the net increase in number being 280 and in paid-in capital stock \$22,649,536. As a result of the policy of the Department in permitting the substitution of State, municipal, and other bonds, as security for public deposits, for United States bonds, on condition that the latter were redeposited as security for circulation, there was a material increase in United States bond-secured circulation up to February, 1908, the amount outstanding as shown by reports on August 22, 1907, being \$551,949,461, rising to \$601,805,985 on December 3, and to the maximum, \$627,641,739, on February 14, 1908. By May 14 the amount outstanding had decreased to \$614,088,723, and declined further to \$613,663,963 on July 15.

Individual deposits, amounting on August 22, 1907, to \$4,319,035,-402, declined to \$4,176,873,717 on December 3, and to \$4,105,814,418 on February 14, 1908. In May, however, there was an increase to \$4,312,656,789, and on July 15 to \$4,374,551,208, the greatest amount of deposits ever held by national banking associations.

The liabilities of the banks on account of notes and bills rediscounted, bills payable and bonds borrowed, amounting approximately to \$119,100,000 on August 22, 1907, were increased on December 3 to \$267,000,000. By February this account was reduced to \$189,800,000, and on May 14 to \$116,300,000. By July 15 last these liabilities had been reduced to \$95,300,000. The indebtedness of the banks to the

Government for public deposits rose from \$143,282,393 on August 22, to \$223,117,082 on December 3, 1907. This account was but slightly reduced by February 14, but on May 14 last had declined to \$170,700,222, and on July 15 to \$118,576,923.

Loans and discounts, representing about 55 per cent of the aggregate resources of the banks, which on August 22, 1907, amounted to \$4,678,583,968, declined to \$4,585,337,094 on December 3, and in the February following to \$4,422,353,647. On May 14, 1908, the volume of loans had increased to \$4,528,346,875, and on July 15 to \$4,615,675,531, but, as will be noted, was greater in August, 1907, than at date of any subsequent report.

As hereinbefore indicated, the aggregate loans and discounts of national banks declined between August 22 and December 3, 1907, to the extent of over \$93,000,000, while the banks in the city-of New York increased accommodations to their customers from \$712,121,058 to \$775,181,207, or, roundly, \$63,000,000, but during the same period their lawful money holdings fell from \$218,700,000 to \$177,000,000, a decrease of \$41,700,000. In February, 1908, the loans made by the New York City banks had declined to \$746,692,658, but their lawful money holdings increased to \$258,100,000. In May the loans reached \$814,120,506, and in July, \$866,957,813. In May the cash holdings of the New York banks reached \$318,300,000, approximately \$3,000,000 in excess of the amount in bank on July 15.

Lawful money—that is, specie and legal tender notes—held by the banks on August 22, 1907, amounted to \$701,623,532, but declined to \$660,784,736 on December 3. By February 14, 1908, these holdings had increased to \$788,395,576, and on May 14 to \$861,326,450. The amount held on July 15, however, was approximately \$12,000,000 less than at date of the prior report.

The deposit liabilities of the banks on August 22, 1907, amounted to \$5,256,085,097, on which reserve was held to the amount of \$1,121,358,395, or 21.33 per cent. On December 3 the liabilities of this character had decreased to \$4,906,684,057, and the percentage of reserve to 21.31 per cent. On February 14, 1908, the percentage of reserve was 23.47 against liabilities aggregating \$5,037,945,759, and on May 14, 23.94 per cent on liabilities of \$5,295,981,122. The percentage of reserve held on July 15 last was 23.19 on liabilities, aggregating \$5,464,614,059.

Notwithstanding the unfavorable conditions during the year, the aggregate value of the resources of the national banks was greater at date of every report since August 22, 1907, than on that date, although between December 3, 1907, and February 14, 1908, there was a decrease of approximately \$11,000,000.

### Bank examinations.

For upward of fifty years bank examinations have been made by each examiner working independently of all other examiners. The result has been a lack of uniform methods, not only in making the examinations, but in deciding certain questions which the banker would ask the examiner at the time of his visit to the bank.

Another bad feature of this independent work of each examiner was that a man who was either a poor or an indifferent examiner at the time of his appointment, but who had the qualifications of a good examiner if properly instructed, went on from year to year making but little improvement in his work, because he did not come in contact with examiners of better natural qualifications and wider experience.

These and other similar conditions have engaged the earnest attention of the Secretary, who, while recognizing that the corps of national-bank examiners was in the main composed of men of tried integrity and ability, especially qualified for the difficult service they were called upon to render, felt the need of greater unity and harmony of action; and, acting under his general direction, the Comptroller of the Currency has been striving to bring this about. To this end, the country has been divided by the Comptroller into eleven examiners' districts, each to be presided over by a chairman. The idea is to have frequent meetings of examiners, with reports of the meetings, forwarded by the chairmen to the Comptroller's Office. The chairmen of the different districts have held a meeting in Washington, and have outlined a plan to be followed in holding these meetings, so that the work will be uniform and the reports from each district will be made up along similar lines. In this way it is believed that greater efficiency in bank examinations will be attained.

Through these meetings in the different districts it is hoped to approximate the work of the less experienced examiners to that of the more capable ones, and to encourage a full discussion of all the problems with which the examiners have to deal.

The Comptroller also summoned to Washington all the examiners in the East, about 40 in number, and will later on hold a meeting in the West to meet the examiners in the Middle and Far West.

At the meeting held in the East the examiners were strongly urged to take more time in making their examinations; to give more attention to finding out the exact value of the assets held by the bank, in order that their estimate of such assets might be as nearly correct as possible; and they were advised that the board of directors should be convened in case the condition of the bank warranted it, in order that the directors might be fully informed. This plan is now being followed and much good has already resulted.

The receivers of national banks have also been summoned to Washington and urged to close their trusts promptly and to keep down expenses as low as possible. In carrying out this policy, the expenses of many of the receiverships have already been reduced to a considerable degree.

Appointments to the position of bank examiner are made only after a most thorough inquiry into the qualifications of the applicant as to his character, ability, and training, and without regard to political considerations. It is of vital importance to the highest usefulness of this service that it be kept absolutely out of politics, and that the appointment, assignment, and promotion of examiners be made wholly on the basis of merit. In carrying out this policy the Department believes it is insuring, as far as possible under existing law, that the work of bank examinations, which is of a peculiarly confidential and responsible nature, shall be conducted with thoroughness and efficiency.

The Department has made to the Monetary Commission recommendations for certain amendments to the administrative features of the national banking laws, which are largely the outgrowth of the experience and observation of officials of the Comptroller's Office in the practical operation of these laws. Among these recommendations is one that the method of compensating national-bank examiners should be changed from a fee to a salary or per diem and expense basis. This and other recommendations have been repeatedly made by Comptrollers of the Currency, and while calling particular attention to it now I do not feel warranted, because of its presentation to the Monetary Commission, which is considering the whole subject, in making further reference to it at this time.

#### AMENDMENT OF THE NATIONAL BANKING LAWS.

The monetary disturbance of 1907 caused the introduction in both branches of the Congress of bills designed to obviate a repetition of the trouble. In the last few days of the session a bill combining the important features of several of these measures was passed and was approved by the President, May 30, 1908. Its text was as follows:

[Public-No. 169.]

[H. R. 21871.]

AN ACT To amend the national banking laws.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That national banking associations, each having an unimpaired capital and a surplus of not less than twenty per centum, not less than ten in number, having an aggregate capital and surplus of at least five millions of dollars, may form voluntary associations to be designated as national currency associations. The banks uniting to form such association shall, by their presidents or vice-presidents, acting

under authority from the board of directors, make and file with the Secretary of the Treasury a certificate setting forth the names of the banks composing the association, the principal place of business of the association, and the name of the association, which name shall be subject to the approval of the Secretary of the Treasury. Upon the filing of such certificate the associated banks therein named shall become a body corporate, and by the name so designated and approved may sue and be sued and exercise the powers of a body corporate for the purposes hereinafter mentioned: Provided, That not more than one such national currency association shall be formed in any city: Provided further. That the several members of such national currency association shall be taken, as nearly as conveniently may be, from a territory composed of a State or part of a State, or contiguous parts of one or more States: And provided further, That any national bank in such city or territory, having the qualifications herein prescribed for membership in such national currency association, shall, upon its application to and upon the approval of the Secretary of the Treasury, be admitted to membership in a national currency association for that city or territory, and upon such admission shall be deemed and held a part of the body corporate, and as such entitled to all the rights and privileges and subject to all the liabilities of an original member: And provided further, That each national currency association shall be composed exclusively of banks not members of any other national currency association.

The dissolution, voluntary or otherwise, of any bank in such association shall not affect the corporate existence of the association unless there shall then remain less than the minimum number of ten banks: *Provided, however*, That the reduction of the number of said banks below the minimum of ten shall not affect the existence of the corporation with respect to the assertion of all rights in favor of or against such association. The affairs of the association shall be managed by a board consisting of one representative from each bank. By-laws for the government of the association shall be made by the board, subject to the approval of the Secretary of the Treasury. A president, vice-president, secretary, treasurer, and an executive committee of not less than five members, shall be elected by the board. The powers of such board, except in the election of officers and making of by-laws, may be exercised through its executive committee.

The national currency association herein provided for shall have and exercise any and all powers necessary to carry out the purposes of this section, namely, to render available, under the direction and control of the Secretary of the Treasury, as a basis for additional circulation any securities, including commercial paper, held by a national banking association. For the purpose of obtaining such additional circulation, any bank belonging to any national currency association, having circulating notes outstanding secured by the deposit of bonds of the United States to an amount not less than forty per centum, of its capital stock, and which has its capital unimpaired and a surplus of not less than twenty per centum, may deposit with and transfer to the association, in trust for the United States, for the purpose hereinafter provided, such of the securities above mentioned as may be satisfactory to the board of the association. The officers of the association may thereupon, in behalf of such bank, make application to the Comptroller of the Currency for an issue of additional circulating notes to an amount not exceeding seventy-five per centum of the cash value of the securities or commercial paper so deposited. The Comptroller of the Currency shall immediately transmit such application to the Secretary of the Treasury with such recommendation as he thinks proper, and if, in the judgment of the Secretary of the Treasury, business conditions in the locality demand additional circulation, and if he be satisfied with the character and value of the securities proposed and that a lien in favor of the United States

on the securities so deposited and on the assets of the banks composing the association will be amply sufficient for the protection of the United States, he may direct an issue of additional circulating notes to the association, on behalf of such bank, to an amount in his discretion, not, however, exceeding seventy-five per centum of the cash value of the securities so deposited: *Provided*, That upon the deposit of any of the State, city, town, county, or other municipal bonds, of a character described in section three of this act, circulating notes may be issued to the extent of not exceeding ninety per centum of the market value of such bonds so deposited: *And provided further*, That no national banking association shall be authorized in any event to issue circulating notes based on commercial paper in excess of thirty per centum of its unimpaired capital and surplus. The term "commercial paper" shall be held to include only notes representing actual commercial transactions, which when accepted by the association shall bear the names of at least two responsible parties and have not exceeding four months to run.

The banks and the assets of all banks belonging to the association shall be jointly and severally liable to the United States for the redemption of such additional circulation; and to secure such liability the lien created by section fifty-two hundred and thirty of the Revised Statutes shall extend to and cover the assets of all banks belonging to the association, and to the securities deposited by the banks with the association pursuant to the provisions of this act; but as between the several banks composing such association each bank shall be liable only in the proportion that its capital and surplus bears to the aggregate capital and surplus of all such banks. The association may, at any time, require of any of its constituent banks a deposit of additional securities or commercial paper, or an exchange of the securities already on deposit to secure such additional circulation; and in case of the failure of such bank to make such deposit or exchange the association may, after ten days' notice to the bank, sell the securities and paper already in its hands at public sale, and deposit the proceeds with the Treasurer of the United States as a fund for the redemption of such additional circulation. If such fund be insufficient for that purpose the association may recover from the bank the amount of the deficiency by suit in the circuit court of the United States, and shall have the benefit of the lien hereinbefore provided for in favor of the United States upon the assets of such bank. The association or the Secretary of the Treasury may permit or require the withdrawal of any such securities or commercial paper and the substitution of other securities or commercial paper of equal value therefor.

Sec. 2. That whenever any bank belonging to a national currency association shall fail to preserve or make good its redemption fund in the Treasury of the United States, required by section three of the act of June twentieth, eighteen hundred and seventy-four, chapter three hundred and forty-three, and the provisions of this act, the Treasurer of the United States shall notify such national currency association to make good such redemption fund, and upon the failure of such national currency association to make good such fund, the Treasurer of the United States may, in his discretion, apply so much of the redemption fund belonging to the other banks composing such national currency association as may be necessary for that purpose; and such national currency association may, after five days' notice to such bank, proceed to sell at public sale the securities deposited by such bank with the association pursuant to the provisions of section one of this act, and deposit the proceeds with the Treasurer of the United States as a fund for the redemption of the additional circulation taken out by such bank under this act.

Sec. 3. That any national banking association which has circulating notes outstanding, secured by the deposit of United States bonds to an amount of not

less than forty per centum of its capital stock, and which has a surplus of not less than twenty per centum, may make application to the Comptroller of the Currency for authority to issue additional circulating notes to be secured by the deposit of bonds other than bonds of the United States. The Comptroller of the Currency shall transmit immediately the application, with his recommendation, to the Secretary of the Treasury, who shall, if in his judgment business conditions in the locality demand additional circulation, approve the same, and shall determine the time of issue and fix the amount, within the limitations herein imposed, of the additional circulating notes to be issued. Whenever after receiving notice of such approval any such association shall deposit with the Treasurer or any assistant treasurer of the United States such of the bonds described in this section as shall be approved in character and amount by the Treasurer of the United States and the Secretary of the Treasury, it shall be entitled to receive, upon the order of the Comptroller of the Currency, circulating notes in blank, registered and countersigned as provided by law, not exceeding in amount ninety per centum of the market value, but not in excess of the par value of any bonds so deposited, such market value to be ascertained and determined under the direction of the Secretary of the Treasury.

The Treasurer of the United States, with the approval of the Secretary of the Treasury, shall accept as security for the additional circulating notes provided for in this section, bonds or other interest-bearing obligations of any State of the United States, or any legally authorized bonds issued by any city, town, county, or other legally constituted municipality or district in the United States which has been in existence for a period of ten years, and which for a period of ten years previous to such deposit has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose net funded indebtedness does not exceed ten per centum of the valuation of its taxable property, to be ascertained by the last preceding valuation of property for the assessment of taxes. The Treasurer of the United States, with the approval of the Secretary of the Treasury, shall accept, for the purposes of this section, securities herein enumerated in such proportions as he may from time to time determine, and he may with such approval at any time require the deposit of additional securities, or require any association to change the character of the securities already on deposit.

SEC. 4. That the legal title of all bonds, whether coupon or registered, deposited to secure circulating notes issued in accordance with the terms of section three of this act shall be transferred to the Treasurer of the United States in trust for the association depositing them, under regulations to be prescribed by the Secretary of the Treasury. A receipt shall be given to the association by the Treasurer or any assistant treasurer of the United States, stating that such bond is held in trust for the association on whose behalf the transfer is made, and as security for the redemption and payment of any circulating notes that have been or may be delivered to such association. No assignment or transfer of any such bond by the Treasurer shall be deemed valid unless countersigned by the Comptroller of the Currency. The provisions of sections fifty-one hundred and sixty-three, fifty-one hundred and sixty-four, fifty-one hundred and sixty-five, fifty-one hundred and sixty-six, and fifty-one hundred and sixty-seven and sections fifty-two hundred and twenty-four to fiftytwo hundred and thirty-four, inclusive, of the Revised Statutes respecting United States bonds deposited to secure circulating notes shall, except as herein modified, be applicable to all bonds deposited under the terms of section three of this act.

Sec. 5. That the additional circulating notes issued under this act shall be used, held, and treated in the same way as circulating notes of national banking associations heretofore issued and secured by a deposit of United States bonds, and shall be subject to all the provisions of law affecting such notes except as herein expressly modified: *Provided*, That the total amount of circulating notes outstanding of any national banking association, including notes secured by United States bonds as now provided by law, and notes secured otherwise than by deposit of such bonds, shall not at any time exceed the amount of its unimpaired capital and surplus: *And provided further*, That there shall not be outstanding at any time circulating notes issued under the provisions of this act to an amount of more than five hundred millions of dollars.

Sec. 6. That whenever and so long as any national banking association has outstanding any of the additional circulating notes authorized to be issued by the provisions of this act it shall keep on deposit in the Treasury of the United States, in addition to the redemption fund required by section three of the act of June twentieth, eighteen hundred and seventy-four, an additional sum equal to five per centum of such additional circulation at any time outstanding, such additional five per centum to be treated, held, and used in all respects in the same manner as the original redemption fund provided for by said section three of the act of June twentieth, eighteen hundred and seventy-four.

Sec. 7. In order that the distribution of notes to be issued under the provisions of this act shall be made as equitable as practicable between the various sections of the country, the Secretary of the Treasury shall not approve applications from associations in any State in excess of the amount to which such State would be entitled of the additional notes herein authorized on the basis of the proportion which the unimpaired capital and surplus of the national banking associations in such State bears to the total amount of unimpaired capital and surplus of the national banking associations of the United States: Provided, however, That in case the applications from associations in any State shall not be equal to the amount which the associations of such State would be entitled to under this method of distribution, the Secretary of the Treasury may, in his discretion, to meet an emergency, assign the amount not thus applied for to any applying association or associations in States in the same section of the country.

Sec. 8. That it shall be the duty of the Secretary of the Treasury to obtain information with reference to the value and character of the securities authorized to be accepted under the provisions of this act, and he shall from time to time furnish information to national banking associations as to such securities as would be acceptable under the provisions of this act.

SEC. 9. That section fifty-two hundred and fourteen of the Revised Statutes, as amended, be further amended to read as follows:

"Sec. 5214. National banking associations having on deposit bonds of the United States, bearing interest at the rate of two per centum per annum, including the bonds issued for the construction of the Panama Canal, under the provisions of section eight of 'An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans,' approved June twenty-eighth, nineteen hundred and two, to secure its circulating notes, shall pay to the Treasurer of the United States, in the months of January and July, a tax of one-fourth of one per centum each half year upon the average amount of such of its notes in circulation as are based upon the deposit of such bonds; and such associations having on deposit bonds of the United States bearing interest at a rate higher than two per centum per annum shall pay a tax of one-half of one per centum each half year upon the average amount of such of its notes in circulation as are based upon the deposit of such bonds. National

banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first month a tax at the rate of five per centum per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax of one per centum per annum for each month until a tax of ten per centum per annum is reached, and thereafter such tax of ten per centum per annum, upon the average amount of such notes. Every national banking association having outstanding circulating notes secured by a deposit of other securities than United States bonds shall make monthly returns, under oath of its president or cashier, to the Treasurer of the United States, in such form as the Treasurer may prescribe, of the average monthly amount of its notes so secured in circulation; and it shall be the duty of the Comptroller of the Currency to cause such reports of notes in circulation to be verified by examination of the banks' records. The taxes received on circulating notes secured otherwise than by bonds of the United States shall be paid into the Division of Redemption of the Treasury and credited and added to the reserve fund held for the redemption of United States and other notes."

• Sec. 10. That section nine of the act approved July twelfth, eighteen hundred and eighty-two, as amended by the act approved March fourth, nineteen hundred and seven, be further amended to read as follows:

"Sec. 9. That any national banking association desiring to withdraw its circulating notes secured by deposit of United States bonds in the manner provided in section four of the act approved June twentieth, eighteen hundred and seventy-four, is hereby authorized for that purpose to deposit lawful money with the Treasurer of the United States and, with the consent of the Comptroller of the Currency and the approval of the Secretary of the Treasury, to withdraw a proportionate amount of bonds held as security for its circulating notes in the order of such deposits: *Provided*, That not more than nine millions of dollars of lawful money shall be so deposited during any calendar month for this purpose.

"Any national banking association desiring to withdraw any of its circulating notes, secured by the deposit of securities other than bonds of the United States, may make such withdrawal at any time in like manner and effect by the deposit of lawful money or national bank notes with the Treasurer of the United States, and upon such deposit a proportionate share of the securities so deposited may be withdrawn: *Provided*, That the deposits under this section to retire notes secured by the deposit of securities other than bonds of the United States shall not be covered into the Treasury, as required by section six of an act entitled 'An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes,' approved July fourteenth, eighteen hundred and ninety, but shall be retained in the Treasury for the purpose of redeeming the notes of the bank making such deposit."

Sec. 11. That section fifty-one hundred and seventy-two of the Revised Statutes be, and the same is hereby, amended to read as follows:

"Sec. 5172. In order to furnish suitable notes for circulation, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved, in the best manner to guard against counterfeiting and fraudulent alterations, and shall have printed therefrom, and numbered, such quantity of circulating notes, in blank, of the denominations of five dollars, ten dollars, twenty dollars, fifty dollars, one hundred dollars, five hundred dollars, one thousand dollars, and ten thousand dollars, as may be required to supply the associations entitled to receive the same. Such notes shall state upon their face that they are secured by United States bonds or other securities, certified by the written or engraved signatures of the Treasurer and Register and by

the imprint of the seal of the Treasury. They shall also express upon their face the promise of the association receiving the same to pay on demand, attested by the signature of the president or vice-president and cashier. The Comptroller of the Currency, acting under the direction of the Secretary of the Treasury, shall as soon as practicable cause to be prepared circulating notes in blank, registered and countersigned, as provided by law, to an amount equal to fifty per centum of the capital stock of each national banking association; such notes to be deposited in the Treasury or in the subtreasury of the United States nearest the place of business of each association, and to be held for such association, subject to the order of the Comptroller of the Currency for their delivery as provided by law: *Provided*, That the Comptroller of the Currency may issue national bank notes of the present form until plates can be prepared and circulating notes issued as above provided: *Provided*, *however*, That in no event shall bank notes of the present form be issued to any bank as additional circulation provided for by this act."

Sec. 12. That circulating notes of national banking associations, when presented to the Treasury for redemption, as provided in section three of the act approved June twentieth, eighteen hundred and seventy-four, shall be redeemed in lawful money of the United States.

Sec. 13. That all acts and orders of the Comptroller of the Currency and the Treasurer of the United States authorized by this act shall have the approval of the Secretary of the Treasury, who shall have power, also, to make any such rules and regulations and exercise such control over the organization and management of national currency associations as may be necessary to carry out the purposes of this act.

Sec. 14. That the provisions of section fifty-one hundred and ninety-one of the Revised Statutes, with reference to the reserves of national banking associations, shall not apply to deposits of public moneys by the United States in designated depositaries.

Sec. 15. That all national banking associations designated as regular depositaries of public money shall pay upon all special and additional deposits made by the Secretary of the Treasury in such depositaries, and all such associations designated as temporary depositaries of public money shall pay upon all sums of public money deposited in such associations interest at such rate as the Secretary of the Treasury may prescribe, not less, however, than one per centum per annum upon the average monthly amount of such deposits: *Provided, however*, That nothing contained in this act shall be construed to change or modify the obligation of any association or any of its officers for the safe-keeping of public money: *Provided further*, That the rate of interest charged upon such deposits shall be equal and uniform throughout the United States.

Sec. 16. That a sum sufficient to carry out the purposes of the preceding sections of this act is hereby appropriated out of any money in the Treasury not otherwise appropriated.

Sec. 17. That a commission is hereby created, to be called the "National Monetary Commission," to be composed of nine members of the Senate, to be appointed by the Presiding Officer thereof, and nine members of the House of Representatives, to be appointed by the Speaker thereof; and any vacancy on the commission shall be filled in the same manner as the original appointment.

Sec. 18. That it shall be the duty of this commission to inquire into and report to Congress at the earliest date practicable, what changes are necessary or desirable in the monetary system of the United States or in the laws relating to banking and currency, and for this purpose they are authorized to sit during the sessions or recess of Congress, at such times and places as they may deem desirable, to send for persons and papers, to administer oaths, to summons and compel the attendance of witnesses, and to employ a disbursing officer and

such secretaries, experts, stenographers, messengers, and other assistants as shall be necessary to carry out the purposes for which said commission was created. The commission shall have the power, through subcommittee or otherwise, to examine witnesses and to make such investigations and examinations, in this or other countries, of the subjects committed to their charge as they shall deem necessary.

Sec. 19. That a sum sufficient to carry out the purposes of sections seventeen and eighteen of this act, and to pay the necessary expenses of the commission and its members, is hereby appropriated, out of any money in the Treasury not otherwise appropriated. Said appropriation shall be immediately available and shall be paid out on the audit and order of the chairman or acting chairman of said commission, which audit and order shall be conclusive and binding upon all departments as to the correctness of the accounts of such commission.

Sec. 20. That this act shall expire by limitation on the thirtieth day of June, nineteen hundred and fourteen.

Approved, May 30, 1908.

Pursuant to this bill the Department published a circular under date of June 10, which, after quoting the act, proceeded as follows:

There are two methods of applying for additional national bank currency under the provisions of the above act:

- 1. National banks occupying contiguous territory may organize a national currency association. There must be at least 10 national banks in each national currency association, and the aggregate capital and surplus of such national banks must be at least \$5,000,000. No national bank may join a national currency association unless it has an unimpaired capital and a surplus of not less than 20 per cent. After the formation of an association any national bank belonging thereto, whose outstanding circulating notes actually issued amount to not less than 40 per cent of its capital, may obtain additional circulating notes in the manner provided in section 1 of the above act.
- 2. National banks possessing the same qualifications as to unimpaired capital and surplus required of banks joining a national currency association, and whose circulating notes outstanding and actually issued are equal to 40 per cent of its capital stock, may obtain additional circulating notes based upon the securities prescribed in said section 3 and in the manner indicated therein.

In pursuance of the requirements of the above act, the following regulations are hereby established:

The national banks located in any city in the United States containing 10 or more such banks, having an aggregate unimpaired capital and surplus of not less than \$5,000,000, may form a national currency association. Ten or more national banks possessing an aggregate unimpaired capital and surplus of not less than \$5,000,000 may form a national currency association of the banks located within any contiguous territory outside of cities. But, in order that all national banks in the United States possessing the qualifications of unimpaired capital and 20 per cent surplus prescribed in the act may, if they desire, be included within the membership of some national currency association, the Secretary hereby expressly reserves the right to add to, and include in, the territory of any national currency association formed in accordance with the provisions of the act any contiguous territory containing national banks which, but for such inclusion, would be excluded from or inconveniently located as to a national currency association.

National banks are advised that the names of the national currency associations must be indicative of the locality of the several associations. It is not feasible, for instance, to permit an association to style itself "First National Currency Association."

Accompanying herewith is a blank form of resolution which should be adopted by the board of directors of each of the national banks desiring to form a national currency association, empowering its president or vice-president, as the case may be, to act in the formation of such national currency association; also a blank form of application to be used by a bank desiring to join an association. These papers are to be presented at a meeting of national banks held for the purpose of forming a national currency association.

There has been prepared a blank form of certificate to be executed by the officers and executive committees of national currency associations and forwarded to the Secretary of the Treasury with the duly authenticated resolutions and applications above mentioned.

Upon receipt of the certificate above mentioned, and the papers which should accompany the same, they will be examined under direction of the Secretary of the Treasury, and notice of approval or disapproval will be promptly forwarded to the association.

Blank forms of the certificate above mentioned, also additional blank resolutions and applications, will be furnished upon application to the Secretary of the Treasury.

The following table shows, by States, the amount of capital and surplus of the national banks which are entitled to membership in a national currency association. The aggregate capital of such banks and the aggregate surplus are stated in the table, which includes only national banks having an unimpaired capital and a surplus of not less than 20 per cent.

United States	798, 141, 375	541,521,011	1,339,662,386

It will be seen from an examination of the table that the national banks within some of the States are not eligible to form by themselves national currency associations, the aggregate capital and surplus being insufficient for the formation of such association. It is apparent, therefore, that the national banks in these States must affiliate with national banks in contiguous States in order to effect the formation of an association.

The Secretary will not at this time allot any territory for the formation of national currency associations other than as is herein indicated. It is thought that the banks may prefer to come together of their own volition. It is preferable that state lines be observed as far as practicable, and due notice should be taken of the fact that each national bank desiring to become a member of a national currency association should be affiliated with the national banks in its neighborhood, and not apply for admission to an association not occupying contiguous territory.

Under the law, national banks not taking part in the formation of a national currency association, but possessing the qualifications of membership, may apply to the Secretary of the Treasury for admission to some association, and upon his approval of their applications they may be admitted to membership in a national currency association for their city or territory.

It will be observed that the foregoing relates only to the formation of national currency associations. The method to be followed in obtaining additional circulation through such national currency associations will be made the subject of a separate circular to be issued later. It should be stated in this connection, however, that national banks belonging to national currency associations and desiring to obtain additional circulation through their associations must apply therefor and submit their lists of securities to the officers of their respective associations, and not to the Secretary of the Treasury. Applications to the Secretary for additional circulation will be made by officers of the national currency associations.

Applications for additional circulation under section 3, by individual national banks, may be addressed, when the circulation is desired, to the Comptroller of the Currency. That officer will advise any national bank as to the details of procedure.

National banks, by examining section 6 of the act, will see that the redemption fund to be deposited in the Treasury on account of additional circulation authorized by the act must consist of 10 per cent of such additional circulation.

Section 10 of the act provides that additional circulation issued under the provisions of the act may be retired at any time, without restriction as to the aggregate amount retired in any one month.

Referring to section 15 of the act, the rate of interest to be paid by depositary banks is hereby fixed at 1 per cent per annum upon the average monthly amount of public deposits held, to be computed from June 15, 1908, and to be payable July 1, 1908, and thereafter on January 1 and July 1 of each year. Interest will be paid on the entire amount held by temporary or special depositaries, and on the amount held by regular depositaries in excess of the amount needed for the transaction of public business. Each bank will be advised by letter of the precise amount of its public deposits exempt from payment of interest.

The Secretary hereby reserves the right at any time, upon notice, to increase the rate of the interest to be paid by depositary banks.

There has been but one national currency association actually formed whose by-laws have received the approval of this Department. Other associations are in process of formation, and there has been correspondence with national banks in different parts of the country upon the subject; but it seems to be the general feeling among the national banks that the act should be amended in certain particulars in order to make it entirely effective. It is contended that there should be some provision in the law authorizing the withdrawal of a national bank from the national currency association to which it belongs, and that the voting strength of the several banks belonging to a national currency association should bear some proportion to their capital and surplus.

The Department is engaged in an investigation of the value and character of the county, town, and other municipal securities specified in section 3 of the act of May 30, 1908, and it has arranged with the Interstate Commerce Commission to furnish promptly, upon application, information as to the status and value of railroad bonds, which will no doubt be offered to national currency associations by the national bank members thereof as security for additional circulation to be issued through such national currency associations. Financial conditions at this time do not indicate the need of the issue of additional circulation under provisions of the act of May 30, 1908, but it is important that the Department and the national banks should perfect as far as possible the details for carrying out in case of necessity the provisions of the act.

#### New vault.

In order to store the emergency currency prepared under the terms of the act of May 30, 1908, it has been found necessary to construct a new vault in the Treasury building. Contracts have been made

to construct in the subbasement of the Treasury building a vault which will be in all respects the best that can be made. The dimensions are: 54 feet long, by 18 feet wide, by 13 feet 9 inches high, and the cost will be \$34,000. The cubic contents of the vault will be 13,291 cubic feet, and the estimated storage capacity will be \$580,000,000. It is to be completed by February 15, 1909.

#### OPERATIONS OF THE MINT.

## Earnings and expenditures.

The earnings and gains of the Mint service during the fiscal year 1908 were as follows:

Charges for parting and refining	\$317, 512. 95
Charges for alloy	21, 332. 60
Charges for assaying and stamping	28, 085, 68
Seigniorage on subsidiary coinage	8, 713, 413. 35
Seigniorage on minor coinage	1, 535, 029. 42
Seigniorage on recoinage of minor coins	2, 928, 87
Profits on medals and proof coins	1, 193, 80
Charges received for mounting, etc., medal-fund account	474.18
Charges for the manufacture of medals, etc	19, 202. 91
Deposit melting room grains and sweeps	31, 152. 39
Surplus bullion recovered by operative officers	29, 797. 58
Gain on bullion shipped mint for coinage	5, 066. 68
Proceeds sale of old material	5, 618. 38
Receipts from special assay of bullion and ore	3, 594. 00
Receipts from sale of by-products	9, 704. 79
Receipts for manufacturing appliances for Government and other	
institutions	6, 164. 44
Charges received for coinage for Philippine government	203, 287, 72
Charges received for coinage for Mexico	9, 114. 22
Gain on light-weight United States gold coin for recoinage	227. 02
Total earnings and gains	10, 942, 900. 98
The expenditures were as follows:	
Salaries of officers and clerks	\$222, 344, 72
Wages of workmen and adjusters	
Contingent expenses, less amount paid to reimburse wastage and	
loss on sweeps sold	
Parting and refining expenses, less amount paid to reimburse	
wastage and loss on sweeps sold	312, 554. 64
Wastage of operative departments	54, 222, 20
Wastage of operative departments, minor coinage operations	1, 233. 82
Loss on sweeps sold during the year	7, 334. 81
Expenses of distributing minor coins	
Expenses of medal fund (charges paid for mounting, etc.)	481.55
Loss on recoinage of minor coins	10, 887. 54
Total expenditures and loss	

#### Mint service.

The domestic coinage of the four coinage mints during the fiscal year ended June 30, 1908, amounted to 184,007,755 pieces, of the value of \$215,714,862.97. Of this amount \$197,238,377.50 was gold, \$16,530,477.25 subsidiary silver, and \$1,946,008.22 minor coinage. As compared with the fiscal year 1907, there was an increase of \$117,616,040 in gold coin and \$3,555,943 in silver coin, and a decrease of \$1,373,444.96 in the minor coinage. Of the gold coinage, \$106,164,360 in double eagles and \$4,829,060 in eagles were of the designs prepared by the eminent sculptor, the late Augustus Saint Gaudens, to whom great credit is due for the artistic merits of these coins.

In addition to the domestic coinage, there were coined for the government of the Philippine Islands in silver 25,003,915 pieces, of the value of 18,131,792.90 pesos, and 1,500 pieces of base coins, of the value of 32.50 pesos, making a total of 18,131,825.40 pesos.

There were coined for the Government of Mexico in silver 1,397,291

50-centavo pieces, of the value of \$698,645.50.

The value of the original deposits of gold at the several mints and assay offices during the fiscal year ended June 30, 1908, was \$207,413,762.82.

Production of gold and silver and consumption in the industrial arts.

The production of gold by the mines of the United States during the calendar year 1907 is estimated to have been \$90,435,700. The amount of gold consumed in the industrial arts during the year is estimated to have been \$37,596,254, of which amount \$30,418,680 was new material.

The production of silver in the United States during the year is estimated to have been 56,514,700 fine ounces, of the commercial value of \$37,299,700. The amount of silver consumed in the industrial arts during the year is estimated to have been 24,293,939 fine ounces, of which amount 21,138,568 fine ounces were new material.

## Purchases of silver.

There were purchased for the coinage of subsidiary silver during the fiscal year 16,956,309.37 ounces of silver bullion 0.999 fine, at a cost of \$9,923,026. The coinage of subsidiary coin from new bullion during the year was \$15,698,063.25, on which there was a seigniorage of \$8,713,413.35. The purchases of silver for the subsidiary silver coin was resumed in August, 1906. The aggregate amount purchased to June 30, 1908, was 28,956,185.44 ounces 0.999 fine, costing \$18,050,212.11.

The coinage of subsidiary coin from new bullion from August, 1906, to June 30, 1908, was \$28,358,018.40. The cost of the bul-

lion contained in the same was \$12,998,695.61, giving a seigniorage of \$15,359,322.79.

New designs for coins.

For many years, and especially since the resumption of specie payments in 1879, when coins commenced to enter into active circulation, there has been a popular demand for improvement in the designs of our gold and silver coins. The act of February 12, 1873, revising the coinage laws, limited both the designs and devices of such coins to those employed at the time of the passage of that act.

On September 26, 1890, an act was passed by the Congress providing for the preparation of new designs of authorized devices of the coins of the United States. Under the terms of this act the Director of the Mint, with the approval of the Secretary of the Treasury, was authorized to cause new designs or models of authorized devices to be prepared and adopted. No change, however, in the designs of the dies of any coin was to be made oftener than once in twenty-five years from and including the year of the adoption of the design of the coin.

Under the act of 1890, in June, 1891, artists and others were invited by circular letter to submit designs and suggestions for changes in the designs of the silver dollar, the half dollar, the quarter dollar, and the dime. None of the designs or suggestions were satisfactory, and all were rejected by a committee appointed by the Secretary of the Treasury to pass thereon. Instructions were given, in the latter part of August, 1891, for the preparation of new designs for the half and quarter dollar and the dime by the engraving department of the Mint at Philadelphia. The designs prepared were adopted and the coinage therefrom commenced in January, 1892.

No action was taken looking to the artistic improvement in the designs of the gold coins until early in 1905, when the President decided that a change should be made. The eminent American sculptor, the late Augustus Saint Gaudens, was, by his direction, employed to prepare models for the gold coins. Mr. Saint Gaudens entered upon the work enthusiastically, and after much thought and labor submitted models for the twenty and ten dollar gold pieces, which were approved by the President.

In November, 1907, the coinage of the double eagle and the eagle in the designs prepared by Mr. Saint Gaudens was commenced. The relief of the new double eagle and eagle is the highest of that of coins issued by any country. The execution of the designs for these coins was the last effort of the great American sculptor and the crowning work of a notable career, giving additional interest to the coinage.

The designs for the five dollar and the two and one-half dollar gold pieces were prepared by another American sculptor, Mr. Bela L. Pratt, of Boston. The striking characteristic of these coins is that they are executed in intaglio, or, more strictly speaking, "incused," an innovation that is unique in coinage. It was adopted upon the suggestion of Dr. William Sturgis Bigelow, of Boston, to the President as a plan of coinage to get the best results in artistic work and at the same time preserve for commercial interests the uniformity of the stacking of the pieces. Aside from this these coins are well adapted for circulation in that the liability of loss by abrasion is reduced to a minimum on account of the flat field.

The present designs of the half and quarter dollar and the dime having been adopted in 1892, under existing law, no change can be made in the designs of these coins until after the expiration of twenty-five years from the date of their adoption, which would not be until 1917. It is very desirable that a change in the designs of the subsidiary silver coins should be authorized, and the favorable consideration of the Congress is earnestly recommended, that the designs of these coins may be brought up to the standard of artistic merit now distinguishing the present issue of the gold coins of the United States.

## Numismatic collection.

The collection of historical coins and medals in the Mint at Philadelphia was commenced in 1838, and has been gradually added to each year until it has become a valuable one. Owing, however, to the limited appropriation made by the Congress (\$500 per annum) the purchase of rare specimens has been necessarily limited, and because of the restricted appropriation opportunities to secure specimens that would have added much to the interest and value of the collection have been lost.

As the numismatic value of rare coins is constantly increasing, and as the present value of the cabinet in the Philadelphia Mint is far greater than the amount expended for these coins and medals, I renew my recommendation of last year that the annual appropriation by the Congress for the purchase of coins and medals for this collection be not less than \$5,000, or that authority be granted for the striking of a small medal to be sold at the Mint and the proceeds applied to the purchase of coins and medals for this collection.

#### ENGRAVING AND PRINTING.

In response to the increased needs for its product to meet the requirements of the business of the country the Bureau of Engraving and Printing has steadily expanded and its resources have been drawn upon to the utmost limit. It has successfully met every demand made upon it, notwithstanding the inconvenient and unsatisfactory conditions under which its work has been executed.

The amount available for the transaction of the business of the bureau during the year was \$3,316,231 appropriated by the Congress,

and \$567,440.48 repaid for services and materials furnished the several executive departments and bureaus, making an aggregate of \$3,883,671.48. The expenditures comprised \$186,919.42 for salaries; \$1,415,272.37 for compensation of employees; \$1,567,165.17 for wages of plate printers and assistants; and \$671,816.64 for materials and miscellaneous expenses, making an aggregate of \$3,841,173.60, and leaving an unexpended balance of \$42,497.88.

The result accomplished with the expenditures above stated included the production and delivery of 49,254,000 sheets of United States notes and certificates; 19,000 sheets of registered bonds; 9,446,267 sheets of national-bank notes; 73,319,610 sheets of internal-revenue stamps; 399,000 sheets of customs stamps; 75,666,333 sheets of United States postage stamps; 47,690 sheets of postage stamps for the Philippine Islands; 101,200 sheets of silver certificates for the Philippine Islands; 129,150 sheets of notes for El Banco Espanol Filipino for the Philippine Islands; and 2,206,947 sheets of checks, drafts, etc., making an aggregate of 210,589,197 sheets. In addition to these impressions delivered, miscellaneous work was executed to the value of \$119,360.49.

Compared with the deliveries in the fiscal year 1907, there was an increase of 10.54 per cent in United States notes and certificates and bonds, 20.34 per cent in national-bank notes, and 8.34 per cent in postage stamps, and a decrease of 2.86 per cent in internal-revenue stamps, 5.45 per cent in customs stamps, and 16.33 per cent in checks,

drafts, etc., or an increase in the aggregate of 4.7 per cent.

In addition to the manufacture of this great quantity of securities, stamps, etc., the bureau was called upon, in compliance with the act of May 30, 1908, amending the national banking laws, to undertake the immediate preparation of \$500,000,000 in bank notes. This work involved an enormous amount of labor, not only in printing, but in altering nearly 10,000 engraved plates, required to be changed in order that the notes prepared might, in the inscription on their face, conform to the provisions of the act.

It was deemed advisable, also, that the backs of these notes should bear some suitable inscription connecting them with the new act and differentiating them from previous issues. This was readily accomplished on the plates of the series of 1902 by adding the numbers "1902–1908," but as the series of 1882 had backs of an inartistic design, expensive to print, and bore the coats of arms of the different States, making it necessary to carry in stock a full supply for each State, it was considered to be an opportune time to prepare a new design for these backs, and new plates were accordingly prepared. This work was commenced immediately after the passage of the act, the first back plate altered in accordance therewith having been sent to press June 5, and the first delivery of the new currency made to

the Comptroller of the Currency June 15, showing commendable promptness on the part of the bureau in the prosecution of the work.

In the preparation of the new currency, early provision was made for notes for banks located in the agricultural sections of the country in order that they might be available if required in the annual moving of crops, and afterwards the orders for printing were distributed among banks located in manufacturing and financial centers of other States, this method being followed with the object of preparing the emergency currency for use in those sections of the country which it was believed would first need it. Gratifying progress has been made with this work, about \$315,000,000 having been delivered to the Comptroller of the Currency by the middle of November. The daily deliveries now approximate \$3,500,000 in value, and it is expected to complete the entire work early in the current calendar year. In addition to preparing this currency, the usual deliveries of national-bank notes have been maintained to provide for the redemption of current circulation and for supplying new banks.

The satisfactory results achieved have been made possible only by the continued employment of a night force, made necessary by the lack of facilities and space for utilizing all of the employees during the day, a portion of the engraving division being employed during the entire twenty-four hours. This condition will obtain until the completion of the new building, which, in accordance with the recommendation made in my last annual report, was authorized by the Congress at its last session, and for which an appropriation for preliminary work was made. In pursuance of this authorization, the Department has acquired by purchase all of the land in square numbered 231 not now owned by the Government, together with all of squares numbered 232 and 233, at a total cost of \$396,304.40. Sketches are now under consideration for the building, with a view to an early commencement of actual building operations.

One of the most important items in the work of the bureau is the preparation of postage stamps, of which 75,666,333 sheets were delivered during the year, and it is gratifying to note that the bureau has fully met the agreement with the Post-Office Department with regard to the manufacture of these stamps, and especially in the matter of carrying a reserve supply. It now has a stock of every denomination in excess of the required reserve.

It has been found difficult, owing to the peculiar nature of the work of the bureau, to obtain satisfactory technical and experienced men for its service in the line of the preparation of engraved plates, and steps have been taken through the Civil Service Commission to procure young men of special qualifications and train them in the bureau, so that it will be unnecessary to take men from similar private establishments. The force is adequate at this time, but it is deemed wise

to take this step in anticipation of future additions to it that will be necessary owing to the constantly increasing demand for the product of the bureau.

#### SECRET SERVICE.

The secret-service division reports that the period of financial and commercial disturbance which developed during the early autumn was followed almost immediately by a very marked increase in the number of offenses against the counterfeiting laws, especially those relating to coining. There were 17 new counterfeit issues discovered and described in official circulars during the year, 6 of which might be considered in the fairly deceptive or dangerous class. There were 345 prosecutions under the various acts relating to counterfeiting as compared with 216 the previous year, and there was an increase of not quite 150 per cent in the amount of notes and coin captured and confiscated, the total coin, \$19,135, being almost double the amount confiscated in 1907. An unusually large quantity of plates, dies, molds, and contraband material was also captured. Incidentally a contemplated revolution in a neighboring island failed when the counterfeit currency with which the insurgent troops were to be paid was seized by the agents of the division, and the fiscal agent was arrested and prosecuted for counterfeiting.

A mandatory statute requiring officers and employees of national banks properly to brand counterfeit notes coming into their possession is very generally disregarded, because through inadvertence no penalty is prescribed for failure to comply with its provisions. If a penalty clause were enacted, the circulating life of a counterfeit would be shortened. Legislation is also suggested covering the offense of having in possession or passing worthless bills of defunct corporations where the instrument sufficiently resembles Federal currency as to be readily accepted by those not thoroughly experienced in the handling of all the various issues of genuine obligations.

Attention is directed to the restrictive legislation incorporated in the last sundry civil act in the paragraph "Suppressing counterfeiting and other crimes:"

No part of any money appropriated by this act shall be used in payment of compensation or expenses of any person detailed or transferred from the secret service division of the Treasury Department, or who may at any time during the fiscal year nineteen hundred and nine have been employed in or under said secret service division.

While it may have been the intention of the Congress merely to put a limitation upon the funds available for the suppression of counterfeiting and to prevent the employment of secret service agents by the heads of other departments, the effect of this legislation during the five months it has been in operation is to extend it much further. The Revised Statutes give to the Secretary of the Treasury, in common with other heads of departments, the right to utilize his force of employees in the manner best calculated to serve the public interests. In the Treasury Department, more than in any other, perhaps—in the mints, Bureau of Engraving and Printing, Treasurer's office, subtreasuries, assay offices, and similar important adjuncts to the handling of the Government's finances—there are great temptations and great opportunities for the wrongdoer.

In the investigation of any irregularity which may be suspected or discovered the Secretary must necessarily adopt protective measures. I am advised that he is quite within his rights in thus employing the services of these agents. Modification of his statutory authority by the restrictive paragraph of the act is not only a discrimination against him as the head of an executive department, but distinctly to the advantage of violators of the criminal statutes of the United States. In one other direction the Secretary is seriously embarrassed, for he may not promote a faithful, efficient, and deserving employee of the secret-service division to any one of the many offices in the Treasury Department where the salary or expenses are included in the sundry civil act. I respectfully insist that there should be no question of the authority of the head of this Department to transfer, detail, or promote officers or employees under his jurisdiction.

### DISTRICT OF COLUMBIA.

The net disbursements on account of the District of Columbia for the fiscal year 1908 by warrants paid were \$12,184,505.10.

The net receipts deposited in the Treasury by warrant on this account for the same period were \$6,576,989.51.

The amount of the funded debt retired during the year was \$501,000, reducing the annual interest charge by \$18,286.50. Since the close of the fiscal year the debt has been further reduced by the purchase of \$486,650 3.65 per cent bonds, leaving outstanding September 1, 1908, \$10,117,100 in bonds bearing 3.65 per cent interest.

The total issue of 3.65 per cent bonds is limited by law to \$15,000,000, and of this sum \$14,997,300 has now been issued.

At the close of the fiscal year 1908 the 10 per cent guaranty fund retained from District of Columbia contractors amounted to \$260,018.89, and is represented by \$121,230 in bonds purchased at the request and risk of contractors and \$126,280.76 uninvested cash.

Detailed information in regard to the affairs of the District of Columbia will be found in the reports of the District Commissioners and the Treasurer of the United States, ex-officio commissioner of the sinking fund of the District of Columbia.

#### STATE BONDS AND STOCKS OWNED BY THE UNITED STATES.

The following statement shows the nonpaying State bonds and stocks, formerly in the Indian trust fund, now in the Treasury, belonging to the United States:

Louisiana	\$37,000.00
North Carolina	58,000.00
Tennessee	335, 666. 663
Total	430, 666, 663

A history of these State stocks and bonds is given in House Document No. 263, Fifty-fourth Congress, second session.

### CENTRAL PACIFIC AND WESTERN PACIFIC DEBT.

The debt of the Central Pacific and Western Pacific railroads on account of bonds issued by the Government in aid of the construction of the roads, amounting to \$58,812,715.48 principal and interest, has been paid in full.

Under settlement agreement of February 1, 1899 (House Document No. 238, Fifty-fifth Congress, third session), the entire debt was funded into 20 notes issued to the United States of \$2,940,635.78 each, maturing semiannually from February 1, 1899, to February 1, 1909, bearing interest at the rate of 3 per cent per annum and secured by the deposit in the Treasury of collateral bonds bearing interest at 4 per cent per annum. These notes were paid either before or upon the dates of maturity thereof, the last payment being made July 29, 1908, which canceled the debt.

#### TERRITORY OF HAWAII.

The debt of Hawaii, assumed by the terms of the joint resolution of July 7, 1898, consisted of \$3,235,400 in interest-bearing bonds and \$764,570.31 in postal savings deposits. This indebtedness has been fully paid by the United States, except \$2,493.80 in postal savings certificates not yet presented for payment.

The appropriation of \$1,000,000 provided by the Congress for the liquidation in part of awards made for property destroyed in suppressing the bubonic plague in the Territory in 1899 and 1900 has been practically expended. The First National Bank at Honolulu reports that 26 awards, amounting to \$2,298.71, are now outstanding.

#### INTERNAL REVENUE.

The receipts from internal-revenue taxes for the fiscal year 1908, as shown by collectors' reports, were \$251,665,950.04, a net decrease from 1907 of \$17,998,072.81.

The following items show increases for 1908: Fermented liquors, \$239,798.63; oleomargarine, \$66,663.65; adulterated butter, \$30,793.70; banks, bankers, etc., \$100; total increases, \$337,355.98.

The following items show decreases for same period: Distilled spirits, \$16,178,094.74; tobacco, \$1,948,315.43; filled cheese, \$1,742.77; mixed flour, \$341.53; process or renovated butter, \$33,791.93; miscellaneous, \$173,142.39; total decreases, \$18,335,428.79.

The total expenditures for the maintenance of the Internal Revenue Service for the fiscal year 1908 were \$4,830,624.97.

The cost of collecting \$1 of internal revenue was \$0.019.

The following table gives a comparative statement of receipts for the fiscal years 1907 and 1908. For a more detailed statement reference should be made to the report of the Commissioner of Internal Revenue.

RECEIPTS FROM INTERNAL REVENUE IN 1907 AND 1908, AS SHOWN BY COLLECTORS' REPORTS.

Objects of taxation.	Fiscal year ended—		Transas	
	June 30, 1907.	June 30, 1908.	Increase.	Decrease.
Distilled spirits Manufactured tobacco Fermented liquors Oleomargarine Filled cheese Mixed flour Adulterated butter. Process or renovated butter Banks, bankers, etc Miscellaneous.	59,567,818.18 887,641.31 3,414.29 2,722.25 12,743.60 161.795.79	\$140, 158, 807. 15 49, 862, 754. 26 59, 807, 616. 81 954, 304. 96 1, 671. 52 2, 380. 72 43, 537. 30 128, 003. 86 100. 00 a 706, 773. 46	\$239,798.63 66,663.65 30,793.70	
Total	269,664,022.85	251,665,950.04		b17,998,072.81

Includes \$459,860.12 from playing cards, \$241,680.16 from penalties, and \$5,233.18 from miscellaneous sources.

Net decrease.

The total production of distilled spirits, exclusive of fruit brandies, was 126,989,740.1 taxable gallons, against 168,573,913.2 gallons in 1907, a decrease of 41,584,173.1 gallons.

The production of fruit brandies increased 761,518.2 gallons.

During the fiscal year 1908 1,200 distilleries of all kinds were operated, a decrease of 387.

The production of beer was 58,814,033 barrels, an increase of 192,031 barrels.

The financial disturbance of last year naturally made itself felt in reduced collections of internal revenue as well as of duties on imports.

It is probable that other causes also contributed to the decrease in internal-revenue collections, among which may be mentioned the following:

1. The prohibition movement, whereby the area in which distilled spirits may be legally sold has been restricted.

- 2. The unsettled condition of the trade with reference to the marking and branding of certain classes of distilled spirits under the purefood laws.
- 3. The increase in the price of grain, causing an increase in the cost of production of distilled spirits, resulting temporarily in a reduction of the quantity of tax-paid spirits in the hands of dealers.

For comparative purposes, the collections for each month of the fiscal years 1907 and 1908, and for the first four months of 1909, are given in the table below:

### INTERNAL-REVENUE COLLECTIONS.

Month.	1906-7.	1907-8.	1908-9.
July. a Sunday.

Increase for 1908.

\$1,200,381

The daily receipts from internal revenue are showing a gradual improvement, which, if continued, will bring the total for the fiscal year ending June 30, 1909, to a figure not far below normal.

## Denatured alcohol.

On June 8 I addressed a letter to the Commissioner of Internal Revenue and to the chief chemist of the Internal Revenue Bureau, directing them to proceed to Europe, to visit especially Great Britain,

Germany, and France for the purpose of studying the conditions existing in those countries and the systems used there with regard to the manufacture of denatured alcohol for consumption in the arts and industries and for fuel, light, and power; and directing them also to make personal investigation into the regulations and modes of procedure now in force under the supervision of the countries named. They were further directed to investigate particularly the question of just how the cost of making denatured alcohol could be reduced, looking to the regulations covering farm productions and methods employed in the processes.

The Commissioner has made a lengthy report, which is in printed form and is available for inspection.

The greatest ultimate advantage to be derived from the denaturedalcohol law will be in the shape of increased diversification of crops, enhanced productiveness of unfertile soil, and the utilization of what would otherwise be waste crops or by-products of crops. This feature of the development of the industry will come necessarily as a slow growth, especially as alcohol in our country has so far been made from high-priced grains rather than cheap potatoes or molasses, the by-product of the sugar beet.

Considerable interest, however, is being taken by the Agricultural Department, by several States through experiment stations, and by the farmers in the West looking to the planting, cultivation, and use of the cheaper materials mentioned, and I look hopefully for a gradual and substantial development of the industry in this respect. It should not be overlooked that, however slow that development is, the operation of the denatured-alcohol law has already been of the greatest benefit to the manufacturers of products, such as varnishes, ether, fulminates, and various chemicals made from alcohol, and other articles, such as celluloid and artificial leather, which require treatment by alcohol as a part of the process of manufacture; also, that the use of denatured alcohol for the purposes of fuel, light, and power is increasing, notwithstanding the relative cheapness of petroleum products. The necessary appliances so used are being rapidly manufactured and introduced, and the merits of denatured alcohol as a source of energy are being brought to the attention of the public.

### CUSTOMS ADMINISTRATION.

The Department is endeavoring to administer the customs law in such a way as not to permit the business of the country to be hampered by quibble or technicality, and at the same time to safeguard the revenue in every respect. It believes in giving an administration that is fair alike to the American producer and the foreign importer. To carry out completely such a policy, certain changes are needed in the existing laws of customs administration.

I renew the recommendation made in my annual report of last year that legislation be enacted that will give to the Secretary of the Treasury such power as will enable him to remedy the mistakes made by the importer whose transaction is in good faith and who has no intent to evade the law or defraud the revenue. The present law is rigid and inelastic and treats the man whose fault is entirely that of ignorance or accident with the same harshness as the deliberate and habitual offender. Reference is made, in this connection, to that part of my report of last year which gives at some length the reasons why such legislation is desired.

## Customs receipts.

During the fiscal year ended July 1, 1908, the customs receipts of the United States amounted to \$291,081,942.84. The twenty leading ports of the country, in their order as regards the amount of revenue collected, and with the value of the imports at these places, are as follows:

	Amount collected.	Value of imports.
1. New York.		\$688,215,938
2. Boston. 3. Philadelphia. 4. Chicago.	18, 178, 385	93,678,716 63,432,007 26,171,943
5. San Francisco. 6. New Orleans. 7. Baltimore.	7,039,000	48, 251, 476 42, 785, 646 29, 477, 101
8. St. Louis. 9. Detroit.	2,661,781 2,123,209	6,857,050 7,982,642
10 Puget Sound	1,570,383 1,447,498	22, 208, 814 4, 385, 219 4, 689, 661
13. St. Paul. 14. Portland, Oreg. 15. Buffalo.	1,035,608	5,847,325 3,758,752 6,927,281
16. Cincinnatí. 17. Milwaukee.		2,729,909 3,228,662
18 Pittsburg 19. Burlington, Vt. 20. Kansas City.	608, 495	1,834,053 5,347,672 1,757,637

## Former recommendations.

I wish to renew other recommendations in my report of a year ago, in regard to legislation needed for the proper conduct of the customs business of the country, the reasons for which were given in detail at that time. I again call attention to the need of a law licensing persons desiring to transact business as custom-house brokers, for the protection alike of the Department and of the profession of customs brokerage.

The present fee system of payment of customs officials is full of recognized evils and should be changed. Collectors and other chief officers of the customs should be paid fixed and suitable salaries.

A small protest fee should be required in all cases of protest before the Board of General Appraisers in order to relieve the Board of unnecessary labor and to prevent the filing of protests that are admittedly without foundation and wholly insincere.

The time within which protests may be made against the action of customs officers, both as to value and classification of merchandise, should be extended. The present limit is inadequate in the great pressure of business of the present day, and it is often impossible for the importer to receive information as to the decision in the case of his importation before the time within which he can protest has passed.

## Sudden changes unjust.

The Department appreciates thoroughly the injury that can be done to business interests by a sudden change in the customs standing of imported merchandise. It realizes that such sudden changes are unfair to business and introduce an element of uncertainty that should be eliminated as far as possible. It has accordingly instituted a new system by which, when the classification of goods is changed which results in the payment of a higher rate of duty, ample warning and notice are given to those interested. Any change in classification that is now made by the Department does not go into effect until thirty days after such action has been determined upon and notice and warning of such advance formally and publicly given.

# Uniformity necessary.

The proper administration of customs depends upon uniformity of appraisement and classification. The law gives to appraising officers at the different ports the authority to classify and appraise merchandise. This results too often in conflicting methods, with consequent hardship and injustice. The Department is taking all possible steps to bring about absolute uniformity. This is of especial importance at this time, as a revision of the tariff means new tariff schedules, new interpretations to be made, and new paragraph problems to be solved.

This year a conference of appraisers at New York was called, which was attended by representatives from the leading ports of the country. It was the largest conference of the kind that has ever been held in the United States and there were present officers from the following ports: New York, Boston, Philadelphia, Chicago, Baltimore, San Francisco, Detroit, St. Louis, Cleveland, Buffalo, New Orleans, Tampa, Portland, Me., and the officers acting as appraisers at Port Townsend, Cincinnati, Newport News, Pittsburg, Milwaukee, Galveston, Los Angeles, Honolulu, Kansas City, St. Paul, Providence, Portland, Oreg., and Porto Rico. In addition, the Department summoned to meet these appraising officers its confidential agents abroad, so as to have these officials come in personal contact and thus

reach a better understanding. The result was very gratifying, and the conference will be helpful in the movement to secure uniformity. The Department has other and important plans under consideration whereby the same class of goods will be made to pay the same rate and amount of duty at all of the ports of the country.

## Mail importations.

The question of mail importations and what legislation is necessary to put merchandise sent through the mails upon the same footing as merchandise sent through the regular channels is being thoroughly considered by a joint committee composed of Treasury Department and Post-Office Department officials. At present as to this class of imports there are not the necessary safeguards for protecting the revenue of the Government. It is hoped that whatever recommendation is submitted to the Congress as the result of the work of this committee will receive prompt and favorable attention.

## New baggage regulations.

The new system for passenger baggage declarations, referred to in my report of last year, is working successfully. It has done away with much annoyance and legitimate complaint from the traveling public, and at the same time has not in any way lessened the protection to the revenues of the Government. Declarations are now made out in better and more detailed form than before, and as a consequence baggage can be examined more easily and expeditiously than under the old system. The steamship companies have cooperated with the officers of the Department in handling the details of the subject, and have done their part of the work with diligence and care.

# Limoges china agreement.

There have just been concluded by the Department negotiations which put an end to the long-drawn-out controversy as to the value of Limoges china. In doing this it has established a precedent and a principle of cooperation between the manufacturing interests involved and the United States Government which, in its opinion, is capable of being extended to other classes of merchandise with excellent results. In this matter the manufacturers of Limoges and the Treasury Department officials have worked together with the one object in view of securing a proper and fair valuation of the product of the Limoges potteries.

The work was started late last year, when the Treasury Department commission visited Limoges and went thoroughly into the whole matter of manufacture and home-market value. The members of the commission found manufacturers, with very few exceptions, frank

and well disposed. Their attitude was one of good faith and a desire to have the question of value settled once for all, so that their business would not be hampered by controversy and uncertainty. After months of labor and a study of all the intricacies of china manufacture an agreement has been reached between the Department and the Chamber of Commerce of Limoges, representing the manufacturers of that city, as to the value of all kinds of pottery there manufactured. There may be some details still to be settled, but they are of minor importance and do not affect the harmonious result that has been achieved by this cooperation.

## Foreign chambers of commerce.

During the past year the Department sent abroad a commission, consisting of Assistant Secretary James B. Reynolds, and Marion De Vries and Byron S. Waite, of the Board of General Appraisers, to examine into certain important matters affecting the proper administration of the customs law. One of these matters was the question of chambers of commerce and their certificates of value. The commercial agreement with Germany contained a provision that the chambers of commerce of that country should be entitled to furnish certificates of value of merchandise manufactured or produced in their respective communities, which should be regarded by appraising officers of the United States as competent evidence in the finding of value. Subsequent to this agreement this same privilege was, at the request of several governments, extended to chambers of commerce of other nations. It was granted only after it was ascertained that these organizations were governmental in their character, so that in case of a careless or false certificate of value being sent to this country by such an organization it would be possible to present the matter to its Government for proper action. The Treasury commission made a special study of these chambers of commerce in Germany, France, Austria-Hungary, and Great Britain to determine just what would be the competency of the evidence that was presented in cases of disputed value. What was found by this commission appears in the following extract from their report submitted to the Secretary of the Treasury:

The chambers of commerce of these European countries should not and must not be confused with similar organizations in the United States. Here they are purely local, and to that extent irresponsible, making their own laws and rules of procedure, accountable to no higher authority, and organized and acting at their own will. In the four countries which the commission visited we found these chambers of commerce under governmental authority, varying somewhat in directness of control, but all accountable to government officers. In Germany and in Austria-Hungary this control is most practical, for the Government holds the purse strings, their funds are obtained from government tax, and dissatisfaction with their conduct could be met by a cutting off of appropriation and financial supply. The members are chosen from

all branches of business, elected as prescribed by national law, make annual reports to the government, their proceedings are published, and they do official work for the government along many lines. In France there is not this financial equation, but qualifications for membership are strictly prescribed by law as well as the number of members.

In Great Britain there is a different system. Not all of the chambers of commerce are under governmental control, and the Department has extended the certificate privilege only to those which hold that relation. The government board of trade holds itself responsible for a certain number of these organizations, having examined into their qualifications and abilities to do the work of certification, and guarantees the results. At a conference between the board of trade and the commission these qualifications were agreed upon, and the board will examine closely and thoroughly into each organization before asking that the privilege be extended, and the Department will grant this privilege only to those chambers of commerce recommended by the government board.

The commission had personal conferences with these organizations and the government officers who controlled them in each of the countries visited. We examined into their practical workings, and what their procedure would be when asked to furnish a certificate of value. We told them that the United States would insist upon two things in the certificates; that there should be honest intent, and careful, thorough, and impartial examination as well; that it was not enough to mean to give correct value and then permit, through carelessness, a wrong value to be stated; that we desired no perfunctory signing of a paper by some high officer of a chamber of commerce who was not acquainted with the subject; that honest ignorance would not suffice if they wished a high degree of competency to be attached to the certificates by the appraising officers; that when we received such a paper we wished to be assured that it represented a painstaking examination by persons competent to make it. We were assured that this wish would be followed and the certificates sent would represent all those features.

Of two things the commission is very confident—that in the chamber of commerce certificate there are great possibilities for good, and that the several governments will do their utmost to see that no careless or false value is sent to the United States. The members of these organizations we found to be the leading business men of the place, of high standing in the community, and men who would not certify to a value that they had reason to believe was wrong. And they have the ability to get at the true values. They are well organized, possessed of facilities for getting information at first hand that neither treasury nor consular officials can have or acquire, and have persons competent to find the exact truth. Should a chamber of commerce fail in its duty in the issuance of such a certificate, we are confident that the government would take up the matter actively, remedy the carelessness, if such there was, or provide suitable punishment should such be needed.

Such organizations must, of course, vary in their expertness and accuracy of work. Some may be found to be influenced by local conditions, especially in cases where a city manufactures only one kind of goods and the prosperity of the place depends upon the profit that the manufacturers show where these weak spots are and where the line will need to be strengthened. But we do believe that appraising officers in the United States should regard these certificates as coming from organizations of reputable business men of high standing, who intend that the information given shall be correct, and that which is obtained by thorough investigation, and that above the chamber of commerce is a government that will insist that the privilege given shall be neither wasted nor abused.

## Enforcement of the pure-food law.

In the administration of certain provisions of the food and drugs act of 1906 the Department has endeavored to act so as to disturb as little as possible business conditions and to eliminate all unnecessary technicality and delay, and at the same time to safeguard the revenue. In cooperation with the Department of Agriculture certain methods and measures have been adopted which help to bring about such a result.

It has been the practice in cases where goods have been detained to have the findings of the local representative of the Department of Agriculture and the evidence submitted by the importer sent to the Department for decision. Such reference of each case to Washington has resulted in delaying final action, and has caused friction between Government officers and importers. It has now been arranged to do away with such practice and to leave to the chief local representatives of the two Departments at the larger ports the disposition of all cases in which precedents or principles have been well established, leaving only exceptional cases and new questions to be referred to the Department of Agriculture for decision. The necessary instructions to carry out this new system are in preparation, and other changes designed to improve the present practice and to facilitate the transaction of business are under consideration by this Department and the Department of Agriculture.

# Court of customs appeals.

Prompt and efficient administration of the customs laws is greatly retarded by the present inefficient system of appeals from decisions by the Board of General Appraisers. While improvement has been in a measure afforded by the act of May 27, 1908, the system yet invites delay by placing a premium upon it. As every rate and phrase of a tariff act may be the subject of judicial action, until such is finally had, no such act is complete, and until then all affected industries and employments are to an extent embarrassed.

Previously the average life of a customs appeal after leaving the Board of General Appraisers was four and one-half years. At present the average time consumed is about two and one-half years. It may well be doubted whether the recent act mentioned will afford any marked improvement in this respect. The present system makes each of at least 120 judges a possible final judge of customs appeals, a condition which experience has demonstrated will inevitably result in numerous irreconcilable conflicts of authority. In customs appeals, each of which often, if not usually, affects large industries and great numbers of employees, as well as consumers, prompt decision is of vital importance.

The establishment by the Congress of a single appellate customs tribunal to be coordinate in powers with United States circuit courts of appeal would remedy the prevalent evils. Such a tribunal, having exclusive jurisdiction of all customs appeals, would reduce the time of ultimate disposition of all such cases to one-third of the time now required, would avoid all possible conflicts in final customs decisions, and would eliminate other objectionable features of the present system.

It is therefore recommended to the Congress that there be established a United States circuit court of customs appeals having jurisdiction of all appeals from decisions of the Board of United States General Appraisers.

#### PUBLIC BUILDINGS.

The policy of the Department with reference to the design and construction of public buildings under its control has been to keep fully abreast of the great advance made in this field of enterprise. Probably no branch of art has made greater strides in recent years than architecture, and this Department has steadily endeavored to raise the standard of its buildings to the level of the best examples known.

The act of the Congress approved May 30, 1908, carried an appropriation of approximately \$34,000,000, and authorized the purchase of 259 sites and the construction of 206 buildings. Proposals have been taken for the sale of these sites to the Government, and agents of the Department have been in the field examining the properties offered. Selections of sites are being made as rapidly as possible, and the preliminary work has been pushed with all possible expedition.

The office of the Supervising Architect, which is charged with the duty of preparing plans and specifications for public buildings and the administrative work in connection therewith, has again reached the high state of efficiency which characterized it prior to July 1, 1905, when it underwent partial disintegration for reasons mentioned in previous reports. This is largely due to the policy of the Congress in making additional appropriations for its support, and this important branch of the Department is now well equipped for the task of erecting the many buildings authorized. Its operations have, however, been considerably hampered by lack of space for the working force, a condition which the Department hopes may be remedied in the near future.

Provision was made in the act of May 30, 1908, that all appropriations for public buildings subsequent to July 1, 1907, should be expended for the actual work of construction and no other purpose.

This is a radical but wise change in former laws, which directed the Secretary of the Treasury to charge the construction appropriations equitably with the salaries of employees in the office of the Supervising Architect and other contingent expenses. This policy was a burden upon the appropriations in question, rather cumbersome and difficult to carry into effect, and its operation was frequently misunderstood by citizens of towns and cities where public buildings were erected. Under the legislation mentioned the full limit of cost will be expended upon buildings authorized by the Congress in the act of May 30, 1908.

Further change, it is believed, could be made to great advantage. The present system employed in connection with bills for public buildings is not conducive to the best results. A great mass of bills is annually poured in on the Department, with requests for early reports. In many instances the buildings authorized are unnecessary for the public business, and in the interests of economy the construction could be postponed for several years. Insufficient time is allowed for investigation as to the requirements of the building proposed, or, in fact, for an accurate estimate of cost. As a result, it frequently happens that a number of buildings are authorized which are not required, and on the other hand no appropriations are made for localities in which the Government is urgently in need of adequate buildings, and is in all probability paying large rent for insufficient quarters.

Public building appropriations should be put on a basis similar to that now employed in connection with appropriations for river and harbor work. If this were done, the Congress would submit to this Department a list of localities, with the request that at the next session a report be submitted showing:

- 1. The necessity or advisability of a building in the city or town suggested. This would necessarily embrace the size of the city, the cost of the building, and the price at which rented quarters are to be had,
- 2. If a public building is recommended, the area and probable cost of the site; the size, cost, and character of the building that should be erected; the branches of the Government service that would occupy it when completed, and the annual cost of its maintenance.

3. The amount of appropriation necessary to carry on the work during the ensuing fiscal year.

With such a report, carefully made in detail after consultation with the other departments interested, the Congress would be better able to judge of the advisability of authorizing a building and of the appropriation required. I am confident that by this method a great saving could be effected and that buildings could be more satisfactorily and economically distributed.

The following tables show the construction and financial operations of the Department with reference to public buildings under its control during the fiscal year ending June 30, 1908:

### Legislation.

The act of May 30, 1908, provided for the following:

Sites onlySites and buildings	
Buildings on sites already owned  Extensions and improvements to old buildings	77
Total	

There are also 10 sites acquired under previous legislation for which no buildings were authorized by the act above mentioned, making in all 140 sites without appropriations for buildings.

### Statement of buildings.

Completed and occupied, including 43 marine hospitals and quarantine	
stations, as of September 30, 1907	
Completed since	10
In course of erection	
Not commenced	348
Total	942

In addition to the above, 7 extensions to buildings have been completed and 29 are now in course of construction.

STATEMENTS OF APPROPRIATIONS FOR PUBLIC BUILDINGS, JULY 1, 1907, TO JUNE 30, 1908.

### EXPENDITURES DURING THE FISCAL YEAR,

For sites and additional land, for the construction of public	
buildings, and for extensions and repairs especially appro-	
priated for	\$7, 397, 871.60
For repairs and preservation	491, 141, 40
For heating apparatus	391, 595. 02
For vaults, safes, and locks	46, 555. 53
For plans, including books and periodicals.	1, 509. 66
For electrical protection to vaults	19, 745. 02
Total	8, 348, 417. 63

### CONTRACT LIABILITIES EXISTING ON JUNE 30, 1908.

On account of sites and additional land, for the construction of public buildings, and for extensions and repairs especially	
appropriated for	\$11, 594, 004. 85
Less authorized contract liabilities in excess of amounts ap-	
propriated	2, 198, 122. 95

Net contract liability payable from amounts appropriated	\$9, 395, 881. 90
On account of repairs and preservation	116, 258. 19
On account of heating apparatus	146, 181, 68
On account of vaults, safes, and locks	44, 748. 04
On account of plans, including books and periodicals	407. 50
On account of electrical protection to vaults	10, 062. 51
Total	9, 713, 539. 82
BALANCES AVAILABLE ON JUNE 30, 1908.	
For sites and additional land, for the construction of public	
buildings, and for extensions and repairs especially appro-	
propriated for	\$25, 276, 249. 08
For repairs and preservation	3, 289. 78
For heating apparatus	6, 258. 50
For vaults, safes, and locks	528. 27
For plans, including books and periodicals.	
For electrical protection to vaults	19, 955. 48
[Poto]	25 202 146 25

## Sites for new buildings in the District of Columbia.

The Congress at its last session directed the acquisition in Washington of a new post-office site; of squares 226 to 230, inclusive, for the Departments of State, Justice, and Commerce and Labor; and of squares 233 and 232 and the remainder of 231 for the enlargement of the Bureau of Engraving and Printing, already referred to. After considerable negotiation the Department has contracted for square 678, immediately west of the Union Station, for the post-office site, at \$450,000, and for squares 233, 232, and the remainder of 231 at \$396,304.40. It was found necessary to condemn squares 226 to 230, inclusive, proceedings for which are pending.

## Branch post-office at New York.

To insure early action in providing adequate quarters for the New York post-office at the new Pennsylvania terminal, a competition for the selection of an architect was held, with the result that the firm of McKim, Mead & White was selected. These architects are now preparing the complete working drawings, which it is believed will be submitted to the various contractors for estimates early in the spring, and a contract awarded which will enable the Department to complete and occupy the building coincident with the opening of the terminal by the Pennsylvania Railroad Company.

#### PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

## Bureau of Public Health.

Attention is invited to the necessity of increased administrative facilities for the efficient conduct of the Bureau of Public Health, established by act of the Congress approved July 1, 1902.

# Plague in San Francisco and vicinity.

In May, 1907, a fatal case of plague in San Francisco was reported. Efforts were made by local and State authorities, assisted by officers of the service, to suppress the disease, but in September, 1907, at the request of the mayor of San Francisco, and by direction of the President the Department took charge of the work of suppression, and Passed Asst. Surg. Rupert Blue was placed in charge. On his arrival he found that the infection was widespread and that the difficulties of the situation were added to by disorganized and ruinous conditions consequent upon the earthquake and conflagration of April, 1906. An active antiplague campaign was begun at once, and the measures instituted by the service received the hearty support and cooperation of the local authorities, mercantile bodies, trade councils, and labor unions of the city. The expenses of the Government were limited up to the end of the fiscal year to the pay of officers and employees and the expenses of laboratory investigations, other expenses being borne by the city of San Francisco. Up to June 30, 1908, there were 159 cases of plague, with 77 deaths. One thousand six hundred and eighty sick persons suspected of plague infection were inspected; 3,973 inspections of the dead were made; 5,320 houses were disinfected; numerous sanitary nuisances were abated, and over 7,000,000 poisons for the destruction of rats were placed; 203,642 rats were collected, and of these, 90,720 were examined bacteriologically, with the result that 306 were found infected with plague. Although the last case of human plague in San Francisco was reported in February, 1908, these sanitary measures have been continued.

On November 1, 1908, in view of the lapse of time since the occurrence of the last case of human plague in the city, and only two plague-infected rats having been discovered in a period of nearly eight months, the force engaged in plague suppressive measures in the city

was materially reduced.

In Oakland, up to and including June 30, 1908, there were 12 cases of plague, with 7 deaths. The service operations there included the detail of an officer for the supervision of preventive measures and laboratory investigations of plague suspects. In Oakland 37,756 rats were trapped or killed, 357 houses were disinfected, numerous sani-

tary nuisances were abated, and nearly 3,000,000 poisons for the destruction of rats were placed. Three cases occurred in other localities in California, in the vicinity of San Francisco, and were followed by necessary sanitary measures.

On August 11, 1908, a case of human plague was reported from Los Angeles, Cal., and immediately afterwards a ground squirrel, found dead, presented bacteriological evidence of plague infection. A laboratory has been established in Los Angeles, and numerous examinations of ground squirrels, rats, and mice have been made. Up to this date no further evidences of rodent infection have been found, but the details of a plan for the destruction of ground squirrels are being perfected and a systematic campaign against these animals will shortly be inaugurated.

## Plague in Seattle, Wash.

Three human cases of plague occurred in Seattle in October, 1907. Infected rats were also found, and upon request of the governor of the State of Washington and the mayor of Seattle, the service assumed charge of plague suppressive measures November 9, 1907. To June 30, approximately 41,000 rats were collected, and 25,000 of this number were subjected to necropsy, with the result that 11 were found plague infected. Since June 30, 9 infected rats were found in July and 1 in September.

## Plague in other countries.

Plague was widespread throughout the world during the fiscal year. Since the first outbreak of plague in China in 1894, 51 countries have been invaded. Ecuador, Venezuela, and the British gold coast were added during the fiscal year to the plague-infected countries. In Hawaii there were 7 cases, 4 of which were in Honolulu. In the Philippine Islands there occurred a single fatal case from a vessel at Manila.

The advance of plague throughout the world in the past fourteen years has been notable, and attention to this fact has been called by the bureau in special bulletins, including one on the "Measures Necessary to Prevent the Introduction and Spread of Plague." The lastnamed bulletin has also been published in Spanish and circulated by the Porto Rican and Cuban authorities.

The high rate of mortality of this disease and the exceeding persistency of its spread from one locality to another make it imperative that in all combative measures there be the most thorough cooperation between the authorities, representing national, State, and municipal governments, and private citizens of all ranks, and that no precaution be omitted which will prevent this dread menace from gaining a permanent foothold on our shores.

### Yellow fever.

The only cases of yellow fever reported in the United States during the year were three fatal cases imported by vessels and confined to quarantine. In Panama there was a single reported case at Ancon. In Cuba, during the first half of the fiscal year, 147 cases and 50 deaths were reported, and during the second half, 35 cases and 13 deaths.

### Cholera.

In Hawaii there was one fatal case at Honolulu in December. In the Philippine Islands there were reported, from July to February, 421 cases and 355 deaths at Manila, and 360 cases and 283 deaths in the provinces.

### Smallpox.

Forty-two States, two Territories, and the District of Columbia reported 31,190 cases.

### Rabies.

A considerable number of persons were exposed to rabies in the District of Columbia during the past year, and authority was granted the Director of the Hygienic Laboratory to administer the virus to persons who might present themselves for that purpose. Sixty cases have been treated, with no fatality. Because of its increasing prevalence in the United States, investigations of this disease in the Hygienic Laboratory have been resumed. These studies have included the preparation of a "fixed virus," which is of great value in the prophylactic treatment of those bitten by rabid animals.

# Investigation of typhoid fever in the District of Columbia.

The board of officers appointed to investigate the origin and prevalence of typhoid fever in the District of Columbia have submitted a second report (Hygienic Laboratory Bulletin No. 44) which throws additional light on the causation of this disease. The board is engaged in further investigations of this problem during the present season, intensive studies of a limited area of the city being made. These investigations have been of great value in studies of typhoid fever in other parts of the country, the Pittsburg Typhoid Commission recently organized having undertaken precisely similar studies in that city.

## Leprosy investigation station, Molokai, Hawaii.

It having been determined to erect the necessary buildings under the supervision of the constructor, orders were issued September 26, 1907, to an officer to undertake this work. Since that time rapid progress has been made looking to the completion of the station. The medical director in charge of the investigation station and his assistants have continued their studies at Honolulu and Molokai. These studies have been of importance in relation to the problems of leprosy, and they have also emphasized the necessity of the study of incipient cases in Honolulu as a part of the general investigation.

Supervision over the manufacture and sale of viruses, serums, and toxins.

The act approved July 1, 1902, regulating the sale of viruses, serums, and toxins in interstate traffic has been administered as in previous years.

## Standardization of tetanus antitoxin.

In order that the above-mentioned law might be properly administered, it became necessary to establish a standard for measuring the strength of tetanus antitoxin, and work upon this subject has been carried on in the Hygienic Laboratory for the past two years, with the result that a standard has been devised. An amendment to the regulations promulgated under the act of the Congress approved July 1, 1902, was therefore prepared and issued October 25, 1907, fixing the immunity unit for measuring the strength of tetanus antitoxin, the same being based upon the official test dose of a standard toxin prepared in the Hygienic Laboratory, this toxin being furnished from time to time to manufacturers of viruses, serums, and toxins, and others concerned.

# The Hygienic Laboratory.

The additional building for which the Congress appropriated \$75,000 is now in the course of construction. The activities of the laboratory have increased in scope, and the results of investigations made therein are contained in 7 bulletins published during the year. With the approval of the Secretary of the Treasury, there has been some enlargement of the Division of Pharmacology to provide for investigations of organo-therapeutic preparations in their relation to the public health and the study of pharmaceutical preparations in relation to the decennial revision of the pharmacopæia.

# Sanitary conferences.

In accordance with the act of the Congress approved July 1, 1902, the sixth annual conference of State health authorities with the Surgeon-General of the Public Health and Marine-Hospital Service was held in Washington, April 27, 1908. In accordance with sec-

tion 5 of the same act, a meeting of the advisory board of the Hygienic Laboratory was held in Washington, February 27, 1908. The summary of the work of the typhoid fever board during 1907 was presented for consideration, and it was the unanimous opinion that the investigations should be continued, the problem being one of national importance and the results obtained of great value to health officers in combating this disease.

# International sanitary conventions.

The Third International Sanitary Convention of the American Republics was held in the City of Mexico, December 2-7, 1907, at which were present delegates from 13 Republics. This convention adopted a number of important resolutions relating to the prevention of malaria, tuberculosis, and other diseases, and the improvement of health conditions in the Western Hemisphere.

A conference was held in Rome, December 3, 1907, at which were present delegates from the powers signatory to the International Sanitary Convention of Paris, signed ad referendum December 3, 1903. The conference had for its object the exchange of propositions regarding the organization of the International Sanitary Bureau of Paris. An agreement and organic statutes were edited and signed December 9, 1907. This arrangement was ratified by the President of the United States by and with the advice and consent of the Senate February 15, 1908. The International Sanitary Bureau of Paris was therefore duly organized November 4, 1908, this Government being represented by a commissioned medical officer of the Public Health and Marine-Hospital Service. The United States will, therefore, participate in the conduct and benefits of the above-mentioned bureau.

# International Congress on Tuberculosis.

The Congress at its last session adopted a resolution that an invitation be extended to the governments of other countries to send representatives to the International Congress on Tuberculosis, to be held in Washington September 21 to October 12, 1908. An appropriation was also made to enable the Government of the United States to participate suitably in this congress, and the Public Health and Marine-Hospital Service therefore assembled an exhibit calculated to show the activities of this Department in the combat against tuberculosis.

# National quarantine.

The Surgeon-General reports that 9,579 vessels were inspected, of which number 733 were disinfected at the 43 national quarantine stations in the continental United States. Inspection has been main-

tained on the Canadian and Mexican borders. National quarantine has also been maintained at 8 ports in Porto Rico, 7 in Hawaii, and 7 in the Philippine Islands. Medical officers of the Public Health and Marine-Hospital Service were stationed at the following-named foreign ports: Habana, Cienfuegos, Matanzas, and Santiago, Cuba: Rio de Janeiro, Brazil; Veracruz, Progreso, Coatzacoalcos, Salina Cruz, and Tampico, Mexico; Colon, Republic of Panama; Bridgetown, Castries, and St. Thomas, West Indies: Guavaguil, Ecuador; Callao, Peru; Yokohama, Kobe, and Nagasaki, Japan; Hongkong, China; Naples, Italy, and Calcutta, India. These officers have exercised quarantine supervision over outgoing vessels bound for the United States, its insular possessions and dependencies. At a number of foreign ports they have also examined emigrants by request of the Immigration Bureau and steamship companies. Medical officers have also been stationed at nine fruit ports in Central America to enforce at the foreign ports the special regulations relating to fruit vessels which permit their entry at ports of the United States without detention.

During the fiscal year the legislature of the State of South Carolina ceded to the United States, without cost, its four quarantine stations, and the operation of the said stations has been continued throughout the year. The title to the New Orleans quarantine station and of the four substations in Louisiana has not as yet been completed, but the stations have been operated as national stations, and the question of the title is in the hands of the proper law officers of the Government. A title to the quarantine station at Mobile has been perfected, and the erection of buildings necessary to the complete rehabilitation of the station will be proceeded with under a decision of the Comptroller of the Treasury. Measures will be taken looking to the acquisition of a quarantine site in the harbor of Galveston, Tex.

Outgoing quarantine procedures instituted on account of the prevalence of bubonic plague in San Francisco, Cal., were maintained during the fiscal year, but on October 20, 1908, no case of human plague having occurred in the city during a period of eight months, and but two plague-infected rats having been discovered during the same period, these restrictions were removed.

## Medical inspection of immigrants.

During the fiscal year 935,597 immigrants were inspected under the provisions of the immigration laws and regulations. These examinations have been made at ports in the United States, at some ports officers being detailed for this duty exclusively, while at others the examination has been made in conjunction with other duties of the

officers, and at all ports provision is made for a board of medical officers to pass upon cases that have given rise to dispute. Of the number of inspections made, 782,870 were arriving aliens, 141,825 were arrivals whose American citizenship was subsequently determined, and of the former number 10,902 were rejected for various causes falling under the immigration laws and regulations.

## Sanitary bulletins and reports.

During the year 222,456 sanitary and scientific bulletins and reports were issued by the bureau. These included the weekly Public Health Reports, the bulletins of the hygienic laboratory, and numerous special bulletins relating to the public health. The bulletin entitled "Milk and Its Relation to the Public Health," to which reference was made in my last annual report, has been published and distributed. There has been an enormous demand for this treatise, and the Department edition is now exhausted. Because of its practical and scientific value, the Surgeon-General is of the opinion that this publication should have a wider circulation, and it is respectfully recommended that provision be made by the Congress for a special edition.

# Marine hospitals and relief.

During the fiscal year 54,301 patients received treatment, 14,778 being treated in hospital, and 39,523 as dispensary or out-patients. The hospital patients received a total of 426,957 days treatment. The service operated 21 hospitals, owned by the Government, and maintained 126 other relief stations where seamen were given hospital or dispensary treatment.

At the sanatorium for consumptives, Fort Stanton, N. Mex., 369 patients were cared for during the year. Of these, 91 were discharged, 84 died at the sanatorium, and 194 remained under treatment at the close of the year.

Aid was extended to other branches of the Government in the physical examination of 5,210 persons, of whom 463 were rejected. In addition 274 merchant seamen were examined to determine their fitness for shipment on American vessels, of whom 27 were rejected; also 10 foreign seamen, of whom 6 were rejected.

During the year relief stations of the third class were established at Bellingham, Wash., Kansas City, Mo., and Port Arthur, Tex.

#### Personnel.

At the close of the fiscal year there were 128 commissioned medical officers, namely, the Surgeon-General, 5 assistant surgeons-general, 29 surgeons, 62 passed assistant surgeons, and 31 assistant surgeons. There were also 281 acting assistant surgeons and 48 pharmacists.

### Expenditures.

The appropriation for the ordinary maintenance of the service was \$1,187,750, of which sum \$150,000 was payable from the appropriation for expenses of regulating immigration. The receipts from all sources, repayments for care of foreign seamen, etc., were \$17,104.95. The expenditures were \$1,084,783.23; estimated outstanding liabilities, \$13,149.73, leaving an estimated balance of \$106,921.99.

The amount available of the appropriation for preventing the introduction and spread of epidemic disease at the beginning of the fiscal year was \$379,803.17. Appropriations amounting to \$700,000 were made in addition to the available balance reappropriated. The expenditures were \$368,795.59, leaving a balance June 30, 1908, of \$711,007.58.

The appropriation for the maintenance of the quarantine service was \$355,000. The amount of repayments was \$509.11. The expenditures were \$342,390.92, which, deducting outstanding liabilities, leaves an estimated balance of \$5,158.01.

The amount available of the appropriation for national quarantine and sanitation at the beginning of the fiscal year was \$456,225.48; the repayments were \$525.20; the expenditures were \$88,084; the balance on hand June 30, 1908, was \$368,666.68.

# Legislation.

There is increasing demand for further protection of the public health, and in this respect the National Public Health Service has certain duties to perform. Broadly speaking, these duties are the prevention of the introduction of contagious and infectious diseases from without and prevention of their spread from one State or Territory to another; the investigation of said diseases and conditions favoring their spread, as well as methods necessary for their prevention; the dissemination of sanitary information thus acquired among sanitary officials and the public generally, and cooperation with State and territorial authorities for the protection of life and health. The officers of this service are constantly doing work no less arduous than the medical officers of the other services of our Government in time of war. No small number of them have lost their lives in epidemics, and in justice they should receive the same compensation as officers of the other medical services of the Government. In view of these facts it is recommended that the Congress during its present session enact legislation necessary to further improve the public health and to maintain the high standard of efficiency in the Public Health and Marine-Hospital Service.

#### REVENUE-CUTTER SERVICE.

The following is a summary of the work performed by the United States Revenue-Cutter Service during the fiscal year 1908, together with the net expenditures:

Lives saved (actually rescued) from drowning	50
Persons on board vessels assisted	3, 269
Persons in distress taken on board and cared for	317 -
Vessels assisted	146
Vessels boarded and papers examined	13, 252
Vessels seized or reported for violation of law	242
Fines and penalties incurred by vessels reported	\$54,700
Value of vessels assisted and their cargoes	\$6, 858, 918
Derelicts and obstructions to navigation removed or destroyed	18
Net expenditure:	

Appropriation for maintenance of the service, including appropriation for special repairs \$1,817,227.55 Estimated unexpended balance \$2,030.88

The work of the service has extended, as usual, along the entire coast of the United States, including the waters of the Great Lakes, Alaska, and Porto Rico. Four vessels have operated exclusively in Bering Sea from June until late in the fall for the protection of the fur seals. The *Thetis* made the annual cruise into the Arctic Ocean, and her efforts in the far north have resulted in great good not only to the public interests generally, but in correcting various abuses that were found to exist in the whaling fleet. It is thought that these abuses have been practically eradicated. Two Japanese schooners, the *Nitto Maru* and *Kaiwo Maru*, were seized by the patrol fleet for unlawful sealing in territorial waters off the Pribilof Islands, and their crews were taken to Valdez, Alaska, for trial.

There have been during the year 22 cruising cutters in active commission, and 17 harbor vessels and launches which have performed boarding and anchorage duty at various ports. Twelve officers have been assigned to the Life-Saving Service to inspect the life-saving stations, drill their crews, superintend the construction of buildings and appliances, etc.

The important work of assisting vessels in distress and of removing derelicts and other dangerous obstructions from the paths of commerce, with which the service is specially charged, has been diligently and successfully prosecuted. Two instances of the character of this work deserve special mention. On September 11, 1907, 243 persons who had been cast ashore from the wrecked ship *John Currier*, of San Francisco, near Nelsons Lagoon, Aleutian Islands, Alaska, and were suffering great privation, were rescued and afterwards safely conveyed to Seattle, Wash. On February 21, 1908, the *Thetis* was dis-

patched from Puget Sound to Point Manby, Yakutat Bay, Alaska, a distance of 1,000 miles, for the relief of a Japanese crew of 11 men belonging to the schooner Satsuma Maru, who were reported wrecked at that place and in distress. The Thetis promptly set out on her mission, found the shipwrecked crew, and, at much risk, succeeded in bringing them to the ship in small boats through a dangerous surf.

All duties within the scope of the service have been carefully performed, and the organization has been maintained in a state of

readiness and efficiency.

### Vessels.

The cutters *Boutwell*, *Fessenden*, *Dallas*, and *Dexter*, all obsolete types of vessels, and which had become unfit for active service and were not worth extensive repairs, were condemned and sold under authority of section 2748, Revised Statutes. There is need of several additional sea-going, well-equipped vessels to enable the service to discharge effectively its duties and meet the increased demands made upon it. I recommend the passage of Senate bill 3345, for the construction of 4 steam vessels, which has been favorably reported, with amendments, to the House of Representatives by the Committee on Interstate and Foreign Commerce. I recommend also that a suitable vessel be provided for the Hawaiian Islands.

## Legislation.

The provisions of the act approved April 16, 1908, which are in accordance with my recommendations of last year, will materially improve the organization of the service. Aside from other advantages of this legislation, the benefits which it insures to the warrant officers and enlisted men will exert a marked influence in promoting the efficiency of the noncommissioned force.

# Transfer of Fort Trumbull.

The school for the education and training of cadets is now located at Arundel Cove, Md., about 7 miles from Baltimore, on the site provided for a general depot for the Revenue-Cutter Service. This location is not easy of access, has undesirable surroundings, and is not suitable for the proper development and progress of the school. The matter has been given careful consideration by the Department and various places have been examined with a view of securing a location which would be advantageous and permanent. That considered most available and best adapted for the purposes of the school is the military reservation of Fort Trumbull, on the Thames River, at New London, Conn., consisting of about 13 acres, with various buildings and improvements thereon, which is under the jurisdiction of the

War Department. The latter has signified its willingness, with the approval of the Congress, to turn over the reservation, subject to certain minor limitations, for the use of the Revenue-Cutter Service. I therefore strongly recommend that the Congress authorize the transfer of Fort Trumbull to this Department for the purpose stated. Small expense has been incurred in permanent improvements for the school. These are well adapted and are needed for the equipment of the depot.

#### LIFE-SAVING SERVICE.

At the close of the fiscal year the Life-Saving Establishment embraced 280 stations, distributed upon the sea and lake coasts as follows: On the Atlantic and Gulf coasts, 201; on the coasts of the Great Lakes, 61; on the Pacific coast, 18.

The number of vessels meeting disaster within the domain of the service during the year was 1,094. There were on board these vessels 5,712 persons, 22 of whom were lost. The estimated value of the property imperiled was \$13,530,225, of which amount \$10,390,955 represents the value of the vessels endangered, and \$3,139,270 the value of their cargoes. The number of vessels totally lost was 56. These figures are divided between documented and undocumented vessels (the last-mentioned class being craft of less than 5 tons burden, including sailboats, gasoline launches, rowboats, etc.) as follows:

	Documented.	Undocu- mented.	Total.
Number of vessels involved Number of vessels totally lost Number of persons on board Number of persons lost Number of persons succored at stations Number of days' succor afforded Value of vessels Value of cargoes Total valu © of property involved Value of property saved Value of property lost	52 3,749 16 421 848 \$9,776,725 3,135,190 12,911,915 11,056,805	708 4 1,963 6 141 152 \$614,230 4,080 618,310 609,630 8,680	1,094 56 5,712 22 1,000 \$10,390,955 3,139,270 13,530,225 11,666,435 1,863,790

The number of disasters included in the foregoing table exceeds that given in last year's report by 39 for documented vessels and 217 for small craft, and is 246 greater than that for any previous year in the history of the service. The increase over last year in the number of casualties to vessels of the larger class is attributed to two causes, namely, the exceptional openness of the winter and the extension of the scope of operations of the life-saving crews as a result of the installation of power in the service lifeboats, which has made it possible for them to assist a larger number of distressed vessels. The increase with respect to undocumented vessels is in some

measure due to the same reasons, but chiefly to the fact that the use of gasoline launches has sprung into such sudden and general favor. The number of accidents to this type of craft alone during the last year was 330—nearly one-third of the total for all classes of vessels.

Of the 1,094 vessels imperiled, 861, valued with their cargoes at \$4,447,460, were assisted solely by the life-saving crews; 192 vessels, valued with their cargoes at \$8,109,710, were aided by the life-saving crews in cooperation with tugs and other agencies; 13 vessels, valued with their cargoes at \$502,445, were assisted by private agencies only; and 28 vessels, valued with their cargoes at \$470,610, received no assistance from any source.

Assistance of more or less importance was afforded by the station crews to 89 documented and 210 undocumented vessels not included in the tabular statement, making in all 1,352 vessels assisted by the service crews.

The crews also saved the lives of 56 persons from situations of peril unassociated with vessels, and succored at the stations 156 persons in distress arising from causes unrelated to shipwreck.

Warning signals were made from the station lookouts and by the beach patrol to 219 vessels running into danger, 199 of the warnings having been given at night and 20 in the daytime. Of the vessels so warned, 97 were steamers.

A comparison of the foregoing statistics with those of former years establishes the gratifying fact that, while the number of disasters occurring last year was much greater than for any previous year, the percentage of lives lost has never been less. The best showing heretofore made in this regard was that for the year 1896, when one life was lost out of each 260 persons involved, the ratio being the same as that for the period covered by this report. The work accomplished in the saving of property has likewise been equaled but once, namely, in the same year, 1896, when the percentage of loss was slightly smaller. Taking into consideration, however, the services performed by the station crews outside their duties as salvors of life and property from the perils of the sea, such as extinguishing neighborhood fires, recovering miscellaneous property, etc., it may be asserted that the year's record has never been surpassed. The net expenditure for the maintenance of the service was \$1,962,524.90.

New life-saving stations were completed and manned during the year at Bethany Beach, Del., and at the entrance to Tillamook Bay, Oregon.

During the year several of the self-righting and self-bailing lifeboats in use at the stations were equipped with motive power. The remarkable extension of life-saving operations that has been effected in the localities of those stations at which mechanical power has thus been made to supplement the use of oars and sails renders it a matter of imperative necessity to similarly equipall the larger service boats. This is being done as rapidly as possible.

Adopting the Secretary's recommendation in last year's report, both Houses of the Congress passed a bill authorizing the transfer of surplus books from the Treasury Department library to the stations of the Life-Saving Service, too late, however, to receive the

approval of the President before adjournment.

Composition of Continuing Composition of

The act of the Congress approved March 26, 1908, increasing the compensation of the field force of the service, has done much to improve the conditions heretofore complained of with respect to the difficulty experienced in securing suitable men for the station crews. It is to be regretted, however, that the law carries no pension or retirement feature, which would have permitted the Government to recognize appropriately the deserts of a class of men engaged in hazardous public service.

#### JAMESTOWN EXPOSITION.

In accordance with the provisions of public act No. 211, approved March 3, 1905, and section 10 of public act No. 383, approved June 30, 1906, the first permanent settlement of English-speaking people on the Western Hemisphere was celebrated by holding an international exposition in the vicinity of Jamestown, Va.

The several appropriations made, and directed to be expended under the supervision of the Jamestown Ter-Centennial Commission, composed of the Secretaries of the Treasury, War, and Navy, in promotion of the exposition, and specifically allotted by the acts of the Congress above referred to, were placed to the credit of the respective Departments for the purposes indicated, as follows:

Jamestown Ter-Centennial Commission:	
Expenditures of the Jamestown Ter-Centennial Commission \$50,00	00
United States Government exhibit, Jamestown Exposition 200, 0	00
Policing, comfort stations, etc., Jamestown Island, Virginia 10,0	00
Aid to the Jamestown Exposition Company 250, 00	00
Aid to the Negro Development and Exposition Company 100, 0	00
Under Treasury Department:	
Monument to commemorate the first permanent settlement at	
Jamestown, Va	00
Buildings, Jamestown Exposition 350, 0	00
Under Navy Department:	
Entertainment of foreign naval representatives 100, 0	00
Permanent moorings, Jamestown Exposition 15,0	00
Exhibit of monitors, Jamestown Exposition 10,0	00
Under War Department:	
Entertainment of foreign military representatives 25,0	00
Piers, Hampton Roads, Virginia 400, 0	00
Permanent landing pier, Jamestown Island, Virginia 15,0	00

The President issued his proclamation March 29, 1905, inviting the nations of the world to participate, and on April 26, 1907, being present in person, he formally declared the Jamestown Exposition opened. On this occasion there were present many of the Cabinet officers, the Diplomatic Corps, many military and naval officials from foreign countries, and other distinguished guests.

The buildings erected comprised five large structures for exhibit purposes, including a building for the American Republics and Mexico's exhibits, club houses for the officers and enlisted men of the army and navy, a home and office building for the Jamestown Ter-Centennial Commission, and a commodious building for the exhibit made by the negroes of the country. At Jamestown Island was erected a handsome granite monument, marking the first place of settlement, and suitable rest and comfort stations were provided for the use of the public.

Permanent piers adjacent to the exposition grounds and extending into Hampton Roads were constructed as required by the War Department, permanent moorings provided by the Navy Department, a landing pier arranged for at Jamestown Island, and a large military camp and establishment made a part of the exposition immedi-

ately outside of the grounds.

At the close of the exposition all Government exhibits were carefully packed and returned to Washington, and such as might be utilized, together with other fixtures purchased for exposition purposes, will be arranged for shipment to the Alaska-Yukon-Pacific Exposition at Seattle.

All buildings erected and the permanent Government pier constructed in Hampton Roads remain in the custodianship of the Secretary of the Treasury, pending congressional action as to the other interests involved in the bill before the Senate looking to the purchase of the exposition grounds for a naval training and coaling station.

There is attached hereto a statement showing the expenditures made as directed by the Jamestown Ter-Centennial Commission. A report of the work in detail, with that of the Government Board, Negro Development and Exposition Company, and the various departments, will be transmitted to the President for the information of the Congress, as provided by law.

STATEMENT OF VOUCHERS APPROVED BY THE JAMESTOWN TER-CENTENNIAL COMMISSION, TO AND INCLUDING OCTOBER 15, 1908.

Appropriation.	Amount.	Prepara-	Mainte- nance.	Freight.	Per diem.	Transpor- tation.	Salaries.	Miscella- neous.	Total.	Balance.

#### DOUBLE-ENTRY SYSTEM OF BOOKKEEPING.

On July 1, 1907, a double-entry system of bookkeeping, as outlined in a report addressed to the President on January 19, 1907, by the Committee on Department Methods, was installed in this Department, recording the accounts of receipts and disbursements, appropriations, revenues, expenditures, and statutory acounts, and the personal accounts of fiscal officers. Controlling or general accounts are provided, which exhibit the aggregates of the detailed accounts in the books of original entry, and which insure a balance of all accounts.

The system supplements the methods in existence during past years in requiring a record by audits of the transactions of the year, so that the accounts may be exhibited on the basis of audited revenues and expenditures, and its general features have operated satisfactorily.

Approximately seven-eighths of the total yearly payments of the Government are made through disbursing officers and agents, whose accounts of disbursements are subsequently rendered, and which under existing law and the practice thereunder require from four to six months after the close of each quarter of the fiscal year for the preparation, transmission, administrative examination, and audit thereof before the results can be entered in the records of the Department. This condition operates to delay to a late period final action on the accounts for the last quarter of the year involving a very considerable part of the year's business.

For these reasons it is impracticable to present or publish at this time complete statements of audited revenues and expenditures for the year 1908, and the statements of receipts and disbursements for the last fiscal year are therefore continued on the basis of warrants issued.

#### DISBURSING OFFICERS.

A necessity exists for the good of the service and for the relief of the disbursing officers of the several executive departments, and of the independent bureaus and offices located at the seat of Government, that during their sickness or unavoidable absence, or while on their annual leaves of absence, authority be vested by law in some clerk in the same office to act in the place of such sick or absent disbursing officer, and to discharge the duties thereof during such sickness or absence; the official bond of such disbursing officer to be held to cover and apply to the acts of the person appointed to act in his place, and the clerk so appointed to be subject to all the liabilities and penalties prescribed by law for his official misconduct while he is so acting.

I recommend that appropriate legislation to this end be enacted. It is not the intent of this recommendation, however, to extend the leave of absence now allowed by law to disbursing officers.

#### SURETY BONDS.

The law makes no adequate provision for effective Federal supervision of surety companies authorized under the act of August 13, 1894, to do business with the United States. A recapitulation of the business for the last fiscal year shows that, including customs, internal revenue, and contract bonds, 500,000 bonds were required by the Government with penalties aggregating \$4,000,000,000, and that approximately one-fourth of this amount was written by surety companies.

On February 1, 1907, the Secretary of the Treasury limited the amount for which any bonding or surety company would be accepted on any one bond to 10 per cent of its capital and surplus. This regulation has been twice revised and adopted by all of the executive departments and is now in operation. It has been productive of beneficial results and should be enacted into law.

The function performed by the Treasury Department in supervising the advancement of public funds and the auditing and settling of accounts has brought under its immediate review practically all of the bonding business in which the Government is interested. Bonds of all other executive departments submitted to it for this purpose are certified by the Treasury Department as to the authorities of the executing officers of the surety companies and as to legal sufficiency; and the financial and other statements showing the condition of these companies are rendered to and passed upon by the Treasury Department, the information thus obtained being made available to the other departments. This information, disclosing as it does in a general way the business methods and financial condition of the bonding companies, emphasizes the need of further inquiry along these lines. This, however, can not effectively be done without the use of a small sum, which I recommend be appropriated for the purpose. Five thousand dollars will be adequate for the next year and this amount will be included in the annual estimates.

I renew the recommendations contained in my report of last year as follows:

The law should be amended so as to terminate the liability of the sureties on a bond as to future transactions after a new bond has been executed as required by law for the same class of disbursements.

The law relating to the liability of the sureties upon the bonds of assistant treasurers should also be amended so as to authorize a bonded deputy to act in the event of a vacancy by death or otherwise

of an assistant treasurer, or by making the bond of such officer liable for the acts of the deputy until the appointment of his successor. Only the Treasurer of the United States can now act in case of the death of an assistant treasurer.

The law should also be amended which provides that the estate of a deceased customs officer shall be liable for the acts of his deputy until the appointment of his successor. It sometimes happens that such officers have no such estates as would afford the Government adequate protection. The law should specifically make the sureties on the bond of the deceased collector liable for the acts of the deputy, or the deputy should be separately bonded.

The law prescribing a form of bond for customs officers should also be amended and the adoption of a proper form should be left to the Secretary of the Treasury as in the case of most other bonds. Because of the fact that the form of these bonds is recited in the law it becomes necessary to require, in some cases, six or eight separate bonds from such officers for the disbursement of funds which might properly be assigned to them by the Secretary under one official bond if the law authorized the requirement of a bond sufficiently broad in its terms to cover such disbursements.

#### PRINTING AND BINDING.

The expenditures for printing and binding for the entire Treasury service amounted to \$338,790.40, as follows:

Bureaus, offices, and divisions of the Department		\$216, 874. 24
Treasury Service outside of Washington—		
Customs Service	\$71, 365.88	
Internal Revenue Service	24, 677. 31	
Assistant treasurers	9, 075. 31	
Public Health and Marine-Hospital Service	4, 208. 23	
Mints and assay offices	4, 188. 24	
Revenue-Cutter Service	2, 604. 17	
Life-Saving Service	1, 709.84	
National-bank depositaries	2, 572. 25	
Custodians of public buildings	1, 390. 14	
Superintendents of construction of public buildings_	124.79	
		121, 916. 16
Total		338, 790. 40

Close supervision has been exercised over the expenditure of this appropriation by the Department committee on printing and publication, appointed pursuant to executive order of January 20, 1906, by whom all requisitions and copy are scrutinized in the interest of economy and with the view of maintaining uniformity in forms, publications, and methods.

#### STATIONERY.

The cost of the stationery supplied to the officers of the Department during the year amounted to \$119,872.49, divided as follows:

Bureaus, offices, and divisions of the Department\_\_\_\_\_\$46,691.55 Treasury Services reimbursing the stationery appropriation—

Custom Service	\$34, 719, 08	
Internal Revenue Service	15, 399. 18	
Assistant treasurers	6, 864, 70	
Bureau of Engraving and Printing	3, 027, 67	
National Bank Redemption Agency	2, 999. 40	
Public Health and Marine-Hospital Service	2, 144, 30	
Revenue-Cutter Service	2, 013, 83	
Superintendents of construction of public buildings_	1, 580. 39	
Custodians of public buildings	1,481.32	
Mint and assay offices	1, 351. 51	
Life-Saving Service	1, 312, 92	
Secret Service	286. 64	
		73, 180. 94
(Pote)		110 879 40

Of the \$46,691.55 expended for the Department proper, \$42,132.78, or about 90 per cent, was used by the following seven offices:

Office of the Secretary	\$10, 175, 04
Office of the Treasurer of the United States	
Office of the Commissioner of Internal Revenue	6, 961, 09
Office of the Comptroller of the Currency	6, 040. 51
Office of the Auditor for Post-Office Department	4, 530. 47
Office of the Auditor for War Department	2,077.91
Office of the Supervising Architect	1, 755. 39
m	10 100 50
Office of the Auditor for Post-Office Department Office of the Auditor for War Department	4, 530. 47 2, 077. 91

Of the \$34,719.08 worth of stationery furnished to the outside customs service, \$23,500.71, or about 67 per cent, went to the following seven ports:

New York	\$15, 327. 99
Boston	1, 817. 71
New Orleans	1, 547. 55
Philadelphia	1, 380. 98
Baltimore	1, 376. 28
San Francisco	1, 075, 92
Chicago.	974. 28
Total	23, 500. 71

The appropriations made by the Congress of late years for stationery supplies have not kept pace with the needs of the service, and in consequence the Department has been embarrassed by lack of sufficient funds. Increased demands for supplies have been felt especially in the branches connected with the internal revenue and customs, the finances, and the currency.

Attention is called to the objectionable method of appropriating for stationery for this Department, and to the embarrassment occasioned thereby.

The present practice, which has existed for many years, is to appropriate a certain amount (\$40,000 being the amount for the present fiscal year) for the purchase of stationery for the Department proper and its several bureaus, offices, and divisions in Washington; but in order to secure the benefits of the favorable Department contract prices, the several outside Treasury services are supplied from this appropriation by means of a repay method, by which thirteen different appropriations reimburse the stationery appropriation, to the amount (this year) of \$73,180.94. This method is cumbersome, dilatory, and expensive, and serves no good purpose. Under this method contractors' bills for supplies furnished can not be paid as promptly as they ought to be on account of the delay experienced in obtaining repay credits. Repay accounts are not approved by the auditor in the absence of the receipts of consignees for supplies furnished to them, and these receipts, in many instances, are not received for weeks after shipment; consequently the fund from which bills are paid is but slowly replenished.

If a lump sum were appropriated for the whole service, as is done in the case of the printing and binding, the public business would be simplified and improved, and legislation to that end is recommended.

#### HALL OF RECORDS.

Attention is invited to the following letter, recommending that provision be made for the erection of a hall of records in this city, which recommendation I renew at this time:

Treasury Department, Office of the Secretary, Washington, March 7, 1908.

SIR: The earnest consideration of the Congress is invited to the necessity for providing, at the present session, an appropriation for the erection of a hall of records in this city in which the uncurrent files of the various executive departments and other branches of the Government may be stored.

This matter has been agitated for many years, and on March 3, 1902, was made the subject of a special communication from the Secretary of the Treasury to the chairman of the Committee on Public Buildings and Grounds (Senate Document No. 236), in which the pressing need for such a building was fully set forth. Since that time, under authority of an act of Congress approved March 3, 1903, square No. 143, situated between Eighteenth and Nineteenth and E and F streets NW., has been acquired for a hall of records, and title thereto is now vested in the Government. Recommendations have been made yearly for an appropriation for a building to be erected on this site, and in 1904 tentative plans for such a building were prepared by the Supervising Architect of this Department.

The necessity for some structure of the character described grows constantly. An investigation made in 1906 showed that the files then on hand in all the

buildings under the control of the Treasury Department in Washington, and in space rented exclusively therefor, occupied over 1,000,000 cubical feet of space, and that they were accumulating at the rate of 25,000 cubical feet per annum.

The condition of these uncurrent files is precarious in the extreme. In many instances they occupy space which is frequented by the public and are unprotected in any way from depredation. Some of them are stored in rented buildings which are not fireproof, and are liable at any moment to be destroyed by fire. All of the available space in the different buildings under the control of this Department is now occupied, as well as two and one-half floors in a large storage building for which the Department pays an annual rental of \$8,000, and, in addition, the Department is compelled to use corridors and other valuable space which is badly needed for the transaction of current business.

While these files are referred to as "uncurrent," it must be borne in mind that reference is made to them almost constantly; that in most instances they pertain to questions of great importance; that they have been accumulating since the organization of the Government, and that their destruction by fire would cause almost irreparable injury, confusion, and delay in the transaction of the public business. It is therefore absolutely necessary that sufficient space be provided to assemble them in such a manner that they may be of ready access. They are now inaccessible for reference, except with great labor, on account of insufficient space, and at the same time are daily exposed to loss, decay, and accidents which may at any time destroy them in whole or in part.

While there is no recent data covering the other executive departments and governmental establishments, it is believed that similar conditions prevail in all.

In my opinion there are few, if any, public improvements here for which there is greater need than for a hall of records, and the matter is presented with the earnest hope that action will be taken at this session looking to the erection of such a building.

Respectfully,

GEO. B. CORTELYOU,

Secretary.

To the Speaker of the House of Representatives.

#### SEPARATE BUILDING FOR AUDITORS.

The construction of a separate building in the city of Washington to accommodate the offices of the various auditors is urgently needed. At the present time these offices are located in various buildings throughout the city. Not only is this inconvenient in the administration of business, but the rents which are paid for quarters for these auditors annually amount to a considerable sum. The following is a statement of the space occupied by the various auditors and the amounts paid for rented quarters:

The auditors for the Treasury, War, Interior, and (in part) Post-Office Departments are in buildings owned by the Government.

The auditors for the Navy, State and Other Departments, and Post-Office (in part) are now in rented quarters.

The Auditor for the Treasury Department occupies 20,719 square feet.

The Auditor for the War Department occupies 83,721 square feet, of which amount 13,545 square feet are in rented quarters at a cost of \$2,500 per annum.

The Auditor for the Post-Office Department occupies 95,407 square feet, of which 20,773 square feet is in rented quarters, at a cost of approximately \$8,000 per annum.

The Auditor for the State and Other Departments is entirely in rented quarters, and occupies 15,000 square feet, at a cost of \$8,500 per annum.

The Auditor for the Navy Department occupies 15,120 square feet, in rented quarters at a cost of \$11.980 per annum.

Quarters for the Auditor for the Interior Department, comprising 41,246 square feet, at a cost of approximately \$15,250 per annum, are now under consideration.

In addition, a portion of a building on E street is rented for storage purposes, at an annual cost of \$3,000.

It will be seen that approximately 106,000 square feet is rented at an annual cost of \$49,230. In addition, the space occupied by the auditors in Government buildings could be better used for the accommodation of other bureaus and offices. For example, the quarters now assigned to the Auditor for the Treasury Department, if vacated by him, could be used to accommodate the Life-Saving Service and the Public Health and Marine-Hospital Service, both of which in the interests of good administration should be located in the main Treasury building. The Life-Saving Service pays annually \$5,136 for quarters.

It is estimated that by the construction of an adequate building for auditors' offices approximately \$60,000 could be saved annually in rent, in addition to facilitating very greatly the administration of public business and affording additional space for a number of bureaus that at the present time are unduly cramped.

A building to accommodate the various auditors and to allow for a reasonable increase should contain 7,500,000 cubic feet and would cost approximately \$3,750,000, exclusive of site.

#### REDUCING UNNECESSARY MOVEMENTS OF GOLD.

The advantage of reducing to a minimum the transfer of gold between the financial centers of the world has been often discussed, but has not yet been the subject of official action. Economy in such transfers has come about automatically from time to time by the extension of the system of bills of exchange and of the use of international credits. Distrust of these resources in times of crisis—the very moment at which they are most needed—invokes the demand for physical gold. Even under ordinary conditions, the interval between the outward crop movement from this country and the payment for foreign merchandise imported in the spring is often marked by shipments of gold in both directions, which the mechanism of international exchange has not yet found the means of entirely avoiding.

The movement of gold was exceptionally large last autumn and spring because of the disturbance to credit which so seriously affected not only the American market but the markets of other countries. The three months of November and December, 1907, and January, 1908, witnessed imports of gold into the United States to the amount of \$118,822,870. On the other hand, the three months of April, May,

and June, 1908, witnessed experts of gold from the United States to the amount of \$49,658,972. For the twelve months ending October 31, 1908, total imports of gold were \$150,234,064, and total experts were \$72,509,564. The excess of imports stood at \$77,724,500, as against an excess of experts for the twelve months ending October 31, 1907, of \$5,513,526.

It would seem that means might be devised to diminish the transfer of physical gold under these conditions. That credits or loans of gold might be extended more generously than at present by one nation to another in times of stress was proposed soon after the crisis of a year ago. It has been suggested that an international conference be called of representatives of the ministries of finance and of the great state banks with a view to more prompt and effective cooperation in emergencies. It is not proposed here to enter upon a general discussion of this subject, but if such a conference should be held, there might well be included in the list of topics to be considered the creation of an international gold certificate, which would represent for all practical purposes the transfer of gold coin or bullion without the necessity of transferring the metal itself.

Such an arrangement would require international sanction, either by an agreement among the leading banks of the world to issue a transferable international certificate upon a certain amount of gold coin, definitely set aside for the purpose, or an agreement through diplomatic channels among the several governments to some similar arrangement under official control.

In the present advanced state of public faith and of financial responsibility there is apparently no serious obstacle to reaching such an agreement if measures are once set on foot by those capable of carrying it out. The issue of such international certificates, payable on demand, like the gold certificate of the United States, would not prevent the transfer of the physical gold when desired. The certificates might be redeemable in all countries which were parties to the agreement, without regard to the country in which they were issued, and it might be left to those in charge of the gold funds to determine from time to time whether physical transfers of gold were required. Actual transfer might be advisable where there was reason to believe that the movement was more or less permanent in character, but it would seem that such transfers might be reduced to the minimum where it seemed probable that the metal would be recalled by the normal movement of trade within the space of a few months. It is suggested that the Secretary of the Treasury might be authorized to receive hospitably any suggestion on this subject from abroad and to appoint through the proper channels delegates on behalf of the United States to any conference which might be assembled having the subject within the scope of its deliberations.

### THE REGULATION OF THE BUDGET.

A question which grows in importance with the growth of the country is that of an economical adjustment of disbursements to current receipts and the classification of both receipts and disbursements in such a way as to facilitate such an adjustment. The rapid growth of net receipts and net disbursements at intervals of ten years since the lowest point after the civil war is indicated by the following figures:

Year.	Net receipts.	Net disburse- ments.
1878.	\$257, 446, 776	\$236, 964, 327
1888.	379, 266, 075	259, 653, 959
1898.	405, 321, 335	443, 368, 582
1908.	601, 126, 118	659, 196, 319

If interest on the public debt is excluded, the growth in ordinary expenditures for carrying on the Government, including payments for pensions and many public works, was from \$135,000,000 in 1878 to \$638,000,000 in 1908, or an increase in a generation of nearly 400 per cent. It is not intended here to enter upon any criticisms of detail, nor to minimize the benefits which have resulted from these expenditures to the health, comfort, and security of our people; but it is desired to point out that the distribution of such immense sums raised by taxation should be subjected to scrutiny, classification, and coordination. The present method of dealing with the subject is entirely lacking in system.

Under the relations of the different branches of our Government there is practically no control by the executive department over the appropriations made by the Congress (except by veto of the President), and no control by the Treasury or any other branch of the Government over the amount of the estimates submitted by the various executive departments to the Congress. The Secretary of the Treasury is given authority to transmit to the Congress estimates of revenue and expenditure, but he is not authorized by existing law to reduce these estimates to conform to the receipts. Nor is any single committee of the Congress charged with the comparison and coordination of the appropriations for different branches of the public service in order to distribute equitably any reductions or increases which may be warranted by the state of the revenue.

From this point of view the subject is a broad one and one with which it is not possible for a single Department to deal without the cooperation of other Departments. The Secretary of the Treasury, however, occupies by law a relation toward the Congress which in many respects is one of more direct responsibility than that of the heads of other Departments. It is declared by statutes which have not been repealed that the Secretary of the Treasury "shall make re-

port, and give information to either branch of the legislature in person or in writing, as may be required, respecting all matters referred to him by the Senate or House of Representatives, or which shall appertain to his office."

It would perhaps be competent for the Congress to vest in a joint committee the power of revising the appropriation bills, with a view to distributing reductions and increases in an equitable manner and with a view also to the relative importance of the objects for which appropriations were sought. It would seem that such a committee on budget revision should be charged with the responsibility of keeping the expenditures of each year approximately within the revenue of the year, or, if this could not be done without crippling branches of the public service, that it should authorize the issue of a proper amount of short-term obligations to bridge over the deficit of lean years. By such a committee needless and wasteful expenditure might be checked and the amounts saved diverted to more necessary or more beneficial purposes.

Whatever may be found practicable in regard to the larger question of control of the budget, something will be accomplished in promoting scrutiny of expenditures by a proper classification of sources of revenue and objects of expenditure. It is the intention of this Department to make modifications in the present form of Treasury statements as soon as the merits of such changes can be carefully weighed. The present form of daily statements is in several respects misleading. It makes no separation between expenditures for the ordinary service of the Government and those for permanent public works, like river and harbor improvements, public buildings, and the Panama Canal. In many foreign budgets, expenditures for permanent improvements are provided for by the issue of bonds, and are stated in a separate account from expenditures for the maintenance of the ordinary service of the Government.

Putting our budget on this basis for the past fiscal year, for purposes of illustration, the account would stand as follows:

## FISCAL YEAR ENDING JUNE 30, 1908.

# Net ordinary receipts and disbursements.

Receipts	\$601, 126, 118. 53
Disbursements	570, 477, 838. 81
Surplus of receipts	30, 648, 279, 72
Extraordinary receipts and disbursements.	
Receipts:	
Sale of Panama bonds	\$24, 631, 980.00
Sale of Treasury certificates	15, 436, 500.00
From premiums	735, 788. 67
Total	40, 804, 268, 67

#### Disbursements:

For Panama Canal	\$38, 093, 425, 29
For public buildings under Treasury Department	9, 341, 364. 55
For Reclamation Service	11, 126, 042, 02
For rivers and harbors	30, 157, 649. 01
For reduction of the public debt	34, 356, 750. 00
775 - 4 - 1	100 075 000 07
Total	123, 075, 230. 87

Whether or not all items which involve permanent capital improvements should be placed in a separate account may be open to question. It may be proper in some cases to charge them to current revenue; but there can be no question that when bonds are actually sold by the Government to meet the cost of an important public work, like the Panama Canal, such expenditures should be placed in a separate account or the proceeds of the bonds sold should be included in the receipts.

Under the present form of making up the daily Treasury statement the proceeds of bonds sold are not counted in the receipts, but all the money which is paid out for the purpose for which the bonds are issued is included in expenditures; thus expenditures for the Panama Canal and other public works appear mixed with expenditures for maintenance of the public service. From this cause arose the large apparent deficit for the last fiscal year, which was stated at \$58,070,201. Of total expenditures, however, the sum of \$88,718,481 was expended on public works, including \$38,000,000 on the Panama Canal and \$30,000,000 on rivers and harbors. Had these items been carried to a separate account as extraordinary expenditures and their cost met by the sale of bonds there would have been a surplus of current receipts amounting to over \$30,000,000, as shown above.

There are other items, like payments of lawful money for the redemption of bank notes, under the provisions of the act of July 14, 1890, which introduce confusion into the exhibit which the Treasury balance sheet should make of the difference between current income and expenditure for the maintenance of the public service.

It is commended to the serious consideration of the Congress whether a careful study should not be made of the entire subject of the budget, with a view not to niggardly economies, but to applying the money of the taxpayers in the most efficient and beneficial manner to those objects of expenditure which are most desirable.

#### ECONOMIES IN ADMINISTRATION.

There have been, under many administrations, excessive expenditures, due to one cause or another. The time may come when a session of the Congress will be given over largely to the consideration of ways and means to reduce the operating expenses of the Government, and if it does come, and patriotic and discriminating judgment

is brought to bear on the problem, we shall see a saving of many millions of dollars with no sacrifice of efficiency of administration. Few domestic reforms would do so much to set the people an example of good business and economical government.

### REVISION OF THE TARIFF.

The new administration is pledged to a fair and equitable revision of the tariff. The necessities of the Government should be a guide, at least in part, to the measure and character of this revision. Data recorded in this report tell their own story. If the deficiencies reach anything like the figures given, ample provision must be made, if necessary through new subjects of taxation, to provide adequate revenue. The earnest consideration of the Congress is especially urged to this phase of the subject.

#### CURRENCY LEGISLATION.

The Monetary Commission created by the Congress at its last session has presented to it a great opportunity for public service. The scope of its authority is apparently equal to the wide range of subjects that must be considered if the existing needs of our currency system are to be adequately met. The necessity has long existed, and during the past year has been especially apparent, for greater flexibility in our circulating medium, for better apportionment of bank reserves, for ampler and more scientifically adjusted redemption facilities, and for the adoption of other elements which shall bring the system closer to the people of the whole country. To soundness must be added greater effectiveness. There should be no hostility between the banker and his customers, and to assure this, heed must be paid to just demands that are now made by the merchant, the farmer, and the mechanic, by workers in all lines of activity outside of the business of banking.

The increase in our population, the development of industry, both national and international, present problems which can not be solved by a blind adherence to all the details of a system which, though in many ways well adapted to our requirements and of great service to our people, as it has been, was yet primarily the outgrowth of the exigencies of a time of civil strife. The changed conditions call for modifications of the existing system, or for the ultimate establishment, if it can be safeguarded so as to keep it out of the domain of politics on the one hand and the control of great moneyed interests on the other, of a central institution of issue and reserve.

What is essentially a question of finance is embodied in the proposition to establish postal savings banks. If it is decided to establish such a system, the conditions under which it is put in operation should be made to harmonize fully with the general financial operations of the Government.

The recent currency measure has served a useful purpose and will be available until the recommendations of the commission can be considered and acted upon. But we have had unfortunate experiences in our past financial disturbances, and though their recurrence may at this time appear to be a thing of the distant future, we should not be satisfied with what is essentially a temporary measure, however satisfactory it may be as such.

With the likelihood of an early return of the more prosperous conditions which have obtained up to within the past twelvemonth, encouraging renewed activity in all fields of enterprise, we should be still further fortified by wisely considered, comprehensive, and thoroughgoing currency legislation, which shall not only meet the normal needs of all sections of the country and all classes of our population, as well as facilitate our foreign exchanges, but which shall promptly and adequately respond to those extraordinary demands which manifest themselves at such seasons as the crop-moving periods, and at the same time be effective in sudden crises, which no financial system, however strong, can wholly avert.

Geo. B. Cortelyou, Secretary of the Treasury.

To the Speaker of the House of Representatives.

	LOAN OF JULY AND AUGUST, 1861.  The act of July 17, 1801 (12 Statutes, 259), authorized the issue of \$250,000,000 bonds, with interest at not exceeding 7 per centum per annum, redeemable after twenty years. The act of Augusts, 1861 (12 Statutes, 361), authorized the issue of bonds, with interest at 6 per centum per annum, payable after twenty years from date, in exchange for 7-30 notes issued under the act of July 17, 1861.	LOAN OF JULY AND AUGUST, 1861. Continued at 34 per cent interest, and redeemable at the pleasure of the Government.  OLD DEMAND NOTES.	Acts of July 17, 1861 (12 Statutes, 259); August 5, 1861 (12 Statutes, 313); February 12, 1862 (12 Statutes, 338). SEVEN-THIRTIES OF 1861.	Act of July 17, 1861 (12 Statutes, 259) FIVE-TWENTIES OF 1862.	Acts of February 25, 1862 (12 Statutes, 345); March 3, 1864 (13 Statutes, 13), and January 28, 1865 (13 Statutes, 425). LEGAL-TENDER NOTES.	The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$15,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars as the Sectetary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July II, 1861, these notes to be a legal tender in payment of all debls, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for 6 per cent United States bonds. The act of July II, 1862 (12 Statutes, 552), authorized an additional issue of \$150,000,000, of such denomination as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$55,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863 (12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denomination than five dollars; these notes to be a legal tender as before authorized, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The such and the time in which the

a Including reissues.

so established—first, by exchanging the notes so redeemed for any good coun in the general fund of the Tresury, second, by accepting deposits of gold coin at the Tresury or at any subtreasury in exchange for such notes; hird, by procuring gold coin by the use of said notes in accordance with the provisions of section 3700 of the Revised Statutes of the United States. The above-mentioned act also provides that if the Severtary of the Tresury is mable to resione and maintain the gold coin in the reserve fund by the forethe prompt and certain redemption of such notes it shall be the duty of the Secretary of the Treasury to set apart in the Treasury a reservethnoi of one hundred and fifty million dollars in gold coin and whenever and as often as any of said notes shall be redeemed from said fund it shall be the duty of the Secretary of the Treasury to going methods, and the amount of such gold coin and bullion in said fund shall at any time fall below one hundred million dollars, it shall be his duty to restore the same to the maximum sum of one bullion, to be used for such redemption purposes only, and that The act of March 14, 1900, provides that United States notes, when coin of the standard fixed in said act, and that in order to secure use said notes so redeemed to restore and maintain the reserve fund hundred and fifty million dollars by borrowing money on the credit of the United States, and for the debt so incurred to issue and sell coupon or registered bonds of the United States bearing interest at the rate of not exceeding three per centum per annum, payable quarterly, the bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, the gold coin received from the sale of said bonds to be exchanged for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet defipresented to the Treasury for redemption, shall be redeemed in gold kept in circulation.

J. 1863. The amount of notes authorized by this act were to be in iten of \$100,000,000 authorized by the resolution of January 17, 1863 T2 Stantuse, \$22). The act of May 31, 1878 (20 Stantus, 87), provides

Freasury notes might be exchanged for United States bonds to Jul

that no more of the United States legal-tender notes shall be eaneeled or retired, and that when any of said notes are redeemed or received into the Trensnry under any law, from any source what.

ever, and shall belong to the United States, they shall not be retired, canceled, or destroyed, but shall be reissued and paid out again, and

ests may require, except that they shall not be used to meet deficiencies in the current revenes.

The act of March 4, 1907, section 2, provides that whenever and so long as the outstanding silver certificates of the denominations of one dollar, two dollars, shand five dollars, issued under the provisions of section seven of an act entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coince by the United States, to refund the public debt, and for other purposes," approved March fourteenth, mineteen hundred.

aIn the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption and added to the eash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption, should properly be deducted from the principal of the public debt in making comparison with former years.

b Exclusive of gold, silver, currency certificates, and Treasury notes of 1890 held in the Treasurer's cash, and including outstanding bonds issued to the several Pacific railroads.

c Exclusive of gold and silver certificates and Treasury notes of 1890 held in the Treasurer's cash.

Note 1.—Annual interest charge computed on amount of outstanding principal at close of fiscal year and is exclusive of interest charge on Pacific Railway bonds. Note 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

Note 3.—The femporary loan per act of July 11, 1862, is included in the 4 percents from 1882 to 1868, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days motice after thirty days, but being constantly changing it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on a average for the year.

a Based on warrants issued

b The cost of collecting the internal revenue embraces the following items: Salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine; salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses; paper for internal-revenue stamps, and expenses of detecting and punishing violations of internal-revenue laws.

and expenses of detecting and punishing violations of internal-revenue laws.

"The expenses of collecting the revenue from customs includes all sums drawn from the appropriation made by Congress for that purpose. The money is expended for salaries, rents, labor in weighing, gauging, and measuring imported merchandise, revenue boatmen, repairs, and other expenses incident to rented buildings, stationery, and the traveling expenses of special agents, but does not include disbursements for revenue cutters, fuel, lights, water, furniture, janitors, etc., for buildings owned by the Government, nor disbursements for creeting new buildings, all of which are paid for from specific appropriations made for those purposes.

specific appropriations made for those purposes.

The expenses of collecting internal and customs revenue do not include the disbursements for salaries, etc., incident to auditing these accounts in the Departments at Washington.

d No data.

Table I.—Statement showing the Receipts and Disbursements of the Government by Months; the Legal-Tender Notes, Net Gold, AND AVAILABLE CASH IN THE TREASURY AT THE END OF EACH MONTH; THE MONTHLY REDEMPTION OF LEGAL-TENDER NOTES IN GOLD, AND THE IMPORTS AND EXPORTS OF GOLD, FROM JULY, 1896, TO JUNE, 1908, INCLUSIVE.

a Excess of disbursements.

Nore.—The receipts and disbursements by months are made up from partial reports, and, being subject to change by subsequent concentration of accounts, do not agree with the totals by years. The latter are the actual results, as shown by complete returns.

Table J.—Statement of Receipts of the United States from March 4, 1789, June 30) from that time. For Postal

				2 00 / 111011		2011 2001112

Note 1.—Specie payments were suspended from January 1, 1862, to January 1, 1879. During the greater part of that period gold and silver coins were not in circulation except on the Pacific coast, where, it is estimated, the specie circulation was generally about \$25,000,000. This estimated amount is the only coin included in the above statement from 1862 to 1875, inclusive.

Note 2.—In 1876 subsidiary silver again came into use, and is included in this statement, beginning

with that year.

Note 3.—The coinage of standard silver dollars began in 1878, under the act of February 28, 1878.

Note 4.—Specie payments were resumed January 1, 1879, and all gold and silver coins, as well as gold and silver bullion in the Treasury, are included in this statement from and after that date.

Note 5.—For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury, and is not included in the account of money held as assets of the Government.

Note 6.—This table represents the circulation of the United States as shown by the revised state-

NOTE 6.—In table represents the circulation of the United States as shown by the revised statements of the Treasury Department for June 30 of each of the years specified.

Note 7.—The Director of the Mint recently made a revised estimate of the stock of gold coin, and, as a consequence of such revision, the estimated stock of gold in the United States and of gold coin in circulation has been reduced \$135,000,000 in the figures for 1907.

NOTE 8.—The details of the foregoing table, showing the amount of each kind of money in circulation each year since 1860, are omitted; but they may be had upon application to the Secretary of the Treasury, Division of Loans and Currency, where a circular covering information on the subject has been prepared for distribution. been prepared for distribution.

c Covering a period from November 25, 1907, upon the consolidation of the second and fifth districts of Tennessee, to June 30, 1908, inclusive.

Note.—The foregoing statement of expenses does not include salaries and expenses of internal-revenue agents, salaries of the officers and clerks in the office of the Commissioner of Internal Revenue, amounts expended in detecting and punishing violations of internal-revenue laws, cost of paper for internal-revenue stamps, and certain miscellaneous expenses.

Amount of expenses as above stated	\$4,158,491.32
Expenses not included in above	672, 207, 33

dThis amount differs with the amount stated as disbursements by warrants in Table H of this report, for the reason that only the expenses incurred and paid from the appropriations pertaining to fiscal year 1908 are shown herein.

b Covering a period from July 1 to November 24, 1907, at which time the second and fifth districts of Tennessee were consolidated.

APPENDIX TO THE REPORT ON THE FINANCES.

# APPENDIX.

# REPORTS OF HEADS OF BUREAUS.

# REPORT OF THE TREASURER.

Treasury Department,
Office of the Treasurer,
Washington, November 2, 1908.

Sir: The transactions of the Treasury of the United States for the fiscal year ended June 30, 1908, and its condition on that and subsequent dates, are presented in the annexed tables.

# REVENUES AND EXPENDITURES FOR 1907 AND 1908.

The usual relations between the income and outgo of the Government were unexpectedly disturbed during the greater part of the fiscal year 1908, and as a result, the ordinary revenues were \$58,070,201.15 less than the expenditures. Contrasted with the showing for the preceding fiscal year when the revenues were \$84,236,586.30 in excess of the expenditures, the change is not only a surprising one, but it also emphasizes the fact that the income of the Government is not exempt from the influences of trade depression.

The ordinary revenues and expenditures for the past two years are recorded in the table following:

REVENUES AND EXPENDITURES FOR FISCAL YEARS 1907 AND 1908.

It is a noteworthy fact that the total revenues for 1908 were in excess of those of any preceding fiscal year, with the single exception of 1907. If the expenditures of 1908 had not been in excess of those of 1907, there would have been a surplus of \$22,222,370.78, notwithstanding the decrease of \$62,014,215.52 in the revenues. Thus it becomes apparent that the trouble is not in decreasing receipts, but the great increase of expenditures.

Fortunately the condition of the available cash balance, \$272,061,445.47, at the beginning of the fiscal year was such as to enable the Government to meet a large deficiency in revenue without

embarrassment.

REVENUES AND EXPENDITURES, FIRST QUARTERS OF 1908 AND 1909.

For the first quarter of 1909 the revenues were \$33,362,536.64 less than the expenditures, and as compared with the same period in the preceding fiscal year, there was a decrease of \$19,787,287.22 in the revenues and an increase of \$9,155,985.50 in the expenditures.

The comparison, by items, for the two quarters follows:

RECEIPTS AND DISBURSEMENTS ON ACCOUNT OF THE POST-OFFICE DEPARTMENT.

The receipts and expenditures on account of the Post-Office Department are under the exclusive control of the Postmaster-General. A statement of transactions relative thereto at the Treasury offices during the past year will be found on page 192 of this report.

#### TRANSACTIONS IN THE PUBLIC DEBT.

The total receipts on account of the public debt during the last fiscal year were \$909,463,405.17 and the disbursements \$739,111,906.50.

Comparison of the transactions, by items, for the fiscal years 1907 and 1908 may be studied in the table following:

PUBLIC DEBT, 1907 AND 1908, AND FIRST QUARTER OF 1909.

The aggregate amount of the public debt, including certificates and treasury notes (trust funds, offset by an equal amount of cash in the Treasury), June 30, 1907, was \$2,457,188,061.54, and at the close of the fiscal year 1908, \$2,626,806,271.54, an apparent increase of \$169,618,210. The additions to the various accounts were: Panama Canal loan, \$24,631,980; certificates of indebtedness, \$14,186,500; matured loans, \$3,042,200; national-bank notes (redemption fund), \$24,800,480; gold certificates, \$141,539,000, while reductions were made in the following accounts: Funded loan of 1907, \$36,126,150; refunding certificates, \$22,620; fractional currency, \$1,180; silver certificates, \$1,427,000; treasury notes, \$1,006,000.

The total debt at the close of the first quarter of 1909 was \$2,632,337,092.04, an apparent increase of \$5,530,820.50 since June 30, the net result of the following transactions: Interest-bearing debt decreased \$250,000; debt bearing no interest decreased \$30,124,179.50,

while there was an increase of \$35,905,000 in the trust funds, as may be observed from the comparative statement of the debt following:

## PAYMENT OF SPANISH INDEMNITY CERTIFICATES.

The Secretary of the Treasury on January 13, 1908, gave notice to the holders of the Spanish indemnity certificates of 1834 that the department had received from the Government of Spain, through the Department of State, the sum of \$570,000, to be paid to such holders in full satisfaction of their certificates, the face value of which aggregated \$599,850.16.

In conformity with such notice, settlement was made to June 30 of certificates having a face value of \$591,896.03, for which the amount

of \$562,441.67 was paid.

#### PURCHASE OF CERTIFICATES OF INDEBTEDNESS.

The Secretary of the Treasury on March 3, 1908, authorized the purchase of \$1,250,000 of the certificates of indebtedness issued under the act of June 13, 1898, at par and interest to date of purchase. The total disbursement in the transaction was \$1,260,582.18.

## REDEMPTION OF THE FUNDED LOAN OF 1907.

The bonds of the funded loan of 1907, having been called for redemption, ceased to bear interest from the date of maturity, July 2, 1907. The amount of this loan outstanding November 1, 1908, was \$2,677,000.

There appears to be unnecessary delay in presenting for redemption the bonds of matured loans, and the attention of holders thereof is invited to the amount outstanding at the present time, viz:

Loan.	Matured.	Amount.
Funded loan of 1891 Funded loan of 1891 continued at 2 per cent. Loan of 1904. Funded loan of 1907 Refunding certificates. Total.	July 2, 1907 July 1, 1907	\$24,500 32,000 72,450 2,677,000 18,030 2,823,980

# THE PANIC OF 1907 AND MEASURES OF RELIEF BY THE TREASURY.

Financial conditions became very acute in New York about the 20th of October, and the Treasury Department used \$37,597,000 of its available resources for the relief of the stringency at that point by increasing public deposits in national banks therein (as stated on p. 161 of this report), thereby reducing its working balance to the lowest point indicated by prudence under prevailing conditions. There was an unusual shortage of ready cash to meet current demands, and many national banks were unwilling to part with their currency to cash freely the government checks, owing to the fear that they might not be able to secure currency in return for such payment. The Treasurer therefore directed the nine assistant treasurers to pay or ship currency on all Treasury and Post-Office Department warrants or drafts and United States disbursing officers' checks drawn upon any subtreasury office when presented properly indorsed and the indorsement guaranteed by the bank presenting the same. Under these instructions the holders of such paper were enabled to convert it into cash upon presentation to the nearest subtreasury without the delay usually attending the collection of such items from the officer upon whom drawn. This action caused a formidable amount of extra work, lasting several months, and great inconvenience to the Treasury in clearing the accounts.

The kinds of paper and amounts involved in the payments by each office are recorded in the statement following:

	Kinds of obligations.					
Warrants and cheeks drawn on other offices and paid by—	Treasury warrants and checks.	Post-office warrants.	Disbursing officers' checks.	Total.

Total	595, 724. 09	1, 210, 823. 91	14, 841, 030. 68	16, 647, 578. 68		

The Secretary of the Treasury early in October notified depositary banks that they would be permitted to substitute bonds acceptable for savings-banks investments under the laws of the States of New York, Massachusetts, Connecticut, and New Jersey for government bonds which were pledged as security for public deposits, provided the bonds thus released were deposited for additional bank-note circulation. The offer was readily accepted by the banks, and United States bonds to the amount of \$44,109,860 were thus made available for the issue of circulation which was used in relieving the shortage

The supply of United States bonds in the market available for the issue of circulation was limited in quantity and held at such a price as to practically make it unprofitable to the banks to buy the bonds and take out circulation thereon. To relieve this situation and to counteract the premium on currency, the Secretary of the Treasury on November 17, 1907, announced that he would receive bids for an issue of \$50,000,000 in Panama Canal bonds under the act of June 28, 1902, and \$100,000,000 in 3 per cent certificates of indebtedness under the act of June 13, 1898. Under ordinary conditions, the proceeds of these sales would have been deposited in the Treasury, thereby withdrawing that amount of money from circulation. But in this instance to turn the sale into a relief measure as well as to make it an inducement to banks to purchase the new issues with a view to making them a basis for circulation, it was deemed advisable to allow the banks to which awards of Panama Canal bonds were made, to retain 90 per cent, and those to which awards of certificates of indebtedness were made, 75 per cent of the purchase price as additional deposits. The amount of each class of obligation sold was, Panama Canal loan \$24,631,980 and certificates of indebtedness \$15,436,500. securities were almost wholly absorbed by banks and were used as a basis for increasing the bank-note circulation or securing public deposits.

The accumulated balances arising from our foreign-trade relations placed a number of the financial institutions of the country in a very advantageous position for importing gold. During the month of October engagements of \$24,000,000 in gold for import were announced, and by January 1, 1908, such imports aggregated more

than \$100,000,000.

The inflow of this large amount of gold exerted a very great influence in restoring confidence, and relieved the pressing needs for currency in those localities favored by its distribution. The Treasury, through the medium of the general fund, facilitated this movement by receiving gold deposits of \$52,462,051 at the subtreasury in New York during November and December, making payments therefor at other points as follows:

Washington	\$203,000	Chicago	\$22, 685, 932
Boston	572,000	St. Louis	5, 790, 700
Cincinnati	391, 400	Denver	2, 545, 392
New Orleans	2, 641, 500	_	
San Francisco	14, 677, 127	Total	52, 462, 051
Philadelphia	9 955 000		1 1

## RESERVE AND TRUST FUNDS.

The amount of gold coin and certificates in circulation seem to supply all demands for the precious metal. There are numerous transactions in the reserve fund, but they are not indicative of a desire to obtain gold in exchange for notes redeemable therefrom. The redemptions from the reserve fund during the fiscal year 1908

were, in United States notes, \$21,278,307, and in Treasury notes, \$41,705, making a total of \$21,320,012. In accordance with the provisions of law, the redeemed notes were immediately transferred to the general fund in exchange for gold which restored the reserve to the fixed amount.

The net growth in the volume of the trust funds during the last fiscal year was \$139,106,000. The gold coin increased \$141,539,000, while there was a decrease of \$2,433,000 in standard silver dollars. These funds are held for the redemption of the certificates and notes outstanding for which they are respectively pledged.

The transactions in the certificates and notes were as follows:

Kind.	Outstanding	Fiscal y	Outstanding		
Anu.	June 30, 1907. Issued.		Redeemed.	June 30, 1908.	
Gold certificates. Silver certificates. Treasury notes.	\$678, 244, 869 475, 777, 000 5, 988, 000	\$378, 360, 000 302, 356, 000	\$236, 821, 000 303, 783, 000 1, 006, 000	\$819,783,869 474,350,000 4,982,000	
Total	1,160,009,869	680,716,000	541,610,000	1, 299, 115, 869	

The foregoing statement does not include \$3,140,000 in gold certificates, series of 1900, that had been issued but not reported in time to be taken up in the public-debt statement for June.

The revised figures at the close of the fiscal year were:

# RESERVE FUND.

#### TRUST FUNDS.

[Held for the redemption of the notes and certificates for which they are respectively pledged.]

DIVISION OF REDEMPTION.	DIVISION OF ISSUE.

The excess of ordinary expenditures over revenues, by warrants issued during the fiscal year 1908, was \$58,070,201.15, but this amount is not reflected in the available cash balance on June 30, 1908, upon comparison with like cash of twelve months earlier, for the reason that the receipts and disbursements on certain public-debt items and two miscellaneous items are not included in the account of ordinary revenues and expenditures.

The following analysis and proof of the available cash balance takes into account every receipt or expenditure that in any way affects

the showing, viz:

#### AVAILABLE CASH BALANCE.

Less decrease in amount of moneys not covered by warrants.....

245, 266, 265.90

94, 918. 17

The reversal of financial conditions during the last year has resulted in a considerable reduction of the available cash balance in the Treasury at the close of the fiscal year 1908. The Government in its financial transactions stands on the same plane as the merchant who in periods of prosperity accumulates a fund that enables him to meet his obligations when conditions are reversed. In previous years the excess of revenues over expenditures favored the accumulation of an increased balance in the Treasury, which, during the recent period of depression, furnished the means to continue the operations of the Government.

The balance in the Treasury at the end of each month from January, 1902, is stated in Table No. 31, page 229 of the appendix; and for July 1 in each year since 1896 in the statement following:

AVAILABLE CASH BALANCE (INCLUDING THE RESERVE FUND), FROM THE REVISED STATEMENTS, ON THE DATES NAMED.

D. (	Available cash balance.			
Date.	Reserve fund.	Balance.	Total.

#### GOLD IN THE TREASURY.

The steady flow of gold into the Treasury continues to interest the students of finance at home as well as abroad and to excite an absorbing study of the resources of a country so favored in the distribution of the precious metal. There was a net increase of \$100,196,952 in the Treasury holdings of gold during the fiscal year 1908, an amount equal to 66 per cent of the growth in the general stock of gold in the country during the year.

By October 31, 1908, the holdings were \$1,039,298,181, an increase

of \$34,409,499 since July 1, 1908.

The total amount of gold in the Treasury on July 1 in each year from 1897, set apart for the respective uses, is here stated:

# GOLD IN THE TREASURY.

Date.	Reserve.	For certificates in circulation.	General fund (belonging to Treasury).	Total.

## BONDS HELD AS SECURITY FOR NATIONAL BANKS.

At the close of the fiscal year 1908 the United States bonds held in trust for national banks to secure their circulating notes amounted to \$628,172,130, an increase of \$69,807,470 as compared with the

amount held at the close of the previous year.

The increase of public moneys in national banks during the financial stringency in October, 1907, and following months called for the pledge of unusual amounts of obligations to secure the deposits. The amount of bonds held to secure deposits attained a maximum at \$296.338.417.26 on December 31, 1907, and was reduced to \$180,509,419 by the close of fiscal year 1908.

The transactions relative to deposits and withdrawals of bonds

during the fiscal year 1908 are recorded in the table following:

Bonds Held for National Banks, Close of June, 1907 and 1908, and September 30, 1908, and Changes during 1908.

### WITHDRAWAL OF BONDS TO SECURE CIRCULATION.

The deposits of lawful money in the Treasury for the retirement of national-bank notes under the provisions of the act limiting such deposits to \$108,000,000 annually, amounted to \$37,112,837.50 during the fiscal year 1908. From the foregoing it will be seen that the banks have availed of but little more than one-third of the option; therefore the law is not restrictive on retirements until the limit of \$9,000,000 per month has been reached. The largest monthly deposit was \$10,735,750 in February, which apparently was in excess of the limit; but of this amount \$4,290,500 was deposited in subtreasuries near the close of January and was not taken up on the books of this office until February.

The monthly deposits are recorded in Table No. 64 on page 270 of

this report.

# NATIONAL BANKS DESIGNATED AS DEPOSITARIES OF THE UNITED STATES.

The Secretary of the Treasury deemed it expedient to increase the number of depositary banks during the last fiscal year. The object to be attained in selecting banks as depositaries of public moneys is to afford to the business community the necessary means for promoting its transactions upon a normal basis of money supply, and the aim has been to designate banks in every part of the country, so that the benefit arising from the use of the funds thus distributed would extend even to the most remote localities.

The growth in the number of depositaries which qualified is shown

in the statement following:

Number of depositaries June 30, 1907.  Net increase during the fiscal year 1908.	1, 255 181

#### PUBLIC DEPOSITS IN NATIONAL BANKS.

The annual report of the Treasurer of the United States for the fiscal year 1907 included the transactions relative to public deposits in national banks to October 15, 1907, at which time the balance therein to the credit of the general fund was \$162,708,310.90. Under the plan of allotment adopted by the Secretary of the Treasury

during the latter part of August, 1907, with a view to furnishing funds to aid in the movement of the crops, the deposits in banks had gradually grown. The allotment of deposits to the banks selected was made principally to relieve local needs for currency, but it was observed that many of the banks had their allotments placed with their correspondents in New York City, influenced no doubt by the high rates of interest prevailing there, owing to the stringency

in the money market.

The transactions in the New York stock market from October 19 to 26 produced a serious break in values. Public confidence was shaken thereby to such an extent that it precipitated withdrawals of individual deposits from banks and trust companies. The situation was critical and created great anxiety throughout financial circles; strong appeals were made for relief by an increase of the public deposits in national banks. The Secretary of the Treasury, impressed with the responsibility that attaches to the proper use of the public moneys held in the Treasury, which to all intents and purposes are additional reserves back of the credits of the country, hastened to the scene of financial disturbance. From close observation and consultation with those in touch with business conditions he was convinced that instant relief only could avert a panic which might be ruinous in its results. Accordingly he directed that the public deposits be increased in the depositary banks in New York City, upon a pledge with the Treasurer of securities acceptable for savings-bank investments. The amount transferred to the banks under these instructions during the period from October 21 to October 31, 1907, was \$37,597,000.

The pressure for relief was not confined to New York City, but came from other commercial centers, and in response thereto the Secretary of the Treasury, under like conditions, directed that the public deposits in some of the depositary banks located in Chicago, Cincinnati, Pittsburg, St. Louis, and San Francisco be increased either by a direct transfer of funds from the Treasury or by retaining the receipts deposited in the banks from ordinary sources. The amount of increase allotted to the depositaries in the respective

cities was as follows:

Chicago, Ill	\$3, 249, 000	San Francisco	\$500,000
St. Louis, Mo	200,000	-	
Pittsburg, Pa	1, 127, 000	Total	6, 303, 700
Cincinnati, Ohio	1, 227, 700		

In several instances the depositaries were dilatory in pledging with the Treasurer the securities required; the balance in banks to the credit of the general fund increased to \$207,786,733.22 by

October 31, 1907.

The withdrawals of individual deposits from banks and trust companies and the withholding of the same from circulation continued; banks in almost every section of the country limited their payments in currency, and as a result merchants, manufacturers, and other business interests found it necessary to retain their cash receipts to meet current demands. This reversal of the ordinary business methods caused a great scarcity of currency throughout the country. The depositary banks in the interior, while receiving collections in the usual manner, mostly in checks, were unable to make prompt transfers to subtreasuries in cash or by draft on their

city correspondents, as had been the previous custom, because of the refusal to honor such drafts, or, if honored, a charge was made by the correspondents for the currency so paid. All the power and available resources of the Treasury were used for the relief of these conditions; additional public deposits were placed in banks in various sections of the country where there was an unusual pressure for currency, as follows:

New York	\$900,000	Washington	\$200,000
New Orleans		Richmond, Va	
Danville, Ill		Wheeling, W. Va	
Greenville, Miss	100,000	Helena, Mont	50,000
Little Rock, Ark	20,000	St. Paul, Minn	250, 000
Minneapolis, Minn		Birmingham, Ala	
Portland, Oreg	200,000		
Pittsburg		Total	3, 010, 000

The banking institutions of the country imported unusual amounts of gold early in November, and when the gold was received in New York conditions immediately improved in that city to such an extent that it was deemed expedient by the Secretary of the Treasury to withdraw a part of the public deposits from the depositary banks therein for use in other places, and accordingly \$5,125,000 was recalled, to be paid in five equal daily installments from and after November 13, 1907, as follows:

The Chemical National Bank, New York.	\$375,000
The First National Bank, New York	
The National City Bank, New York	. 1, 500, 000
The National Park Bank, New York	250,000
The Merchants' National Bank, New York	375,000
The National Bank of Commerce, New York	500,000
The Hanover National Bank, New York	500,000
The Mechanics' National Bank, New York	375,000
The Chase National Bank, New York	500, 000
The Fourth National Bank, New York	250, 000
(D) 1	F 308 000

Depositary banks that purchased 3 per cent certificates sold by the Secretary of the Treasury as a relief measure were allowed additional deposits of public moneys, and the amounts so transferred to the banks in the respective cities from and after November 23, 1907,

were as follows:

New York	\$7, 150, 000	New Orleans	\$675,000
Boston		Washington	75,000
Philadelphia	562, 500	Newark, N. J	600,000
Richmond, Va	112, 500	Buffalo, N. Y	187, 500
Petersburg, Va	107,000	Pittsburg, Pa	917,000
Reno, Nev		Atlanta, Ga	127,500
Sidney, Ohio	44, 250	Wellsburg, W. Va	50,000
Forsythe, Ga	50,000	High Point, N. C	50,000
San Antonio, Tex	126,000	Greenwood, S. C	37,500
Chattanooga, Tenn	90,000	Milwaukee, Wis	375,000
Lynchburg, Va	75,000	· · · ·	
Baltimore, Md	304, 500	Total	13, 174, 750

The foregoing transactions increased the balance in banks to the credit of the general fund to \$224,384,881.06 by the close of November.

The depositary banks to which awards were made of Panama Canal bonds, sold by the Secretary of the Treasury as a relief measure,

were allowed to hold additional public deposits equal to 90 per cent of the purchase price of the bonds, and accordingly the respective amounts were transferred to the depositaries located in the following States and Territories, from and after December 7, 1907:

State or Territory.	Amount.	State or Territory.	Amount.
Alabama Alaska Arkansas. California Colorado. Connecticut. District of Columbia Florida. Georgia Idaho. Illinois. Indiana. Iowa Kansas Kentucky. Maryland Massachusetts. Michigan.	\$306,000 50,000 67,500 50,000 50,000 386,000 144,000 423,000 50,000 90,000 190,000 190,000 321,000 695,000	Montana Nebraska New Hampshire New Jersey New York North Carolina Ohio Oklahoma Oregon Pennsylvania South Carolina Tennessee Texas Vermont Virginia Washington West Virginia	\$90,000 347,500 125,000 120,000 5,543,500 830,000 50,000 3,325,700 180,000 150,000 150,000 909,500 90,000 50,000
Minnesota. Mississippi Missouri	50,000 153,000 2,370,000	Wyoming.  Total.	50,000 19,791,500

During the month of December some additional deposits of public moneys were made with banks in localities where such funds aided in restoring confidence and relieved a local demand for currency.

The great amount of gold arriving at New York afforded substantial aid in restoring confidence in that money center, and the premium on currency disappeared about the 1st of January, 1908, as the panic subsided and as hoarded funds were gradually restored to circulation. So rapidly did conditions improve that in the latter part of December the Secretary of the Treasury recalled \$6,916,000 of public deposits from depositary banks in New York City, to be paid in ten equal daily installments commencing December 27, 1907. The amounts recalled from the respective banks were as follows:

National City Bank, New York	\$1,050,000
First National Bank, New York	1,000,000
Hanover National Bank, New York	1,082,000
National Bank of Commerce, New York	750,000
Chase National Bank, New York	500,000
Chemical National Bank, New York	500,000
Mechanics' National Bank, New York	500,000
Merchants' National Bank, New York	500,000
Fourth National Bank, New York	300,000
American Exchange National Bank, New York	134,000
Importers and Traders' National Bank, New York	100,000
National Park Bank, New York	500,000
Total	6 016 000

The balance in banks to the credit of the general fund attained a maximum at \$249,233,643.55 on December 27, 1907, after which it decreased to \$245,556,944.45 by the close of that month.

In January, 1908, there was a freer circulation of money than had prevailed for the previous three months. Unusual amounts were returned to the money centers, and several of the depositaries

therein voluntarily returned a part of the public deposits they held to the Treasury, as recorded in the statement subjoined:

10. 13. 15. 16. 17. 21. 22. 24. 25. 27. 30.	National Bank of North America, New York Fourth National Bank, New York First National Bank, Baltimore. 	Total	3, 978, 217

During the latter part of January, 1908, the Secretary recalled from depositary banks located in New York City \$8,850,000 of the public deposits held therein, to be paid in six equal daily installments from and after January 23, 1908. The amounts recalled from the respective banks were as follows:

Citizens' Central National Bank, New York.	\$90,000
National Park Bank, New York	120,000
Hanover National Bank, New York	
Fourth National Bank, New York.	120,000
Merchants' National Bank, New York	150,000

National City Bank, New York	
American Exchange National Bank, New York	1, 500, 000
American Exchange National Dank, New 10tk	
Chase National Bank, New York	450,000
Importers and Traders' National Bank, New York	
National Bank of Commerce, New York	
Mechanics' National Bank, New York	450,000
(n )	
$m_{\text{odd}}$	0 050 000

The balance in banks to the credit of the general fund at the

close of January, 1908, was \$226,241,418.85.

During the month of February, money having continued to flow from the interior to the financial centers, a number of the depositaries therein voluntarily returned a part of the public deposits held by them, as here stated:

1908—Feb. 5-7. Consolidated National Bank, New York	
10-11. Fourth National Bank, New York	205, 000
15. First National Bank, Baltimore	155,000
18-21. Fourth National Bank, New York	
21. National City Bank, New York	
22. Bank of New York N. B. A., New York	
23. First National Bank, Boston	
Total	4 770 000

The Secretary of the Treasury, on February 25, 1908, issued a call to 326 depositary banks throughout the country for the return

to the Treasury of a part of the public moneys deposited with them, pavable as follows:

A number of the depositaries anticipated the payment of the amounts required of them, and thereby the balance in the banks to the credit of the general fund February 29, 1908, was reduced to \$219,543,719.13. The banks promptly returned the amounts called as stated in the foregoing and voluntarily added thereto \$930,700, making a total of \$29,516,850 returned under the call. The balance in banks to the credit of the general fund on March 31, 1908, was \$190,518,388.93.

On April 28, 1908, the Secretary of the Treasury, owing to local conditions prevailing in the District of Columbia, deemed it advisable to increase the public deposits in depositary banks located therein to the amount of \$3,000,000, and directed that \$2,000,000 of the amount be transferred to the banks at once and \$1,000,000 on May 28, 1908, to be returned to the Treasury in ten equal monthly installments payable from and after July 1, 1908. He also issued a call on 369 depositary banks throughout the country for the return to the Treasury of a part of the public moneys deposited with them. pavable as follows:

The amounts were promptly returned by the banks at the time designated, and in addition thereto \$387,000, making a total of \$41,840,000 returned under the call. The balance in banks to the credit of the general fund on May 31, 1908, was \$154,049,500.75.

On June 10, 1908, the Secretary of the Treasury, in accordance

with the provisions of the fifteenth section of the act of May 30, 1908, fixed the amount of public moneys needed in each regular depositary bank for the transaction of the public business and notified such depositaries that they would be required to pay interest at 1 per cent per annum on the average monthly amount of public deposits held in excess of the sum needed, to be computed from June 15, 1908, and payable July 1, 1908, and thereafter January 1 and July 1 in each year. The temporary depositaries were also notified that they would be required to pay interest at the same rate on the average monthly amount of public deposits held.

No material change in the balance in banks to the credit of the general fund was made during June, and at the close of the year the amount was \$149,004,924.29, from revised returns.

The Secretary of the Treasury on July 2, 1908, issued a call on the depositary banks for the return to the Treasury of \$33,261,270 of the public moneys deposited with them, payable July 15, 1908.

The banks responded promptly and returned the amounts required. Overpayments to the amount of \$141,850 are also recorded in the settlement of this call, making the total amount paid \$33,403,120.

No other transactions of note relative to balances in banks occurred during the month of July, and the amount therein to the credit of the general fund at the close of that month was \$118,836,354.59 and remained practically at that figure during the months of August, September, and October, 1908.

#### UNAVAILABLE FUNDS.

Attention is again invited to the necessity for legislation that will clear the accounts kept in this office of unavailable funds and relieve the Treasurer of the United States from further accountability for amounts which have passed from his control without fault or negligence on his part. This subject has been called to the attention of Congress by many of my predecessors and has received some consideration by committees in the Senate and House of Representatives, but the desired legislation has not been enacted.

In the Forty-fourth Congress, first session, the Committee on Finance in the Senate submitted a report (No. 371) in which, on page 3, reference is made to this question of unavailable moneys as

follows:

All money in the Treasury, wherever it may be deposited or placed for disbursement or custody, is charged to the Treasurer of the United States. It is obvious, however, that this money may be lost without fault on the part of the Treasurer, by robbery, accident, defalcation of a subordinate officer, misconduct of depositaries having it in charge, or otherwise. Still, under the law, the Treasurer is responsible and is charged with these sums. Such a deficit would, in the accounts of a firm, be a simple plain entry in the profit and loss account by crediting cash and debiting the defaulter. But from the fact before stated that money can not be taken from the Treasury except by an appropriation, this course could not be pursued. An account called "unavailables" was created, which was charged with the amounts, and the Treasurer credited in his general account through the statement of an account by the accounting officers. This method of relieving the Treasurer is, your committee are informed, a practice which has grown up, and is not authorized by law, and for some years past has been prohibited by the Comptroller, and has been discontinued. It is plain that the Treasurer should be relieved from this responsibility, and that Congress should in some proper way provide by law for the dropping of these unavailable funds, by authorizing a credit to the Treasurer and a corresponding charge against the defaulting officer who fails to pay the money on demand.

It is desirable that you should recommend such measures as will provide for the dropping of these unavailable funds by authorizing a credit to the Treasurer and a corresponding charge against the defaulting officer who fails to pay the money on demand. There is precedent for such legislation in the act of March 3, 1837. (5 Stat. L., 178.)

An itemized statement of the unavailable funds will be found in

Table No. 22 on page 208 of this report.

#### GENERAL STOCK OF MONEY IN THE UNITED STATES.

The general stock of money in the country at the close of the last fiscal year was \$3,378,764,020, an increase of \$263,203,013 as compared with that of twelve months earlier. The growth in gold was \$151,744,391; in silver, \$17,919,395, and in national-bank notes, \$94,545,227, while the Treasury notes of 1890 decreased \$1,006,000.

The amount of each kind of money included in the general stock at the close of the fiscal years 1907 and 1908 and October 1, 1908, may be studied in the statement following.

# MONETARY STOCK.

#### RATIO OF GOLD TO THE TOTAL STOCK OF MONEY.

There was a noticeable increase in the ratio of the gold to the total stock of money during the last fiscal year; the advance was from 47.06 per cent July 1, 1907, to 47.89 per cent July 1, 1908.

The volume of gold in the general stock of money in the country and its ratio thereto on July 1 in each year since 1897 is given in the

annexed table:

# RATIO OF GOLD TO TOTAL STOCK OF MONEY FROM JULY 1, 1897.

[From the revised statements of the Treasury Department.]

Date.	Total stock of money.	Gold.	Per cent.

#### MONEY IN CIRCULATION.

The money in actual circulation at the close of the fiscal year 1908 amounted to \$3,038,015,488, an increase during the year of \$265,059,033. The circulation per capita of \$34.72 is exceeded only by that of France.

Comparisons by kinds of money in circulation for the years since

1897 are recorded in the table following:

MONEY IN CIRCULATION AT THE END OF EACH FISCAL YEAR FROM 1897.

	Money in circulation.						Percent-
Fiscal year.	Gold coin and gold cer- tificates	United States notes and Treasury notes.	National- bank notes.	Silver certificates, standard dollars, and subsidiary silver.	Total.	Circu- lation per capita.	age of gold coin and certificates to total circulation.

Note.—Currency certificates, act of June 8, 1872, are included in the amount of United States notes and Treasury notes during the years when they were in use.

# CIRCULATION AND POPULATION.

The money in circulation for the past eleven years has steadily increased; the growth per capita advanced from \$22.87 in 1897 to \$34.72 in 1908. The population of the United States has more than doubled every thirty years, while the wealth of the nation has more than doubled every twenty years. There is legitimate demand for an enormous amount of money in developing the growing industries and expanding the trade relations of the country, but there is no method employed by which that demand, per capita, can be measured.

Some rule of action should be formulated that would not be so misleading, and one that would more accurately measure the volume of money required for the increasing activities of business. It is my opinion that the volume of currency should not be based upon the individual man or per capita, but upon the volume of products produced by man, measured by the market value thereof.

Data relative to circulation and population at the end of each fiscal year from 1897 will be found in the table following:

INCREASE IN POPULATION AND IN CIRCULATION PER CAPITA.

Fiscal year.	Money in circulation.	Population.	Circulation per capita.	Per cent of increase of population per year.	Per cent of increase of circula- tion per capita per year.

a Decrease.

#### CONDITION OF THE UNITED STATES PAPER CURRENCY.

The paper circulation issued directly by the Government is in better condition at the present time than for many years past, owing to the replacing by new issues in kind of large amounts of worn notes and certificates returned for redemption during the past three years. However, there is necessity for legislation that will equalize the expense of redemption between the different sections of the country, and that will require the return of all worn currency to the Treasury when received by depositary banks and postmasters of the first and second class.

The national-bank circulation is kept in good condition mainly by the legislative provision that requires the banks to bear the expense of transporting their circulating notes to the Treasury for redemption. It is submitted that the Government, in justice to the people of all sections, should maintain and keep its paper issues in good condition, and that for sanitary reasons it should provide for its

transportation to the Treasury for redemption.

#### UNITED STATES NOTES.

The United States notes issued and redeemed during the last fiscal year were \$123,610,000, an amount that has been exceeded but once (in 1905) since the close of the war of the rebellion. The demand for small denominations of currency is at all times urgent, and the gradual growth in the volume of United States notes of the denominations of \$5 and under outstanding, by substitution for the higher denominations redeemed and retired, is the result of the efforts made by the department to supply the demand.

The amounts issued and redeemed, by denominations, during the

fiscal year 1908 are recorded in the table following:

Demonstration	Outstanding	Fiscal y	Outstanding	
Denomination.	June 30, 1907.	Issued.	Redeemed.	June 30, 1908.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Tiventy dollars Fifty dollars One hundred dollars Five hundred dollars Five hundred dollars Ten thousand dollars Ten thousand dollars	17, 566, 262 3, 441, 925 6, 224, 250 7, 114, 000 19, 640, 000	\$78, 220, 000 22, 480, 000 2, 880, 000 2, 200, 000 350, 000 17, 480, 000		\$1,861,343 1,408,025 75,316,465 203,317,936 17,171,022 2,975,775 7,315,450 5,604,000 32,701,000

Net	346,681,016	123,610,000	123,610,000	346,681,016

# TREASURY NOTES OF 1890.

The issue of Treasury notes of 1890 for the purchase of silver bullion began on August 19, 1890, and from that date to November 1, 1893 (the date of the repeal of the purchasing clause of the act), the Government had purchased 168,674,682.53 fine ounces, at a cost

of \$155,931,002, for which Treasury notes had been paid.

Under the provisions of the act of July 14, 1890, all Treasury notes redeemed in standard silver dollars are canceled and retired. Also, sections 5 and 8 of the act of March 14, 1900, provide for the cancellation and retirement of such notes to an amount equal to the coinage of standard silver dollars and the cost of the bullion used in the coinage of subsidiary silver purchased with such notes. The total amount of Treasury notes retired under the foregoing provisions has been as follows:

Retired on account of redemption in silver dollars	\$84, 393, 976
Retired on account of coinage of silver dollars and substitution of silver	
certificates	
Retired on account of coinage of subsidiary silver	21, 600, 727
Total canceled and ratired to June 30, 1908	150 949 002

There remained outstanding June 30, 1908, but \$4,982,000, offset by an equal amount of standard silver dollars held in the trust funds for their redemption when presented.

The amount of each denomination redeemed during the year and the amounts outstanding at the close of 1907 and 1908 are recorded in the table following:

Denomination.	Outstanding June 30, 1907.	Redeemed during fiscal year 1908.	Outstanding June 30, 1908.
One dollar Two dollars Five dollars Ten dollars Twenty dollars Fifty dollars One hundred dollars One thousand dollars	2,190,410 1,098,070 26,650	\$28,606 26,154 210,790 432,350 202,900 4,100 43,100 58,000	\$434,381 298,144 1,144,395 1,758,060 895,170 22,550 269,300 160,000
Total	5,988,000	1,006,000	4,982,000

#### GOLD CERTIFICATES.

The amount of gold coin actually used in the channels of trade is less than one-half of the general stock of gold coin in the country, owing to the increasing popularity of the gold certificates, which are the representatives of gold coin deposited in the Treasury under provisions of law. The growth in the stock of gold is largely indicated by the increased volume of gold certificates outstanding. Since 1896 the stock of gold has increased \$1,016,071,331, while the volume of gold certificates has taken on a growth of \$776,965,680.

Recent legislation authorizing the issue of gold certificates of the denomination of \$10 has enlarged the resources of the Treasury for responding to the wants of the people in the way of small denomi-

nations of currency.

The transactions in gold certificates during the fiscal year 1908 are set forth, by denominations, in the annexed table:

Quistanding	Fiscal year 1908.		
Denomination.  June 30, 1907.  Issued.	Redeemed.	June 30, 1908.	
8     \$36,000     \$107,760,000       ollars     250,778,364     67,280,000       rs     50,115,155     12,000,000       red dollars     71,358,850     15,600,600       red dollars     17,065,000     6,100,000       and dollars     61,346,500     14,300,000       and dollars     81,315,000     17,000,000       and dollars     146,230,000     138,320,000	3,640,500 10,195,000 16,165,000 110,790,000	\$98, 177, 160 257, 238, 104 50, 667, 755 72, 814, 850 19, 524, 500 65, 451, 500 82, 150, 000 173, 760, 000	
and dollars		,320,000 110,790,000	

### SILVER CERTIFICATES.

The silver certificates are issued principally in \$1, \$2, and \$5, and supply largely the demands for currency of the smaller denominations. The volume of the smaller certificates became somewhat redundant during the later months of the last fiscal year and were returned to the department for redemption, thus necessitating the issue of certificates of higher denominations in order to pay for redemptions in kind.

The amount of each denomination issued and redeemed during the year and the amounts outstanding at the close of 1907 and 1908 are recorded in the statement following:

Denomination. June 30,	Issued.	Redeemed.	June 30, 1908.
	094	151, 075, 315 3, 001, 410 2, 022, 260 430, 000 120, 000 5, 000	\$112, \$05, 795 56, 043, 742 263, 029, 282 18, 195, 111 14, 773, 290 8, 041, 860 787, 420 30, 500 43, 000 474, 350, 000

# CHANGES IN DENOMINATIONS.

The changes effected by issue and redemption in the total amount of each denomination of United States paper currency outstanding may be studied in the subjoined table:

D	Outstanding	Fiscal y	Outstanding	
Denomination,	June 30, 1907.	Issued.	Redeemed.	June 30, 1908.
One dollar. Two dollars. Five dollars. Ten dollars. Twenty dollars Fitty dollars One hundred dollars. Five hundred dollars One thousand dollars Tre thousand dollars Tren thousand dollars. # COST OF PAPER CURRENCY.

Many inquiries reach the department relative to the cost attending the production, issue, and redemption of United States paper currency. The subject is carefully investigated every third year; the last reckoning was made upon the experience of 1906, and may be studied in the statement following:

Cost of each 1,000 sheets of paper delivered to the Bureau of Engraving and Printing	<b>\$5.95</b>
Printing Cost of engraving and printing each 1,000 sheets (4,000 notes) of perfect work, delivered to the Treasurer of the United States	42. 09
Cost of sealing, separating, bundling, and issuing each 1,000 sheets (4,000 notes)	6.00
Total average expense of 4,000 notes issured.  Total average expense of 4,000 notes redeemed.	54. 04 8. 80
Aggregate average expense of issue and redemption	62. 84 0. 01571

# TOTAL EXPENSES OF ISSUE AND REDEMPTION.

# AVERAGE LIFE OF PAPER CURRENCY.

The hard usage of the paper circulation during the last few years, necessitating its frequent renewal, has shortened its average lifetime of usefulness.

Data relative to the average length of service, in years, of the different kinds and denominations of paper currency may be studied in the table following:

# Number of Notes and Certificates Issued and Average Lifetime of Each in Years.

. Kind and denomination.	Total number of notes issued to June 30, 1908.	Calculated aggregate num- ber of life years expe- rienced when redeemed.	Resulting average lifetime of each note in years.

# PAPER CURRENCY PREPARED FOR ISSUE AND AMOUNT ISSUED.

There were 266,306,572 pieces of United States paper currency in circulation October 1, 1908, which must be replaced when worn and redeemed. Heretofore it has taxed the full capacity of the force engaged in the preparation of new currency to meet the demands, but with the increased facilities recently authorized and installed it is believed the output will be sufficient to provide for the accumulation of a reserve of such denominations as may be required.

The number of pieces and amount of paper currency prepared for issue and the amount issued since 1902 is set forth in the subjoined table:

	Prepared for issue.			Pape	r currency issu	ed.

#### REDEMPTIONS OF PAPER CURRENCY.

There were 172,178,577 pieces of United States paper currency unfit for circulation presented for redemption during the last fiscal year, an increase of 9,743,747 pieces as compared with that of the fiscal year 1908.

The number of pieces redeemed in the first quarter of the fiscal year 1909 was 41,587,941, a slight increase over that of the first

quarter of 1908.

Under present regulations United States paper currency is redeemed at full face value of the note when not less than three-fifths of the original proportions remain. Fragments less than three-fifths are redeemed at face value of the whole note when accompanied by an affidavit of the owner or other person having knowledge of the facts that missing portions have been totally destroyed.

Comparison of the redemptions, by months, for the fiscal years 1907 and 1908 and first quarter of 1909 may be observed in the

annexed table:

#### STANDARD SILVER DOLLARS.

The total stock of standard silver dollars in the United States on October 1, 1908, was \$563,493,982 (exclusive of \$4,767,000 held against outstanding Treasury notes). There were in the Treasury \$488,409,835 and in circulation \$75,084,147, a decrease of \$9,674,019 as compared with that of October 1, 1907.

The appropriation for the free transportation of silver dollars to depositors therefor was exhausted by April 1, 1908, and since that time all shipments of such coins have been at the expense of the

consignee

Silver dollars paid into the Treasury are utilized as a basis for the issue of silver certificates of the smaller denominations for which

there is demand.

The shipment of silver dollars to depositors therefor, by months, during the past two years and a quarter is recorded in the statement following:

#### MOVEMENT OF STANDARD SILVER DOLLARS.

# EXCHANGE OF STANDARD SILVER DOLLARS.

The presentation of silver dollars at Treasury offices for exchange during the fiscal year 1908 amounted to \$43,680,767, an increase of \$6,076,512 as compared with that of 1907.

Comparison of the amounts presented at the several offices during the past two years and a quarter may be studied in the annexed table:

Office.	Fiscal	year—	First quarter—	
office.	1907.	1908,	1908.	1909.
Washington Baltimore New York Philadelphia Boston Cincinnati Chicago St. Louis New Orleans	\$1,999,305 1,032,643 4,646,648 3,548,619 1,240,040 4,628,058 8,370,225 6,773,266 3,827,850	\$2, 294, 639 1, 168, 360 5, 820, 240 3, 619, 804 1, 360, 430 5, 781, 908 10, 372, 210 6, 707, 808 4, 199, 950	\$465, 404 259, 430 1, 137, 145 1, 186, 853 314, 980 1, 317, 535 2, 614, 314 1, 592, 775 818,000	\$204, 281 133, 590 1, 140, 705 628, 817 211, 290 899, 790 1, 697, 810 472, 090 597, 000

#### SUBSIDIARY SILVER COIN.

There was an increase of \$16,903,565 in the subsidiary silver coin, and the stock in the country at the close of the fiscal year 1908 amounted to \$147,355,783; the amount held in the Treasury was \$23,177,618 and in circulation \$124,178,165. The increase in circulation over that of the preceding year was \$2,400,764.

The deposits for shipments of such coin during the last fiscal year amounted to \$31,438,830.99, an increase of \$1,043,168.44 as com-

pared with that of 1907.

Comparison of the amounts shipped to depositors therefor, by months during the past two years and a quarter, may be observed in the statement following:

	1907.	1908.	1909.

#### REDEMPTION OF SUBSIDIARY SILVER COIN.

There was an unusually large amount of subsidiary silver coin returned to the Treasury for redemption in lawful money during the last fiscal year.

The amounts received at each of the Treasury offices for redemption during the fiscal years 1907 and 1908 and the first quarter of 1909 are

recorded in the table following:

Office	Fiscal	year—	First quarter—	
Office	1907.	1908.	1908.	1909.
Washington Baltimore New York Philadelphia Boston Cincinnati Cincinnati Chicago St. Louis New Orleans San Francisco Total	\$2, 333, 168 2, 802, 130 14, 711, 446 5, 218, 245 1, 894, 270 2, 419, 400 5, 103, 935 4, 879, 307 1, 902, 776 2, 706, 337	\$3,514,216 2,964,100 18,126,042 6,235,714 2,450,010 3,301,565 7,113,740 5,218,591 2,737,265 2,949,953	\$721, 104 743, 240 3, 336, 207 1, 471, 954 538, 880 714, 050 1, 437, 032 1, 118, 570 388, 630 549, 985	\$667, 795 672, 210 4,928, 476 1,649,690 528, 860 744,600 1,440,700 813,731 527,350 539,635

#### MINOR COIN.

The minor coins are authorized by law, and provision is made for an increase thereof if there is demand for it. Also the coins are redeemable in lawful money when presented at Treasury offices for redemption. The amount in circulation is growing annually, and under the foregoing conditions there does not appear to be good reason for excluding such coin from the stated stock of money in the United States. During the last fiscal year an addition of \$789,875.22 was made to the stock of bronze cents and of \$964,156.10 to the 5-cent pieces.

The amount of minor coin outstanding, by denominations, at the

close of the fiscal years 1907 and 1908 is recorded here:

Outstanding			Outstanding	
Jnne 30, 1907.	Coined.	Remelted.	June 30, 1908.	
39, 926, 11 1, 206, 190, 14 15, 454, 395, 27 572, 935, 98 624, 368, 39 27, 095, 340, 85	\$811,708.12	627. 99 21, 832. 90 244. 90 690. 00 170, 144. 00	\$1, 182, 545. 81 39, 926. 11 1, 205, 562. 15 16, 244, 270. 49 572, 691. 08 623, 678. 39 28, 059, 496. 95

# MOVEMENT OF MINOR COIN.

There was a decrease of \$313,406.60 in the amount of minor coin shipped to depositors therefor during the last fiscal year, as compared with like shipments in 1907.

The amount of minor coin distributed, by offices, to depositors therefor during 1907 and 1908 and first quarter of 1909 is stated in

table following:

	Fiscal ye	ear 1907.	Fiscal ye	ear 1908.

# MONEY FOR MOVING THE CROPS.

The Treasury is annually requested to render assistance in the movement of the crops, which it does, by receiving deposits of currency in New York for which payments are made by wire through this office at other points in denominations of paper currency required in the locality where it is to be used.

The amounts deposited in New York for 1905, 1906, 1907, and 1908 in all months when any were received, and the resultant payments in

the several cities, are recorded in the table following:

Transactions.	Gold coin and certificates.	United States notes.	Silver dollars and certifi- cates.	Total.

# DEPOSITS OF GOLD BULLION AT THE MINTS AND ASSAY OFFICES.

The value of the new product of gold bullion, from mines and imports, deposited at the mints and assay offices during the fiscal year 1908 demonstrates the control that the United States has over the gold supplies of the world.

The amount of the precious metal deposited at each institution during the fiscal years 1906, 1907, and 1908 is recorded here:

Office.	1906.	1907.	1908.
Philadelphia San Francisco New Orleans Denver New York Carson Boise Helena Charlotte St. Louis Deadwood Seattle Total	\$2, 040, 242. 66 35, 808, 830. 73 737, 333. 54 25, 830, 358. 12 64, 345, 545. 58 735, 974. 22 811, 377. 41 2, 341, 811. 92 220, 822. 49 220, 810. 55 548, 188. 95 17, 945, 146. 16	\$1, 809, 596. 26 44, 138, 661. 93 874, 035. 21 22, 569, 154. 64 77, 754, 786. 19 811, 415. 95 834, 713. 11 2, 039, 329. 03 173, 945. 02 259, 517. 48 470, 150. 17 22, 860, 744. 44 174, 646, 049. 43	\$435, 929. 98 34,087,705. 48 757, 927. 83 14,103,766. 91 126, 322,084. 27 1,706, 910. 68 1, 235. 76 1,703, 183. 32 218, 867 66 75, 190, 28 1, 195, 0327. 01 15, 769, 486. 47

Depositors of gold bullion at the above-named offices are paid therefor in coin or by checks on assistant treasurers and depositary banks. During the last fiscal year \$250,000 in gold coin was transferred from San Francisco to Carson and \$5,500,000 to Seattle to be used in making payments for local deposits of gold bullion.

## ACCUMULATION OF GOLD COIN AT SAN FRANCISCO.

In order to prevent a burdensome accumulation of gold at Treasury offices on the Pacific coast, the privilege heretofore granted owners of bullion of depositing it in San Francisco for telegraphic exchange on New York has been withdrawn. However, one deposit of \$235,000 for such exchange was accepted in March, 1908.

#### SHIPMENTS OF CURRENCY FROM WASHINGTON.

The shipments of currency from Washington are governed largely by the amount of worn and unfit paper money presented for redemption. As a new record for redemptions was made in the last fiscal year, there was a large increase in the number of packages and amount of currency sent from the Treasury.

Comparison of the shipments for the fiscal years 1907 and 1908

may be observed here:

	Fiscal	Fiscal year 1907.		Fiscal year 1908.	
	Number of packages.	Amount.	Number of packages.	Amount.	
Total by express	72,663 17,320	\$570, 552, 841 1, 214, 026	75, 781 18, 138	\$627, 628, 740 3, 658, 874	
Aggregate	89, 983	571, 776, 867	93, 919	631, 287, 614	

#### RECOINAGE IN THE FISCAL YEAR 1908.

The recoinage of gold, silver, and minor coins during the fiscal year 1908 was more in value than in 1907.

The details for the two years follow:

Demonstrabless	190	17.	1908.

#### REDEMPTIONS AND EXCHANGES.

The moneys received in redemption and exchange accounts at all the Treasury offices during the fiscal year 1908 attained a maximum at \$1,337,826,564, and exceeded those of 1907 by \$310,950,064.

The amount of each kind of money received and paid at Treasury offices on account of redemptions and exchange during the fiscal year 1908 is recorded here:

# REDEMPTION OF NATIONAL-BANK NOTES.

The amount of national-bank notes presented for redemption, as valued by the owners and contained in 31,511 remittances, was \$349,-634,341.42, a sum equal to 52.78 per cent of the average amount of notes outstanding during the year. As verified by count the proceeds of the remittances were \$348,549,280.70. Payment of this sum was made by checks on the subtreasuries to the amount of \$172,719,-195.75, by remittances of \$124,175,368.95 in new United States currency and coin, and by credits of \$51,654,716 in accounts. The total number of notes redeemed was 35,221,320, and the average value of the notes was \$9.91. The \$5 notes outstanding were redeemed at the rate of 58.66 per cent, the \$10 notes at 55.20 per cent, the \$20 notes at 48.81 per cent, the \$50 notes at 49.99 per cent, and the \$100 notes at 49.84 per cent. Compared with the redemptions of the previous year, there was an increase of \$109,319,660, and of this increase \$91,013,000 was presented by the banks in New York City. The total amount presented by those banks was \$193,292,000. The net addition to the bank-note circulation during the year was \$94,545,227, of which sum \$80,150,428 took place in the months of November and Decem-This increase in circulation appears to have appreciably stimulated redemptions during the second six months of the year, as \$242,-827,576 was presented for redemption in that period, as against \$106,806,765 in the first six months. The unusual redemptions of bank notes which commenced in January and continued through the remainder of the year quickly exhausted the 5 per cent redemption fund, and by June 30 the Treasury had advanced \$41,992,052 in the redemption of such notes, and the total notes on hand at that date was \$62,277,880, as against \$12,377,478 on the corresponding date of the previous year. By employing an additional force soon after July 1 the redeemed notes held in the cash for moneys advanced by the Treasury were assorted and disposed of by October 27, and the balance of notes on hand was reduced to \$21,691,923. The average monthly redemptions during July to December was \$17,801,127, while the average for the months of January to June was \$40,471,262. Such variation in the volume of redemptions suggests the desirableness to have authority to temporarily employ additional force immediately the necessity arises, so that there could be no call on the Treasury to advance money for the redemption of notes, for it is plain that under the conditions that arose during the year a force sufficient for the first half of the year would be insufficient for the second half. There were notes assorted during the year to the amount of \$298,178,914. Of this sum, \$258,643,757.50 was charged to the 5 per cent redemption fund, \$62,194,650 as fit for use, and \$196,449,107.50 as unfit for use, and \$39,535,156.50 was charged to deposits for the retirement of notes. The notes fit for use were forwarded by express to the respective banks of issue in 50,180 sealed packages, and those unfit for use were delivered to the Comptroller of the Currency in 146,197 packages for reissue. There was \$328,535,358.20 in lawful money deposited in the Treasury on account of transactions in nationalbank circulation, \$260,678,988.70 for the 5 per cent fund and \$67,856,-369.50 for the retirement of such circulation. The total of the deposits made under the law limiting deposits to nine millions monthly was \$37,112,837.50. The expenses incurred for the year's operations amounted to \$270,840.21, and they were assessed on the banks in proportion to their notes redeemed at the rate of \$0.90366 per \$1,000.

# SPURIOUS ISSUES DETECTED IN 1908.

There has been no apparent increase of spurious issues in circulation during the last fiscal year, and this favorable condition of the currency is owing to the vigilance of the Secret Service agents in ferreting out those who perpetrate such frazilia upon the public. The spurious issues detected during the year we y \$13,236.19 in nominal value in all kinds.

#### SPECIAL TRUST FUNDS.

During the fiscal year 1908 the Central Pacific Railroad reduced its indebtedness to the Government by the payment of two notes amounting to \$5,881,271.56, and on July 28, 1908, in the current fiscal year, the company paid the remaining two notes of like amount, and thus closed the account. Bonds of the company held to secure said notes were released at the time of each payment.

Transactions during the year in the special trusts in the custody

of the Treasurer are recorded in the subjoined table:

Special Trust Funds in the Custody of the Treasurer of the United States at the Close of the Fiscal Year 1908.

#### DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District are fully set forth in a separate report.

During the fiscal year 1908 the bonds of the funded debt retired amounted to \$501,000, resulting in the reduction of the annual

interest charge by \$18,286.50.

From July 1, 1878, to the close of the fiscal year 1908 the bonded debt was increased by the issue of 3.65 per cent bonds amounting to \$1,254,050, and decreased by the operations of the sinking funds and otherwise \$12,757,950, making a net reduction of \$11,503,900 and of the annual interest charge \$628,758.75. The interest-bearing bonds outstanding June 30, 1908, were \$10,602,750.

Since the close of the fiscal year the debt has been further reduced by the purchase of 3.65 per cent bonds amounting to \$485,650. This leaves outstanding November 1, 1908, \$10,117,100 in bonds

bearing 3.65 per cent interest.

The retentions from 29 District of Columbia contracts were canceled during the year by the return to the contractors of \$22,350 in

bonds and \$152,431.88 in cash.

At the close of the fiscal year 1908 the 10 per cent guaranty fund amounted to \$260,018.89, and was credited to 67 separate contracts, and is represented by \$121,230 in bonds purchased at the request and risk of contractors, and \$126,280.76 uninvested cash.

The receipts during the year for account of the police relief fund were \$82,904.16, and for account of the firemen's relief fund \$37,303. These sums were advanced to the Commissioners of the District in

monthly installments.

The securities of the District in the care and custody of the Treasurer are:

3.65 per cent bonds (unsigned)	4, 895, 450 121, 230 84, 285

Respectfully,

Chas. H. Treat, Treasurer of the United States.

Hon. George B. Cortelyou, Secretary of the Treasury.

## REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., December 9, 1908.

SIR: I have the honor to submit herewith the thirty-sixth annual report of the Director of the Mint, covering the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1908, with other interesting statistics relating to coinage and financial matters in this and other countries, which will be found valuable in considering this report.

## THE YEAR'S OPERATIONS.

The fiscal year ended June 30, 1908, was remarkable in that there was made at the various mints of the United States \$16,530,477.25 in subsidiary coinage, this being the largest amount of subsidiary coinage ever made in the United States mints in one year since 1877, when a little over \$3,000,000 more than the above amount was coined in preparation for the resumption of specie payments. The larger part of this coinage was made in the first half of the fiscal year, and was wholly due to the remarkable expansion of trade during that period. The demand for this character of coinage ceased as soon as the effect of the panic of last fall began to be felt, while for several months previous to the 1st of December, 1907, there had been a continuous absorption of the entire output of the mints. During the last half of the year only two mints operated on subsidiary coin, the mint at Philadelphia operating almost exclusively on gold coinage, and the operations of the mint at San Francisco being devoted almost entirely to the coinage work for the government of the Philippine Islands.

## NEW DESIGNS FOR THE GOLD COINAGE.

In response to a popular demand for an improvement in the designs used on our coin, the President took steps early in the year 1905 to accomplish this result. It was decided to make the first change on the gold coins, and the eminent sculptor, Mr. Augustus Saint Gaudens, was employed at the request of the President to prepare models for all denominations of the gold coins, and with the purpose in view of securing a much higher relief in design than was ordinarily used in modern coinage several models were made of the

same design but with different heights of relief. But it was found to be impossible to work any of the designs upon the ordinary coining press until a third model was made with a greatly reduced relief. This was somewhat disappointing to those urging a high relief, and therefore some 12,153 pieces of double eagles from the second model were struck on a medal press and sent to such places in the United States where a general distribution of them could be made. Of the new Saint Gaudens double eagle perfected for coinage in the regular way, \$105,939,360 were struck by the close of the fiscal year.

The new designs for the eagle were also prepared by Mr. Saint Gaudens, and are regarded by competent critics as artistic. The standing eagle is true to nature, while the feathered head of Liberty is a radical departure from the head heretofore appearing on any of

our coins of either gold or silver.

There were coined in eagles during the fiscal year \$4,829,060 in the new design.

BIGELOW-PRATT DESIGNS FOR THE HALF EAGLE AND QUARTER EAGLE.

Early in the present year while the President was explaining to Dr. William Sturgis Bigelow the mechanical difficulties met with in the effort to bring to success the double eagle and the eagle of the Saint-Gaudens designs, especially that referring to the commercial desire that the coins should stack or pile to a uniform height, Doctor Bigelow became impressed with the idea that a high or strong relief of design on a coin could be obtained by depressing the design below the face or field of the coin, instead of raising it, as was being done in all coinage operations, thereby the field being flat and uniform in thickness would insure a stacking, and would permit of the pieces being piled to a uniform height.

In all other coins the wear comes on the highest point of the relief. In these, the flat surface takes the wear and protects the relief, which is depressed below it, the shape of the depression following the outline of the relief. This system of countersinking a relief is one of the oldest forms of sculpture in stone. Egypt is full of examples of it. It has been little used in modern times except in Japan, where it finds a restricted application chiefly in wood carving. been applied to coins in modern times. The idea of so applying it was Doctor Bigelow's. Acting upon his own responsibility, he asked Mr. Bela L. Pratt, an artist of St. Botolph Studios, Boston, to make an experimental design to illustrate the principle. This model was submitted to the President, and the practicability of this new idea in coinage appealed so strongly to him it was decided that the experiment of making a coin on this principle should be made. The design of a real Indian head, with war bonnet of feathers, was adopted for the obverse side, and the President selected the design of a real eagle, standing, for the reverse side; and Mr. Pratt was commissioned to prepare models for the engraver of the United States mint at Philadelphia. The model work was done during the summer and the dies made. The results were so satisfactory that the designs were approved by the President and instructions given the mint at Philadelphia for the striking of the coins. This coinage was commenced in November of the present year.

That the artist in producing faithful representations of both the real Indian and the real eagle has reached a remarkable degree of success, persons familiar with those subjects must attest. The engraving work, executed by Mr. Charles E. Barber, engraver of the United States mint at Philadelphia, is remarkably fine and sharp in detail, showing consummate skill and an artistic hand.

## THE MEDAL DEPARTMENT OF THE MINT AT PHILADELPHIA.

The medal department of the mint at Philadelphia is now equipped with the most powerful and modern presses and other apparatus for the manufacture of medals of every character. During the last two years there have been made for the War and Navy departments over 100,000 bronze medals, and the necessary bars for mounting the same, at a much less cost than the same could have been procured from private firms. No valid reason exists why all national medals should not be made by the medal department of the mint at Philadelphia.

## COST OF COINAGE AS SHOWN BY THE COST REPORTS.

The system of keeping account of the expenditures incidental to the manufacture of coin, which was inaugurated last year, has been improved and perfected so that now the figures shown therein can be deemed reliable as giving a close estimate of the actual cost of coinage of the different denominations. This system is based upon the actual coinage costs only, such as ingot making, alloy, coining department operations, and the cost of administration, but does not take into account the cost of making the coinage dies used. For the first time in the history of mint operations it is thus made possible to make a report on the cost of coinage.

The following statement shows the average cost per thousand pieces for each denomination coined during the fiscal year at all of

the mints as shown by the cost reports kept by them:

## AVERAGE COST PER THOUSAND PIECES.

Gold:	
Double eagle	\$29.51
Eagle	32, 75
Half eagle	13. 93
Silver:	
Half dollar	9.80
Quarter dollar	5, 93
Dime	2.53
Minor:

1 cent	1. 12
Philippine:	
Peso.	
50 centavo	
20 centavo.	
10 centavo	3. 15

# LIFE OF COINAGE DIES USED IN THE MINTS OF THE UNITED STATES DURING THE CALENDAR YEAR 1907.

During the calendar year 1907 there were used in the four coinage mints in the coinage of domestic, Philippine, and Mexican coin 3,100 obverse and reverse coinage dies. From these dies 262,018,610 pieces of good coin were struck. The following table shows the highest,

lowest, and average number of pieces of coin struck per die for each denomination coined:

Denomination.	Total number dies.	Highest number pieces single die.		Lowest number pieces single die.		Average number pieces per die.	
Double eagle Eagle Half eagle Quarter eagle Half dollar Quarter dollar Dime 5 cent nickel 1 cent bronze Philippine: Peso 50 centavo 20 centavo Mexican: 50 centavo 20 centavo 20 centavo 20 centavo 20 centavo 20 centavo	66 53 16 323 259 374 356 545 196 116 140 195	1	337, 341 269, 120 140, 364 85, 218 468, 850 660, 352 515, 476 294, 319 493, 211 481, 865 265, 630 276, 500 261, 000 630, 925	Rev. ## ELECTROLYTICAL REFINING.

The installation of an electrolytical refinery plant in the mint at San Francisco has been completed. Experience already had as to the cost of the operating of the same is such as to justify the belief that in the near future it will be possible to reduce the charges to depositors of bullion for parting and refining. For the mints the electrolytical processes of refining possess many advantages over the old acid processes. In the first place there is little or no loss of gold or silver in the operations. Then, again, deposits are made containing small and minute particles of platinum that were heretofore lost in parting and refining by the acid process, but are now recovered and inure to the benefit of the Government. The amount contained in any one deposit is so small as to make it impracticable to account to the depositor for the same. If all deposits were treated individually the cost of extracting the platinum would be much greater than its value. By treating the deposits in large quantities with other bullion the platinum is recovered without any additional expense to the Government.

Electrolytical refining plants have already been installed in the mints at Philadelphia and Denver.

# ENLARGEMENT OF ASSAY OFFICE AT NEW YORK.

Under the act of June 30, 1906, to increase the limit of cost of certain public buildings, authorizing the purchase of sites therefor, and for the erection and completion of public buildings, and for other purposes, the Secretary of the Treasury was authorized to enter into contract for the remodeling of the United States assay office at New York. Under the authority conferred in the act the old building in which refinery operations were conducted was demolished. Specifications were prepared and proposals invited for the construction of a suitable building in lieu thereof. Upon opening proposals it appeared that the amount appropriated would not permit of an award of contract for the construction of a building in accordance with specifications.

An urgent necessity exists for the erection of this building at an early date. The part of the building formerly used for refinery purposes having been torn down, there are no facilities for parting and refining bullion, making it necessary to transport all crude and unparted bullion to the mint at Philadelphia at the expense of the Government to be parted and refined.

#### IMPROVEMENT IN MELTING.

In 1899, what was then considered a great improvement in meltingfurnace fuel was made by the introduction of gas for melting bullion instead of coal and coke; another improvement is now made by using fuel oil instead of gas. The mints at Denver and San Francisco have demonstrated that oil is not only more effective but very much cheaper than gas. One of the main features in favor of oil-burning apparatus is that oil can be stored at or in the building in sufficient quantities to provide a working supply that will allow the furnaces to be operated for a period of several weeks. With the use of oil the number of melts made per day has been increased greatly. The first cost of installation of furnaces and generating apparatus is greatly reduced and the actual cost of melting cheaper. The fuel oil used at Denver and San Francisco is obtained from the local oil fields of Colorado and California.

## THE RESTORATION OF THE MOTTO.

The motto "In God we trust" was first placed upon the bronze 2-cent piece authorized to be coined by the act of September 22, 1864. Section 5 of the act of March 3, 1865, authorizing the coinage of the 3-cent piece, provided for the placing of the motto on such coins as would admit thereof. This provision was enacted under section 18 of the act of February 12, 1873. The motto was first placed on the gold and silver coins (with the exception of the dime, which was too small) January 1, 1866.

Section 3517 of the Revised Statutes of the United States adopted by the act of Congress dated June 22, 1874, did not provide for the placing of the motto on any of the coins. The motto continued to be placed on the coins upon which it had previously appeared until the adoption, in 1907, of the new designs of the double eagle and the eagle, from which it was omitted, the inscriptions and legends being confined to those authorized by section 3517 of the Revised Statutes.

May 18, 1908, an act was passed by Congress restoring the motto "In God we trust" on the coins of the United States, to take effect thirty days after its passage. The motto appears on all gold and silver coins struck since July 1, 1908, with the exception of the dime.

AN ACT Providing for the restoration of the motto "In God we trust" on certain denominations of the gold and silver coins of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the motto "In God we trust," heretofore inscribed on certain denominations of the gold and silver coins of the United States of America, shall hereafter be inscribed upon all such gold and silver coins of said denominations as heretofore.

SEC. 2. That this Act shall take effect thirty days after its approval by the President.

Approved, May 18, 1908.

#### ASSAY OFFICE AT SALT LAKE CITY.

The following act was passed by Congress May 30, 1908, providing for the establishment of an assay office at Salt Lake City, Utah:

AN ACT To establish an assay office at Salt Lake City, State of Utah.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized and required to establish an assay office of the United States at Salt Lake City, in the State of Utah; said assay office to be conducted under the provisions of the Act entitled "An Act revising and amending the laws relating to the mints and assay offices and the coinage of the United States," approved February twelfth, eighteen hundred and seventy-three; that the officers of the assay office shall be an assayer in charge, at a salary of two thousand five hundred dollars per annum, who shall also perform the duties of melter; chief clerk, at a salary of one thousand five hundred dollars per annum; and the Secretary of the Treasury is hereby authorized to rent a suitable building for the use of said assay office, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of twenty thousand dollars for salary of assayer in charge, chief clerk, and wages of workmen, rent, and contingent expenses.

Approved, May 30, 1908.

It was not practicable to secure an entire building for the use of the assay office, but rooms have been rented at an annual rental of \$1,800 for the purpose, and the necessary melting furnaces, appliances, and apparatus are now being installed therein, and it is confidently expected that the office will be open to the receipt of bullion early in January, 1909.

USE OF CUPRIC CHLORIDE IN TOUGHENING BRITTLE INGOT MELTS AT THE MINT, PHILADELPHIA.

Within the last year the melter and refiner of the mint at Philadelphia, David K. Tuttle, Ph. D., makes report on the use of cupric chloride which shows an ingenious and most effective application in toughening brittle melts of standard gold bullion. One great advantage is that a brittle ingot melt for coinage can be treated with the cupric chloride most expeditiously and without danger of destroying the proportion of the alloy to the precious metal. The chlorine when it unites with and carries off the troublesome base responsible for the brittleness, leaves its former associate, copper, in place of the base metal.

## UNITED STATES GOLD COIN IN CANADA.

The treasury of the Dominion of Canada held on December 31, 1907, \$33,529,889 in United States gold coin, while the amount held by the chartered banks on the same date was \$12,244,213, making the total amount of United States gold coin held in the Canadian reserves on December 31, 1907, \$45,774,102. In addition to this there were held by agencies of Canadian banks in Cuba and Porto Rico \$1,299,811, and in Jamaica \$370,217 in United States gold coin.

#### DEPOSITS OF GOLD BULLION.

The deposits of gold bullion at the mints and assay offices of the United States during the fiscal year 1908, exclusive of redeposits were of the value of \$207,415,984, against \$176,580,654 reported the previous year.

Redeposits which consisted of bullion transferred from one office of the service to the other, or bars bearing the stamp of one of the offices of the service deposited or sold to another office, amounted to \$119,214,058.

The total gold bullion and gold coin received, including redeposits, contained 17,556,365 standard ounces of the value of \$326,630,042.

The deposits of domestic bullion amounted to 6,005,804 standard ounces, of which 2,201,114 standard ounces were in crude condition direct from the mines operating in the different States; 668,016 standard ounces of refinery bars (less than 0.992 in fineness) and 3,136,673 standard ounces of refined bullion (0.992 in fineness and over) were received from private refineries, bromide, chlorination, and cyanide works.

## UNCURRENT DOMESTIC GOLD COIN FOR RECOINAGE.

Uncurrent and mutilated gold coin received for recoinage contained 214,450.317 standard ounces of the coining value in new coin of \$3,989,772.90. Of this amount 71,363.207 standard ounces were received over the counter and 143,087.110 standard ounces were received on transfer orders from the Treasury. The loss on this coinage was \$30,895.60.

DEPOSITS OF FOREIGN GOLD BULLION AND GOLD COIN.

Foreign gold bullion containing 3,857,871 standard ounces of the value of \$71,774,351, and foreign gold coin containing 735,538 standard ounces of the value of \$13,684,426 were received from various countries as follows:

Silver is coined in the United States on government account only. Deposits of silver bullion are received by the mints and assay offices to be returned to the depositors in fine or unparted bars with the weight and fineness stamped thereon. These deposits are confined almost exclusively to the assay office at New York, and the bars when returned to the depositors are sold for use in the arts or exported.

The deposits and purchases of silver at the United States mints and assay offices during the fiscal year 1908 were as follows:

Item.	Standard ounces.
Silver purchased Silver parted from gold deposits Uncurrent domestic coin for recoinage For return in fine bars.	15, 806, 746, 7 3, 012, 532, 3 872, 651, 6
For return in fine bars. For Philippine coinage.  Total	3, 320, 600. 8 10, 391, 605. 0 33, 404, 136. 7

Included in silver "for Philippine coinage" is 9,851,801.76 standard ounces Philippine silver coin received for recoinage at a reduced fineness.

#### UNCURRENT DOMESTIC SILVER COINS FOR RECOINAGE.

Uncurrent and mutilated domestic silver coins received for recoinage contained \$73,428.65 standard ounces of the value of \$1,086,691.94 in new subsidiary coin. The net loss on this recoinage was \$76,290.12.

#### DEPOSITS OF FOREIGN SILVER BULLION AND SILVER COIN.

Foreign silver bullion containing 3,292,665 standard ounces of the coining value of \$3,831,465 and foreign silver coin containing 149,972 standard ounces of the value of \$174,512 were received from various countries as follows:

Total	444, 867, 966	57, 454, 055	34, 364, 816	38, 155, 890	12, 894, 155	587, 736, 88

a Includes 461,686 fine ounces Hawaiian coin.
b Includes 148,788 fine ounces Hawaiian coin.
c Includes 6,901 fine ounces Philippine special assay coins.
d Includes 3,447 fine ounces Hawaiian coin.
e Includes 3,456 fine ounces Philippine special assay coins.
f Includes 3,895 fine ounces Philippine special assay coins.
f Includes 2,663 fine ounces Philippine special assay coins.
h Includes 4,680,791 fine ounces Philippine coins.
f Includes 3,411 fine ounces Philippine assay coins and 8,866,622 fine ounces Philippine coins for recoinage.

## COINAGE OF THE UNITED STATES, FISCAL YEAR 1908.

The domestic coinage was as follows:

Denomination.	Pieces.	Value.
Gold Silver, subsidiary Nickels, 5-cent pieces Bronze, 1-cent pieces	10,984,878 69,166,063 22,686,002 81,170,812	\$197,238,377.50 16,530,477.25 1,134,300.10 811,708.12
Total	184,007,755	215,714,862.97

Of the subsidiary coinage made during the year, \$832,414 were from uncurrent domestic coin received from the Treasury for recoinage and \$15,698,063.25 from silver bullion purchased under the provisions of section 3526 of the Revised Statutes.

## RECOINAGE OF STANDARD SILVER DOLLARS.

There were purchased as bullion and melted at the mints and assay offices 1,170 mutilated silver dollars during the fiscal year 1908, which were for use in the manufacture of subsidiary silver coins.

Fiscal year.	Amount.	Fiscal year.	Amount.
\$83	\$621	1897	\$1,89

95. 96.	18,580 2,034	Total	186,7

#### RECOINAGE OF UNCURRENT UNITED STATES COIN.

The following table shows the face value of abraded subsidiary coin transferred and purchased for recoinage, the amount of new coin made therefrom, and the loss since 1891:

Fiscal year.	Face value.	Value of new coin produced.	Loss.
1891 1892 1893 1894 1895 1896 1897 1896 1897 1898 1990 1900 1901 1902 1903 1904 1904 1905 1906 1907	\$910,046.69 7,118,602.78 7,618,198.25 7,184,472.17 4,361,761.36 4,627,141.46 3,197,998.50 6,109,772.32 6,5261,070.35 5,261,070.35 3,832,280.69 3,333,437.06 3,008,747.98 2,828,384.90 1,964,476.11 1,414,963.90 1,142,184.00	\$861, 680. 41 6, 937, 886. 02 7, 381, 289. 58 6, 924, 753. 05 4, 161, 820. 73 4, 377, 258. 40 3, 048, 861. 64 5, 820, 159. 16 5, 820, 159. 16 4, 950, 088. 485. 18 4, 950, 088. 985. 18 4, 950, 088. 985. 18 4, 950, 088. 985. 11 4, 950, 088. 980. 71 2, 829, 890. 71 2, 829, 810. 21 1, 839, 219. 21 1, 084, 826. 39 1, 086, 691. 94	\$48, 366. 28 180, 716. 76 236, 908. 6, 719. 12 199, 940. 63 249, 883. 06 149, 136. 86 289, 613. 16 485, 819. 08 310, 981. 39 219, 259. 10 191, 889. 02 178, 857. 27 172, 280. 69 125, 256. 87 92, 129. 63 77, 357. 61 76, 290. 12
Total.	73,660,824.84	70, 116, 419. 52	3,544,405.32

The loss on the recoinage of \$4,020,668.50 in worn and uncurrent

gold coins was \$30,895.61, and the net loss on the recoinage of \$1,162,982.06 in worn and uncurrent silver coins was \$76,290.12.

The Treasury was reimbursed \$6,404.09 loss on uncurrent gold coin transferred and \$76,245.05 loss on uncurrent silver coin transferred for recoinage from the appropriations for this purpose.

Coinage of Gold and Silver of the United States since 1873, by fiscal years.

#### COINAGE FOR PHILIPPINE ISLANDS.

The following coinage was made during the fiscal year 1908 for the Philippine government:

Denomination.	Made at Philadelphia mint.	Made at San Fran- cisco mint.	Total.
Silver: Pesos. 50 centavos. 20 centavos. 10 centavos.		Pieces. 16,128,000 2,105,000 2,735,000 4,033,911	Pieces. 16,128,501 2,105,501 2,735,501 4,034,412
Nickel: 5 centavos Bronze: 1 centavo			500 500 500
Total	3,504	25,001,911	25,005,415

The total coinage made for the Philippine government, urler authority of the act of March 2, 1903, to June 30, 1908, is as follows:

Denomination.	Made at Philadelphia mint.	Made at San Fran- cisco mint.	Tota.
Silver: Pesos. 50 centavos 20 centavos 10 centavos Nickel:		Pieces. 45,890,000 6,125,000 6,625,000 12,793,911	Piece; 48,666,859 10,442,644 13,243,840 19,412,750
5 centavos. Bronze: 1 centavo.			10,000,384 37,845,784 17,753,384
½ centavo	85,961,734	71,433,911	157,39,5,64

#### RECOINAGE OF PHILIPPINE COINS.

Under the act of June 23, 1906, which provides for the recoinage of Philippine silver coins of a reduced fineness and weight, there were received at the mints and melted for recoinage up to June 30, 1907, the following:

Denomination.	Pieces.	Standard ounces.
Peso 50 centavos 20 centavos 10 centavos Mixed Philippine coins	2,215,000 3,690,000	1,233,414.16 382,404.85
Total	23,883,319	15,042,897.95

#### WEIGHT AND FINENESS OF PHILIPPINE COINS.

The weight and fineness of the Philippine silver coins authorized under the act of March 2, 1903, and of the reduced weight and fineness authorized under the act of June 23, 1906, are as follows:

	Act of Marc	eh 2, 1903.	Act of Juné 23, 1906.	
Denomination.	Weight in grains.	Fineness.	Weight in grains.	Fineness.
Peso. 50 centavos. 20 centavos. 10 centavos.	416.00 208.00 83.10 41.55	900 900 900 900	308.640 154.320 61.728 30.864	800 750 750 750

#### COINAGE FOR MEXICO.

The mint at Denver coined during the fiscal year 1908, for the Mexican Government 1,397,291 silver 50-centavo pieces.

## RECOINAGE OF HAWAIIAN SILVER COIN.

There were transferred from the Treasury to date for the purpose of recoinage Hawaiian silver coins of the face value of \$828,624.50, producing \$854,351.75 in domestic subsidiary silver coins on which there was a gain of \$25,727.25.

## BARS MANUFACTURED.

During the fiscal year 1908 there were manufactured by the mints and assay offices of the United States gold and silver bars of the value as follows:

Description.	Standard ounces.	Value.
Gold barsSilver bars	8,740,825.920 8,041,326.040	\$162,620,352.65 9,357,179.28
Total		171,977,531.93

## WORK OF THE GOVERNMENT REFINERIES.

There were received and operated upon by the refineries connected with the mints at Philadelphia, San Francisco, New Orleans, and Denver, during the fiscal year 1908, gold and silver bullion as shown by the following table:

	Go	ld.	Silver.		
Institution.	Standard ounces.	Value.	Standard. ounces.	Coining value.	
Philadelphia San Francisco. New Orleans Denyer a New York b	2,465,453.361 1,073,491.250 35,147.197 1,387,352.785	\$45,868,899.74 19,971,930.22 653,901.34 25,811,214.60	3,198,095.55 237,018.86 81,265.97 1,616,422.61	\$3,721,420.27 275,803.76 94,564.04 1,880,928.13	
Total	4,961,444.593	92,305,945.90	5,132,802.99	5,972,716.20	

# SILVER BULLION ON WHICH CHARGES WERE COLLECTED.

In order to show the amount of the above-mentioned silver bullion treated by the government refineries on which charges were received and the amount handled for parting purposes, the following table is presented:

Institution.	Silver bullion on which charges were collected.	Silver bullion owned by the Government retained by the refinery for parting pur- poses on which there were no charges.	Total.
Philadelphia. San Francisco New Orleans Denvera New York b Total.	227,537.34 21,427.33	Standard oz. 582,817.03 9,481.52 59,838.64 1,006,927.66	Standard oz. 3,198,095.55 237,018.86 81,265.97 1,611,266.83

a For period April 1, 1907, to June 30, 1908.
 b Refinery operations suspended during reconstruction of building.

#### PURCHASE OF SILVER.

The table following shows the amount and cost of silver bullion purchased for the subsidiary silver coinage during the fiscal year 1908:

Stock.	Standard ounces.	Cost.
Silver bullion purchased under section 3526, United States Revised Statutes, at the Treasury Department. Silver bullion purchased under section 3526, United States Revised Statutes, at mints. Parting charges and fractions purchased. Metted assay coins purchased. Mutilated coins purchased. Surplus bullion purchased. ## BALANCES OF SILVER BULLION.

The balances of silver bullion on hand June 30, 1908, at the mints and assay offices of the United States for the coinage of subsidiary silver coins and also for coinage for the Philippine Islands were as follows:

Item.	Standard ounces.	Cost.
For subsidiary silver coinage Silver bullion for Philippine coinage		\$6,278,891.53 1,700,108.85
Total	12,783,434.04	7, 979, 000. 38

MARKET PRICE OF SILVER DURING THE FISCAL YEAR 1908.

During the twelve months ending June 30, 1908, the price of silver in the London market varied from 32\frac{1}{4}d. per ounce for silver 0.925 fine, equivalent to \$0.7069+ per ounce fine, to 24\frac{1}{4}d., equivalent to \$0.5274+ per ounce fine. For the first three months of the year the price was comparatively steady, but commencing with October the price declined rapidly. The decline was in a great measure due to the small amount of rain that had fallen in some parts of India, leading to the fear of a failure of the crops and, in consequence thereof, a famine. This led the bazaars of India, who deal very largely in silver, to make heavy sales in the London market. Aside from these forced sales by the India bazaars there was little demand from any quarter for silver.

For the last six months of the fiscal year the London price ranged from 27d. to  $24\frac{1}{16}d$ . The following table exhibits the monthly fluctuations in the price and the value of a fine ounce of silver for

the twelve months ending June 30, 1908:

Highest, Lowest, and Average Price of Silver Bullion and Value of a Fine Ounce, Each Month, during the Fiscal Year 1908.

Months.	High- est.	Low- est.	Average price per ounce, British standard, 0.925.	Equivalent value of a fine ounce with exchange at par (\$4.8665).	Average monthly price at New York of exchange on London.	Equivalent value of a fine ounce based on average monthly price and average rate of exchange.	Average monthly New York price of fine bar silver.

Distributed from mints during the year	95,288	3,595	300	99,183

#### SEIGNIORAGE ON SILVER COINAGE.

The balance of profits on the coinage of silver on hand in the mints June 30, 1907, was \$253,795.33.

The seigniorage on subsidiary silver coinage during the fiscal year

ended June 30, 1908, was \$8,713,413.35.

Including the balance on hand at the mints July 1, 1878, the net seigniorage on silver coined from that date to June 30, 1908, aggregated \$151.666.237.81.

The amount of seigniorage deposited in the Treasury during the fiscal year was \$8,852,842.52, leaving a balance on hand in the mints

on June 30, 1908, of \$114,366.16.

#### APPROPRIATIONS AND EXPENDITURES.

The acts approved February 26, 1907, and February 15, 1908, making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1908, contained specific appropriations for the support of the mints and assay offices of the United

States amounting to \$1,199,570.

The earnings of the mints at Philadelphia, San Francisco, and Denver collected from the manufacture of coins for foreign countries, appliances for other institutions, etc., amounting to \$235,887.52, were deposited in the Treasury to the credit of the appropriations for wages of workmen and contingent expenses of the above-named

The acts approved June 6, 1900, March 3, 1903, April 28, 1904, and

March 3, 1905, contained the following specific appropriations:

New machinery and appliances, mint at Philadelphia	\$440, 185
Charges collected and credited to above	4,600
New machinery and appliances, mint at Denver	345, 055
Charges collected and credited to the above	560

The expenditures from these appropriations to June 30, 1908, have been:

Mint at Philadelphia	\$433, 550. 44
Mint at Denver.	340, 419, 49

EARNINGS AND EXPENDITURES OF THE REFINERIES OF THE COINAGE MINTS AND ASSAY OFFICE AT NEW YORK, FISCAL YEAR 1908.

The earnings of the refineries, amounting to \$357,015.32, were deposited in the Treasury to the credit of the appropriation for "Parting and refining bullion."

The expenditures on account of "Parting and refining bullion" during the fiscal year aggregated \$318,183.10, showing a net gain of earnings over expenditures of \$38,832.22, as shown by the following table:

EARNINGS AND EXPENDITURES, PARTING AND REFINING BULLION, FISCAL YEAR, 1908.

APPROPRIATIONS AND EXPENDITURES OF THE OFFICE OF THE DIRECTOR OF THE MINT FOR THE FISCAL YEAR 1908.

Under the acts of February 26, 1907, February 15, 1908, and May 30, 1908, the sum of \$39,170 was appropriated for the office of the Director of the Mint to meet the expenses of the fiscal year 1908.

The expenditures from these appropriations for salaries, supervising the annual settlements at the mints and assay offices, for collecting and compiling statistics of the production of gold and silver in the United States, for incidental expenses and the purchase of and subscription to books and pamphlets and contingent expenses for the laboratory, aggregated \$35,534.84, leaving an unexpended balance of \$3,635.16 to the credit of the appropriations.

In addition to the above appropriations for the office of the Director of the Mint, the acts of February 26, 1907, and February 15, 1908, contained specific appropriations aggregating \$125,000 for "Freight on bullion and coin between mints and assay offices." The expenditures from these appropriations for the fiscal year amounted to \$94,504.19, leaving an unexpended balance to the credit of said

appropriation of \$30,495.81.

Appropriation and Expenditures of the Office of the Director of the Mint for the Fiscal Year ended June 30, 1908.

## LABORATORY OF THE BUREAU OF THE MINT.

During the calendar year 1907 there were tested by the assayer of this bureau 362 gold and 696 silver coins, all of which, with one exception, were found within the legal requirements as to weight and fineness.

In the gold coins the greatest deviation in fineness above standard (the legal limit being 0.001 above or below) was 0.0007, while

the greatest deviation below was 0.0006.

The greatest deviation of silver coin in fineness above standard (the limit being 0.003 above or below) was 0.0009, while the greatest deviation below was 0.0018, as shown by the following table of assays made at the Bureau of the Mint:

	Philad	elphia.	San Fr	ancisco.	New C	rleans.	Den	ver.	То	tal.
Fineness.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.

Total	188	161	60	54		87	114	46	362	348
Average fineness.	900.051	899, 400	899. 913	899. 826		899.608	899.926	899.824	899.980	899. 598

In addition to the above there have been examined 363 Philippine silver coins and 132 Mexican silver coins, all of which, except 4, were within the legal requirements as to weight and fineness.

# PROCEEDINGS OF THE ASSAY COMMISSION, 1908.

The following-named gentlemen acted as commissioners to test and examine the weight and fineness of the coins reserved at the several mints during the calendar year 1907 pursuant to the provi-

sions of section 3547 of the Revised Statutes:

Hon. William B. McKinley, House of Representatives; Hon. William A. Ashbrook, House of Representatives; Hon. Charles J. Russell, Burlington, Vt.; Prof. Leverett Mears, Williams College, Massachusetts; Mr. George L. Harrison, jr., Philadelphia, Pa.; Mr. J. W. Campbell, Fort Dodge, Iowa; Mr. L. S. Kerfoot, Seattle, Wash.; Mr. John L. McNeil, Durango, Colo.; Mr. E. W. Harden, Chicago, Ill.; Mr. Thomas P. Burns, San Francisco, Cal.; Mr. Frank Shinn, Columbus, Ohio. (Dr. H. G. Torrey, ex officio member.)

The commission met at the mint in Philadelphia on February 12,

1908, and Hon. William A. Ashbrook was elected chairman.

The following committees were appointed by the chairman, with the approval of the commission:

Committee on counting: Mr. Campbell, chairman; Messrs. McNeil

and Burns.

Committee on assaying: Professor Mears, chairman; Messrs. Harrison, Russell, and Torrey.

Committee on weighing: Mr. Harden, chairman; Messrs. Kerfoot,

Shinn, and McKinley.

The committee on counting reported that the packages containing the pieces reserved by the several mints for the trial of coins were delivered to them, and that they were compared with the transcripts kept by the Director of the Mint and found to be correct. After verification the coins were delivered to the committees on weighing and assaying.

The coins reserved by the mints for the purposes of the assay com-

mission were as follows:

Gold coins from the mint at Philadelphia, 4,280, of the value of \$55,597.50.

Silver coins from the mint at Philadelphia, 16,017, of the value of

Gold coins from the mint at San Francisco, 2,377, of the value of \$45,430.

Silver coins from the mint at San Francisco, 2,896, of the value of

Silver coms from the mint at New Orleans, 6,783, of the value of \$1.809.90.

Gold coins from the mint at Denver, 2,765, of the value of \$31,670. Silver coins from the mint at Denver, 5,210, of the value of \$1,478.50.

The coins reserved on account of coinage executed for the Philippine Islands were as follows:

Mint at Philadelphia:	
50 centavos	
20 centavos	626
10 centavos	751
Mint at San Francisco:	
Pesos	
50 centavos	
20 centavos	1,583
10 centavos	2,465

The committee on assaying reported receiving and making assays of coins reserved from the mints at Philadelphia, San Francisco, Denver, and New Orleans, representing the deliveries made by the coiners to the superintendents during the calendar year 1907.

The highest assay value of the gold coinage (the limit of tolerance

being one one-thousandth) was at-

Philadelphia.	900.3
San Francisco.	900.0
Denver	900.3

The lowest assay value of the gold coinage (the limit of tolerance being one one-thousandth) was at—

Philadelphia.	899.	. 6
San Francisco.	899.	. 7
Denver.	899.	. 8

The highest assay value of the silver coinage (the limit of tolerance being three one-thousandths) was at—

Philadelphia	901.1
San Francisco.	901.6
New Orleans.	900.9
Denver	901. 1

The lowest assay value of the silver coinage (the limit of tolerance being three one-thousandths) was at—

Philadelphia.	898. 2
San Francisco.	
New Orleans.	
Denver	900, 2

The highest assay value a of the Philippine silver coinage was at-San Francisco (pesos) 800.6 Philadelphia (20 centavos) 751.5 The lowest assay value of the Philippine silver coinage was at-

The committee also tested the quartation silver and found it free from gold, and the lead used in the assay of gold bullion and found it free from gold and silver. The acid used in the humid assay of silver was found to be free from silver and also from chlorine.

The balances used were tested and found to be correct.

The committee reported the assays as entirely trustworthy, and that none of the coins tested differed from the standard of fineness

by a greater degree than the amount allowed by law.

The committee on weighing respectfully reported examining sample coins selected at random from those reserved by the several mints. The weighing was made on a balance by Henry Troemner, of Philadelphia. The weights employed were furnished under seal by the Director of the Bureau of Standards, and were accompanied by a certificate stating their variations in mass from the standards fixed by law. The balance was carefully tested and found to be sufficiently accurate without making corrections.

The secondary troy pound of the mint was compared with the standard pound and found to be correct. A pound built up of working weights of the mint was found to be correct within 1 part in

30,000.

The details of the weighings indicated that the deviations from the statutory standard weights of the coins examined were all within the legal tolerance, consequently the committee on weighing pronounced the examination of the weights of the coinage of the several mints during the year 1907 to be satisfactory.

The committee on resolutions submitted the following:

Resolved, That it is the sense of the members of the annual assay commission that the coin collection of the United States in the mint in Philadelphia should be made as complete as possible. The commission desires to express its approval of the recommendation of the commission of 1907, and it recommends that an appropriation of \$20,000 be made available for the purchase of these coins and medals, these purchases to be made under the direction of the Director of the Mint, and that an annual appropriation of \$5,000 be made to continue the purchases of coins and medals for this collection.

One hundred thousand citizens of the United States, and many foreigners, visit annually the United States mint in Philadelphia; many of these visitors desire to purchase a souvenir of the mint. It is recommended that the Director of the Mint be authorized to have prepared annually a souvenir medal for sale to visitors. In the opinion of the officers of the mint such authorization would net to the mint from \$5,000 to \$10,000 annually, that representing the sale price above the cost of preparing the dies and striking the medals. The profit to be obtained from the sale of these medals, in the opinion of the members of this commission, should be added to the amount appropriated annually for the purchase of coins and medals. And be it further Resolved, That the thanks of the members of the assay commission be extended to

the Director of the Mint and the officers and employees of the mint in Philadelphia

for their courtesy to the members of the commission during the session.

a By the act of June 23, 1906, the standard fineness of the Philippine peso was reduced to 800 and the subsidiary coins to 750 fine.

# MINT OF THE UNITED STATES AT PHILADELPHIA, PA.

The following table shows, by weight and value, the gold and silver deposited during the fiscal year 1908:

Metal.	Deposits.	Redeposits.	Standard ounces.	Coinage value.
Gold	3,338 920	3,151 20	5,621,472.076 6,637,558.74	\$104,585,526.98 7,723,704.71
Total	4,258	3,171		112, 309, 231. 69

#### ASSAYER'S DEPARTMENT.

The number of assays made in this department was as follows:

Deposits and purchases	10,113 9,812 2,407
Total	62.731

In addition to this 300 ounces of proof gold and 320 ounces of proof silver were made.

Of the 2,341 melts of gold ingots made by the melter and refiner 2,008 were passed, 324, while within the standard fineness required by law, were returned for remelting, and 5 melts were condemned. There were 1,485 melts of silver ingots made, of which 1,474 were passed, 5 returned for remelting, and 1 condemned.

The fineness of gold melts passed was: 12 melts at . 899.6 258 melts at . 899.7 560 melts at . 899.8 521 melts at . 900 128 melts at . 900.1 33 melts at . 900.2 1 melt at . 900.3	
--	--

In addition five melts for Philippine coinage were made by the melter and refiner and passed by the assayer.

## MELTER AND REFINER'S DEPARTMENT.

During the fiscal year the melter and refiner received from the superintendent gold bullion containing by assay 12,864,633.519 standard ounces, of the value of \$239,342,018.95, his legal allowance for wastage being 12,864.633 standard ounces, of the value of \$239,342. He also received silver bullion containing by assay 11,699,861.48 standard ounces, of the value of \$13,614,384.27, his legal allowance for wastage being 17,549.79 standard ounces, of the value of \$20,421.57. He returned to the superintendent 12,863,283.347 standard ounces of gold and 11,705,630.93 standard ounces of silver.

He operated upon bullion as follows:

Items.	Gold.	Silver.
Ingots Refinery Merchant bars	Standard ozs. 14, 426, 095, 830 2, 465, 453, 361 331, 874, 140 17, 223, 423, 331	Standard ozs. 5,795,688.86 3,198,095.55 917,748.40 9,911,532.81

The excess of gold and silver operated upon over the amounts

charged during the year is due to duplicate operations.

Upon the settlement of the melter and refiner's accounts, June 30, 1908, there was found an apparent loss upon the gold bullion during the fiscal year of 1,350.172 standard ounces, and in the operations upon the silver bullion an apparent gain of 5,769.45 standard ounces.

The melts made aggregate as follows:

Melts.	Bars.	Ingots.	Anodes.	Deposits.	Special.	Total.
Gold	381 915	2,341 1,485	1,044	4,755 891	385	8,906 3,291
Total	1,296	3,826	1,044	5,646	385	12,197

During the year five gold melts and one silver melt were condemned.

NUMBER, WEIGHT, AND VALUE OF GOLD AND SILVER BARS FOR INDUSTRIAL USE.

Metal.		Standard ounces.	Coinage value.
Gold	3,976 2,584	341,257.630 1,025,321.40	\$6,348,979.18 1,193,101.26
Total	6,560	1,366,579.030	7,542,080.44

During the year 212 barrels of sweeps were gathered, containing by assay 2,913.565 standard ounces of gold, and 5,342.59 standard ounces of silver.

The operations of the refinery were as follows:

Bullion.	Gold.	Silver.
Sent to the refinery, 5,524,410.24 gross ounces, containing by assay	2, 464, 032, 812	Standard oz. 3,198,095.55 3,196,197.05 3,394.22
Apparent gain	44.792	1,495.72

Silver bullion sent to the refinery upon which refining charges were collected contained by assay 2,615,278.52 standard ounces, and silver owned by the Government and returned to the refinery for parting purposes upon which no parting charges were collected contained by assay 582,817.03 standard ounces.

During the year the melter and refiner received from the superintendent metal	minor coinage	Troy ounces. 17,045,564,31

#### Coiner's Department.

During the fiscal year 1908 this department received 12,496,691.010 standard ounces of gold, of which 12,449,944.310 standard ounces, of the value of \$231,626,870.88 were operated upon, from which there were produced 6,470,284.041 standard ounces of coin, of the value of \$120,377,377.50, all delivered to the superintendent during the fiscal year prior to the settlement, upon which there was a wastage of 285.598 standard ounces, of the value of \$5,313.45, being 4.57 per cent of the legal allowance.

The percentage of coin produced from the amount of metal oper-

ated upon was 51.97 per cent.

During the same period the coiner also received and operated upon 6,274,260.60 standard ounces of silver, of the value of \$7,806,234.02 in subsidiary coin, from which there were produced 3,562,592.34 standard ounces of domestic coin, of the value of \$4,432,463.25 in subsidiary silver coin, and 501.11 standard ounces of Philippine coin, of the value of \$623.46 in domestic subsidiary silver coin, delivered to the superintendent during the fiscal year prior to settlement, and 22,951.75 standard ounces of domestic coin delivered to the superintendent at settlement, upon which there was a wastage of 520.48 standard ounces, of the value of \$284.11, being 8.29 per cent of the legal allowance.

The percentage of coin produced from the amount of metal oper-

ated upon was 57.10 per cent.

There were also delivered to the coiner during the same period 5,692,502.34 ounces of nickel ingots and planchets, from which were produced 3,642,183.58 ounces of domestic 5-cent nickel coin, of the face value of \$1,134,300.10 and 80.38 ounces of nickel coin for the Philippine government, of the value of \$25 in United States nickel coinage, upon which there was a wastage of 17,200.06 ounces.

During the same period the coiner also received 10,310,811.88 ounces of copper-bronze ingots and planchets, from which there were produced 8,126,204.93 ounces of 1-cent coin, of the face value of \$811,708.12, and 125 ounces of copper-bronze coin for the Philippine government, of the value of \$12.50 in United States copper-bronze coinage, upon which there was a wastage of 20,979.27 ounces.

Owing to a considerable amount of experimental coinage in the development of the new design double-eagle and eagle coins, the product of which could not enter into the amount of coin produced, and the receipt of a quantity of defective gold ingots which could not be worked satisfactorily and had to be returned for remelting, the percentage of coin produced from the amount of metal operated upon is lower than it otherwise would have been.

The following table shows the coinage executed during the year:

Denomination.	Pieces.	Value.
GOLD.		0144 000 000 000
Double eagles	5,744,415 $272,935$	\$114,888,300.00 2,729,350.00
Half eagles	551,913	2,759,565.00

Grand total	137,133,777	126,755,848.97

#### ENGRAVER'S DEPARTMENT.

All the dies used in the coinage operations of all the mints of the United States are made in the engraving department at Philadelphia.

The number of dies prepared for United States coinage last year was 2,380. In addition 629 dies were made for Philippine coinage, 10 for Mexican coinage, 56 for medals, and 111 master dies, hubs, and experimental dies for the new gold coinage.

The following table shows the number of proof coins and medals

and their nominal value manufactured during the fiscal year:

Article.	Number of pieces.	Nominal value.
Gold medals. Silver medals. Bronze medals. Gold proof coins. Silver proof coins. Minor proof coins.	183 2,418 69,585 165 2,620 1,774	\$4,603.50 1,152.50 18,788.75 1,222.50 476.84 53.22
Total	76,745	26,297.31

## MINOR COINAGE. .

The manufacture of the 1-cent bronze and 5-cent nickel coins has heretofore been confined by law to the Philadelphia mint. The Fifty-ninth Congress at its first session authorized the making of these coins at the other mints, but the output so far has been wholly at Philadelphia, and owing to the recent financial troubles was much less than during the fiscal year 1907, as shown below:

Denomination.	1907.	1908.
1-cent bronze.	\$937, 315. 68	\$811,708.12
5-cent nickel	2, 382, 137. 50	1,134,300.10

Bronze and nickel blanks were purchased from contractors as follows:

Character.	Pounds avoirdupois.	Cost.
Bronze I-cent blanks Nickel 5-cent blanks	369,000 60,000	\$138,744.00 25,350.00
Total	429,000	164, 094. 00

· The amount of metal purchased for the manufacture of minor coinage other than blanks was 819,419 pounds avoirdupois, at a cost of \$166,155.13.

The amount of uncurrent copper, nickel, and bronze coins transferred from the Treasury during the year for conversion into current coins, cost, and seigniorage are shown by the following table:

coms, cost, and seignorage are shown by the following table	•
Old copper cents. Nickel 1-cent coins. Bronze 1-cent coins Bronze 2-cent coins Nickel 3-cent coins. Nickel 5-cent coins.	244. 90 690. 00
Total	193, 671. 25
Cost of nickel added to 1-cent metal to convert into 5-cent alloy for recoinage into nickel 5-cent coin.  Cost of tin and zinc added to old copper-cent metal to convert into bronze 1-cent alloy for recoinage into bronze 1-cent coin.  Cost of metal of same alloy added to nickel 3-cent metal for recoinage into nickel 5-cent coin.  Selgniorage (gain by recoinage).  Total.	
Coinage executed, nominal value:  Bronze 1-cent coin. \$21,643.67  Nickel 5-cent coin. 164, 108.90  Loss by recoinage.	185, 752. 57 10, 887. 54

The seigniorage, or gain, on recoinage of minor coin was \$2,928.87,

as against a loss of \$10,887.54, showing a net loss of \$7,958.67.

The seigniorage on the coinage of nickel and bronze coins coined from purchased metal was \$1,535,029.42, which, less a net loss of \$7,958.67 on the recoinage of minor coin and a wastage of the operative officers in the minor coinage operations of \$1,233.82, gives a net seigniorage on minor coin of \$1,525,836.93.

The total amount of the several types of minor coin manufactured from 1793, when the first coinage of copper cents was made, until June 30, 1908, aggregated \$52,707,463.67. From the records of this mint, at which all this coinage has heretofore been made, it appears that there have been melted for recoinage \$4,779,292.69, leaving outstanding June 30, 1908, \$47,928,170.98.

The several types and denominations of minor coin issued, manufactured by the mint at Philadelphia since its establishment, the amount remelted, and the amount outstanding June 30, 1908, are set forth in the following table:

# . MINOR COINS ISSUED, REMELTED, AND OUTSTANDING.

Denomination.	Coined.	Remelted.	Outstanding June 30, 1908.
Copper cents. Copper half cents. Copper nickel cents. Bronze cents. Bronze 2-cent pieces. Nickel 3-cent pieces. Nickel 5-cent pieces. Total.	39, 926. 11 2, 007, 720. 00 16, 562, 297. 05 912, 020. 00 905, 768. 52 30, 716, 844 55	\$380, 341. 63 802, 157 85 318, 026. 56 339, 328. 92 282, 090. 13 2, 657, 347. 60 4, 779, 292. 69	\$1, 182, 545, 81 39, 926, 11 1, 205, 562, 15 16, 244, 270, 49 572, 691, 08 623, 678, 39 28, 059, 496, 95 47, 928, 170, 98

Minor coins to the amount of \$2,337,103.04 have been distributed throughout the States and Territories of the United States during the fiscal year 1908—\$1,441,538.60 in nickel 5-cent pieces and \$895,564.44 in bronze 1-cent pieces.

The expenditure for the distribution of minor coin for the same

period was \$48,105.86.

#### ALL SEIGNIORAGE.

The seigniorage on the coinage of purchased metal for the fiscal year was \$3,506,350.27, as shown by the following table:

Item.	Coined.	Seigniorage.
Subsidiary silver coins. Minor coins.	\$3,695,463.25 1,760,255.65	\$1, 971, 320. 85 1, 535, 029. 42
Total	5, 455, 718. 90	3, 506, 350, 27

#### VISITORS.

A large number of visitors from all States of the Union and from foreign countries visited the mint during the year, 113,406 having been shown through by the several guides.

## NUMBER OF EMPLOYEES.

The force of employees at the end of this fiscal year shows a reduction of 24 from the number carried on the rolls at the end of the previous fiscal year. The total number on the rolls at the close of the fiscal year was 472, distributed in the several departments as follows:

Department.	Male.	Female.	Total.
General . Assayer's. Coiner's. Melter and refiner's. Engraver's.  Total.	182 12 92 68 17	57 1 1 101	224 12 149 69 18

# MINT OF THE UNITED STATES AT SAN FRANCISCO, ÇAL.

It was necessary during the fiscal year of 1908 to close this mint for settlement on two unusual occasions, owing to a change of the officers

and the consequent filing of new bonds.

In the early part of the year, Frank A. Leach, superintendent of this mint, was offered the position of Director of the Mint, and on September 19, 1907, he resigned the superintendency to take up the duties of his new office. Mr. Leach was succeeded as superintendent by Edward Sweeny. On July 8, 1907, Dan T. Cole resigned, and Aug. E. Muenter assumed the duties of coiner. Mr. Muenter remained in office until the date of Mr. Leach's promotion, when he, too, resigned, and was immediately succeeded by William M. Cutter.

The settlement of January 31, 1908, was occasioned by the necessity for the filing of new bonds by the superintendent and coiner, the former bonds having been filed under a recess appointment.

The weight and value of the gold and silver bullion deposited

during the fiscal year was as follows:

Metal.	Deposits.	Redeposits.	Standard ounces.	Value.
Gold	6, 126 9, 428	1,253	2, 865, 013. 444 14, 678, 964. 51	\$53, 302, 575, 69 18, 263, 097, 36
Total	15, 554	1,253		71, 565, 673. 05

Of the above amount of silver bullion 9,851,801.76 standard ounces of Philippine silver coin were received for recoinage for the government of the Philippine Islands.

#### ASSAY DEPARTMENT.

During the fiscal year ending June 30, 1908, several improvements in the equipment were made, which have tended in no small degree to increase the efficiency of the department. The purchase of a set of heavy 3-inch rolls, operated by an electric motor, has greatly facilitated the rolling of silver ingot granulations, especially in the case of ingots for Philippine subsidiary coinage, where the proportion of copper alloy has been so large. Individual motors are now being placed on all rolls, the unsightly and cumbersome shafting and belting in use for so many years being dispensed with, and the frequent falling of dirt and grease upon the samples thereby avoided.

Late in the year a fairly complete experimental laboratory with hoods, tables, shelves, etc., of acid-proof stone was fitted up, to enable the carrying on of investigations into the nature of base metal contained in refractory deposits, and to permit the making, not only of qualitative tests of all kinds, but of various quantitative determina-

tions, both volumetric and electrolytic.

The installment of this laboratory resulted almost immediately in the adoption of a method for the determination of the gold contents in Doré bullion, that for accuracy and rapidity is far superior to the ordinary fire assay formerly used. This new method does away altogether with the use of the parting flask or mattress, and in many instances enables us to dispense with the use of the cupel furnace as well.

Briefly speaking, it consists in the parting of a gram of the bullion, either with or without cupellation, according to the amount and nature of the base metal present, in a No. 2 porcelain crucible containing moderately strong nitric acid. Two five-minute boilings are made, the discarded solutions being carefully decanted to avoid distributing the gold residue, which, after being thoroughly washed in hot water, is dried and annealed without having been removed from the crucible in which the parting was made. The results are very accurate, quadruplicate assays agreeing almost exactly.

A greater amount of routine work was achieved in the department than for several years past, there having been a total of 92,124 assays made at an average cost of \$0.318 per assay. A considerable proportion of this increase was due to the opening of the new refinery, the assays for which averaged over 1,200 a month during the last quarter.

The appended table shows the operations of the department in

detail:

Gold assays made Silver assays made Sweep assays made	43, 263
Total. Ounces. Proof gold made Ounces. Proof silver made Ounces. Parting silver prepared Ounces. Cupels made Ounces. Leads cut and rolled	250 100 1,500 100,000

During the fiscal year the coiner operated upon 4,167,758.980 standard ounces of gold and 20,401,848.95 standard ounces of silver. He delivered to the superintendent during the same period 2,441,378.750 standard ounces of gold coin, valued at \$45,421,000, and 11,810,282.19 standard ounces of silver coin, valued at \$13,742,873.81 in standard dollars, or \$14,693,974.72 in subsidiary coin, aggregating 35,504,039 pieces. Of this amount there was delivered for the government of the Philippine Islands 18,130,891.10 pesos in silver coin, weighing 10,291,263.81 standard ounces, valued at \$11,975,288.79 in standard dollars, or \$12,804,060.72 in subsidiary silver coin.

The following table exhibits the coiner's deliveries for the fiscal year:

Denomination.	Pieces.	Value.
Gold: Double eagles. Eagles.	2, 165, 800 210, 500	\$43,316,000.00 2,105,000.00
Total	2,376,300	45, 421, 000. 00
Silver: Half dollars. Quarter dollars. Dimes.	2,172,828 1,388,000 4,565,000	1, 086, 414. 00 347, 000. 00 456, 500. 00
Total	8, 125, 828	1,889,914.0

#### PHILIPPINE ISLANDS.

Denomination.	Pieces.	Value.
Pesos. 50 centavos. 20 centavos. 10 centavos.  Total.	16, 128, 000 2, 105, 000 2, 735, 000 4, 033, 911 25, 001, 911	Peso. 16, 128, 000. 00 1, 052, 500. 00 547, 000. 00 403, 391. 10

The percentage of coins produced from the amount operated upon was: Gold, 58.58 per cent; silver, 57.76 per cent. This has been a record-breaking year for the coining department of this mint, the total number of pieces coined and delivered exceeding the production of any previous year by 4,231,025 pieces.

#### NUMBER OF EMPLOYEES.

The total number of employees in this mint at the close of the fiscal year 1908 was 317, distributed as follows:

Department.	Male.	Female.	Total.
General Assayer's. Melter and refiners. Coiner's	87 17 61 70	1 0 0 81	88 17 61 151
Total	235	82	317

# MINT OF THE UNITED STATES AT NEW ORLEANS, LA.

The standard weight and value of gold and silver deposited at this mint during the fiscal year was as follows:

Metal.	Deposits.	Standard ounces.	Coining value.
GoldSilver	780 100	46, 296, 675 4, 535, 796, 480	\$861,333.47 5,278,017.71
Total	880	4, 582, 093. 155	6, 139, 351. 18

There were purchased over the counter 2,659,268 ounces standard of uncurrent domestic gold coin, of the face value of \$49,989.50, producing in new coin \$49,474.74, showing a loss in recoinage of \$514.76, and 160.49 ounces standard of uncurrent domestic silver coin, of the face value of \$201.25, producing in new coin \$199.66, showing a loss in recoinage of \$1.59.

The treasurer transferred for recoinage uncurrent domestic subsidiary silver coin of the face value of \$64,550, containing 48,064.30 ounces standard silver, producing in new coin \$59,800.05, showing

a loss by wear of \$4,749.95.

There were deposited 204.762 ounces standard gold (unrefined)

domestic bullion, producing in gold coin \$3,809.52.

There were deposited 621.34 ounces standard silver domestic bullion, producing in standard dollars \$723.01.

There were deposited 38,519.085 ounces standard gold unrefined

foreign bullion, producing in gold coin \$716,634.14.

There were deposited 21,450.70 ounces standard silver unrefined

foreign bullion, producing in standard dollars \$24,960.81.

The following table shows the countries from which the bullion was received:

•	Go	Gold.		Silver.	
Country.	Standard ounces.	Value.	Standard ounces.	Coining Value.	
Mexico. Nicaragua. Honduras Guatemala. Costa Rica.	36, 140, 266 299, 759 957, 044	\$19,068.63 672,377.04 5,576.91 17,805.47 1,806.09	125. 36 21,056. 38 53. 59 74. 55 140. 82	\$145. 87 24, 501. 97 62. 36 86. 73 163. 86	
Total.	38, 519. 085	716, 634. 14	21, 450. 70	24, 960. 81	

Foreign gold coin containing 1,881.494 standard ounces of the coinage value of \$35,004.54, and foreign silver coin containing 66,577.83 standard ounces of the value of \$77,472.38 in standard silver dollars were received.

Gold bullion amounting to 3,018.180 standard ounces and coinage value of \$56,152.19 and silver bullion 4,978.570 standard ounces and coinage value of \$5,793.25 in standard silver dollars was obtained from jewelers' bars, plate, etc.

The number of employees during the fiscal year were as follows,

the superintendent and operative officers not included:

Department.	Male.	Female.	Total.
General Assaver's	29	7	36
Assayer's. Melter and refiner's Coiner's	11 22	38	11
Total	65	45	110

#### Assayer's Department.

The following is the assayer's report of the fineness of the silver and gold ingot melts passed during the fiscal year 1908:

## SILVER INGOTS.

Fineness.	Number of melts.	Fineness.	Number of melts.
898.4 898.6 898.8 898.9 899.1 899.3 899.3	4 57 147 2 488 93 15 87	899.7. 899.8. 900. Condemned	23 5 7 928 3 931

#### GOLD INGOTS.

# MELTER AND REFINER'S DEPARTMENT.

The melter and refiner received and operated upon 111,959.889 standard ounces of gold bullion and returned at the settlement 112,078.779 standard ounces, showing a surplus of 118.890 standard ounces. He also received and operated upon during the same period 8,406,388.43 standard ounces of silver and returned 7,416,073.43 standard ounces, showing a wastage of 1,929.93 standard ounces, being 15.3 per cent of his legal allowance.

From 95 barrels of sweeps there were obtained 97.052 standard

ounces of gold and 5,732.42 standard ounces of silver.

The number of gold and silver ingot melts made and the number condemned by the assayer is as follows:

Melts.	Number made.	Number condemned.
Gold ingots	931	3
Total	933	3

# MELTS MADE DURING THE YEAR.

Fine gold. Fine silver Mass melts.	11 30	Grain bars. Granulations	19 44
Gold deposits	780	Miscellaneous	30

#### REFINERY OPERATIONS.

The weight and value of gold and silver operated upon in the refinery were as follows:

Metal.	Standard ounces.	Coining value.
Gold bullion. Silver bullion. Amount of gold and silver received from refinery: Gold. Silver.	35, 147, 197 81, 265, 97 35, 147, 197 80, 438, 95	\$653, 901. 33 101, 108. 51 653, 901. 33 100, 079. 56

Silver bullion on which charges were collected contained 21,427.33 standard ounces.

Silver bullion owned by the Government on which there were no charges contained 59,838.64 standard ounces.

The refinery was in operation for only three months.

## Coiner's Department.

During the fiscal year 1907 the coiner received and operated upon 7,612,014.20 standard ounces of silver.

He manufactured during the same period 4,185,206.63 standard ounces of silver coin, valued at \$5,207,100, aggregating 16,266,600 pieces, as shown by the following table:

No gold coined during this fiscal year.

Denomination.	Pieces.	Value.
Half dollars. SILVER. Quarter dollars. Dimes	6, 354, 600 6, 924, 000 2, 988, 000	\$3, 177, 300 1, 731, 000 298, 800
Total	16, 266, 600	5, 207, 100

The percentage of coin produced from the amount operated upon was, silver, 54.98.

At the annual settlement of his accounts it was found that there had been a wastage during the year of 3,025.60 standard ounces of silver, being 39.74 per cent of the legal allowance.

# MINT OF THE UNITED STATES AT DENVER, COLO.

The receipts of gold and silver during the fiscal year 1908 were as follows:

Metal.	Deposits.	Redeposits.	Standard ounces.	Coining value.
GoldSilver	3,865 3,758		760, 259. 597 4, 357, 843. 44	\$14,144,364.59 5,070,945.09
Total	7,623		5, 118, 103. 037	19,215,309.68

Domestic bullion, refined, carried 13,867.862 standard ounces gold, of a coinage value of \$258,006.74, and 4,006,640.05 ounces of silver, of

a coinage value of \$4,662,272.06.

The metallurgical plants, manufacturing high-class bars below .990 assay fineness, furnished 254,922.145 standard ounces gold, of a coinage value of \$4,742,737.59 and 10,426.69 standard ounces silver, of a coinage value of \$12,132.88.

#### OFFICERS AND EMPLOYEES.

The number of officers and employees in the mint at the close of the fiscal year was as follows:

Department.	Men.	Women.	Total.
General. Assayer's. Coiner's. Melter and Refiner's	60 10 32 24	47	62 10 79 24
Total	126	49	175

#### ASSAY DEPARTMENT.

The operations of this department during the fiscal year 1908 were as follows:

#### Samples Operated Upon.

	Items.	Gold.	Silver.	Total.
		3,833	562	4, 395

#### MELTER AND REFINER'S DEPARTMENT.

The melter and refiner received from the superintendent during the fiscal year ended June 30, 1908:

GOLD ACCOUNT.	tandard ounces.
In bullion	98
Returned at settlement 269 731 6	19 2,747,703.717
Surplus in gold recovered.	489, 448

#### SILVER ACCOUNT.

In bullion.         6, 665, 331.67           Returned prior to settlement.         6, 665, 331.67           Returned at settlement.         865, 023.54	,
Surplus in silver recovered.	11, 438, 52

The surplus was recovered from unreported fractions of assays, from the difference between standard and actual fineness of ingots delivered, and from fractional gains in weight of deposits.

The following melts were made:

Melts.	Gold.	Silver.	Gold and silver.	Total.
Deposits. Anodes. Ingots. Mint bars. Settlement bars. Miscellaneous.	4,140 449 438 211 18	602 470 1,776 117 31	728	4,742 919 2,214 328 49 728
Total	5, 256	2, 996	728	8,980

Ingot melts condemned: Gold, 5; silver, 1.

One continuous run on silver ingots weighing 3,556,313.56 ounces

was made without having a melt condemned or remelted.

During the year there were gathered 1,525 sacks of sweeps, containing, by mint assay, 435.145 standard ounces of gold and 2,872.82 standard ounces of silver.

Refinery operations, covering a period of nearly ten months, were

as follows:

as follows.	
GOLD ACCOUNT.	
Star	ndard ounce s

#### Coiner's Department.

During the fiscal year 1908 the coiner received from the superintendent 2,696,697.90 standard ounces of gold, making therefrom \$31,440,000, on which there was a wastage of 70.936 standard ounces, being 5.26 per cent of the legal allowance. He also received during the same period 6,488,225.60 standard ounces of silver, making

therefrom \$5,001,000 in subsidiary coin, on which there was a wastage of 2,147.17 standard ounces, being 33.09 per cent of the legal allowance.

The following table shows the denomination, number of pieces, and value of coin made:

Denomination.	Pieces.	Value.
GOLD.  Double eagles. Eagles. Half eagles.	1,346,250 210,000 483,000	\$26,925,000 2,100,000 2,415,000
Total gold	2,039,250	31,440,000
SILVER.		
Half dollars. Quarter dollars. Dimes	6,120,000 4,976,000 6,970,000	3,060,000 1,244,000 697,000
Total silver	18,066,000	5,001,000
Total coinage	20,105,250	36,441,000

During the period from April 1, 1907, to August 1, 1907, he received 4,358,049.09 standard ounces of 50-centavos silver ingots for Mexican coinage, making therefrom 6,199,291 pieces on which there was a wastage of 2,916.12 standard ounces, being 66.91 per cent of the legal allowance.

The per cent of coin produced from amount of ingots operated on was: Gold, 62.93 per cent; subsidiary silver, 61.96; per cent; Mexican 50-centavos, 50.81 per cent.

# ASSAY OFFICE OF THE UNITED STATES AT NEW YORK, N. Y.

The report on the business of this office for the fiscal year 1908 is as follows:

Bullion received.	Deposits.	Redeposits.	Standard ounces.	Coinage value.
Gold	10,898 2,845	4 24	7,083,832,191 5,544,155,42	\$131,792,226.75 6,451,380.85
Tota1	13,743	28		138,243,607.60

The gross weight of the above bullion was 11,821,125.41 ounces, an increase over last year of 3,850,282.97 ounces.

The value of foreign gold bullion and coin deposited was \$79,188,-392.28, an increase over last year of \$45,190,681.17.

The value of domestic gold coin and bullion deposited was \$52,603,-642.69, an increase over last year of \$8,844,830.01.

The sources of domestic gold bullion and coin were as follows:

From new production in the United States and Territories. From private refineries. From jewelers' bars, plate, etc From redeposited bullion From United States gold coln of light weight.	41,567,044.42 4,691,142.19 3,147.61
Total	52 603 642 60

This statement shows an increase over last year in the amount of gold bullion received from private refineries of \$8,486,051.11, and from United States gold coin of light weight of \$140,176.97.

Of the fine silver received during the year, \$1,996,097.73 standard

ounces consisted of purchases.

The redeposits of silver consisted of 85,470.71 standard ounces, contained in fine bars made at this office, and 29.36 standard ounces of unparted bars made at the Denver mint and the Boise assay office.

The unparted bullion received during the year has been transmitted to the Philadelphia mint for treatment, as the parting opera-

tions have not been resumed during the year.

The deductions from base silver bullion received from July 1, 1907, to February 28, 1908, inclusive, for the benefit of the melter and refiner's account amounted to 1,935.35 ounces, containing 62.87 ounces fine gold and 1,448.56 ounces fine silver.

The surplus bullion recovered by the melter and refiner in his operations was 1,293.19 ounces fine silver, and he incurred a wastage

of 55.165 ounces fine gold.

The amount of bullion delivered to and returned by the melter and refiner to the superintendent during the fiscal year 1908 was as follows:

Items.	Delivered to the melter and refiner.	Returned by the melter and refiner.
GoldSilver	Standard ozs. 7,313,458.888 5,675,084.20	Standard ozs. 7,313,414.31 5,676,377.39

The grains and fluxes from the deposit melting room yielded \$10,466.38; the sweeps (119 barrels), \$13,408.93.

There were stamped during the year 50,903 gold bars and 15,451 silver bars; previous year, 73,759 gold bars and 23,041 silver bars.

Gold bars issued to depositors of bullion for domestic use.  Gold bars exchanged for gold coin for domestic use.	

Total gold bars issued for use in the arts, etc. 20, 194, 298. 66

showing a decrease of \$8,722,611.05 compared with last year.

The value of gold bars exchanged for gold coin for export was \$40,799,187.96, being an increase over that of last year of \$15,628,288.17. The income from the exchange of gold bars for gold coin was \$25,014.44.

The force employed in this office at the close of the year comprised 81 men and 3 women, including the superintendent, assayer, melter

and refiner, and 81 others, distributed as follows:

General department. Melter and refiner's department. Assayer's department	41
Total	

During the year the old refinery building has been taken down, but actual operations in the building of a new one have not been begun

This report covers the business for one and one-half months, to August 15, 1907, under the incumbency of the previous superintend-

ent, and the remaining ten and one-half months of the year under that of the present superintendent.

#### ASSAYER'S DEPARTMENT.

There were assayed 10,898 melts of gold deposits and 2,845 melts of silver deposits, a total of 13,743 melts involving 68,715 assays. The fine gold and fine silver melts assayed were about 431 and the fineness was stamped upon 50,903 bars of gold and 14,451 bars of silver, a total of 66,354.

Special assays number 995, being largely articles of jewelry and

manufacturers' samples.

Assays were made on 205 barrels of sweeps and on 174 consolidated melts for shipment to the mint, with the usual incidental ones for the melter and refiner, etc.

All proof gold, proof silver, and cupels used were made in this

department.

An electric pyrometer has been installed in the laboratory and has proved of great assistance in determining the different heats of the gold, silver, and copper cupellation.

#### MELTER AND REFINER'S DEPARTMENT.

The business of this department during the fiscal year 1908 is as follows:

Items.	Gross amount.	Standard gold.	Standard silver.
Settlement metal of June 30, 1907 Gold deposits, July 1 to August 15, 1907 Silver deposits, July 1 to August 15, 1907. Silver purchases, July 1 to August 15, 1907 Gold deposits, August 16, 1907 to June 30, 1908 Silver deposits, August 16, 1907, to June 30, 1908. Silver deposits, August 16, 1907, to June 30, 1908.		Ounces. 229, 637, 005 380, 400, 799 5, 646, 984 6, 637, 559, 632 60, 214, 468	Ounces. 132, 221. 97 24, 632. 40 530, 619. 14 201, 531. 27 4, 786, 079. 42
Total	12, 183, 676, 573	7, 313, 458. 888	5,675,084.20
The number of gold deposits melted was about			10,89
Total			13 74

The number of fine, standard, mint and unparted bars made was: Gold, 50,903; silver, 15,451; mint and unparted, 17,041. Total 83,395, containing 7,218,263.714 ounces of standard gold and 5,533,394.20 ounces of standard silver.

Deductions on base silver bullion were 1,864.80 ounces gross esti-

mated as containing 1,500 ounces of standard silver.

There was refined by fire and fluxes, fine, standard and mint gold, 2,430,443.117 standard ounces; fine, standard and mint silver, 548,067.13 standard ounces. There was returned from melters and delivered to superintendent as unparted mint bars: Gold, 259,392.448 standard ounces; silver, 392,191.66 standard ounces.

Ten and three hundred and eight-thousandths ounces of standard gold (value, \$191.78) and 422.48 ounces of standard silver (value, \$261.94) were returned in settlement of August 15, 1907, in excess of amounts debited to the melter and refiner, and in the settlement of June 30, 1908, there was a wastage of 55.165 ounces of standard gold (value, \$1,026.34) and an excess of 870.71 ounces of standard silver (value, \$423.72).

The following statement shows the relation between the expenses of this department for parting and refining and charges collected therefor:

Receipts:		
Charges collected	\$119,177,87	
Gold surplus of August 15, 1907	191 78	
Silver surplus of August 15, 1907.	261.94

# THE MINT OF THE UNITED STATES AT CARSON, NEV.

The value of the deposits at this mint, conducted as an assay office, during the fiscal year 1908 showed an increase of \$937,552.31, or nearly 114 per cent over the deposits of 1907. Gold to the value of \$1,707,399.16 and silver valued at \$53,681.38 were deposited. Four-fifths of this amount originated in Nevada; the balance from California.

The operations required a total of 4,485 assays. This number includes deposits, consolidations, bullion and ore assays for gold, silver, copper, and lead.

The weight of deposits before melting contained 139,366.31 ounces and the weight after melting 136,683.31 ounces, an average loss in melting of 1.92 per cent.

The force of employees consisted of 7 men during the first eight

months of the year, and 9 during the last four months.

The following table shows the amount of deposits, earnings, and expenditures, together with the percentage of net expenses to deposits for the fiscal year:

Item.	Amount.
Deposits: Gold	£1 761 000 F4
Earnings	\$1,761,080.54 3,621.63 11,445.10

# ASSAY OFFICE OF THE UNITED STATES AT BOISE, IDAHO.

During the fiscal year 1908 there were received at this office 1,549 deposits of gold bullion, all of domestic production. The States from which deposits were made are Idaho, Oregon, Montana, Washington, and Utah. No silver bullion or coin were received for assay.

The amount of deposits shows a small increase over those of last

year.

The weight of bullion received before melting was 70,118.67 ounces and after melting 67,695.90 ounces, the average loss in melting being 3.45 per cent. There was a gain of \$635.44 in mass melting.

The office force of this institution consists of 9 men.

The following table shows the amount of deposits, earnings, and expenditures, and the percentage of net expenses to deposits:

Item.	Amount.
Deposits:	<b>2000 000 00</b>
Earnings Expenditures Percentage of net expenses to deposits, 1.26060.	\$880,396.80 2,815.55 13,913.88

# ASSAY OFFICE OF THE UNITED STATES, HELENA, MONT.

During the fiscal year 1908 there were received at this office 880

deposits of gold bullion. Of these deposits 13 were buttons.

The weight of the 867 regular deposits before melting contained 137,372.93 ounces and after melting 131,625.89 ounces, being an average loss in melting of 4.183 per cent. The average fineness of the unparted bars shipped to the Philadelphia mint was: Gold, 634½; silver, 316; the total gold and silver coinage value being \$1,779,113.15.

Number of assays, regular deposits.	2,810
Special assays, slags, by-products, etc.	170
Total	2,980

There are 13 persons employed at this office, 12 men and 1 woman. The following table shows the amount of deposits, earnings, and expenditures, and percentage of net expenses to deposits.

Item.	Amount.
Deposits:  Gold	
Earnings. Expenditures. Percentage of net expenses to deposits, 1.07908.	\$1,779,113.34 3,892.53 23,090.69

# ASSAY OFFICE OF THE UNITED STATES AT CHARLOTTE, N. C.

During the fiscal year 1908 there were received at this office 212 deposits of gold bullion, principally from the Appalachian Range.

In addition to the assay of regular deposits there were made 95

assays of ore.

The weight of bullion before melting contained 13,313 ounces and after melting 13,142.36 ounces, an average loss in melting of 1.28 per cent.

The force of this office consists of 2 officers, 1 clerk, and 2 laborers.

The following statement shows the amount of deposits, earnings, and expenditures, also the percentage of net expenses to deposits during the fiscal year 1908:

Item.	Amount.
Deposits:     Gold	\$221,989.06 819.77
Earnings. Expenditures. Percentage of net expenses to deposits, 1.69657.	4,585.99

## ASSAY OFFICE OF THE UNITED STATES AT ST. LOUIS, MO.

The value of deposits of bullion for the fiscal year 1908 at this office aggregated \$442,285,23, showing a gain in value of deposits compared

with those of 1907 of \$182,270.56.

The receipt of domestic gold bullion amounted to 890.705 standard ounces of gold and 115.96 standard ounces of silver; of jeweler's bars, 2,341.716 standard ounces of gold and 670.80 standard ounces of silver; foreign bullion unrefined contained 186.821 standard ounces of gold and 326.25 standard ounces of silver; uncurrent domestic gold coin, 17,319.833 standard ounces of gold.

There were assayed 333 melts of gold deposits. There were 43 special bullion assays for which a charge of \$2 each was made, and 28 ore assays were made for gold and silver for which a charge of \$3

each was imposed.

The weight of the bullion received was 25,209.13 ounces before melting and after melting 25,067.29 ounces, an average loss in melting being 0.562 per cent.

The working force of this office consists of assayer in charge and

one clerk (male).

The following statement shows the amount of deposits, earnings, and expenditures, also percentage of net earnings to deposits during the fiscal year 1908:

Item.	Amount.
Deposits: \$440, 985. 90 Silver (coinage value) 1, 299. 33	\$442,285.23
Earnings. Expenditures. Percentage of net expenses to deposits, 0.75896.	586. 62 3, 791. 62

#### ASSAY OFFICE OF THE UNITED STATES AT DEADWOOD, S. DAK.

There were deposited in this office during the fiscal year 1908, 241 deposits of bullion, all from the Black Hills of South Dakota, valued at \$1,278,227.12.

There were 4 button assays, 38 ore assays, 7 assays made on mass melts, and 21 assays made for the Forest Service in addition to the 241 assays on bullion deposited.

There were also 6 assays for gold and silver and 4 on base of each of 16 samples of bullion received from the Director of the Mint during the year.

The bullion received contained 138,324.53 ounces before melting and after melting 136,922 ounces, showing an average loss in melting

of 1.013 per cent.

The total number of employees in the assay office at the close of

the fiscal year was 5 men, all in the general office.

The following statement shows the amount of deposits, earnings, and expenditures, also percentage of net expenses to deposits during the fiscal year 1908:

ltem.	Amount.
Deposits: Gold	\$1,278,227.12
Earnings Expenditures. Percentage of net expenses to deposits, 0.46915.	2, 023. 57 8, 020. 39

# ASSAY OFFICE OF THE UNITED STATES AT SEATTLE, WASH.

There were received at this office during the fiscal year 1908, 2,358 deposits of gold and 1 redeposit.

Number of bullion assays determined	6,600
Number of ore assays determined for Forestry Department.	77
Number of special bullion assays received.	31
Number of return bars.	10
Number of ounces of proof gold manufactured	None.
Number of ounces of quartation silver manufactured	406, 55
Number of cupels manufactured.	22,000
Total weight of deposits before melting (ounces).	903, 983, 51
Total weight of deposits after melting (ounces)	897, 300, 31
Per cent of average loss in melting	0.739

There were 1,479 bars, each below 300 ounces, massed into 71 larger bars, the total weight of which was 82,133.53 ounces. The gain in weight from massing these bars was 8.39 ounces, showing an average gain of 0.0059 of an ounce on each deposit.

Average cost of handling bullion melted and assayed was \$0.0454

per ounce.

A net loss of \$346.90 resulted from the operations of the year, the

source of same being as follows:

1. A loss of \$160.42 in the melting department. This loss is due to the fact that depositors are allowed full weight for the granules or pannings from each deposit, whereas these granules almost invariably run lower in fineness than the bar and also contain more or less slag.

2. A loss of \$64.20 in the assay department, the greater part of which undoubtedly arises from the clipping of bars. A removal of the lineleum, etc., from the weighing and clipping rooms will probably net enough bullion to make up most of this loss.

3. A loss of \$13.13 in the general department.

4. A loss of \$334.74 in shipments to the mint, due entirely to difference in assays.

5. A gain of \$225.59 in mass melts. About \$125 of this amount should arise from the swing of the needle on each of the 1,479 bars massed during the year.

The deposit melting room grains for the year amounted to \$901.16, but none of this amount was taken to reimburse losses, as has been the

custom in previous years.

Of the 2,358 deposits received, the entire number were deposits of gold bullion, 2,327 being crude and 31 refined. Only three of the refined bars were of domestic production, the other 28 coming from refineries of British Columbia.

The bullion in the melting room slag was not recovered this year, owing to the fact that the smelting furnace installed for this purpose

was not completed in time.

The receipts from the different districts of Alaska are shown in the following table:

	Gold.		Silver.	
Locality.	Standard ounces.	Coining value.	Standard ounces.	Coining value.

Attention is again called to the need of a new building. This matter was fully taken up in the report of last year, and it is respectfully recommended that the statements therein be given consideration. Owing to the recent decline in values throughout the country, a building site could probably be obtained far cheaper now than at any future time.

The number of employees at the end of the fiscal year was 30 (all male), but for seven months of the year only 25 were employed.

The following table shows the amount of deposits, earnings, and expenditures, together with the percentage of net expenses to deposits, in the fiscal year 1908:

Item.	Amount.
Deposits: Gold	215 046 100 04

#### PERCENTAGE OF LOSS IN MELTING.

It will be noticed there is a wide range of difference in the losses in melting by the various institutions. This difference is wholly due to the character of bullion deposited, as is shown in the following figures. These figures are from the record kept at the United States mint at San Francisco. The record for two half years and two years are given to show the remarkable uniformity of the losses in the bullion that could be classified.

Description.	Half year ending De- cember, 1906.	Year ending December, 1906.	Half year ending De- cember, 1907.	Year ending December, 1907.

SUMMARY OF OPERATIONS, WASTAGE, AND LOSS, FISCAL YEAR 1908.

The institutions of the mint service consist of the coinage mints at Philadelphia, San Francisco, New Orleans, and Denver; the mint at Carson, which at present is conducted as an assay office; the assay office at New York, which, like each of the coinage mints, operates a refinery, and the minor assay offices at Boise, Helena, Charlotte, St. Louis, Deadwood, and Seattle. Bullion is received at the assay offices on the same terms as at the mints, except that an additional charge of one-eighth of 1 per cent is made at the former. Bullion purchased at the assay offices becomes the property of the Government and is shipped to the mints at the expense of the Government.

# OPERATIONS.

The quantity of precious metals operated upon in the different departments of the mints and assay office at New York during the fiscal year 1908 aggregated 51,955,190 standard ounces of gold and 103,980,617 standard ounces of silver.

The figures in the table following are the actual figures as obtained at the settlement of the accounts of the officers in charge. The

figures in the article showing the operations of each mint or assay office are for the entire fiscal year up to June 30, except the operations at the Denver mint, in which case the figures cover a period of fifteen months.

Total	4,270	67		5,688	7		

#### WASTAGE AND LOSS ON SALE OF SWEEPS.

The value of the precious metals wasted in the metallurgical and mechanical departments was \$54,222.20. A loss of \$7,334.81 occurred from the difference between the assay value of the bullion contained in sweeps sold and the amount received for the same, as follows:

		Mint	Assav			
Items.	Philadel- phia.	San Francisco.	New Orleans.	Denver.	office at New York.	Total.
Melter and refiner's gold wastage. Melter and refiner's silver wastage. Coiner's gold wastage. Coiner's silver wastage. Loss on sale of sweeps.  Total.	\$25,119.48 5,313.45 284.11 1,135.87 31,852.91	\$9,240.41 1,143.83 5,647.57 2,678.25 18,710.06	\$988.85 1,550.24 563.27 3,102.36	\$1,319.74 2,588.18 589.95	\$1,026.34 2,367.47 3,393.81	\$35,386.23 988.85 7,777.02 10,070.10 7,334.81 61,557.01
Paid as follows: From contingent appropriation From parting and refining ap- propriation	30,761.12 1,091.79	18,040.40	3,102.36	4,497.87 4,349.17 148.70	3,393.81	56, 253. 05 5,303. 96
Total	31,852.91	18,710.06	3,102.36	4, 497. 87	3,393.81	61,557.01

The wastage and losses aggregated \$61,557.01. Against these losses there were gains arising from the operations in bullion, as follows:

Character of gains.	Fiscal year 1908.
Surplus bullion returned by operative officers. Precious metals received in grains and sweeps. Gains on bullion shipped from the minor assay offices to the mints for coinage.  Total.	\$29,797.58 31,152.39 5,066.68 66,016.65

Deducting the incidental gains on bullion from the value of the total operative wastage and loss on sale of sweeps, there has been a net gain in the operations of the mints during the fiscal year of \$4,459.64.

RECEIPTS AND DISPOSITION OF GOLD BULLION, FISCAL YEAR 1908.

#### RECEIPTS.

The receipts of gold bullion at the mints and assay offices aggregated \$326,630,042.44, as shown by the following table:

	Depos	ited.		Redep		
Institution.	Deposits.	Uncurrent United States coin transferred for re- coinage.	Surplus bullion recovered.	Receipts from assay offices.	Government bars.	Total.

#### RECAPITULATION OF GOLD EXPORTS TO EUROPE.

Description.	France.	England.	Germany.
United States coins. Foreign coins. United States assay office bars Bullion in ore.		\$4,000 3,017,628 272	\$10,850,000 12,285,090
Total	26, 837, 239	3,021,900	23, 135, 090

Grand total of exports to Europe.....

852, 994, 229

During the same period there were shipped to West Indies, Mexico, Central and South America, Cuba, etc., the following:

United States coin Foreign coins.	\$2,238,420 1,275,593	
Total gold exports to other ports		\$3,514,013
Grand total of gold exports		56, 508, 242
The imports during the same period were as follow	s:	
From Europe: United States coins Foreign coins Bullion Bullion in ore	9,340,064 $64,604,653$	
Total gold imports to Europe. From other ports (West Indies, Mexico, Central and South America, and Cuba): United States coin Foreign coin Bullion. In ore and base bullion.	7,640,126 1,632,357 5,043,780	
Total gold imports from other ports.		15, 194, 786
Grand total of gold imports		110 707 274

During the same period there was exported to England copper matte containing 17.65 ounces fine gold and 52,114 ounces of fine silver.

# NET EXPORTS UNITED STATES GOLD COIN.

The net exports of United States gold coin since January 1, 1870, are as follows:

Period.	Imports.	Exports.	Period.	Imports.	Exports.
Jan. 1 to July 1, 1870		\$6,384,250	Fiscal year—Cont'd.	\$15, 432, 443	\$49 S41 065
Fiscal year— 1871		55, 491, 719	1893	6,074,899	\$42,841,963 101,844,087

#### THE WORLD'S STOCK OF MONEY.

The monetary systems of the different countries of the world, an estimate of the approximate stock of gold, silver, and uncovered paper, with per capita of each at the close of the calendar year 1907, are set forth in the following table, compiled from official information as far as received and, in the absence of such information, from other sources regarded as reliable. In some instances it has been impossible to find any information whatever and recourse in such cases has been had to the estimates of the previous year:

e Includes Straits Settlements, the Malay States, and Johore.
f From L'Economiste European, January 1, 1907.
Except Costa Rica and British Honduras (gold-standard countries).

In the foregoing table the total amount of gold in the banks of issue and in the public treasuries exhibits an increase of \$220,600,000 over the amount held at the close of the calendar year 1906. The increase of the stock of gold held for monetary purposes is \$125,000,000 over that of the previous year. The increases and decreases over the estimates for the calendar year 1906 are shown in the following table:

Country.	Increase.	Decrease.	Country.	Increase.	Decrease.
United States Austria-Hungary Belgium Australasia Canada United Kingdom India South Africa Straits Settlements Denmark Finland Germany Greece Italy Japan Mexico	34, 300, 000 3, 900, 000 77, 800, 000 900, 000 14, 100, 000 42, 700, 000	\$3,300,000 300,000 224,100,000 12,800,000 4,200,000 200,000 5,000,000	Netherlands. Net increase, \$125,700,000.

## GOLD AND SILVER USED IN INDUSTRIAL ARTS IN THE UNITED STATES DURING THE CALENDAR YEAR 1907.

Among the purveyors of gold and silver bars for use in the industrial arts the United States mint at Philadelphia and the United States assay office at New York hold the foremost places; consequently the larger portion of the material consumed in the arts is brought under government notice and is a matter of public record.

The following table gives the value of the gold and the quantity of the silver bars issued by the government institutions and private refineries during the calendar year 1907:

GOLD AND SILVER BARS ISSUED BY THE GOVERNMENT INSTITUTIONS AND MANU-FACTURED BY PRIVATE REFINERIES FOR USE IN THE INDUSTRIAL ARTS DURING THE CALENDAR YEAR 1907.

Gold.		d.		Silv		
Material used.	Government institutions.	Private refineries.	Total.	Government institutions.	Private refineries.	Total.
Domestic bullion. Foreign material. United States coin. Old jewelry.	14, 501, 615. 54	955. 00 369, 184. 00 2, 456, 034. 00	14, 502, 570, 54 369, 184, 00 7, 177, 574, 98	1,764,616.75	2, 863, 591.00 1, 500.00	1,500.00 2,232,540.67

The total amount of gold and silver coin estimated to have been used in the arts during the calendar year was \$3,500,000 and \$100,000, respectively; changing the above table so that it will include these amounts will make the total industrial consumption for 1907 as follows:

Material used.	Gold.	Silver.
Domestic bullion Foreign material. United States coin. Old material.  Total.	3,500,000	Fine oz. 17, 431, 691 4, 628, 208 77, 344 2, 232, 541 24, 369, 784

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS, AND CLASSIFICATION OF THE MATERIAL USED, BY CALENDAR YEARS, SINCE 1880.

#### EXCHANGE OF FINE GOLD BARS FOR GOLD COIN AND GOLD BULLION.

The value of the fine gold bars furnished to the trade in exchange for gold coin and bullion monthly, by the United States mint at Philadelphia and assay office at New York, for the fiscal year 1908, was as follows:

Of the total value of bars (\$63,997,687.99) exchanged for coin, \$40,771,587.78 were exported and \$23,226,100.21 were used in the industrial arts.

## THE WORLD'S INDUSTRIAL CONSUMPTION OF THE PRECIOUS METALS IN 1907.

This bureau estimates the world's consumption of the precious metals in the arts during the calendar year 1907 as follows: Gold, of the value of \$135,046,500, equivalent to 6,532,874 ounces, fine; and silver, 92,568,300 ounces, fine, of the commercial value of \$61,095,078. In these estimates only new material is taken into account.

#### PRODUCT OF GOLD AND SILVER IN THE UNITED STATES IN 1907.

The detailed statistics of the product of gold and silver in the United States for the calendar year 1907 were presented in a special report to the Secretary of the Treasury.

The distribution of the product among producing States and Territories was as follows:

Approximate Distribution by Producing States and Territories of the Product of Gold and Silver in the United States for the Calendar Year 1907.

[As estimated by the Director of the Mint.]

	Go	ld.	Silver.		Total value (silver at

## WORLD'S COINAGE.

In the appendix will be found a table, revised from the latest information received, exhibiting the coinages of the various countries of the world during the calendar years 1905, 1906, and 1907. The following is a summary of the same:

#### Coinage of Nations.

Calendar year.	Gold.	Silver.
1905.	\$245, 954, 257	\$173, 333, 093
1906.	366, 326, 788	155, 590, 466
1907	411, 803, 902	221, 652, 826

The above figures represent, as nearly as this bureau has been able to ascertain, the total value of the gold and silver coinages executed in the world during the years given.

It must be borne in mind, however, that the total of these coinages does not correctly represent the amount of new gold and new silver made into coins during the year, for the reason that the coinages as reported include the value of domestic and foreign coins melted for recoinage, as well as old material, plate, etc., used in coinage.

In the circular letter of inquiry prepared at this bureau and sent to foreign governments through the Department of State, asking for information on these subjects, it was especially requested that each country report the amount of such recoinages. This has been done in many instances, but not in all.

Coinage of Gold and Silver of the Mints of the World by Calendar Years since 1873.

	Go	ld.	Sil	ver.

#### VALUES OF FOREIGN COINS.

# TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, October 1, 1908.

In pursuance of the provisions of section 25 of the act of August 28, 1894, I hereby proclaim the following estimate by the Director of the Mint of the values of foreign coins to be the values of such coins in terms of the money of account of the United States, to be followed in estimating the value of all foreign merchandise exported to the United States on and after October 1, 1908, expressed in any of such metallic currencies.

GEORGE B. CORTELYOU, Secretary.

#### VALUES OF FOREIGN COINS.

Country.	Standard.	Monetary unit.	Value in terms of U.S. gold dollar.	Coins.
Argentine Republic	Gold	Peso	\$0.965	Gold: Argentine (\$4.824) and ½ argentine. Silver: Peso and divisions.
Austria-Hungary	do	Crown	. 203	Gold: 10 and 20 crowns. Silver: 1 and 5 crowns.
Belgium	do	Franc	. 193	Gold: 10 and 20 francs. Silver: 5 francs.
BoliviaBrazil	Silver Gold	Boliviano	. 382	Silver boliviano and divisions. Gold: 5, 10, and 20 milreis. Silver: ½, 1, and 2 milreis.
British possessions, N. A. (except Newfoundland). Central American States—	do	Dollar	1.000	2, 1, and 2 miners.
Costa Rica	do	Colon	. 465	Gold: 2, 5, 10, and 20 colons (\$9.307).
British Honduras	do	Dollar	1.000	Silver: 5, 10, 25, and 50 centimos.
Honduras Nicaragua Salvador	Silver	Peso	. 382	Silver: Peso and divisions.
Chile	Gold	do	. 365	Gold: Escudo (\$1.825), doubloon (\$3.650), and condor (\$7.300). Silver: Peso and divisions,

Colombia	Gold	Dollar	1.000	Gold: Condor (\$9.647) and double- condor. Silver: Peso.
Denmark Ecuador	do	Crown Sucre	. 268 . 487	Gold: 10 and 20 crowns. Gold: 10 sucres (\$4.8665). Silver:
Egypt	do	Pound (100 piasters)	4.943	Sucre and divisions. Gold: Pound (100 piasters), 5, 10, 20, and 50 piasters. Silver: 1, 2, 5,
Finland	do	Mark	. 193	10, and 20 piasters. Gold: 20 marks (\$3.859), 10 marks (\$1.93).

## VALUES OF FOREIGN COINS-Continued.

Country.	Standard.	Monetary unit.	Value in terms of U.S. gold dollar.	Coins.
France	Gold	Franc	\$0.193	Gold: 5, 10, 20, 50, and 100 francs. Silver: 5 francs.
German Empire Great Britain	do	Mark Pound sterling	$238$ $4.866\frac{1}{2}$	Gold: 5, 10, and 20 marks. Gold: Sovereign (pound sterling)
		Drachma	. 193	and ½ sovereign. Gold: 5, 10, 20, 50, and 100 draehmas. Silver: 5 drachmas.
Haiti	do	Gourde	. 965	Gold: 1, 2, 5, and 10 gourdes. Silver: Gourde and divisions.
· · · · ·		Pound sterling $a$	4.866½	Gold: Sovereign (pound sterling). Silver: Rupee and divisions.
Italy			. 193	Gold: 5, 10, 20, 50, and 100 lire. Silver: 5 lire.
Japan		Yen	. 498	Gold: 5, 10, and 20 yen. Silver: 10, 20, and 50 sen.
Liberia Mexieo	do	Dollar	1.000 .498	Gold: 5 and 10 pesos. Silver: Dol-
Netherlands	do	Florin	. 402	lar c or peso and divisions. Gold: 10 florins. Silver: 2½, 1 florin and divisions.
Newfoundland Norway		Dollar	1.014 .268	Gold: 2 dollars (\$2.028). Gold: 10 and 20 erowns.
Panama	do	Balboa	1.000	Gold: 1, 2½, 5, 10, and 20 balboas. Silver: Peso and divisions.
		Kran	. 070	Gold: ½, 1, and 2 tomans (\$3.409).
Peru		Libra		Gold: ½ and 1 libra. Silver: Sol and divisions.
Philippine Islands Portugal	do	Peso	. 500 1. 080	Silver peso: 10, 20, and 50 centavos. Gold: 1, 2, 5, and 10 milreis.
Russia	do	Ruble	. 515	Gold: 5, 7½, 10, and 15 rubles. Silver: 5, 10, 15, 20, 25, 50, and 100 copeks.
Spain Straits Settlements	do	$\operatorname{Peseta}_{-}$ $\operatorname{Pound}_{-}$ $\operatorname{sterling}_{-}$ $d$	$193$ $4.866\frac{1}{2}$	Gold: 25 pesetas. Silver: 5 pesetas. Gold: Sovereign (pound sterling).
SwedenSwitzerland	do	CrownFrane	. 268	Silver: Dollar and divisions. Gold: 10 and 20 erowns. Gold: 5, 10, 20, 50, and 100 francs,
	1	Piaster		Silver: 5 francs. Gold: 25, 50, 100, 250, and 500 pias-
Uruguay	do	Peso	1.034	ters. Gold: Peso. Silver: Peso and divi-
Venezuela	do	Bolivar	. 193	sions. Gold: 5, 10, 20, 50, and 100 bolivars. Silver: 5 bolivars.

a The sovereign is the standard coin of India, but the rupee ( $\$0.3244\frac{1}{3}$ ) is the current coin, valued at 15 to

b Seventy-five centigrams fine gold.
c Value in Mexico, \$0.498.
d The current coin of the Straits Settlements is the silver dollar issued on government account and which has been given a tentative value of \$0.567758\frac{1}{3}\$.

Note.—The coins of silver-standard countries are valued by their pure silver contents at the average market price of silver for the three months preceding the date of this circular.

#### MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the production and coinage of the precious metals, imports and exports of gold and silver, amount of bank and government notes, both covered and uncovered, of the different foreign countries, published annually in the reports of this bureau, are obtained directly from the governments of such countries by the representatives of the United States accredited to them.

A copy of the interrogatories covering the points on which informa-tion is sought from the governments of foreign countries is sent yearly to the United States ambassadors and ministers through the Department of State, and the replies in the form of reports are forwarded directly to the Bureau of the Mint. The interrogatories

sent are as follows:

1. What was the amount of gold coined during the calendar year 1907 by denominations and values? What amount of this was recoinage? Domestic and foreign

coins melted given separately.

2. What was the amount of silver coined during the calendar year 1907 by denominations and values? What amount of this was recoinage? Domestic and foreign coins melted given separately. If any coinage was executed at foreign mints, please give separate statement.

3. Was any coinage executed for other governments during the year 1907? If so,

state character and amount of same.

4. What was the weight of fine gold used in the industrial arts during the calendar year 1907? What amount of this was new gold, what amount old gold, and what amount coins?

5. Same questions as to silver.

6. What was the import and export of gold during the calendar year 1907? (Coin, bullion, and ore, as well as their weight and value, should be given separately, if possible.) If practicable, give imports and exports by countries.

7. Same questions as to silver.8. What was the total import of United States gold coin during the calendar year 1907?

9. What was the amount of United States gold coin deposited at the mints and melted?

10. What was the weight, expressed in kilograms fine, and the value of the gold produced from the mines of the country during the calendar year 1907? Give the product of the colonies of the country, naming them separately.

11. What was the weight, expressed in kilograms fine, of the silver produced from the mines of the country during the calendar 1907? Also give product of the colonies of the country.

12. What was the weight and what the value of the output of gold from the refineries of the country during the year? Give the sources of this output if practicable.

13. Same question as to silver.

14. What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1907? Give stock in public treasuries, and banks, and in circulation separately.

- 15. Same question as to silver. 16. What was the amount of government notes outstanding at the end of the year 1907?
- 17. What was the amount of bank notes outstanding at the end of the year 1907? 18. What was the amount of government notes outstanding not covered by legaltender gold and silver coin or bullion at the end of the year 1907?

19. What was the amount of bank notes outstanding not covered by legal-tender

gold and silver coin or bullion at the end of the year 1907?

20. What was the actual currency of the country, gold, silver, or inconvertible paper?
21. Is gold at a premium as compared with the actual currency of the country? And if it is, what was the highest, lowest, and average premium during the year 1907?

22. Were any laws passed during the year 1907 affecting the coinage, issue, or legal-

tender character of the metallic or paper currency? If so, please forward copies of the

same.

23. Is there a report published on the operations of the mint? If so, please forward a copy of the same; also a report of the department of mines for 1907.

## EXPERIMENTS TO ASCERTAIN LOSS IN REFINING GOLD AND SILVER BY AIR BLAST.

A series of interesting experiments were made during the year at the United States assay office at Seattle to ascertain the loss of gold and silver in refining by air blast. Mr. L. S. Kerfoot, who made the experiments, reports:

Bars 2276 and 2239 were used for the experiment. Bar 2276 weighed 15.13 ounces. Four assays with synthetic proofs were care-

fully made and the finenesses found to be:

Gold	526. 1
Silver	400
Base.	73. 9

The base was lead and copper. This bar was melted with flux in a new pot, and for thirty minutes an air blast was played on the surface of the metal, the metal being continually stirred during the operation. Borax was then added and the bar poured. The flux was very carefully ground, panned, and the granules weighed in with the bar. The actual loss in melting was 0 41 of an ounce. Two assays were made with synthetic proofs, which showed this 0.41 loss to have been made as follows:

	rme	ounce.
Gold		0.132
Silver		. 162
Base		. 117

In this case more gold was lost than silver, and more silver than base, due undoubtedly to the higher proportion of gold and silver to

Deposit No. 2239 was a jewelry bar weighing 21.81 ounces. Six assays with synthetic proofs were made, the finenesses obtained being:

Gold	5851
Silver	165
Base	2493

The base was practically all copper. This bar was melted in a new pot and was exposed for thirty minutes to an air blast played on the surface, the metal being continually stirred during the operation. It was then covered with borax and poured, the borax carefully crushed and panned and the granules obtained therefrom weighed in with the bar. Refining loss was 0.35 of an ounce. Four assays with synthetic proofs shows this loss to have been divided as follows:

	ounce.
Gold	 0.067
Silver	 . 108
Base	 . 215

In both these experiments every precaution was taken to guard against any loss in metal by other means than by volatilization, and the method employed at the Helena assay office was followed as carefully as possible. The pots were carefully scraped after each melt and all beads obtained therefrom weighed in with the bar.

Five assays of dust scraped from the melting room at Helena

showed a value of \$55 per pound (avoirdupois).

Deposit No. 1912, a refined bar of gold fineness 993½ and silver 6½, was cut into two pieces. Sample A weighed 119.40 ounces, and was melted in a new pot with a borax cover. It was in the fire eight minutes, and lest nothing in the precess.

minutes, and lost nothing in the process.

Sample B, weighing 112.83 ounces, was melted in a new pot without a flux. It was in the pot eight minutes and lost 0.04 of an ounce in the operation. Both samples were then placed in a new pot, covered with charcoal, and melted. It was in the fire for fourteen minutes and the melting loss was 0.04 of an ounce.

In each case the pot was covered and great care was used in crushing the flux and panning the granulations therefrom. The fineness of the bar was not appreciably changed by the meltings. As there was no base in the original bar, the melting loss must have been gold

and silver.

Deposit No. 2261 was received and melted on the 2d day of June, 1908. It was a fine bar, gold 996¼, silver 3¾. It was melted in the ordinary way with a cover and borax, with a loss of 0.01 of an ounce. On the 20th of June this bar was remelted without a cover of any sort. The loss was 0.17 of an ounce. The bar was then remelted with a covering of charcoal, with a loss of 0.12 of an ounce. The bar was then reassayed and it was found that the fineness had not been changed, the calculations showing a total loss in the two meltings of 0.298 fine ounce of gold.

The same pot was used in all three meltings, great care being taken to remove all particles of metal after each melting. All granules were carefully saved and weighed in with the bar each time. A cover was used on the pot in the original melting, but in the melting

with charcoal without flux no cover was used.

These experiments would indicate that a cover of charcoal will

prevent volatilization to a slight extent only.

Refined bar No. 2348, gold 996½, silver 3½, was cut into two samples. Sample A weighed 293.15 ounces, and sample B, 275.22. Sample A was melted with borax and was kept in a molten condition at a high temperature for one-half of an hour, the total length of time in the furnace being forty-two and one-half minutes. No cover was

used on the pot. The weight after melting was 293.15 ounces,

exactly the same as before melting.

Sample B was melted with a covering of charcoal and was kept in a molten condition for five minutes, the total time in the furnace being twenty-five minutes. No cover was used on the pot. The weight after melting was 275.18, showing a loss of 0.04 of an ounce.

In each case a pot used exclusively for fine gold was used, and great care was taken to scrape all particles of metal from the crucibles, both before and after melting. Also, every possible precaution was taken to guard against the loss of granules. Both the slag and the charcoal cover were carefully panned out and the granules weighed in with their respective bars.

This experiment would indicate that there is no volatilization of metal when a proper covering of borax flux is used. Also, that char-

coal does not prevent volatilization.

#### ADJUSTING SCALES.

A device has been adopted at the San Francisco mint increasing the capacity and accuracy of adjusting balances. The designers, Messrs. W. W. Clark and J. L. Riley, of the device, describe its operations as follows:

The method or device may be called a "limit swing method," and consists of an adjusted "bob" or weight attached to the indicator of the scale at a given point, reducing the sensibility and causing a gravity swing. Also an adjustable index by which we are enabled to save pieces either side of standard at any limit that may be desired.

To explain this method thoroughly, it will be necessary to make a comparison with the one now in use, and always used, in the mint

service.

With the method now in use, all pieces are separated at standard, and reweighed for condemneds. We have concluded that separating the work at standard is unnecessary, involving much work and expense, necessitating the handling of each piece twice. With our method, all pieces within a safe limit either side of standard are passed as finished work at the first weighing, thus requiring, from tests made by us, the reweighing of only 20 per cent of the work, which, with the present method, would all have to be reweighed. By our method, the light and heavy pieces reweighed would be of a more uniform weight, and would greatly facilitate the work of the coin weigher in making up his drafts.

In using this method we turn the ordinary weighing balance into a weighing machine under the control of the mind of the operator, whereas the liability of the automatic machine getting out of order without the knowledge of the operator requires constant testing of the work. With our method we supersede the automatic machines

in accuracy and in the saving of the adjusting expense.

This description has reference to the handling of the different denominations of silver only. In handling gold, working within a safe limit of standard, and with the aid of the filing machine now used in this mint, the same method could be used. USE OF CUPRIC CHLORIDE IN TOUGHENING BRITTLE MELTS OF STANDARD GOLD AT THE MINT, PHILADELPHIA.

The following report has been submitted by David K. Tuttle, Ph. D., melter and refiner of the mint of the United States at Philadelphia, on the use of cupric chloride in toughening brittle gold ingot melts:

The uniform success we had in the use of cupric chloride as a flux for brittle gold leads me to report the matter in some detail to you in the hope that it may prove serviceable in sister institutions. When the first ingot cast shows signs of brittleness, either at the topping machine or by its want of true ring on the stamping table, the ingot is returned to the melt and the whole subjected to a brief treatment with the cupric chloride. This is kept on hand in small 2-ounce blocks and, like the ready "after-dinner pill," does its work without any special apparatus or any manipulation beyond submerging the pellet beneath the surface of the molten gold by means of a bell-mouthed gold stirrer, which is already hot and in use. The embrittleing metals have volatile chlorides, and cupric chloride (Cu. Cl.2+2H2 O) was selected by me because of the property it has of giving off one-half its chlorine at high temperatures. Experiment showed that the dehydrated salt does this so quietly as to produce only a slight bubbling in the molten gold. Fumes come off which should be ied into a flue. An open-top furnace should not be used. Without submergence in the molten metal the flux would have only a superficial action and have absolutely no value as a practical remedy. The bell-mouthed plumbago stirrer renders this easy; the action begins at once, and in a few minutes a brittle melt is rendered perfectly tough and malicable.

If there be merit in the discovery, it lies in the having found a flux which will do its work effectively when forced to the bottom of a pot of molten metal, while only

causing enough commotion to effect a more perfect mixture of the alloy.

It should supplant the tedious toughening process by saltpeter, which cleans only a thin film on the surface and relies on convection to bring fresh impurities to the surface of the molten mass. To say nothing of the saving in time, fuel, and labor, the avoidance of large accumulations of bone ash sweeps should commend the process as

an improvement in methods.

We purchase the cupric chloride at 20 cents per pound in 100-pound lots. The water of crystallization is driven off at a gentle heat (200° C. is sufficient), and then the salt is melted at a low heat in a crucible. It is then poured into molds, or on an iron plate, and stored for use in lumps of a few ounces in weight. In our experience, from 2 to 5 ounces will correct a brittle melt of 6,500 ounces of standard gold in from five to fifteen minutes.

# MAKING NICKEL INGOT MELTS AND DISPOSING OF THE TROUBLESOME OXIDES AT THE MINT, PHILADELPHIA.

The following report has been made by David K. Tuttle, Ph. D., on the making of nickel ingots:

With fairly pure metals there is little trouble in making good malleable nickel ingots from the first mixture, but when it comes to remelting the clippings with their gossamer-like structure the great surface exposed to oxidation before the melting point is reached causes the result to be a brittle mixture of nickel and copper oxides with the true alloy. As a palliative, it was our practice to add only a modest percentage of clippings to fresh metals already in a molten condition. With proper annealing of strips during the rolling process the ingots were workable, but barely so. Some two years ago experiments were commenced with various deoxidizing materials. Aluminium and magnesium were tried, but failed to give practical results. Finally, "manganese copper" was found to be a perfect "cure-all."

The addition of 10 to 30 ounces of this alloy to a 3,000-ounce melt of refractory nickel causes a remarkable change in the working qualities of the metal. Ingots thus made may be rolled down to the thickness of a dime without annealing. But for this treatment in the melting room the annealing furnaces would to-day be struggling with hard,

if not brittle, nickel ingots.

While to us this matter is no longer new, interest in its application was revived by a letter just received from Mr. Nicoll, an operative officer of the Bombay mint. He had written asking for suggestions as to how he could overcome this trouble with brittle nickel ingots. He writes to Mr. Morgan, my assistant, "The very day I

received your letter, the mint master ordered a trial to be made of the addition of manganese-copper alloy to our nickel, and the results have been most gratifying. All our trouble with brittle bars has ended." Only one with experience can appreciate how much this means. Manganese copper is one of the modern products of the electric furnace and is an inexpensive article of commerce. It contains 30 per cent manganese and 70 per cent copper.

ACCURATE METHOD FOR OBTAINING LOW GOLD CONTENTS IN DORÉ BULLION.

In another part of this annual report of the Director of the Mint, dealing with the affairs of the San Francisco mint, mention is made of a method recently adopted by the assayer of that institution in

making determinations of low gold contents of Doré bullion.

A number of experiments to test the accuracy and advantages of the method were made at the request of the Director of the Mint on bullion carrying about .0007 gold. The result was so highly satisfactory the method was adopted for bullion of low gold contents and without excessive amount of base. Experiments were continued on bullion carrying from 5 to 20 point gold. The report of Assistant Assayer Merrill Martin, however, was to the effect he would not recommend the process for such bullion. He says:

To go somewhat into detail, I have found that in making the two boilings, the most satisfactory results have been obtained by using acid of about 28° Beaumé for the first stage of the parting process, following with 32° acid for the second. The greatest possible care has to be exercised in decanting the silver solution from the gold residue or small particles of the latter metal will escape. In addition, there are many instances where the gold remains in such finely-divided form that it is next to impossible to get all of it out of the crucible after annealing. This seems to be especially the case when the samples contain bismuth and antimony. It might be supposed that cupellation would remove these metals, but I have detected the pres-

ence of bismuth in the cupelled sample upon several occasions.

As stated in my former letter, the system works admirably upon bullion containing from five-tenths to 2 points of gold in the thousand, but this is doubtlessly due to the fact that such bullion has contained but small quantities of base that was not of a refractory nature. I see no reason why bullion containing larger amounts of gold could not be satisfactorily assayed by this method, provided the base contained therein was harmless. It appears, however, that when the gold in Doré bars is comparatively high, the base is also high, or if not high is of a kind that interferes with the parting. This may not hold good in every instance, but it has been the case with all the bars upon which experiments have been made during the past three months. Where the bullion contains a quantity of base metal sufficiently low and harmless to enable the cupellation process to be dispensed with, I should consider the method above referred to as being the most accurate and reliable of any that I have knowledge of. In all other cases of Doré bars, I should be inclined to depend almost entirely upon synthetic assays. The best system of all would seem to be a combination of the two methods, each being applied to the class of bullion it appears to be best suited to.

Respectfully,

Frank A. Leach, Director of the Mint.

Hon. George B. Cortelyou, Secretary of the Treasury.

## REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, December 7, 1908.

SIR: In compliance with the requirements of section 333 of the Revised Statutes of the United States, the forty-sixth annual report of the operations of the Currency Bureau for the year ended October 31, 1908, is herewith submitted.

### CONDITION OF NATIONAL BANKS.

The resources and liabilities of national banks in active operation at date of the periodical reports made to the Comptroller during the past year are shown in detail in the following table:

Abstract of Reports of Condition of National Banks in the United States from December 3, 1907, to September 23, 1908.

		1			,
• /	Dec. 3, 1907— 6,625 banks.	Feb. 14, 1908— 6,698 banks.	May 14, 1908— 6,778 banks.	July 15, 1908— 6,824 banks.	Sept. 23, 1908— 6,853 banks.

****					

As stated in the Comptroller's last annual report to Congress, the extraordinary conditions which developed in October were not shown to any appreciable extent in the banks' reports as a whole up to August 22. Referring to the five abstracts of reports of condition of national banks, made during the year ended August 22, 1907, it is shown that there was a gradual increase in loans and discounts, beginning on November 12, 1906, at \$4,366,045,295.93, and amounting to \$4,678,583,968.99 on August 22, 1907.

Individual deposits in the banks were about \$174,000,000 higher on November 12, 1906, than on January 26 following, when they amounted to \$4,115,650,294.21. On March 22 they had increased to \$4,269,511,629.17; on May 20 to \$4,322,880,141.39, but by

August 22, 1907, a decrease as compared with May 20 of about

\$4,000,000 had occurred.

Lawful money held by banks on November 12, 1906, aggregated \$634,550,158, and was increased by January 26, 1907, to \$695,503,522. Between that date and March 22 there was a decrease to \$656,220,551, but on May 20 there was an increase to \$691,591,148, and on August 22 to \$701,623,533. Between November 12, 1906, and August 22, 1907, the banks increased their outstanding circulation roundly to

the extent of \$15,800,000.

Subsequent to the date of receipt of the August returns, but prior to the next call (December 3, 1907), the financial disturbance occurred attended by a so-called "currency famine." In the following weeks 3 national banks, 8 state banks, and 4 trust companies located in the city of New York failed or suspended, with aggregate liabilities to depositors and other creditors at date of closing of about \$110,000,000. It is of interest to note, however, that one of the national banks resumed business; the second has paid its creditors in full, both principal and interest; the third has paid 95 per cent, and within the near future creditors will be paid in full. All of the state banks referred to have resumed business with one exception, and in the latter case depositors have been paid in full by a trust company which took over the business. Three of the four trust companies have resumed, and provision has been made for the payment of claims of the creditors of the company which did not reopen.

The acuteness of the panic was early relieved by the addition of over \$500,000,000 to the currency medium in circulation, from the following sources: Importation of about \$106,000,000 of gold in November and December; increase in the deposit of public moneys with national banks between September 1 and the close of the year, of approximately \$100,000,000; the issue of \$248,000,000 of clearing-house loan certificates between October, 1907, and January, 1908, and increase of national bank circulation between October 31 and Decem-

ber 31, 1907, of \$80,000,000.

Referring again to the condition of national banks, it is noted that between August 22 and December 3, 1907, the volume of loans and discounts had been reduced to the extent of \$93,246,874.32, standing on the latter date at \$4,585,337,094.67. There was also a reduction of \$146,943,371.08 in the amount due from banks and bankers, \$21,422,471.88 in specie, and \$19,416,324 in legal tenders. The liabilities of the banks on account of individual deposits declined from \$4,319,035,402.62 to \$4,176,873,717.48, or \$142,161,685.14; and in the same period the liabilities to other banks decreased to the extent of \$207,607,182.33. The only material increase in resources was in the item of United States bonds deposited as security for circulation, the increase being \$62,051,920, or from \$557,277,950 to \$619,329,870. Between these two calls the banks increased their outstanding circulation to \$601,805,985, an increase of \$49,856,524. The liabilities of the banks to the United States on account of public deposits was increased to the extent of \$79,834,689.46, the aggregate of these liabilities on December 3 amounting to \$223,117,082.61. Liabilities on account of bills payable and notes and bills rediscounted increased from \$59,176,079.98 on August 22 to \$100,955,229.79, a net increase of \$41,779,149.81.

Between December 3, 1907, and February 14, 1908, loans and discounts decreased from \$4,585,337,094.67 to \$4,422,353,647.81, but increased to \$4,528,346,875.75 on May 14, and to \$4,615,675,531.59 on July 15. On September 23, 1908, loans and discounts reached the highest amount in the history of the system, viz, \$4,750,612,731.11.

United States bonds on deposit to secure circulation and public deposits and the amount in bank increased from \$696,900,000 in round amount on December 3, to \$726,500,000 on February 14, but declined to \$717,000,000 on May 14, and to \$716,000,000 on July 15, but rose to \$717,000,000 on September 23. There was a gradual increase, however, in investments in bonds and other securities, beginning with \$705,000,000 on December 3, increasing to \$714,000,000 on February 14, to \$735,000,000 on May 14, to \$765,000,000 on July 15, and to \$799,000,000 on September 23.

Between August and December, 1907, the stock of gold, silver, and legal tenders decreased from \$701,600,000 to \$660,700,000, or a loss of \$40,900,000; but on February 14, 1908, the banks had accumulated specie and currency to the amount of \$788,395,576.26, increasing the amount on May 14 to \$861,326,450.78. Between the latter date and July 15 there was a decrease of the stock of money by \$12,000,000, the holdings then amounting to \$849,018,749.57; but by September 23 the holdings had increased to \$868,424,070.14, the largest amount of lawful money ever reported by the national banking associations as being held in their tills and vaults.

The aggregate resources of the banks on December 3, 1907, were \$8,407,988,121.37, but between that date and February 14 following there was a decline of approximately \$11,000,000. On May 14, however, the resources had increased to \$8,594,622,697.65, on July 15 to \$8,714,064,400.09, and on September 23 to \$9,027,260,484.76.

Notwithstanding losses by failure and voluntary liquidation, there was a steady increase in the amount of paid-in capital stock during the year from \$901,681,682 in December, 1907, to \$921,463,172 on

September 23, 1908.

Deposits and other liabilities of national banks are safeguarded by the shareholders' liability on capital stock paid in, in addition to the assets. The surplus and other profits of the banks on December 3, 1907, were \$750,172,910.07. By the payment of dividends at the close of the year the combined surplus and profits were reduced on February 14, 1908, to \$742,925,574.78, but on May 14 they amounted to \$758,108,662.92. Between this date and the July call, as a result of the midsummer dividend, the profit account was again encroached upon, reducing the surplus profits of the banks to \$748,701,599.65, but by September 23 they had increased to \$767,666,009.01.

There was an increase in outstanding circulating notes between August and December, 1907, of \$50,000,000, and between December 3, 1907, and February 14, 1908, there was a further increase from \$601,805,985 to \$627,641,739. By May 14, however, the outstanding issues had declined to \$614,088,723, and on July15 to \$613,663,963, with practically no change between that date and September 23.

Approximately 50 per cent of the liabilities of national banks is represented in the individual deposit account which, on December 3, 1907, amounted to \$4,176,873,717.48. There was a decline in this

account by February 14 following to \$4,105,814,418.48, but an increase to \$4,312,656,789.59 on May 14, to \$4,374,551,208.33 on July 15, and to \$4,548,135,165.83 on September 23. The liabilities of the banks to the Government on account of public deposits amounted on December 3, 1907, to \$223,117,082.61, and were only slightly reduced (approximately \$2,000,000) by February 14, 1908; but by May 14 the withdrawals had amounted to approximately \$50,000,000, when the account stood at \$170,700,222.87 and on July 15 at \$118,576,923.89. By September 23 these liabilities had declined to \$114,378,386.73.

Clearing-house loan certificates did not appear in the reports of banks until December 3, 1907, when the net credit balance was stated at \$74,461,026.61, and the net debit balance at \$64,344,128.95. On February 14, 1908, the net credit balance was \$1,550,014.77 and the net debit balance \$5,508,315.80; and on May 14, 1908, the net credit balance appeared as \$108,368.60, and the net debit balance as \$1,265,821.08. Prior to the July report these certificates disappeared

from use.

## DEPOSITS, RESERVE, AND LAWFUL MONEY IN BANK.

The deposit liabilities of national banks on which reserve was required amounted on August 22, 1907, to \$5,256,085,097.14, against which reserve was held to the amount of \$1,121,358,395.31, or 21.33 per cent. The actual amount of money held in vault by the banks was \$701,623,352.52, or  $13\frac{1}{3}$  per cent of the deposit liabilities. Of the total amount of lawful money held \$502,050,777.75 was held by the central and other reserve city banks, \$218,786,132.14, approximately one-third of the total holdings, being in the New York City reserve banks. The New York banks' average reserve was 26.81 per cent, Chicago 25.34 per cent, and St. Louis 23.59 per cent, making the average of the three cities 26.18 per cent. The percentage of reserve in other reserve city banks varied from a minimum of 20.3 in Cedar Rapids to a maximum of 34.37 in San Antonio, Tex. While the aggregate reserve liabilities on December 3 had been reduced to \$4,906,684,057.73 the average reserve for the country was 21.31 per cent, as against 21.33 in August; but the average held by the country banks rose to 19.17, as against 16.88 in August. The withdrawals by correspondents resulted in a reduction of the reserve held in New York City to 21.89 from 26.81 per cent, in Chicago to 24.21 from 25.34 per cent, and St. Louis to 20.38 from 23.59 per cent, and the average in the three central reserve cities to 22.20 from 26.18. The average in other reserve cities showed but a fractional decline—that is, to 24.72 from 25.46. The average reserve in all central and other reserve city banks declined to 23.51, as against 25.79 per cent in August.

Lawful money held by the banks on December 3 had been reduced to the extent of \$41,000,000, or to \$660,784,736.64. This was approximately the loss in lawful money sustained by the national banks in New York City alone. Deposit liabilities of the banks in New York City had only been reduced from \$825,703,785.04 in August to \$824,394,509.91 in December—less than a million and a half—but the loans and discounts had been increased to the extent of

\$63,060,149.

The enormous increase in the circulating medium following the acute stage of the panic is shown in the returns for February 14, 1908, when the stock of specie and other lawful money had been increased to the extent of approximately \$128,000,000 and resulted in the holding of an average reserve by the national banks throughout the country of 23.47 per cent, the reserve in the country banks having increased to 18.75 per cent, all reserve in city banks to 27.98 per cent, reserve city banks to 27.37 per cent, and central reserve city banks to 28.62 per cent. The New York City banks held an average reserve of 29 per cent. The lawful money in the New York banks on February 14 exceeded \$257,000,000 or \$81,000,000 more than on December 3. The deposit liabilities of all banks on May 14 had risen to

The deposit liabilities of all banks on May 14 had risen to \$5,295,981,122.62, whereon an average reserve of 23.94 per cent was held, the average rate in the country banks being 18.40 per cent, reserve city banks 27.87 per cent, and central reserve city banks 29.70 per cent. New York City banks had increased their percentage of reserve to 30.52. The average reserve of all banks on liabilities amounting to \$5,464,614,059.22 on July 15 was 23.19 per cent, and the average reserve in the country banks had declined to 17.92 per cent, reserve city banks to 27.44 per cent, central reserve city banks to 27.85 per cent, and New York City banks to 28.37 per cent. In every State the average reserve exceeded the required 15 per cent, and there were but 8 reserve cities in which the average was less than the legal requirement, viz, 25 per cent.

At date of the last report for the year, viz, September 23, 1908, the deposits on which reserve was required had increased to \$5,695,509,031.06, when the average reserve held was 22.97 per cent. The reserve city banks held on an average 26.84 per cent, or nearly 2 per cent in excess of the requirement, while the central reserve city banks, with an average of 27.81 per cent, held nearly 3 per cent more than required by law. Chicago and St. Louis banks were but slightly above the legal requirement, but the New York average was 28.65 per cent, exceeding the average on July 15, the date of the

next prior report.

#### CLASSIFICATION OF LOANS.

Abstracts of reports of condition of national banks state the aggregate amount of loans and discounts held, and for this report a compilation of the various classes of paper making up the aggregate on September 23, 1908, has been made. Loans are classified as follows: Demand paper with one or more individual or firm names; demand paper secured by stocks, bonds, and other personal securities; time paper with two or more individual or firm names; time single-name paper (one person or firm) without other security; time paper secured by stocks, bonds, and personal securities including mortgages and other real estate security.

Of the total loans, amounting to \$4,750,612,730, demand paper, with one or more individual or firm names, amounted to \$395,892,695; on demand, secured by stocks, etc., \$922,701,718; on time, with two or more individual or firm names, \$1,582,391,359; time, singlename paper, \$852,176,044, and time paper secured by stocks, etc.,

\$997,450,914.

The changes which have occurred in the amount and per cent of each class of paper held by the banks on or about October 1, 1906, 1907, and 1908, are shown in the following table:

	1906.		1907.			
Class.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
On demand, paper with one or more individual or firm names. On demand, secured by stocks, bonds, and other personal secur-	\$374,689,245	8. 7	\$428, 221, 535	9. 2	\$395, 892, 695	8. 3
ities	828,016,734	19.3	832, 878, 479	17.8	922,701,718	19. 4
on time, paper with two of more individual or firm names On time, single-name paper (one person or firm) without other	1, 502, 034, 898	35. 0	1,648,751,438	35. 2	1,582,391,359	33. 3
security On time, secured by stocks, bonds, and other personal securities, or on mortgages or other real-estate	776, 125, 101	18.0	899, 494, 658	19. 2	852, 176, 044	17. 9
security	818, 117, 338	19. 0	869, 237, 859	18.6	997, 450, 914	21.1
Total	4, 298, 983, 316		4,678,583,969		4,750,612,730	

Nearly one-fifth of the aggregate volume of loans of all national banks were made by 37 associations located in the city of New York, the amount being \$905,653,475, classified as follows: Demand paper, with one or more individual or firm names, \$6,800,529; demand paper secured by stocks, etc., \$374,548,964; time paper, with two or more, names, \$146,194,094; time single name paper, \$132,737,553, and time paper secured by stocks, etc., \$245,372,335. The loans of the 59 banks in the central reserve cities (New York, Chicago, and St Louis) exceeded 26 per cent of the aggregate in all banks, the amount being \$1,242,980,123, of the following character and amounts: Demand paper, with one or more names, \$31,699,847; demand paper secured by stocks, etc., \$432,094,695; time paper, with two or more names, \$260,311,174; time single-name paper, \$203,608,591; time paper secured by stocks, bonds, etc., \$315,265,816. The 312 banks in the 43 other reserve cities held loans to the extent of over one-fourth of the aggregate in all banks, \$1,231,756,966; and the 371 banks in the central and other reserve cities held \$2,474,737,089, or slightly in excess of 52 per cent of the aggregate. This total is classified as follows: Demand paper, single name, \$161,985,800; demand paper secured by stocks, etc., \$703,762,010; time paper, with two or more names, \$613,675,155; time single-name paper, \$448,856,139; time paper secured by stocks, etc., \$546,457,985. This leaves approximately 48 per cent of the banks' loans with associations located in the States exclusive of reserve cities. Of the \$2,275,875,641 held by the so-called country banks, \$233,906,895 is classed as demand paper with one or more names; \$218,939,708 demand paper secured by stocks, etc.; \$968,716,204 time paper with two or more names; \$403,319,905 time single-name paper, and \$450,992,929 time paper secured by stocks, etc.

The amount and relative proportion of loans in the national banks in New York, in the three central reserve cities, in other reserve cities, and in banks located elsewhere on September 23, 1908, August 22, 1907, and September 4, 1906, are shown in the following table:

	September 23,	1908.	August 22, 19	907.	September 4, 1906.

Loans and discounts, United States bonds, and lawful money represent approximately 70 per cent of the aggregate resources of national banks and a like proportion of liabilities is represented by capital, surplus and profits, and individual deposits. The relation of these items has changed but slightly during the past nine years, as will be observed by reference to the accompanying table:

Items.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.

a Minimum.

STATE BONDS, ETC., OWNED BY NATIONAL BANKS, ON JULY 15, 1908, AVAILABLE AS SECURITY FOR ADDITIONAL CIRCULATION UNDER THE ACT OF MAY 30, 1908.

Section 1 of the act authorizing the formation of national currency associations provides that any national bank with unimpaired capital and a surplus of not less than 20 per cent, and having circulation secured by United States bonds to the extent of 40 per cent of its capital stock, may deposit with and transfer to a national currency association in trust for the United States any securities, including commercial paper, such as shall be satisfactory to the association, on which the depositing bank shall be entitled to additional

b Lower rate here given was at banks only.

circulation to an amount not exceeding 75 per cent of the cash value of the securities deposited, but upon the security of state, municipal, etc., bonds, circulation to the extent of 90 per cent may be issued. Circulation issued on the security of commercial paper is limited to 30 per cent of the maximum; that is, an amount not exceeding 30 per cent of the bank's capital and surplus. Banks with capital, surplus, and United States bond-secured circulation to the extent indicated may apply directly to the Comptroller, when conditions warrant, for permission to issue additional circulation on the security of state, municipal, etc., bonds and, with the approval of the Secretary of the Treasury, secure circulation within the limitation specified to the extent of 90 per cent of the bonds deposited.

On July 15, 1908, the banks held state bonds and other securities to the amount of \$765,875,219.95, classified as follows: State, city, etc., bonds, \$105,144,006.12; railroad and other corporation bonds, \$507,425,613.60; miscellaneous bonds unclassified, \$17,289,891.72;

judgments, claims, etc., \$136,015,708.51.

It will be noted that the bonds, etc., in question are ample in amount to provide security for additional circulation to the limit authorized by the act of May, 1908; that is, approximately, \$95,000,000 (90 per cent) on state, city, etc., bonds, and \$495,500,000 (75 per cent) on the remaining securities.

As will be observed by reference to the following table, the country banks—that is, those not located in reserve cities—own nearly 70 per cent of the state, municipal, etc., bonds; over 48 per cent of railroad and other corporation bonds; and over 53 per cent of the combined investments of this character:

Amount and Character of State Bonds, etc., Owned by National Banks, as Shown by the Reports of Date July 15, 1908.

a Call of May 14, 1908.

#### CAPITAL STOCK OF NATIONAL BANKS.

The authorized capital stock of the national banks on October 31, 1907, amounted to \$909,274,775, since which date there has been an addition of \$22,823,000 from banks organized during the year and \$16,080,000 from increases of capital of preexisting banks. The losses were as follows: By voluntary liquidation, \$11,040,000; by expiration of charters, \$1,375,000; by failures, \$6,560,000; by reductions of capitalization of old banks, \$1,172,500. These changes show an apparent increase of capital during the year of \$21,090,500, but this amount includes the capital of a number of associations closed voluntarily or otherwise, the stock accounts of which have not been closed on the books of this office, the amount so represented being \$2,035,000.

A record is maintained of the number and capital of banks in the system, classified according to the capital stock. Of the smallest class, those with capital of \$25,000, 1,826 are in operation, their capital being \$45,575,000, and while the number is over one-fourth of the total number of banks in the system, the proportion of their capital is but 4.9 per cent. There are 2,116 banks with capital exceeding \$25,000 but not exceeding \$50,000, the aggregate capital being \$100,823,000. The largest proportion of the banks are in this class, viz, 30.79 per cent, but their capitalization equals only

10.83 per cent of the aggregate. There are 1,623 banks with capital exceeding \$50,000 but not exceeding \$100,000, their total capital being \$151,524,320, the number of banks and percentage of capital in this class being 23.63 and 16.29 per cent, respectively. Banks with capital in excess of \$100,000 but not in excess of \$250,000 have an aggregate capital of \$140,828,335. The number of banks in this class is 757, or 11 per cent of the total, and their capitalization is equivalent to 15.14 per cent of the aggregate. The largest amount of capital, viz, \$249,283,920, or 26.79 per cent of the total, is that of 476 banks, representing but 6.93 per cent of the number in the system, the amount of individual capital ranging from over \$250,000 to \$1,000,000, inclusive. There are but 69 banks with capital of over \$1,000,000 and not in excess of \$5,000,000, representing but 1 per cent of the total number of banks and but 17.45 per cent of the capitalization, the capital of this class of banks being \$162,330,700. Six banks in the system have capital in excess of \$5,000,000, the aggregate being \$80,000,000, which is 8.6 per cent of the capitalization of all national banks. The foregoing is summarized in the following table:

Capital, classified.	Number of banks.	Per cent.	Capital.	Per cent.
\$25,000 capital.  Over \$25,000 to \$50,000, Inclusive.  Over \$50,000 to \$100,000, Inclusive.  Over \$100,000 to \$250,000, Inclusive.  Over \$250,000 to \$1,000,000, Inclusive.  Over \$1,000,000 to \$5,000,000, Inclusive.  Over \$1,000,000 to \$5,000,000, Inclusive. # UNITED STATES BONDS, ETC.

Under the law every national banking association is required to deposit with the Treasurer of the United States in trust as security for circulation, interest-bearing registered bonds of the United States to the extent of one-fourth of the capital stock where the latter does not exceed \$150,000, and \$50,000 where the capitalization is in excess of \$150,000. The interest-bearing bonded debt of the United States on October 31, 1908, was \$897,253,990, of which \$632,624,850 was represented in the bonds deposited by national banks as security for circulation, and \$78,545,100 deposited with the department to secure public moneys. The changes which have occurred since October 31, 1907, in the bonded debt, and the amount and character of bonds deposited as security for circulation and public deposits, are shown in the following table:

BONDED DEBT OF THE UNITED STATES, AND BONDS ON DEPOSIT TO SECURE CIRCULATING NOTES AND GOVERNMENT DEPOSITS AT THE CLOSE OF BUSINESS ON OCTOBER 31, 1908 AND 1907.

#### NATIONAL BANK CIRCULATION.

From the date of the first issue of national bank circulation, December 21, 1863, to October 31, 1908, notes were issued to the amount of \$4,172,614,945, of which \$3,506,769,958 have been redeemed, leaving outstanding \$665,844,987. In the year just closed the issues amounted to \$367,017,740, an amount exceeding by \$130,898,000 the sum issued during the year ended October 31,

1907. The records of the office show that there are still outstanding notes issued by national gold banks to the amount of \$74,779 out of a total issue of notes of that class of \$3,465,240. The act of July 12, 1870, authorized the organization of national banks for the purpose of issuing notes payable in gold. Only ten banks were organized under authority of this act, all of which were closed or converted into currency banks under authority of the act of February 14, 1880. Circulating notes of national banks are now issued in denominations of \$5, \$10, \$20, \$50, and \$100; and the amount of \$10's outstanding is \$281,832,280; of \$20's, \$195,249,940; of \$5's, \$131,161,385; of \$100's, \$39,327,200; and of \$50's, \$17,533,050. The issue of notes of the denominations of \$1 and \$2 was suspended in 1879, but there are still outstanding \$343,875 in \$1's and \$164,470 in \$2's. There are still outstanding notes to the amount of \$90,000 of the denomination of \$500, and \$24,000 of the denomination of \$1,000.

The amount and changes in denominations of notes outstanding on October 31, 1906, 1907, and 1908, as compared with the outstanding issues on March 14, 1900, are shown in the table following:

Denominations.a	Mar. 14, 1900.	Oct. 31, 1906.	Oct. 31, 1907.	Oct. 31, 1908.

a Gold notes not included.

In March, 1900, circulating notes outstanding based on bonds deposited with the Treasurer of the United States in trust represented 35 per cent of the maximum issuable, while on October 31, 1908, the amount issued was nearly 70 per cent of the maximum. By referring to the accompanying table it will be noted that the outstanding circulation of national banks at dates of the five periodical reports made during the year was greatest on February 14, 1908, the amount being \$627,600,000. The banks in the city of New York reduced their outstanding issues from \$68,900,000 in February to \$55,400,000 on September 23, 1908. The outstanding issues of all reserve city banks, however, also declined from a maximum of \$249,400,000 in February to \$223,500,000 in September; but the outstanding issues of the country banks have steadily increased during the year, rising from \$364,800,000 on December 3, 1907, to \$390,200,000 on September 23, 1908. The changes which have occurred in outstanding circulation of banks in the city of New York, other reserve cities, and elsewhere are shown in the following table:

Date.	New York.	New York, Chicago, and St. Louis,	Other reserve cities.	All reserve cities.	Country.	Total.
1907. December 3	Millions. 66.5	Millions. 98.3	Millions, 138.7	Millions. 237. 0	Millions 364. 8	Millions. 601.8
1908.  February 14.  May 14.  July 15.  September 23.	59. 4	100. 6 85. 8 83. 8 82. 4	148. 8 146. 2 142. 7 141. 1	249. 4 232. 0 226. 5 223. 5	378. 2 382. 1 387. 1 390. 2	627. 6 614. 1 613. 6 613. 7

During the year ended October 31, 1908, national-bank circulating notes to the amount of \$382,360,164 were received for redemption at the national bank redemption agency, of which \$64,706,000 being in good condition and fit for circulation, were returned to the banks of issue, and \$310,398,631 delivered to the Comptroller of the Currency for destruction. The receipts by months were as follows:

Month	Amount.	Month.	Amount.
November. 1907. December.	\$7,749,861 11,736,620	1908. May. June. July	\$43,212,118 45,121,039 38,319,375
January February March April	43, 425, 863 29, 627, 608 38, 949, 474 42, 491, 474	August. September October	29, 442, 768

Over 80 per cent of the notes received for redemption came from the eight reserve cities hereinafter named, and over one-half the total from New York alone, as will be seen by reference to the following table:

City.	Amount.	City.	Amount.
New York Chicago. Boston Philadelphia.	21, 692, 440	St. Louis. Cincinnati Baltimore. New Orleans.	7, 602, 500

The expenses incurred in the redemption of national-bank notes during the year amounted to \$270,840.21, or an average of \$0.90366

per \$1,000.

As heretofore stated, the amount of outstanding circulating notes reached its lowest point between 1865 to date in 1891, when it amounted to approximately \$167,000,000, or about 10 per cent of the stock of money in the United States. On June 30, 1907, the percentage of national-bank circulation had increased to 19.38 per cent and on June 30, 1908, to 20.67 per cent. About 90 per cent of the bonds on deposit to secure national-bank circulation are United States bonds bearing interest at the rate of 2 per cent. All notes secured by bonds bearing this rate of interest are subject to a semi-annual tax of one-fourth of 1 per cent. At the instance of this office the government actuary has computed the profit on the issue of national-bank circulation secured by 2 per cent bonds, based on

the average cost monthly during the year of bonds of that character. In the computation money is rated at 6 per cent. The profit on the issue of \$100,000 circulation has varied from 0.884 per cent in November, 1907, when the bonds were quoted at 106.126, to a maximum of 1.095 per cent in September, 1908, bonds then being quoted at 103.643. From the gross returns—that is, 2 per cent on the bonds and 6 per cent on the circulation—the actuary deducts taxes, expenses for redemption, and amount set aside as a sinking fund, and from the net receipts so ascertained deducts interest at the rate of 6 per cent on the amount invested in the bonds to determine the net profit.

#### EARNINGS AND DIVIDENDS OF NATIONAL BANKS.

In the six months ended January 1, 1908, the net earnings of national banks were \$65,088,793, from which dividends were paid to the amount of \$43,883,151, an average rate on the capitalization of \$886,631,425 of 4.95 per cent. From January 1 to July 1, 1908, the net earnings were \$66,246,493, dividends \$53,453,131, an average rate 5.93 per cent. Consolidating the returns for the two semiannual periods on average capital and surplus of \$893,932,010 and \$548,850,476, respectively, the gross carnings were \$332,454,602; losses, etc., charged off, \$50,568,265, and expenses and taxes paid, \$150,551,049, leaving net earnings of \$131,335,288. The aggregate amount of dividends paid during the two periods was \$97,336,282, an average of 10.89 per cent. Based on combined capital and surplus, the average rate of dividends was 6.75 per cent. The dividend rate for the past year is slightly in excess of 2 per cent of the annual average from March 1, 1869, the date of the act requiring reports of earnings and dividends to be made to the Comptroller, to July 1, 1908. The average capital of national banks for the thirty-nine years covering returns in relation to earnings and dividends was \$586,345,749; the average surplus, \$213,914,153; average net earnings, \$68,305,837; average dividends, \$51,857,060, the average rate of dividends being 8.84 per cent.

#### EXPENSES OF NATIONAL BANKS.

The direct money receipts from national banks by the Government of the United States are represented by the taxes paid on capital to June 1, 1883, and under the war-revenue act of 1898; on deposits to June 1, 1883, and on circulating notes to June 30, 1908, exclusive of interest paid on public deposits under the act of May 30, 1908. In addition to the foregoing the banks have been assessed for the cost of redemption of circulating notes, plates from which circulating notes are printed, and examination fees. The taxes paid aggregate \$180,472,155.94. The expenses of the Currency Bureau, including amount appropriated and all other expenses estimated, from 1863 to date, is stated at \$22,884,557.46. This shows that the banks have paid to the Government over and above the cost of the operation of the Currency Bureau, \$157,587,598.48. The expenses of the banks for the cost of plates and redemption of notes from 1874 to date and examiners' fees from 1882 aggregate \$13,044,532.46. In the year ended June 30, 1908, the expenses were as follows: Tax on circulation, \$3,090,811.72; cost of redemption of notes, \$270,840.21; cost of plates, \$58,475; and assessments for examiners' fees, \$429,397.75, a total of \$3,849,524.68.

The expenses of the banks on account of the items mentioned and for the periods indicated are shown in the following statement:

Tax on capital to June 1, 1883  Tax on capital under war-revenue act of 1898  Tax on deposits to June 1, 1883  Tax on circulation to June 30, 1908	7, 048, 413, 00 60, 940, 067, 16

# ORGANIZATION OF NATIONAL BANKS.

During the existence of the system national banking associations to the number of 9,263 have been chartered, of which 6,873 are in existence, 2,390 having been closed, of which 1,740 were placed in voluntary liquidation, 174 closed by expiration of corporate existence, and 476 terminated by insolvency. The number of banks chartered includes 1,437 banks, with capital of \$315,200,928, which were converted from state banks under authority of section 5154 of the Revised Statutes.

Under authority of the act of March 14, 1900, and from that date to October 31, 1908, 2,583 national banks were chartered with individual capital of less than \$50,000, the average being approximately \$26,000 and the minimum \$25,000. The aggregate capital of banks organized under this act was \$67,285,500. In the same period 1,416 associations were incorporated and authorized to do business under the act of 1864, the capital of these banks being \$50,000 or over, and the aggregate \$170,967,800. This shows that since 1900 a total of 3,999 banks have been chartered, with authorized capital at date of organization of \$238,253,300. The banks chartered since 1900 exceed by 382 the number then in existence. During the past eight years a record has been made of the number of banks coming into the system as a result of conversion of state banks, reorganizations of state and private banks, and organizations anew. The number of conversions was 518, reorganizations 1,273, and primary organizations 2,208.

During the past twelve months 326 banks, with authorized capital of \$22,823,000, were chartered, of which 194, with capital of \$4,973,000, were organizations effected under the act of March 14, 1900, and 132,

with capital of \$17,850,000, under the act of 1864.

The average number of banks organized monthly during the year was but a fraction in excess of 27, against a monthly average of approximately 40 between March 14, 1900, and October 31, 1907. A list of the banks chartered during the year in each State and geographical division, chronologically arranged, will be found in the appendix to the report of the Comptroller of the Currency.

The number of national banks organized in each State and geographical division, classified by capital stock, between March 14, 1900, and October 31, 1908, together with paid-in capital, and number of banks reporting on September 23, 1908, is shown in the

following table:

SUMMARY, BY STATES, GEOGRAPHICAL DIVISIONS, AND CLASSES, OF NATIONAL BANKS ORGANIZED FROM MARCH 14, 1900, TO OCTOBER 31, 1908, AND THE PAID-IN CAPITAL STOCK OF ALL REPORTING NATIONAL BANKS ON SEPTEMBER 23, 1908.

### CHANGES IN TITLES OF NATIONAL BANKS.

During the year ended October 31, 1908, there were 14 changes of corporate titles of national banking associations, the banks concerned, the new and old titles, with date of approval of the changes, being shown in the following table:

No.	Title and location.	Date.
6230	"The American National Bank of South McAlester," South McAlester, Okla., to "The American National Bank of McAlester".	1907. Nov. 16
6406	"The City National Bank of South McAlester," South McAlester, Okla., to "The City National Bank of McAlester".	Do.
8335	"The First National Bank of St. James," St. James, Nebr., authorized to move to Wynot, Nebr., under the title "The First National Bank of Wynot"	Jan. 21
4385	"The First National Bank of Muskogee," Muskogee, Okla., to "The First National Bank of Muskogee"	Feb. 14
8864	"The Maxfield National Bank of Batesville," Batesville, Ark., to "The National Bank of Batesville".	Mar. 9
7498	"The Merchants National Bank of New Orleans," New Orleans, La., to "The Peoples National Bank of New Orleans"	Apr. 11
3872	"The First National Bank of Albany, Georgia," to "The Citizens First National Bank of Albany".	May 1
2798	"The Fifth National Bank of Cincinnati," Cincinnati, Ohio, to "The Fifth-Third National Bank of Cincinnati".	June 2
8563 3916	"The National Bank of Luther," Luther, Okla., to "The First National Bank of Luther". "The Oakland National Bank," Chicago, Ill., to "The Oakland National Bank of Chicago". "The Oakland National Bank," Chicago, Ill., to "The Oakland National Bank of Chicago".	June 6 June 20
5501 5176	"The Peoples National Bank of Grove City," Grove City, Pa., to "The Grove City National Bank". "The National Bank of Commerce of Hattiesburg," Hattiesburg, Miss., to "First National	Aug. 1
7457	Bank of Commerce of Hattiesburg".  "The Western National Bank of Louisville," Louisville, Ky., to "The Continental	Aug. 8
8967	National Bank of Louisville".  "The Cortez National Bank of Cortez. Colo., to "The First National Bank of Cortez"	Sept. 30 Oct. 6
3001	The Colleg Patrollar Dalla, Colleg, Colo., to The First National Dalla of College	000.

# EXTENSION OF CORPORATE EXISTENCE OF NATIONAL BANKS.

Under authority of the act of July 12, 1882, 83 associations extended their corporate existence during the last year; and under the act of April 12, 1902, the charters of 7 associations were extended for a second period of twenty years. The total number of extensions under the act of 1882 to October 31, 1908, is 2,665, and the number of second extensions 968. In the year terminating on October 31, 1909, the corporate existence of 134 associations will expire for the first time and one for the second time. The charters of all of these banks may be extended for an additional period of twenty years by conforming to the provisions of the acts of the dates cited. Lists of both classes of banks with dates of expiration of charters will be found in the appendix of the report of the Comptroller of the Currency.

#### LIQUIDATIONS.

During the year ended October 31 charters of three associations expired by limitation, and 77 associations were placed in voluntary liquidation under the provisions of section 5220 of the Revised Statutes. The capital of the banks of the classes named was \$12,415,000. Thirty of the banks voluntarily liquidated, with capital of \$7,355,000, were absorbed by other associations; 3 of the banks the charters of which expired by limitation were reorganized; 38 liquidated to reorganize as state banks; and 9 were closed to discontinue business.

The list of liquidated banks, with date of authority to begin business, date of closing, capital stock, circulation issued, redeemed and

outstanding, is submitted herewith:

NATIONAL BANK EXAMINATIONS AS VIEWED BY THE BANKERS.

On September 14, 1908, a copy of the following letter was mailed to the president of every national bank:

> TREASURY DEPARTMENT, Washington, September 14, 1908.

My Dear Sir: I am making an effort to improve the work of the national-bank examiners, and in order to do so I want an expression of opinion from the banks as to how the work is now done and as to how it may be improved.

Will you please tell me how the examiners who have examined your bank actually do the work; whether or not, in your opinion, it is well done, and whether the examiners take time enough to go into the details of the bank as the law contemplates that they should, and in a general way point out every defect in the examinations that may occur to you.

I will be under obligations to you if you will advise me how, in your opinion, the work for which you pay can be done so that both your bank and this office will get the best results possible from the examinations. The bank pays for these examinations, and it is therefore vitally interested in getting actual benefits from them.

My sole purpose is to improve the entire service from the top to the bottom. Your reply, therefore, will be considered confidential. Please write me fully by return

nail.

Respectfully,

Lawrence O. Murray, Comptroller.

Replies to the foregoing letter were received from over 3,600 banks, and in 1,848 instances the opinion was expressed that the present system and methods in force are satisfactory. In 53 cases the view was taken that the system is not satisfactory, but no recommendations for improvement were submitted. In nearly one-half (1,695) of the replies the system was criticized to a greater or less extent and

corresponding suggestions offered.

On the subject of the compensation of examiners, in 501 replies the view is expressed that the examiners should be paid salaries in lieu of fees. In the opinion of 684 correspondents, more time should be devoted to examinations than at present, and in 278 replies the wisdom of conferences by the directors with the examiner at time of examination is recognized. Forty-five correspondents recommend more frequent examinations than at present; 116, more competent examiners; 54, that examiners should be placed under the civil service; 84, that examiners be retained in the same localities indefinitely; 16, that government auditors or supervising examiners be appointed; 11, that banks in contiguous territory unite in the employment of special auditors; 31, that independent audits be made, and 11, that reports of examiners be made to clearing houses. In 460 replies more careful inspection of loans and discounts is urged, and in 24 it is suggested that closer attention should be given items in transit and accounts current. Correspondents in 61 instances urge the giving of greater attention to loans to officers, directors, and stockholders. Verification of individual ledger balances is advocated in 184 replies.

In the interest of the department, of the examiners, and the banks, the establishment of a credit department in the office of the Comptroller is urged, by a number of correspondents, for the collection of information relative to the character and financial standing of large borrowers, from which both the banks and the examiners could draw, the former to enable them to determine the advisability of granting accommodations or extensions, and the latter to understandingly advise both the Comptroller and the banks of the value of the bills receivable, etc. Upon the part of some of the bankers the view is expressed that examiners should be authorized to communicate more freely with the officers of banks with respect to their knowledge of paper which may be found in a bank at the time of examination.

It is worthy of note that criticisms and suggestions submitted in the replies from the banks are directed to the system and not to

individual examiners.

It is believed that the following tabulation of the replies received from the banks, showing the sources from which they were received and the character of the larger number of criticisms, comments, and recommendations, will be examined with interest:

State.	Num- ber of banks.	Number of replies recelved.	Number that regard present system as satisfactory.	Number criticizing present system without suggesting improvements.	Number offering sugges- tions for im- prove- ment.	of fce	Num- ber suggest- ing more time for exami- nations.	Number suggesting board meetings with examiners.	Number suggesting more careful inspection of loans and discounts.	Number suggesting verification of individual ledger balances.

STATE, SAVINGS, PRIVATE BANKS, AND LOAN AND TRUST COMPANIES.

Under the provisions of section 333 of the Revised Statutes of the United States, the Comptroller of the Currency is required to incorporate in his annual report to Congress a statement exhibiting under appropriate heads the resources and liabilities and condition of the banks, banking companies, and savings banks organized under the laws of the several States and Territories. The information is obtained through the courtesy of State officers having supervision of these institutions and from individual banks and bankers where not obtainable otherwise.

Summaries of this information received for the current year show that there were in operation 14,522 banks other than national, with aggregate resources of \$10,869,345,993, being an increase of 1,205 in the number of banks and a decrease of \$299,168,523 in resources reported the previous year. The returns include 11,220 commercial banks, 1,453 savings banks (of which 676 were of the mutual class, i. e., without capital stock), 1,007 private banks, and 842 loan and trust companies.

The capital stock of the commercial banks aggregates \$502,513,303, individual deposits \$2,937,129,598, and resources \$4,032,638,485. In 1907 the aggregate resources of this class of banks was \$4,119,190,337, thus showing a decrease of \$86,551,852 in the amount reported for

the current year.

Savings-bank reports to the number of 1,453 show deposits aggregating \$3,479,192,891 and resources \$3,809,533,152. Compared with 1907 these figures show an increase in the aggregate resources of \$26,659,952, but a decrease of \$16,217,196 in individual deposits. Including the deposits in savings departments of the Illinois State banks the aggregate deposits to the credit of savings depositors in the United States is shown to be \$3,660,553,945 and the number of depositors 8,705,848, the average deposit being \$420.47.

Reports received from the 842 loan and trust companies show

Reports received from the \$42 loan and trust companies show aggregate resources of \$2,865,632,876 against 794 companies with aggregate resources of \$3,071,419,360 in 1907, or a decrease of

\$205,786,484.

Reports were obtained from 1,007 private banks and bankers, with capital of \$21,122,836 and aggregate resources of \$161,541,480. In 1907 reports were received from 1,141 private banking concerns with capital of \$25,144,822 and resources of \$195,031,619, thus showing a decrease in figures submitted for 1907 of \$4,021,986 in capital

stock and \$33,490,139 in resources.

Statistics submitted with respect to the amount and average rate of dividends paid by state banks, private banks, and loan and trust companies for the year ended June 30, 1908, will be found in the appendix. Reports covering the subject were received from 1,568 state banks with capital of \$142,087,691 which showed the payment of dividends to the amount of \$14,485,772 or an average of 10.19 per cent; from 623 loan and trust companies with capital of \$227,875,359 showing payment of dividends to the amount of \$22,959,630 or 10.08 per cent; and 214 private banks which paid dividends to the amount of \$684,889 or 13.57 per cent on capital stock of \$5,046,705. Similar returns for 1907 show that state banks paid an average of 9.54 per

cent, loan and trust companies 10.38 per cent, and private banks

12.51 per cent.

The following table is a summary of reports received for the year 1908 from state banks, savings banks, private banks, and loan and trust companies:

Resources and Liabilities of State, Savings, Private Banks, and Loan and Trust Companies, 1908.

	11,220 state banks.	1,453 savings banks.	1,007 private banks.	842 loan and trust companies.	Total, 14,522 banks, etc.

For the purpose of comparison a table exhibiting the principal items of resources and liabilities of banks other than national in the years 1900, 1904, and 1906 to 1908 is submitted herewith:

Consolidated Returns from State, Savings, Private Banks, and Loan and Trust Companies.

Item.	1900.	1904.	1906.	1907.	1908.
LoansBonds.	\$3,013,449,827 1,723,830,351	\$4,360,209,382 2,522,890,815	\$5,656,832,201 2,790,159,501	\$6,099,897,535 2,931,506,252	\$5,797,611,743 2,873,226,958
Cash	220,667,109	501,578,011 625,116,824	334,938,185 739,163,401	391,847,497 807,178,262	479,116,289 838,058,353
profits	490,654,957 4,780,893,692	779,241,781 6,688,107,157	893,679,524 8,159,894,029	924,655,010 8,776,755,207	1,012,811,484 8,409,959.961
Resources	5,841,658,820	8,542,839,386	10,363,350,846	11,168,514,516	10,869,345,993

The foregoing statement indicates an increase in the aggregate resources in 1904 over 1900 of \$2,701,180,564; an increase of \$805,163,670 in 1907 over 1906; for 1908 the figures show a decrease

of \$299,168,523 over those reported in 1907, but an increase of

\$5,027,687,173 for the eight years ended June 30, 1908.

Combining the summary of reports from national banks as of July 15, 1908, with those received from other banks for June 30, 1908, makes a total of 21,346 reporting banks with aggregate capital of \$1,757,200,000 and aggregate resources of \$19,583,400,000, as shown by the following comparative statement.

Classification.	6,824 national banks.	14,522 state, etc., banks.	Total, 21,364 banks.
Loans United States bonds All other bonds and securities Cash (including national-bank notes) Capital stock	732. 6 840. 1 889. 2	Millions. \$5,797.6 17.6 2,855.6 479.1 838.1	Millions. \$10, 438. 0 750. 2 3, 695. 7 1, 368. 3
Surplus and profits Deposits (individual) Aggregate resources.	748. 7 4, 374. 5	1,012.8 8,410.0 10,869.3	1,761. 12,784. 19,583.

From the foregoing statement it appears that banks other than national have 55 per cent of the aggregate resources of all reporting banks, 65 per cent of individual deposits, and 55 per cent of the aggregate loans. Of the surplus and profits 57 per cent is credited to this class of banks, while they have only about 47 per cent of the capital and 35 per cent of the cash holdings of all banks.

The individual deposits in all reporting banks are \$12,784,500,000, but estimating the deposits in 3,654 nonreporting banks at about \$486,000,000 the individual deposits in all banking institutions of the

country are approximately \$13,270,000,000.

The aggregate amount of cash in the vaults of the banks of the United States and island possessions on or about June 30, 1907, was \$1,113,700,000. The amount reported on the corresponding date in 1908 is \$1,368,300,000, an increase of \$254,600,000 during the year.

The banking power of the United States in 1908, as represented by capital, surplus and other profits, deposits, and circulation of national and other reporting banks, together with the estimated amount of funds of this character in the nonreporting banks, is shown to be approximately \$17,643,000,000. In 1890 Mulhall estimated the banking power of the United States at \$5,150,000,000.

Information relating to state and private bank failures furnished this office by the Bradstreet Commercial Agency shows that during the year ended June 30, 1908, there were 132 failures of banks other than national, with assets of \$177,073,348 and liabilities of

\$209,835,443.

The growth in the number and volume of business of the banking institutions of the country has been especially marked since 1900. In that year the total number of banks in operation was estimated at 13,977, with capital of \$1,150,728,675; for the present year the number has increased to 25,000, with aggregate capital of \$1,833,805,203. The national banks have increased since 1900 from 3,732, with aggregate capital of \$621,536,461, to 6,824 on July 15, 1908, with aggregate capital of \$919,100,850. Other reporting banks have increased from 6,650, with aggregate capital of \$403,192,214 in 1900, to 14,522, with aggregate capital of \$838,058,353 in 1908. In 1900 the nonreporting banks were estimated at 3,595, with capital of \$126,000,000; for the present year banks not reporting are estimated at 3,654, with capital of \$76,646,000.

#### STATE BANKS.

Reports from state banks, all official returns, with the exception of those from Nevada, Alaska, and Hawaii, show the condition of 11,220 banks of this class in operation, with aggregate resources of \$4,032,638,485. Geographically the state banks are located as follows: Nineteen in the New England States, 406 in the Eastern States, 3,312 in the Southern States, 3,689 in the Middle Western States, 2,866 in the Western States, 902 in the Pacific States, and 26 in the island possessions.

The returns from Texas and California include trust companies and those from South Dakota and Utah include private banks. The returns from the various States are for dates nearest June 30, 1908, except that those from Alabama are for October 15, 1907; Ohio, for December 5, 1907; and Idaho, for December 23, 1907, these

being the latest available returns from the States mentioned.

A summary of the returns submitted show loans \$2,436,015,436; investments in bonds and other securities, \$502,436,171; cash on hand, \$308,736,342; capital stock paid in, \$502,513,303; surplus and undivided profits, \$303,616,057; individual deposits, \$2,937,129,598. Compared with the figures for 1907, it appears that investments in bonds, etc., increased \$12,931,534; cash on hand, \$54,734,772; capital stock, \$30,850,266, and surplus profits, \$22,364,579. There has been a decrease of \$131,520,262 in deposits, \$95,611,884 in loans, and \$25,257,290 in cash items. Comparing the figures for 1908 with those submitted for 1904, there has been an increase of \$1,168,894,312 in the aggregate resources; \$155,092,106 in capital stock, and

\$863,911,549 in deposits.

Missouri has the largest number of state banks, viz, 934, followed by Kansas with 740, Minnesota 607, and Nebraska 598. Illinois has the largest amount of capital invested in this class of banks, viz, \$52,460,000, Ohio being second with \$38,950,747, New York third with \$33,283,000. California has \$46,754,171 of capital stock entered under head of "State banks," but this sum includes capital stock of trust companies. The largest amount of deposits held by state banks is \$427,277,209 in Illinois banks, New York being second with \$375,956,193, and Ohio third with \$304,845,105, Illinois state banks have also the largest volume of aggregate resources, viz, \$561,458,333, those of New York second with \$533,592,633, and Ohio third with \$376,571,571.

Tables I and V in the appendix to the report of the Comptroller of the Currency show complete details of reports from this class of banks.

### SAVINGS BANKS OF THE UNITED STATES.

Savings banks being the repositories of the accumulations of wage-earners mainly, special interest attaches to their operations and condition. There are 8,088,066 depositors in savings banks of the United States (exclusive of savings depositors in state banks of Illinois) with deposits aggregating \$3,479,192,891, the average deposit account being \$430.16.

Savings-bank reports to the number of 1,453 have been received, of which 676 are from mutual institutions and 777 from stock savings banks, the latter being operated for the benefit of both the share-

holder and depositor. The principal items of resources and liabilities of savings banks, both mutual and stock, are as follows:

Loans	\$1,872,098,690
Bonds, etc.	1, 586, 939, 788
Deposits	3, 479, 192, 891
Aggregate resources	3, 809, 533, 152

#### MUTUAL SAVINGS BANKS.

All the mutual savings banks are located in the New England and Eastern States with the following exceptions: 1 in West Virginia, 3 in Ohio, 5 in Indiana, 2 in Wisconsin, and 14 in Minnesota. The number of reporting institutions is 676, two less than reported last year.

As shown by Table IV in the appendix to the report of the Comptroller of the Currency, the aggregate resources of mutual savings banks are \$3,331,737,125, a gain of \$56,748,920 since June 30, 1907. Loans and discounts are \$1,537,834,363, classified as follows:

On real estate	\$1, 265, 645, 819
Other collateral securities	
Other nonclassified loans	205, 563, 759

Compared with 1907, real estate loans have increased \$53,560,320; loans on other collateral, \$5,652,142, other nonclassified loans having decreased in the sum of \$13,266,273. The amount invested in bonds, stocks, and other securities has fallen from \$1,554,409,273 in 1907 to \$1,512,940,551 in 1908, a decline of over \$41,000,000. The investments in bonds and other securities are as follows:

United States bonds	\$13, 860, 045
State, county, and municipal bonds	585, 609, 616
Railroad bonds and stocks.	618, 186, 415
Bank stocks	24, 265, 271
Other stocks, bonds, and securities	271, 019, 204

Cash in bank amounts to \$32,446,782, an increase of \$14,405,816 over the amount shown by the reports for 1907. Individual deposits have increased from \$3,055,287,322 to \$3,065,686,012, a gain of \$10,398,690. Deposits are credited to 7,137,481 depositors, the number reported in 1907 being 7,071,219, a gain of 66,262, but the average deposit account has decreased during the same period from \$432.07 to \$429.52. The mutual savings banks hold nearly 24 per cent of the aggregate individual deposits in all banks of the country. In the New England States, the resources of mutual savings banks aggregate more than one-half of the resources of all the banks in that section, while in the Eastern States the resources of such banks are only about 22 per cent of the combined banking resources of that geographical division. The average deposit account in mutual savings banks in the New England States is \$292.38; in the Eastern States, \$464.65; in the Middle Western States, \$386.06. The highest average deposit account, \$547.79, is to the credit of depositors in the State of Rhode Island, Ohio being next with \$541.10, followed by New York with \$506.78. The average deposit account in all savings banks of the United States is \$430.16. The average rate of interest paid to depositors in mutual savings banks of the New England States is 3.72 per cent; in the Eastern States, 3.49; in the Middle Western States, 3.75, and the average for all mutual savings banks is 3.70.

# STOCK SAVINGS BANKS.

The reporting stock savings banks to the number of 777 are located in the District of Columbia, North Carolina, South Carolina, Florida, Iowa, Nebraska, Colorado, and California. The resources of these banks amount to \$477,796,027, approximately 12½ per cent of the total assets of all savings banks. The loans aggregate \$334,264,327; investments in bonds and other securities, \$73,999,237; deposits with other banks, \$42,596,610; cash on hand, \$11,036,751. The capital reported is \$36,013,455; surplus and undivided profits, \$20,855,074; and deposits, \$413,506,879 credited to 950,585 depositors, the average deposit account being \$435. The average rate of interest paid depositors in this class of banks is estimated at 3.53 per cent. Comparing the stock savings bank returns for the current year with those of 1907, a decrease in aggregate resources is shown of \$30,088,978, and the decrease in deposits amounts to \$26,615,886. of depositors has increased from 911,674 in 1907 to 950,585 in 1908, an increase of 38,911 during the current year. The number of depositors in this class of banks, however, has been obtained by careful estimate, as only a part of the reporting banks gave information on this subject. The large decrease shown in resources and deposits of stock savings banks of the country is attributable principally to a decrease of \$29,237,091 in resources of California savings banks since April 17, 1907. The statistics relating to the savings banks of that State furnished to this office by the state banking board of California for April 17, 1907, showed resources of \$317,433,711, and for March 14, 1908, of \$288,196,620. The same reports showed that individual deposits in California savings banks had fallen from \$282,508,956 in 1907 to \$254,695,083 in 1908, a loss of \$27,813,873.

# ALL SAVINGS BANKS.

The number of depositors in all savings banks reporting (exclusive of those having accounts in savings departments of state banks of Illinois) has increased since 1900 from 5,898,091 to 8,088,066, and the average deposit from \$404.33 to \$430.16. For the current year the number of depositors has increased by 105,173, but the average deposit account appears to have been reduced from \$437.86 to \$430.16. The total number of savings depositors, including those in Illinois state banks having savings departments, has increased from 8,588,811 in 1907 to 8,705,848 in 1908.

In the following table is given a comparative statement of the number of depositors, amount of deposits, and the average savings deposit in savings banks in the States named for the years 1907 and 1908. Included in this table are deposits in savings departments of commercial banks in operation in the State of Illinois, for the reason that the auditor of public accounts of that State in his periodical statements reports such deposits separate from deposits subject to check. The result of the addition of Illinois savings deposits is the raising of the aggregate savings deposits of the United States to \$3,660,553,945, the number of depositors to 8,705,848, the average deposit being \$420.47.

Compared with 1907 there has been a gain of 38 in the number of reporting banks, and of 117,037 in the number of depositors. Deposits show a decrease of \$29,525,000, and the average deposit has

fallen from \$429.64 in 1907 to \$420.47 in 1908.

NUMBER OF SAVINGS DEPOSITORS, AGGREGATE SAVINGS DEPOSITS, AND AVERAGE Amount due to Depositors in Savings Banks in each State in 1907 and 1908.

a Partially estimated.

b October 27, 1907.
 Returns dated October of the prior year from Massachusetts and Connecticut.
 d Includes II banks in process of liquidation.

f Exclusive of one bank not reporting on June 30.

g Included in abstract of State banks having savings departments.

Growth of savings banks in the United States from 1820 to 1908, as evidenced by the amount of deposits, number of depositors, average deposit account, and the average per capita in census years from 1820 to 1890 and annually thereafter is shown in the following table. figures given, however, include the number of depositors and amount of deposits in the State banks of Illinois having savings departments but not the number of such banks, by reason of the fact that general reports from these institutions are incorporated with State bank returns.

Number of Savings Banks in the United States, Number of Depositors, Amount of Savings Deposits, Average Amount due each Depositor in the Years 1820, 1825, 1830, 1835, 1840, and 1845 to 1908, and Average per Capita in the United States in the Years Given.

#### INTEREST RATES PAID BY SAVINGS BANKS.

From an examination of the returns submitted with respect to the rate of interest paid on savings accounts, it will be noted that the maximum rate is 4.50 per cent, the minimum rate 2.77 per cent, and the estimated average rate 3.622, a slight increase over the estimated average interest of 3.615 per cent in 1907.

### AVERAGE RATES OF INTEREST.

a Unofficial.

An abstract of the reports of condition of the mutual and stock savings banks by States will be found in Table IV, and a comparative statement showing the resources and liabilities from 1904 to 1908, inclusive, in Table VII of the appendix to the report of the Comptroller of the Currency.

#### PRIVATE BANKS.

Reports from 1,007 private banks with capital of \$21,122,836 and aggregate resources of \$161,541,480 have been received and tabulated. The statements submitted are from 29 States, the returns from 12 States being official and those from the other States from reports courteously furnished by individual banks and bankers at the request of this office. Reporting private banks furnished by the state officials of Utah and South Dakota are incorporated with the summary of reports of state banks for those States. About 79 per cent, or 791 of the reporting private banks, are located in the Middle Western States, the private banks in this section having 63 per cent of the capital and holding 80 per cent of the deposits of all reporting banks in this class. Over one-half of the reporting private banks are located in the three States of Ohio, Indiana, and Illinois, and these States have 45 per cent of the capital and over 62 per cent of deposits of all private banks. There are 551 private banks in the States named with a capital of \$9,695,799, and deposits of \$78,990,825. Iowa has 111 private banks with capital of \$2,259,573 and over \$13,100,000 deposits.

Table III in the appendix to the report of the Comptroller of the Currency is an abstract of reports of condition of private banks by States, and Table VIII a comparative statement of the resources and liabilities of private banks for each year from 1904 to 1908, inclusive.

### LOAN AND TRUST COMPANIES.

Reports received from 842 loan and trust companies show aggregate resources of \$2,865,632,876, against 794 companies with aggregate resources of \$3,071,419,360 in 1907, a decrease of \$205,786,484. Statistics relating to trust companies in California, however, are incoporated with the returns for state banks furnished by the board of bank commissioners of that State, as they are not reported separately. The principal items of resources and liabilities of reporting trust companies for the fiscal year ended June 30, 1908, are, loans, \$1,380,432,218; investments in bonds and other securities, \$775,875,271; cash on hand, \$118,398,874; capital stock paid in, \$278,408,759; surplus and undivided profits, \$416,039,899; deposits, \$1,866,964,314. Comparing these figures with those submitted for 1907, loans show a decrease of \$221,682,337, investments in bonds, etc., \$10,124,399, and deposits \$194,658,721. The amount due from banks and bankers has increased in the sum of \$129,595,850, real estate, furniture, and fixtures by \$46,033,751, and cash on hand by \$16,679,359. Capital stock shows an increase of \$2,362,678, and surplus and profits \$18,174,873. The most noteworthy decrease in resources of these companies during the fiscal year ended June 30, 1908, has been in New York. The figures submitted for that State on June 4, 1907, showed resources aggregating \$1,490,760,675. On June 17 of the present year the resources reported for this class of corporations in New York was \$1,272,732,049, thus showing a loss of \$218,028,626. A later statement published by the superintendent of banking of that State (August 31) shows that the companies have gained \$82,579,770 since the report of June 17 last, the aggregate resources on August 31 being \$1,355,311,819.

Among other States showing a falling off in resources of loan and trust companies from the figures reported last year are Pennsylvania, with a reduction of \$36,000,000; Rhode Island, \$18,000,000; Missouri,

\$11,000,000; and New Jersey, \$8,000,000.

While there has been a decrease of nearly \$206,000,000 in the aggre gate resources of loan and trust companies during the current year, since 1904 they have increased by over \$485,000,000. There has been a large increase in surplus-profits within the past four years, over \$86,250,000 having been accumulated since 1904. The most noteworthy increase has been in cash holdings, which amounted to \$60,621,740 in 1904 and \$118,398,874 in 1908, a gain of \$57,777,134. Of the 842 loan and trust companies from which reports have been received and compiled, 327 with capital of \$99,775,439, deposits of \$350,933,374, and aggregate resources of \$667,152,633 are located in the State of Pennsylvania. Indiana reports 91, New York 88, New Jersey 75, and Massachusetts 52. While the largest amount of capital is invested in Pennsylvania loan and trust companies, those in operation in New York have the largest volume of resources, 44 per cent of the resources of all reporting loan and trust companies being credited to the companies of that State.

Table II in the appendix to the report of the Comptroller of the Currency is an abstract of reports of condition of loan and trust companies for the present year, arranged by States, and Table VI is a comparative statement of resources and liabilities for each year from 1904

to 1908, inclusive.

#### CAPITAL STOCK OF NATIONAL AND OTHER BANKS.

On June 30, 1900, the capital stock of all reporting banks of the United States, state and national, was \$1,024,728,675; since that date it has increased over \$732,000,000, amounting on June 30, 1908,

to \$1,757,159,203.

Table XI in the appendix to the report of the Comptroller of the Currency shows the amount of capital stock of national banks on July 15, 1908, and of state, stock savings, private banks, and loan and trust companies at date of latest report to this bureau. The aggregate capitalization of the 21,346 banks from which reports have been received for the current year is as above stated, \$1,757,159,203, against \$1,690,869,179 in 1907, a gain of \$66,290,024. Approximately, one-third of the total capital of the banks of the United States is represented by capital of banks located in the Eastern States, the total capital of banks in this section amounting to \$571,034,832. The capital of banks located in the Middle Western States aggregates \$496,800,-233, or 28 per cent, and in the Southern States \$285,560,101, or over 16 per cent. The Pacific States are fourth in order of capitalization of banks, \$145,039,243 being the amount reported for that section. Banks in the New England States have capital aggregating \$137,458,520, and in the Western States \$113,327,004. The capital stock of banks located in the island possessions aggregates \$7,939,270. The States with bank capital aggregating over \$100,000,000 are New York, with \$260,091,320, Pennsylvania \$225,855,400, Illinois, \$117,670,965, and Ohio \$102,618,181. More than one-half of the banking capital of the New England States is that of the Massachusetts banks, the amount being \$74,099,500. In the Southern States Texas has the largest aggregate banking capital, the sum of \$53,985,278 being credited to shareholders of all banks in that State, and in the Western States Kansas has the largest aggregate, or \$25,958,350. Over two-thirds of the banking capital of the Pacific States is held by shareholders in California banks, the aggregate amount credited to that State being \$97,353,619.

# INDIVIDUAL DEPOSITS IN BANKS OF THE UNITED STATES.

In the following table is shown the individual deposits in all reporting banks of the country on or about June 30, 1900, 1904 and 1906 to

1908, inclusive, arranged by geographical divisions.

Individual deposits in all reporting banks in 1900 aggregated \$7,238,986,450; for the current year such deposits aggregate \$12,784,511,169, an increase of \$5,545,524,719 within the past eight years, or over 76 per cent. On June 30, 1907, individual deposits in all reporting banks aggregated \$13,099,635,348, or \$315,124,179 greater than the amount reported for the current year.

 $<sup>\</sup>alpha$  Returns from Connecticut and Massachusetts savings banks for October, 1907.  $\delta$  Includes loan and trust companies.

During the four-year period ended June 30, 1904, as heretofore shown, there was an increase of \$2,761,000,000 in individual deposits, or over 38 per cent, and from 1904 to 1908 the increase was approximately \$2,784,000,000, or about 28 per cent, the increase since 1900, as before stated, being over 76 per cent.

The following table shows the amount and per cent of deposits held

by the several classes of banks in 1900, 1907, and 1908:

Classification.	190	0.	190	7	1908.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Percent.
State banks Savings banks Private banks Loan and trust companies National banks Total	Millions. \$1,266.7 2,389.7 96.2 1,028.2 2,458.1	17. 5 33. 0 1. 3 14. 2 34. 0	Millions. \$3,068.6 3,495.4 151.1 2,061.6 4,322.9	23. 4 26. 7 1. 2 15. 7 33. 0	Millions. \$2,937.1 3,479.2 126.7 1,867.0 4,374.5	23. 0 27. 2 1. 0 14. 6 34. 2

From the foregoing it will be noted that 34.2 per cent of the total individual deposits is held by national banks, 27.2 per cent by savings banks, 23 per cent by state banks, 14.6 per cent by loan and trust com-

panies, and only 1 per cent by private banks.

In 1900 national banks held 34 per cent of the aggregate deposits, while savings banks had 33 per cent and state banks 17.5 per cent. It would therefore appear that state banks have made the largest gains in deposits during the past eight years, apparently at the expense of the savings banks. The proportion of individual deposits held by loan and trust companies in 1900 was 14.2 per cent and in 1908 14.6 per cent.

The following table shows the amount of individual deposits in national and other reporting banks by geographical divisions on or about June 30, 1907 and 1908, together with the amount and per

cent of increase or decrease:

alnerease.

	Individual deposits.					
Geographical division.	1907.	1908.	Decrease.	Per cent of decrease.		
New England States. Eastern States. Sonthern States. Sonthern States Middle Western States Western States. Pacific States. Islands. Total.	Millions, \$1,959.3 5,597.1 1,008.4 3,036.9 607.2 868.4 22.3	Millions. \$1,987. 1 5,427. 9 913. 8 3,003. 6 591. 9 839. 7 20. 5	Millions.  a \$27.8 169.2 94.6 33.3 15.3 28.7 1.8	b 1, 42 3, 11 9, 38 1, 10 2, 52 3, 30 8, 07		

Every section of the country shows a decrease in individual deposits with the exception of the New England States, where an increase of \$27,800,000 is shown, but it should be stated that the latest returns from Massachusetts and Connecticut are for October, 1907. The net decrease in individual deposits for the whole country was \$315,100,000, the decrease in the Eastern States being \$169,200,000, Southern States \$94,600,000, Middle Western States \$33,300,000,

b Per cent of increase.

Net decrease.

Pacific States \$28,700,000, and Western States \$15,300,000. Referring to the New England States, an analysis of the returns submitted for this section shows that individual deposits in national banks increased during the fiscal year \$21,500,000, and in savings banks by \$27,800,000, while deposits in loan and trust companies decreased in the sum of \$21,100,000, and in State banks by only \$401,000.

The percentage of decrease of individual deposits of the country-compared with 1907 is 2.41 per cent. In the New England States an increase of 1.42 per cent is noted. There was a decrease of 9.38 per cent in the Southern States, 8.07 per cent in the island possessions, 3.30 per cent in the Pacific States, 3.11 per cent in the Eastern States, 2.52 per cent in the Western States, and only 1.10 per cent in the Middle Western States. In the Southern States, where the largest per cent of loss in deposits is indicated, national banks appear to have lost 10 per cent and other banks 8 per cent as compared with

1907.

National banks in the Eastern States gained in deposits during the year ended June 30, 1908, approximately 5 per cent, while the loss in deposit accounts sustained by other banks in that section was more than 6 per cent. In this connection it appears that state banks lost about 8 per cent, loan and trust companies nearly 12 per cent, and savings banks only eight-tenths of 1 per cent of individual deposits. In the Middle Western States national banks gained 2.2 per cent while other banks lost about 3.2 per cent. National banks in the Western States lost over 3 per cent, while deposits in other banks of this section show only a decrease of 1½ per cent from the percentage in 1907. The returns from the Pacific States show that national banks lost over 5 per cent in that section while individual deposits in other banks decreased only 2.4 per cent.

The following comparative statement shows the increase in population, individual deposits, and money in circulation in the United

States for 1900, 1907, and 1908:

	1900	1900 1907.		1900 to 8.	1908.	Increase 1907 to 1908.

a Decrease.

b Per cent of decrease.

In connection with the deposits in national banks, the following comparative statement is of interest, showing, on or about July 1, 1896, 1900, and 1908, the amount of individual deposits, the average deposit account, the number of depositors (estimated for 1900 and 1908), and number of shareholders in 1896, together with the estimated number in 1900 and 1908:

Year.	Individual de- posits.	Number of depositors.	A verage deposit ac- count	Number of share-holders.
1896.	\$1,668,413,507	2, 435, 625	\$685	288, 902
1900.	2,550,659,557	3, 470, 285	735	292, 215
1908.	4,374,551,208	5, 593, 927	782	404, 021

# MONEY IN BANKS OF THE UNITED STATES.

On or about June 30, 1908, the banks of the country had on hand \$1,368,329,683 against \$1,113,742,316 in 1907, a gain of \$254,587,367 during the year. About two-thirds of the cash holdings of the banks of the country is in national banks, as will be seen from the following table showing the amount of coin and other money in the United States on or about June 30, 1908, held by national and other banks, including those in the island possessions:

GOLD AND OTHER MONEY HELD BY NATIONAL BANKS ON JULY 15, 1908, AND BY OTHER REPORTING BANKS AND BANKERS ON OR ABOUT JUNE 30, 1908.

Classification.	National banks (6,824).	All other banks (14,522).	Total all banks (21,346).

Total	889,213,394	479,116,289	1,368,329,683

The following table shows the cash holdings of banks in 1907 and 1908 and the amount of increase, geographically arranged:

Geographical division,	1907.	1908.	Increase
New England States Eastern States Southern States Middle Western States Western States Pacific States Islands	Millions. \$63.5 519.2 87.2 305.8 55.2 75.6 7.2	Millions. \$76. 2 656. 6 95. 8 367. 0 67. 0 100. 3 5. 4	Millions. \$12.7 137.4 8.6 61.2 11.8 24.7 a1.8
Total	1,113.7	1,368.3	b 254. 6

From the foregoing it appears that the banks in the New England States held cash, on or about June 30, 1908, to the amount of \$76,200,000; Eastern States, \$656,600,000; Southern \$95,800,000; Middle Western States, \$367,000,000; Western States, \$67,000,000; Pacific States, \$100,000,000; and island possessions \$5,400,000. The banks of the country, including island possessions, increased their cash holdings during the year over \$254,000,000; of this amount the Eastern States gained \$137,400,000, and of the latter sum \$117,700,000 went to banks in the city of New York. The Middle Western States gained \$61,200,000; Pacific States, \$24,700,000; New England States, \$12,700,000; Western States, \$11,800,000;

 $<sup>^</sup>a$  Includes fractional currency.  $^b$  Includes \$250,948 Banco Espanol Filipino notes and \$2,606,805 in Philippine currency.

b Net increase.

and the Southern States, \$8,600,000, the island possessions showing

a decrease in cash holdings of \$1,800,000.

The geographical distribution of money in the banks of the United States in 1900, 1904, 1907, and 1908 is shown in the following table:

	1900.		1904.		1907.		1908.	
Division.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
New England States. Eastern States Southern States. Middle Western States. Western States	Millions. \$61.9 369.1 47.8 195.2 31.8 44.1	8. 25 49. 22 6. 37 26. 03 4. 25 5. 88	Millions. \$59. 2 497. 3 68. 9 261. 9 42. 4 53. 2	6. 02 50. 60 7. 01 26. 65 4. 31 5. 41	Millions. \$63.5 519.2 87.2 305.8 55.2 75.6	5. 74 46. 92 7. 88 27. 64 4. 99 6. 83	Millions. \$76. 2 656. 5 95. 8 367. 0 67. 1 100. 3	5, 5 48, 1 7, 0 26, 9 4, 9 7, 3
Total	749.9	100.00	982. 9	100.00	1, 106. 5	100.00	1,362.9	100.0

In noting the distribution of cash holdings of banks of the United States it will be observed from the foregoing that over 48 per cent of the aggregate is in banks of the Eastern States and nearly 27 per cent in those of the Middle Western States. The proportion of cash in the bank vaults of the Eastern States has varied during the past eight years going as low as 45.71 in 1906 and rising to 50.60 in 1904. In 1896, banks of the Eastern States held 49.30 per cent of the aggregate cash holdings; in 1900 they had 49.22 per cent; in 1901 this proportion had dropped to 48.14, again falling in 1902 to 46.61 and in 1903 to 46.01; in 1904 it rose to 50.60 and in 1905 fell to 47.75, and again in 1906 down to 45.71. In 1907 the percentage increased to 46.92, rising to 48.17 for the present year.

In the appendix to the report of the Comptroller of the Currency, Table XV, is shown the amount of gold, silver, paper currency, and cash not classified held by national and other banks on or about June 30, 1908, arranged by States and geographical divisions. It will be noted that of the \$1,368,300,000 cash in the banks of the country on June 30 \$515,800,000 was in banks located in the State of New York, or nearly 38 per cent of the aggregate cash holdings of

all banks.

In connection with the foregoing statistics relating to cash holdings of the banks the following table, showing deposits and cash holdings of the several classes of reporting banks on or about June 30, 1908, together with the percentage of cash to deposits in 1907 and 1908, will be found of interest:

Banks.	Indi-	Cash on	Ratio of cash to deposits.			
Danks.	vidual deposits.	hand.	1907.		1	908.
National banks State banks Savings banks Private banks Loan and trust companies	Millions. \$4,374.5 2,937.1 3,479.2 126.7 1,867.0	Millions. \$889. 2 308. 7 43. 5 8. 5 118. 4	P. ct.  8.28 .78 5.76 4.93	P. ct. 16.70 5.60	$\begin{cases} 10.51 \\ 1.25 \\ 6.71 \\ 6.34 \end{cases}$	Per cent. 20. 33 5. 70
Total	12,784.5	1,368.3		8. 50		10.70

In 1907 the percentage of cash holdings of all banks to individual deposits was 8.50 per cent; on or about June 30 of the current year the banks of the country held in their vaults 10.70 per cent to meet the demands of depositors. From the figures submitted it appears that national banks increased their percentage of cash holdings to individual deposits from 16.70 to 20.33; state banks from 8.28 to 10.51, private banks from 5.76 to 6.71, loan and trust companies from 4.93 to 6.34, and savings banks from 0.78 to 1.25 per cent.

In the following table is shown the distribution of money in the United States, giving the amount in Treasury as assets, in reporting

banks, and elsewhere, from June 30, 1892, to 1908:

# DISTRIBUTION OF MONEY IN THE UNITED STATES.

a Public money in national bank depositaries to the credit of the Treasurer of the United States not included.

b Money in banks of island possessions not included.

The stock of money in the United States on June 30, 1907, was \$3,115,600,000. On July 1 of the present year it was reported at \$3,378,800,000, being an increase of \$263,200,000. Of the total stock of money in the country, 10.08 per cent is held in the Treasury as assets, 40.34 per cent is in reporting banks, and 49.58 per cent elsewhere, the per capita not in the Treasury or banks being \$19.15, or 21 cents less than in 1907. The amount of money in circulation, exclusive of coin and other money in Treasury as assets, but including money in reporting banks, is \$3,038,000,000, or a per capita of \$34.72 as against \$32.22 in 1907.

The general stock of money in the United States at the close of the year ended October 31, 1908, was \$3,381,079,734, an increase during the year of \$232,302,823. As shown in the following table, the stock of gold was increased to the extent of \$159,615,899; bank notes \$55,863,726; silver \$17,731,198:

a A revised estimate by the Director of the Mint of the stock of gold coin was adopted in the statement

b For redemption of outstanding certificates an exact equivalent in amount of the appropriate kinds of money is held in the Treasury; and is not included in the account of money held as assets of the Government. This statement of money held in the Treasury as assets of the Government of money in national-bank depositaries to the credit of the Treasurer of the United States.

Note.—Population of the United States November 2, 1908, estimated at 87,971,000; circulation per capita, \$35.22.

# LOANS OF NATIONAL AND OTHER BANKS.

The following table shows the amount of loans in national and other reporting banks, by geographical divisions, on or about June 30, 1907 and 1908, together with the amount and per cent of increase or decrease:

		Loa	ns.	
Geographical division.	1007	1000	Decre	ease.
	1907.	1908.	Amount.	l'er cent.
New England States. Eastern States. Southern States. Middle Western States Western States. Pacific States. Islands. Total	Millions. \$1,391.3 4,211.2 1,106.7 2,802.0 513.1 718.6 21.0	Millions. \$1,384.9 4,104.3 1,039.9 2,693.3 508.7 687.4 19.5	Millions. \$6.4 106.9 66.8 108.7 4.4 31.2 1.5	0. 46 2. 54 6. 03 3. 88 . 85 4. 34 7. 14

From this statement it is shown that reporting banks of the country have decreased their loans during the current year by \$325,900,000, or 3.02 per cent. With the exception of the island possessions, the largest percentage of decrease has been in the banks of the Southern States, 6.03 per cent. The loans of the banks of the Pacific States have decreased by 4.34 per cent; those in the Middle Western States, 3.88; in the Eastern States, 2.54; while in the Western States and the New England States the decrease has been only 0.46 and 0.85 per cent, respectively.

# BANK RESOURCES.

Bank resources have more than doubled since 1900, but for the current year they show a decrease of about one-third of one per The resources of all reporting banks on June 30, 1908, aggregated \$19,583,410,393; in 1907 the aggregate resources were \$19,645,015,950, a loss of \$61,605,557 during the current year. In 1900 the bank resources of the country aggregated \$9,146,017,917, the increase since that date amounting to \$10,437,392,476, or 114 per cent. Table XII in the appendix to the report of the Comptroller of the Currency shows the average per capita of resources of each class of banks, state and national, and the per capita of all banks, arranged by States and geographical sections. It appears that the average per capita of bank resources of the United States, exclusive of the island possessions, is \$224.15. In 1907, it was estimated at \$228.58, and in 1900, including Hawaii in the estimate, it was \$118.42. Geographically, the Eastern States are first with \$428.22; New England second, \$415.57; Pacific States third, \$334.41; Middle Western fourth with \$180.77, and the Western and Southern States, fifth and sixth, with \$142.39 and \$65.30, respectively. In 1900 the New England States had the highest per capita resources, or \$312.30. The Eastern States had \$251.10, the Pacific States, \$147.01, the Middle Western States, \$75; the Western States, \$60.16, and the Southern States, \$24.94. The State having the largest bank resources is New York, the amount per capita in that State being \$637.27; Massachusetts is second with \$486.30, and California third with \$478.04. In the Southern States, West Virginia is first in per capita with \$113.10; Louisiana second with \$94.51, and Virginia third with \$84.73. The largest per capita in the Middle Western States is in Ohio, \$208.18; and Colorado, with \$235.01, has the largest per capita in the Western States.

# BANKS AND BANKING IN THE ISLAND POSSESSIONS.

# PHILIPPINES.

The treasurer of the Philippine Archipelago is required by law to make examinations of the banking institutions of the Philippines and to obtain from them periodical statements of their condition. These statements are forwarded to the Insular Bureau of the War Department, and the reports of condition under dates of March 30 and June 30 of the present year have been submitted by that bureau to this office for use in connection with this report, those for the latter date being received too late to incorporate in the general summary of the reports of the banks of the country. On March 31, 1908, there were in operation in the Philippines the following banks which made reports to the insular treasurer, viz: Banco Español-Filipino at Manila and the Iloilo subagency; the Manila agency, and the Cebu subagency of the Chartered Bank of India, Australia, and China; the Manila agency and Iloilo subagency of the Hongkong and Shanghai Banking Corporation; the Manila agency and the Cebu subagency of the International Banking Corporation; the Monte de Piedad Savings Bank at Manila; the Bank of Zamboanga—in all, ten banking institutions.

A summary of the returns from the Philippine banks on March 31, also that for June 30, 1908, together with individual statements made to the treasurer of the Philippines under those dates, appears in the appendix. From the compilation of returns for March 31, 1908, it appears that the resources of the 10 banking institutions named aggregate \$21,816,753, or an increase of \$2,256,341 as compared with returns of June 29, 1907. The principal items of resources and

liabilities are:

Loans and discounts, including overdrafts	\$11,058,370
Philippine and other currency.	
Due from banks and agencies	2, 815, 422
Capital stock paid in	
Surplus and undivided profits	
Bank notes outstanding	
Deposits, including deposits of insular treasurer	9, 711, 688
Bank deposits	

Comparing these returns with those submitted in June, 1907, loans and discounts show an increase of \$1,308,878; surplus and profits an increase of \$45,247, and deposits an increase of \$539,393, while currency in bank has decreased in the sum of \$1,424,418.

The Bureau of Insular Affairs, War Department, advises that—

The Spanish-Filipino Bank dispute has been settled through an agreement by which all claims and exclusive privileges and notes issued beyond the amount approved by the American Government are abandoned, but, on the other hand, the bank receives a confirmation without litigation of important privileges. The circulation to be allowed the bank is for the present \$\Pextstyle{2},400,000\$, representing the paid in and

unimpaired capital and surplus, and \$\partial{7}600,000\$ to be secured by deposit of approved bonds and stocks. If the bank increases its capital up to \$\partial{7}10,000,000\$ the circulation may be increased correspondingly, but not in any event to exceed \$\partial{7}9,000,000\$ The circulation issued upon the capital and surplus is to be taxed one-half of 1 per cent per annum, while the circulation, based upon the securities, will be taxed 1 per cent per annum. The circulating notes from January 1, 1908, are to constitute a preferred lien on the assets, and will be issued to the bank by the treasurer of the Philippine Islands. While the Government has reserved the right to incorporate other banks, the provision is made that no bank shall be authorized to issue circulating notes in the Philippine Islands with a capital and surplus of less than \$\partial{7}2,000,000.

# AGRICULTURAL BANK OF THE PHILIPPINE GOVERNMENT.

The Philippine legislature on June 18, 1908, passed an act, by authority of the United States, creating a government agricultural bank and appropriating 1,000,000 pesos as the capital. The act went into effect on July 1, 1908, and reads as follows:

Section 1. An agricultural banking corporation, to be known as the "Agricultural Bank of the Philippine Government," is hereby created and established, with its principal office and place of business in the city of Manila.

SEC. 2 The sum of one million pesos is hereby appropriated out of any of the general funds of the insular treasury not otherwise appropriated, as and for the capital of said

bank.

Sec. 3. The Agricultural Bank of the Philippine Government is hereby authorized to receive deposits of funds of provinces, municipalities, the Postal Savings Bank, societies, corporations, and private persons, and the Postal Savings Bank and provincial and municipal governments are hereby authorized to make such deposits. Interest to be paid by said bank on deposits so made shall not exceed four per centum per annum.

SEC. 4. The affairs and business of said bank shall be administered by a board of directors, composed of the secretary of finance and justice and in his absence or in the case of his disability the acting secretary of finance and justice, the insular treasurer and in his absence or in the case of his disability the acting insular treasurer, and three citizens of the Philippine Islands or of the United States, resident within the Philippine Islands, who shall be appointed by the Governor-General by and with the advice and consent of the Philippine Commission. The secretary of finance and justice and in his absence or in case of his disability the acting secretary of finance and justice shall be ex officio president of the board of directors. Three members of the board of directors shall constitute a quorum at any meeting thereof.

the board of directors shall constitute a quorum at any meeting thereof.

SEC. 5. The insular treasurer and in his absence or in case of his disability the acting insular treasurer shall be the manager of said bank, and shall perform the duties of his office in accordance with this act and the by-laws of said bank duly

adopted as hereinafter provided.

The official bond of the insular treasurer, and in his absence or in case of his disability that of the acting insular treasurer, shall be liable for the faithful performance of the duties of such insular treasurer or acting insular treasurer when acting as manager of said bank.

Sec. 6. With the approval of the governor-general, the insular treasurer is authorized to constitute provincial and municipal treasurers agents of said bank, and they shall render such services in the operation of said bank as may be required of them by the insular treasurer. When constituted agents of said bank, provincial and municipal treasurers are charged with official responsibility, and their bonds shall be liable for the faithful performance of their duties as such agents and for the safe-keeping and accounting for any money or property of said bank confided to their custody.

The governor-general may, on request of the board of directors of said bank or of the manager thereof, require any officer or employee of the government to perform any service or render any assistance to said bank which he, the said governor-general,

may deem proper.

Subject to the civil-service act and rules and the by-laws of said bank, the manager of the bank is authorized to appoint such other personnel as may be necessarily required for the proper operation of said bank. The personnel so appointed by the manager of said bank shall perform the duties and receive the salaries prescribed in the by-laws.

Sec. 7. The attorney-general shall be the legal adviser of said bank, and shall render such legal services to said bank as may be required of him by the manager of

said bank or by the board of directors thereof. In the performance of his duties, the attorney-general is authorized to require such services from the provincial fiscals as

to him may seem best in the interest of said bank.

Sec. 8. The board of directors is empowered to adopt such by-laws, not in conflict with this act, as may be proper for the prudent and successful operation of said bank, and to amend or repeal the same: Provided, That such by-laws, or any amendment or repeal thereof, shall not take effect until the same shall have received the approval of the governor-general.

Sec. 9. The members of the board of directors, appointed as such by the governorgeneral, shall each receive for each day of meeting of the board actually attended the

Sec. 10. The bank may make loans only for the payment or satisfaction of incumbrances on agricultural lands, for the construction of drainage and irrigation works. and for the purchase of fertilizers, agricultural seeds, machinery, implements, and animals, to be used exclusively by the borrower for agricultural purposes, and no loan shall be made by said bank to any person or corporation not engaged in agricultural pursuits.

Sec. 11. No loan shall be made except upon resolution of the board of directors. No person or corporation shall be permitted to borrow less than fifty pesos nor more than twenty-five thousand pesos: *Provided*, however, That fifty per centum of the capital of said bank shall be set apart for loans of not more than five thousand pesos

to any one person or corporation.

SEC. 12. No loan shall be made except—

(a) Upon the security of a first mortgage on unincumbered improved urban property or upon unincumbered agricultural land, not to exceed forty per centum of the value thereof. No loan shall be made unless the attorney-general shall have certified and the board of directors shall be satisfied that the real estate offered as security for the loan is free from all incumbrances and that the title thereto is in the mortgagor. mortgages shall contain a covenant requiring the mortgagor to insure for the benefit of the mortgagee all buildings of strong materials on the property to the amount of their value as fixed by the board of directors.

(b) Upon the security of a chattel mortgage to the bank on crops already harvested, gathered, and stored: Provided, however, That no loan on the security of such crops so harvested, gathered, and stored as aforesaid shall exceed forty per centum of the market value thereof on the date of the loan. The property mortgaged shall be insured by the mortgagor for the benefit of the mortgagee to the full amount of the

loan

Sec. 13. All mortgages on real property and chattel mortgages on harvested, gathered, and stored crops shall be registered with the register of deeds in the jurisdiction where situate, and it shall be the duty of the register of deeds to indorse on such real or chattel mortgage, and on his record thereof, the date and hour of its reception, and such registration with the register of deeds of such real or chattel mortgage shall be notice to all the world of the lien created by such mortgage and of the terms and conditions thereof. The expenses of registration shall be paid by the borrower.

SEC. 14. The bank shall not exact more than ten per centum per annum on any loan

made by it.

SEC. 15. Loans shall not be made for a period exceeding ten years, and may be made payable in installments as the board of directors may determine in each case.

Sec. 16. No fee or charge of any kind whatsoever by way of commission shall be exacted or paid for granting or obtaining loans, and any official of the bank exacting, demanding, or receiving any fee for service in obtaining a loan or for the use of his influence to obtain a loan shall be punished by imprisonment for not less than one year nor more than five years, in the discretion of the court.

Sec. 17. Within one year after foreclosure sale of property has been accomplished the mortgagor of the property shall have the right to redeem said property from the bank upon payment of the amount found due by the court in the decree of foreclosure, with interest thereon at the rate specified in the mortgage, together with all costs incurred by the bank by reason of the foreclosure and sale and the care of the property.

Sec. 18. The agricultural banking corporation provided for in this act shall have the general powers mentioned in section thirteen of "The Corporation Law," which are not in conflict or inconsistent with the provisions of this act.

SEC. 19. All acts or parts of acts inconsistent with the provisions of this act are

hereby repealed. SEC. 20. This act shall take effect on July first, nineteen hundred and eight.

# POSTAL SAVINGS BANKS IN THE PHILIPPINE ISLANDS.

The general information and statistics herewith submitted are taken from the report of the director of posts of the Philippine Islands for

the fiscal year ended June 30, 1908.

At the close of the year there were in operation 245 banks with deposits of 1,031,994.04 pesos, representing 5,389 accounts, as against 235 banks and deposits of 510,100.64 pesos in 1907. Deposits by the Filipinos represent about 44 per cent of the total, an increase of about 10 per cent from these people as compared with the prior year. About 50 per cent of the deposits belong to Americans and the remainder to Europeans, Asiatics, and local societies.

The resources and liabilities of the postal savings banks on June 30,

1908, were as follows:

### RESOURCES.

Loans on real estate.	<b>P</b> 86, 625, 00
Philippine Railway bonds	249, 515. 55
Philippine Railway bonds. Deposits in banks.	620, 000, 00
Cash deposited in treasury.	39, 000. 00
Cash in hands of postmaster.	47, 458. 39
Accrued interest outstanding.	17, 066. 86
Total	1, 059, 665. 80
LIABILITIES	
Deposits and interest	1, 031, 994. 04
Stamps outstanding.	1, 344, 50

Unapportioned	interest	 	 	. 26, 327. 26
Total				1.059.665.80

Interest at the rate of 10 per cent is charged on real-estate loans. The Philippine Railroad bonds bear interest at the rate of 4 per cent, and the deposits in banks draw interest at the rate of 3\frac{1}{2} per cent. The director recommends that the rate of interest on real-estate loans be reduced to 8 per cent, as the existing rate is so high that the banks have thus far been unable to loan satisfactorily to the full amount on the security of real estate.

# Porto Rico.

Through the courtesy of Hon. Samuel D. Gromer, this office has been placed in possession of a statement showing the condition of the banks in the island of Porto Rico. There are in the island 10 banking institutions, one of which being a national banking association. The aggregate capital stock of these banks is \$2,125,514, which includes \$575,215 due by stockholders of two of the territorial banks. The principal items of resources and liabilities of the nine territorial banks are:

Loans	\$3, 841, 912
Stocks, bonds, and securities.	
Due from banks and bankers	751, 529
Cash in banks	1, 708, 082
Capital stock	2,025,514
Surplus and undivided profits	714, 425
Deposits	5, 940, 587
Bank deposits	237, 482
Aggregate resources	10, 417, 624

The aggregate resources of the reporting banks of the island (including the national bank) have increased over 100 per cent since 1902, when the eight incorporated banks then in operation had capital of \$1,417,725, deposits \$2,489,449, and assets \$5,359,189. The First National Bank of Porto Rico at San Juan was chartered November 10, 1902, with a board of directors who are citizens of the United States and the requisite proportion residents also of the island.

# HAWAII

Unofficial reports have been compiled from seven territorial and private banks in operation in the Territory of Hawaii. The aggregate paid-in capital of these banks as shown by reports at latest dates obtainable is \$3,042,500, individual deposits \$3,620,125, and aggregate resources \$7,274,785. In addition there were in operation on May 14, 1908, four national banking associations, with capital of \$610,000, individual deposits \$980,736, United States deposits \$104,678, and aggregate resources \$2,388,612, the total resources of all reporting banks, private, territorial, and national, being \$9,663,397. Two territorial banks with capital of \$700,000 report dividends paid during the year amounting to \$56,000, or 8 per cent. These two banks report 4,601 depositors, and the average rate of interest paid on deposits, 4.37 per cent. Only two territorial banks in Hawaii responded to the request of this office for reports, and statements relating to the five other banks in Hawaii were taken from a periodical, and are necessarily incomplete as to details

# STATE AND PRIVATE BANK FAILURES.

The Bradstreet Commercial Agency has courteously furnished this office with information relating to the number, assets, and liabilities of the State and private banks which failed in the year ended June 30, 1908. From this statement it appears that there were 132 failures during the year, the assets of the banks being \$177,073,348 and liabilities \$209,835,443. The number of failures reported during the fiscal year exceed those of any previous year since 1893 and the liabilities are greater than in any other year since 1864, when these statistics begin. For the year ended June 30, 1907, there were 34 failures of banks of this character with assets of \$13,037,497 and liabilities of \$22,165,448. Included in the 132 failures in 1908 are 42 State banks, 12 savings banks, 25 trust companies, and 53 private banks. The failures by geographical sections were as follows: Three in the New England States, with liabilities of \$24,550,000; 43 in the Eastern States, with liabilities of \$138,710,900; 29 in the Southern States, with liabilities of \$9,268,369; 7 in the Western States, with liabilities of \$7,660,000; and 21 in the Pacific States, with liabilities of \$22,591,472.

States, with liabilities of \$138,710,900; 29 in the Southern States, with liabilities of \$11,054,702; 29 in the Middle Western States, with liabilities of \$9,268,369; 7 in the Western States, with liabilities of \$7,660,000; and 21 in the Pacific States, with liabilities of \$22,591,472. There were 32 failures in the State of New York among this class of banks, the assets of which aggregated \$114,119,000 and liabilities \$133,400,900. Of the failures in that State 7 were State banks with liabilities of \$33,996,600; 4 trust companies, with liabilities of \$95,290,000; and 21 private banks, with liabilities of \$24,114,300.

Statistics relating to the number of failures of banks other than national for each year from 1864 to 1908 are presented herewith:

Mumber of Failures, Capital, Assets, Liabilities, and Dividends Paid by State and Private Banks that Failed in each Year from 1864 to 1908.

Year.	Number of failures.	Capital.	Nominal assets.	Liabilities.	Dividends. paid.
864	2				
865	5	\$125,000.00	\$245, 401. 97	\$225,662.14	\$145, 592. 23

It will be noted from the foregoing that from 1864 to 1896, in addition to the nominal assets and liabilities, the amount of dividends paid is stated as well as total capital of banks failing during each year; but information in respect to capital and dividends paid since 1896 is not shown, there being no statistics at command, official or otherwise, relative to the progress toward final result of liquidation of insolvent state and private banks.

In 1896 the then Comptroller secured a list of banks which failed in each State from 1864 to June 30, 1896. A copy of this list was furnished to each national-bank examiner with directions to communicate in person or otherwise with officers, receivers, and assignees with a view to ascertaining the result of final liquidations. As a result of this investigation reports more or less complete were obtained relative to the liquidation of 1,234 banks and bankers failing during the period covered by the inquiry. The capital involved aggregated \$53,632,259, nominal assets \$214,312,190, and liabilities \$220,629,988. On claims proved dividends were paid to the amount of \$100,088,726, or 45.4 per cent of the aggregate liabilities. It will be noted that since 1896 banks other than national to the number of 720 have failed, with nominal assets of \$281,722,265 and liabilities \$361,949,861.

Receivers of insolvent State or private banks generally are appointed by and report to the courts, and there is no official publication of the result of these receiverships on the lines followed by this bureau in

reference to insolvent national banks.

Two banks operating under state charters and doing business in the District of Columbia failed since June 25, 1906, the date of the act placing institutions of that character in the District of Columbia under the supervision of the Comptroller of the Currency. The Washington branch of the Ætna Banking and Trust Company failed on October 19, 1906, when a receiver was appointed by this office. On the following day the main office of the Ætna Banking and Trust Company, at Butte, Mont., was also placed in charge of the receiver. The total assets taken charge of amounted to \$574,569 (nominal value), of which only \$24,568 were estimated as good, \$200,067 being estimated as doubtful, and \$349,934 as worthless. After the failure additional assets came into the hands of the receiver, amounting to \$123,318, \$100,000 of which was contributed in cash by one who had formerly been an officer in the company, the total assets, therefore, amounted to \$697,887. The collections from all sources aggregated \$149,606. Offsets amounting to \$18,749 were allowed and losses incurred in compounding claims under order of court aggregated \$33,640, leaving in the hands of the receiver on October 31, 1908, assets of the nominal value of \$495,892. All these remaining assets are practically worthless. Dividends aggregating 28 per cent and amounting to \$107,204, on claims proved totaling \$382,870, have been paid. remains in the hands of the Comptroller and the receiver cash amounting to \$24,310, distribution of which has been deferred pending determination of litigation, which may possibly result in the collection of an additional sum sufficient to make the final dividend a substantial one. The Peoples Savings Bank was taken charge of by a receiver on October 26, 1906. Later in the year creditors of the bank were paid in full and the affairs of the bank turned over to an agent of the shareholders.

# GROWTH OF BANKING IN THE UNITED STATES.

Statistics bearing upon the subject of banking in the earliest days of the country are meager, but some statistical information has been gathered and published for a series of years in the annual reports of the operations of the currency bureau. Table XXIII in the appendix to the report of the Comptroller of the Currency gives the number of colonial and state banks, together with the principal items of resources and liabilities in the years indicated from 1784 to 1833. In 1784 the three banks from which reports have been compiled had a capital of \$2,100,000, circulation \$2,000,000, and specie \$10,000,000. In 1800 reports from 28 banks show capital \$21,300,000,

circulation \$10,500,000, and specie \$17,500,000. In 1820 there were 307 banks, with capital of \$102,000,000, circulation \$40,600,000, deposits \$31,200,000, specie \$16,700,000. In 1830, 329 banks had \$110,100,000 capital, \$48,400,000 circulation, \$39,500,000 in deposits,

\$14,500,000 in specie, and \$159,800,000 in loans.

The resources and liabilities of the banks of the country in detail from 1834 to 1863 will be found in Table XXIV of the appendix to the report of the Comptroller of the Currency. In the compilation of this table, figures for the years 1834 to 1840 were taken from Executive Document No. 111, Twenty-sixth Congress, second Those for 1841 to 1850 are from Executive Document session. Those for 1841 to 1850 are from Executive Document No. 68, Thirty-first Congress, first session. Figures for the years 1851 to 1863, with the exception of the year 1853, are taken from the report on the condition of the banks for 1863, those for 1853 being from Executive Document 66, Thirty-second Congress, second ses-

sion, and are incomplete.

It appears from the table in question that in 1834 there were 506 state banks in the country with capital stock of more than \$200,000,000, circulation of \$94,000,000, and deposits of \$75,000,000. In 1840 the number of banks had increased to 901, with capital of \$358,000,000, circulation \$106,000,000, and deposits of \$75,000,000. In 1850 reports show only 824 banks, with a capital of \$217,000,000, circulation \$131,000,000, and deposits \$109,000,000. In 1862, the year prior to the inauguration of the national banking system, there appears to have been 1,492 state banks in operation. The capital of these banks was \$405,000,000, circulation \$238,000,000, and deposits \$393,000,000; the loans aggregated \$646,000,000, investments in stocks \$99,000,000, specie on hand \$101,000,000, and notes of other banks held \$25,000,000.

The following condensed statement gives the principal items of resources and liabilities of state, savings, private banks, loan and trust companies, and national banks from 1864 to 1908, and reflects the growth of banking in the country for the past forty-five years:

# Principal Items of Resources and Liabilities of State, Savings, and Private (Compiled from Reports to the

Number of national banks only; number of state and savings banks not reported.
 Specie in national banks; incomplete for state banks.
 Includes coin certificates from 1889; specie for 1902 partially estimated.

The "First Bank of the United States" was incorporated by Congress in 1791 for a period of twenty years. A statement of the resources and liabilities of this bank for January, 1809, and for same date in 1811, will be found in Table XXI of the appendix. The first report shows capital \$10,000,000, individual deposits \$8,500,000, circulation \$4,500,000, loans and discounts \$15,000,000, specie \$5,000,000, and aggregate resources \$23,500,000. The "Second Bank of the United States" was chartered by Congress in 1816 for twenty years, at the expiration of which a renewal of the charter was denied. A reorganization of the bank was effected, however, under authority from the legislature of the State of Pennsylvania; the bank assigned in 1841, and after fifteen years the affairs were finally liquidated in 1856, resulting in the payment in full of interest and principal of all liabilities to depositors and note holders. shareholders, it appears, received nothing on their investment in stock of the bank. From the statement published in 1817, which appears in Table XXII of the appendix to the report of the Comptroller of the Currency, the capital stock of the bank was \$35,000,000, deposits \$11,200,000, loans and discounts \$32,200,000, and aggregate resources \$48,100,000. From the annual reports of its operations it appears that in 1833 the business of the bank reached the highest point in its history, the aggregate resources being \$82,900,000, deposits \$20,300,000, loans and discounts \$61,700,000, specie \$9,000,000, and notes of state banks \$2,300,000. In 1840 the report shows that the aggregate resources had declined to \$65,300,000, deposits to \$3,300,000, circulation \$6,700,000, loans to \$36,800,000, and specie to \$1,500,000

#### GROWTH OF BANKING IN RECENT YEARS,

Coincident with the general improvement in business conditions following 1896 there was a notable increase in the banking power of the country, evidenced by the number of banks organized as well as by the increase in the aggregate capital and deposits of all classes of banks. Since 1900 the growth of national banks has been accelerated in a marked degree by the act of March 14 of that year, permitting banks with a minimum capital of \$25,000 to be organized under the national system, but during the same period statistics show that prosperous conditions have also favored banks outside of the national system.

The following table shows the growth of banking in the United States, including island possessions, as indicated by the number of banks, capital stock, and individual deposits, from 1900 to 1908, inclusive, the number of nonreporting banks, their capital, and deposits being estimated from data obtained from reliable sources:

The state	NT	Capita	1.	Individual deposits.		
Bank.	Number.	Amount.	Per cent.	Amount.	Per cent	
1900. National	3,732 6,650 3,595	\$621,536,461 403,192,214 126,000,000	54.00 } 46.00	\$2,458,092,758 { 4,780,893,692 450,000,000	31.9

Total	23,937	1,783,226,179	100.00	13, 654, 535, 348	100.0	
National. 1908. State, etc Nonreporting	6,824 14,522 3,654	919, 100, 850 838, 058, 353 76, 646, 000	50.14	4,374,551,208 { 8,409,959,961 485,988,831	32.9 } 67.0	
Total	25,000	1,833,805,203	100.00	13,270,500,000	100.0	

It is shown from the foregoing table that there were in operation on July 15, 1908, 6,824 national banking associations with capital of \$919,100,850 and individual deposits of \$4,374,551,208. On or about June 30, 1908, there were in operation 14,522 state, savings, and private banks and loan and trust companies, reporting aggregate capital and deposits of \$838,058,353 and \$8,409,959,961, respectively, and nonreporting banks to the number of 3,654, with capital and deposits estimated at \$76,646,000 and \$485,988,831, respectively; or a total of 25,000 banks and banking institutions with capital of \$1,833,805,203 and deposits of \$13,270,500,000.

Since 1900 the increase in the number of banks has been 11,023; capital stock has increased in the sum of \$683,076,528 and individual deposits \$5,581,513,550. In 1900 national banking capital represented 54 per cent and deposits 31.97 per cent of the aggregate

capital and deposits, respectively, of all reporting banking institutions. The percentage of capital of national banks to capital of all banks in 1907 was 49.56 and of deposits to all deposits 31.66; for the present year the percentage of capital is 50.14 and of deposits 32.97. During the period from 1900 to 1908 the percentage of capital of banks other than national to the capital of all banks has increased from 46 to 49.86, and the percentage of individual deposits in such banks has fallen from 68.03 to 67.03. In 1904 there was in operation in the United States one bank for every 4,897 inhabitants; in 1905 one for every 4,182, in 1906 one for every 3,956, in 1907 one for every 3,595, and for the present year one for every 3,500 inhabitants.

# BANKING POWER OF THE UNITED STATES.

The banking power of the United States in 1908 as represented by capital, surplus and other profits, deposits, and circulation, of national and other reporting banks, together with the estimated amount of funds of this character in the nonreporting banks, is shown to be \$17,642,705,274. The items composing this sum are set forth in the following table:

# BANKING POWER OF THE UNITED STATES.

·	Number.	Capital.	Surplus, etc.	Deposits.	Circulation.	Total.
National banks State, etc., banks Nonreporting banks		\$919,100,850 838,058,353 76,646,000	\$748,701,600 1,012,811,484 32,957,000		\$613,663,963	10,260,829,798

a Includes government deposits.
 b Estimated capital, etc., based on reports received from private banks.

# Prof. J. H. Thiry, of Long Island City, N. J., who introduced the system of school savings banks, has furnished this office with statistics relating to the operation of school savings banks in existence on January 1, 1908, in the United States and Canada. From the report submitted it appears that the school savings-bank system is now in operation in 1,102 schools of 101 cities of the United States and Canada. The pupils of these schools have deposited since the introduction of the system \$4,419,453.86, of which \$3,659,807.77 has been

SCHOOL SAVINGS BANKS.

# withdrawn, leaving a balance of \$759,646.09 due 178,817 depositors.

# BUILDING AND LOAN ASSOCIATIONS.

"The building and loan association is a popular American institution," declares Mr. H. F. Cellarius, secretary of the United States League of Local Building and Loan Associations, in his current annual report. He shows by statistics that the local building and loan associations of the United States are in excellent condition, and are enjoying a full measure of public confidence as a means of caring for small savings of the people. It appears that during the year ended December 31, 1907, the local building and loan associations of the United States gained \$56,513,400 in assets, the total assets being \$745,993,398. The gain in membership for the year was 132,979. It is stated that

there are now in the United States 5,459 such associations having a membership of 1,876,967 and assets amounting to \$745,993,398. The following table shows the number of associations, total membership, and total assets, 1907–1908, for such States as have building and loan departments which compile statistics, the data for all other States being shown as "Other States:"

States.	Number of asso- ciations.	Total member- ship.	Total assets.	Increase in assets.	Increase in mem- bership.

### CLEARING-HOUSE TRANSACTIONS.

Mr. William Sherer, manager of the New York Clearing House, has courteously furnished this office with comparative statements of transactions of the New York Clearing House for the past fifty-five years, and also a report of the transactions of clearing houses in the United States for the year ended September 30, 1908. The membership of the New York Clearing House for the year ended September 30, 1908, was 50; capital represented, \$126,350,000; clearings for the year, \$73,630,971,913; average daily clearings, \$241,413,023; aggregate balances paid in money, \$3,409,632,271; the proportion of balances to clearings being 4.63 per cent. The aggregate clearings of the association for the fifty-five years ended September 30, 1908, are shown to have been \$1,930,248,133,348. The average daily clearings were \$114,765,927, and the average ratio of balances to clearings 4.64 per cent. The transactions of the association for the current year were less by \$21,684,449,325 than during the year ended September 30, 1907.

The report of the transactions of 114 clearing houses in the United States for the year ended September 30 last shows total clearings of \$126,238,694,398, as against \$154,476,830,537 for the previous year,

a net decrease of \$28,238,136,139.

# CLEARING-HOUSE CERTIFICATES ISSUED DURING THE PANIC OF 1907.

The manager of the New York Clearing House has kindly furnished this office with statistics and general information in relation to the use of clearing-house certificates during the recent panic. It appears that inquiries were addressed to 106 clearing houses in the United States asking for information relative to the extent of the use of loan certificates, etc., during the panic. The replies indicated that clearing houses in 50 cities issued certificates, and possibly a few others from which replies were not received. The first issues were made during the last week in October, and the New York Clearing House was the first to take this action. With three exceptions there were no issues of certificates later than December 31. In a summary of the returns relating to the issue of these certificates it is stated, in part—

In the larger clearing houses the certificates were issued, with but few exceptions, for the sole purpose of settling balances between the banks and the clearing houses. In other places the certificates were in a number of cases pledged for checks or notes of small denominations meant to serve as currency for general circulation. In still other localities no certificates were issued at all, but cashiers' checks for small, uniform amounts, or checks authorized by the clearing house, or banks associated, were issued to provide funds for pay rolls, etc. \* \* \* \* Clearing-house certificates and checks were not the only form of currency issues, as some of the railroads and industrial corporations issued checks of larger or smaller denominations in making payments to their employees during the period of extreme stringency and while hoarding was still being practiced, and some of these checks passed current and acted as substitutes for currency for the time being.

From the accompanying table it will be noted that the total amount of clearing-house certificates issued was \$248,279,700, New York leading with \$101,060,000, followed by the following cities in the order of greatest issue: Chicago, \$39,240,000; St. Louis, \$15,965,000; Philadelphia, \$13,695,000; Boston, \$12,595,000; San Francisco, \$12,339,000; Pittsburg, \$7,445,000; New Orleans,

\$5,266,000. In other words, \$207,605,000 of certificates out of a total of \$248,279,700 were issued by clearing houses in eight cities. It is further shown that the maximum outstanding at one time was \$219,857,500, and the maximum outstanding issued by the New York associations was \$88,420,000. Of this amount, however, it is estimated that not in excess of \$74,000,000 was in actual use.

From the report of the committee of the New York clearing houses it is shown that during the period the certificates remained outstanding there passed through the committee collateral aggregating \$453,000,000, of which \$330,000,000 consisted of commercial paper and \$123,000,000 of stocks, bonds, and short-time railroad and other similar notes. The total amount of interest paid on the certificates at the rate of 6 per cent was \$1,116,246. Of the 52 banks in the New York Clearing House, 20 did not resort to the use of certificates.

The following comparative statement from the committee's report

for the years 1907 and 1893 is of interest:

	1907.	1893.
Aggregate certificates anthorized	\$101,060,000	\$41,490,000
Maximum amount outstanding at any one time	\$88, 420, 000	\$38, 280, 000
Highest aggregate amount issued to any one bank	\$17,000,000	\$4,000,000
Lowest amount issued to any one bank.  Average amount issued per bank proportioned to entire membership of	\$250,000	\$100,000
association (52 banks in 1907; 65 in 1893).  Average amount issued per bank proportioned to those institutions that	\$1,943,461	\$638, 307
took out certificates (32 banks in 1907; 38 in 1893)	\$3, 158, 125	\$1,091,842
Number of banks taking out certificates	32	38
Number taking none	20	38 27

Certificates first issued, October 26, 1907, and June 1, 1893; last issue of certificates, January 30, 1908, and September 6, 1893; final cancellation, March 28, 1908, and November 1, 1893.
Only one small issue of certificates was made after January 7, 1908, as noted above.

The following statement relating to the issue and cancellation of clearing-house certificates during the recent panic was compiled by Mr. William J. Gilpin, assistant manager of the New York Clearing House:

CLEARING-HOUSE CERTIFICATES ISSUED DURING FINANCIAL CRISIS OF OCTOBER, 1907, TO JANUARY, 1908.

Clearing houses.	First issue.	Last issue.	First cancel- lation.	Final cancel- lation.	Aggregate issue.	Maximum amount outstanding.

a In these places the certificates, in some cases, besides being used for settling balances between bank at the clearing house, were also used as the basis for the issue of subsidary certificates meant for circulation. In other cases the certificates themselves were for small denominations and served the purpose of currency.

currency.  $^{b}$  May 1, 1908, small amount still outstanding, and it is probable that the amounts still outstanding on that date were mainly notes of small denominations which in many cases were lost or destroyed and may never come in.

c Maximum not reported; therefore taken same as aggregate issue.

# FOREIGN BANKS OF ISSUE.

In the appendix to the report of the Comptroller of the Currency will be found statements of the condition of the principal foreign banks of issue, among them a consolidated statement of the resources and liabilities on June 30, 1908, of the banks of the United Kingdom, including colonial and foreign banks with London offices. By comparing the returns of the United Kingdom with those on June 30, 1907, it is observed that there has been a reduction of three in number of banks and \$61,197,385 in aggregate resources, although the capital has increased in the sum of \$26,569,080. It is also noted that there has been an increase in number of branch offices of 266, or from 10,429 to 10,695.

A statement of the resources and liabilities of 26 Swiss banks and their branches, as shown by reports dated March 31, 1908, gives aggregate resources of \$386,411,187 and capital stock \$39,958,500.

In the Republic of Chile, on December 31, 1907, there were in operation 24 banks with paid-up capital of 124,040,525.63 pesos

(a peso equals  $36\frac{1}{2}$  cents) and aggregate resources of 811,363,263.17, as shown by the balance sheet of the banks. The most important of the banks is the Bank of Chile, the subscribed capital of which is

30,000,000 pesos.

Statements of the condition of the Bank of Japan and other banking institutions in operation in the Empire of Japan on June 30, 1907, are presented in the appendix to the report of the Comptroller of the Currency. The outstanding circulation of the Bank of Japan is stated at 332,855,906 yen (a yen equals 49.8 cents) and the aggregate resources are shown to be 868,067,285. Circulating notes are also issued by the Yokohama Specie Bank to the amount of 14,517,391, and the Bank of Taiwan to the amount of 9,989,390. Consolidating returns from the banks of issue with other classes of banks in the Empire, it is observed that the aggregate capital employed is approximately 434,000,000 yen, deposits including accounts current 1,876,000,000, circulating notes 357,000,000, cash in bank 294,000,000, and aggregate resources 3,151,000,000. Institutions classed as "ordinary" banks represent over one-half of the capital and deposits of all banks in the Empire.

From a recent bulletin published by the International Bureau of American Republics a statement in relation to the condition of the banks in the Argentine Republic is taken, which shows that there were 17 banks in Argentina on December 31, 1907, with deposits aggregating \$29,086,145 in gold and \$717,169,629 in paper currency. The discounts and loans amounted to \$37,279,547 gold and \$679,-357,449 paper. The cash on hand consisted of \$40,026,916 gold

and \$220,770,433 in paper.

A summary of reports of condition of the banks of Mexico as of June 30, 1908, will be found in the appendix to the report of the Comptroller of the Currency. Of the 34 legally chartered banks of the Republic of Mexico the most important one is the National Bank of Mexico, which, out of a total of 829,120,473 pesos made up from the balances of said institutions, is credited with 289,763,746

pesos.

Through the courtesy of Mr. Edward D. Adams, of New York, this office is enabled to submit a comparative statement of the principal items of resources and liabilities of 46 leading banks in Germany, as shown by reports of condition at the close of 1907 and 1906. The capital stock of the banks at the close of 1907 was \$540,000,000; gross profits, \$84,170,000; net profits, \$54,280,000; and dividends paid, \$41,020,000, or 7.73 per cent. The statement referred to will be found in the appendix to the report of the Comptroller of the Currencyt, ogether with a consolidated statement of the principal items of resources and liabilities of the leading foreign banks of issue.

## FOREIGN SAVINGS BANKS.

The following tables, prepared by Mr. Morris Jacobson, of the Bureau of Statistics, Department of Commerce and Labor, show the principal statistical data for the savings banks in the more important countries of the world. Data of the first table relate to all savings banks—private, municipal, and government, including postal savings banks. The figures in the second table relate to postal savings banks only.

# NUMBER OF DEPOSITORS AND AMOUNT OF DEPOSITS IN SAVINGS BANKS (INCLUDING POSTAL SAVINGS BANKS) OF PRINCIPAL COUNTRIES.

# BANKING POWER OF THE WORLD.

The banking power of the United States in 1908, as represented by capital, surplus and other profits, deposits, and circulation, of national and other reporting banks, together with estimated amount of funds of this character in the nonreporting banks, has been shown to be \$17,642,705,274. From the latest and most reliable data obtainable the banking power of foreign countries is estimated at \$28,107,600,000, as follows:

British Empire	\$11, 157, 000, 000
Continental Europe	
Central and South America.	851, 700, 000
Other foreign banks	1, 328, 600, 000
Foreign savings banks	9, 297, 700, 000
(Potal	29 107 600 000

The world's banking power in 1890, according to Mulhall, was \$15,985,000,000, the United States being credited with \$5,150,000,000 of this amount. Since that year the banking power of the United States has increased to the extent of \$12,492,700,000, or over 242 per cent; that of foreign countries \$17,272,600,000, or 159 per cent;

Note.—Postal savings bank system was established in the Philippines in 1907.

and the combined banking power \$29,765,300,000, or 186 per cent. The following statement relating to the banking power of the world in 1890 and 1908 shows also the amounts and percentages of increase:

# BANKING POWER OF THE WORLD.

# THE OKLAHOMA DEPOSIT GUARANTY LAW.

The banking law of the State of Oklahoma, which includes the "deposit guaranty" feature, was approved by the governor on December 17, 1907, and became operative February 17, 1908. The law provides that within sixty days after its passage and approval the state banking board shall levy against the capital stock an assessment of 1 per cent of the bank's daily average deposits, exclusive of the deposits of state and United States funds properly secured. Provision is also made for additional assessments if the guaranty fund is depleted, in order to keep the fund equal to 1 per cent of the deposits as provided by the act. Section 4 permits national banks in the State to voluntarily avail their depositors of the guaranty feature.

Under the first assessment by the state banking board \$150,000 was collected, of which \$111,000 was invested in state warrants drawing 6 per cent interest, this investment being made by reason of the fact that the warrants can be deposited and the actual cash received therefor on demand. The remainder of the fund was deposited in banks with interest at the rate of 3 per cent, under the same regulations which govern the state treasurer in depositing state funds.

The number of banks in the State of Oklahoma is claimed to be approximately 800, of which on the date the act in question became effective 312 were national. The records show that 57 national banks availed themselves of the privileges of the state law, but upon being advised that in the opinion of the Attorney-General of the United States their action was ultra vires, a large portion of the banks withdrew, and 22 with aggregate capital of \$850,000 were placed in voluntary liquidation, of which 17 with capital of \$650,000 were succeeded by or reorganized as state banks, and 5 with aggregate capital of \$200,000 were consolidated with other national banks. It should be stated, however, that the period covered by these liquidations was the year ended October 31, 1908. Extracts from the opinion of the Attorney-General appeared in the press, but the text in full is submitted herewith

> DEPARTMENT OF JUSTICE, Washington, July 28, 1908.

The Secretary of the Treasury.

Sir: I received from you on March 4, 1908, a letter in which, at the instance of the Comptroller of the Currency, you requested my opinion "as to the legal right of national banks in the State of Oklahoma to contribute toward the guaranty fund or to avail themselves of the other privileges of the state banking act" in that State. On March 9 I called your attention to the fact that this question did not appear to me, as then advised, one arising in connection with a matter requiring action on your part, and therefore would not be one as to which the Attorney-General was required by law or permitted by established practice to give an opinion. On May 14 following you informed me that the matter was one which, in your judgment, would require action by the Comptroller of the Currency, who could perform such duty only under the general direction of the Secretary of the Treasury, in accordance with United States Revised Statutes, section 324. You further informed me that if in my opinion the acceptance of the provisions of the Oklahoma statute was not within the powers of a national bank, you proposed to direct the Comptroller to bring suit to forfeit the charter of a certain national bank in Oklahoma, in case it should persist in accepting the provisions of the statute in question after being notified not to do so by the Comptroller, and that the immediate official action contemplated by your inquiry was a notification by the Comptroller to the said bank to the effect that its action would or would not be regarded as appropriate ground for such proceeding. I have explained these circumstances, because I feel bound, as a matter of precedent, to say that I still entertain some doubt as to whether the case above stated constitutes one of a character prescribed by the statute as justifying and requiring the expression of an opinion by the Attorney-General; but holding that, as a matter of public policy as well as of courtesy, any doubt on a question of this nature should be determined in favor of the propriety of such advice, I proceed to answer the question above set forth.

National banks are instruments of the Government of the United States. The Congress creates them by virtue of its general powers to provide for such instruments, and no State can, by any law, interfere with their management or operation, in so far as these are determined expressly or by reasonable implication in the laws of the United States. Easton v. Iowa (188 U. S., 229); Davis v. Elmira Savings Bank (161 U. S., 275, p. 283). It seems to me quite immaterial whether the officers or stockholders of the bank are, or are not, voluntary parties to the state action thus affecting its operations. The legality of such state action whether it takes the form of a law to be enforced in invitum against the bank, or of a contract to be entered into by the bank with state officers authorized by law to make such contract, must depend upon whether it is in accordance with the federal statutes regulating the organization, government, and operation of the banks, or with the policies embodied and the public purposes sought to be attained by such laws. The statute of Oklahoma to which you call my attention creates a state banking board, composed of certain designated state officers, and requires the said board to "levy against the capital stock an assessment of 1 per cent of the bank's daily average deposits," with certain deductions, "upon each and every bank organized and existing under the laws of this State." This assessment is to constitute what is designated as a "depositor's guaranty fund," and additional assessments are to be levied against the capital stock of the banks, proportionately to the amount of their deposits, so as to always maintain the fund at the designated amount. This fund is to be used in paying the depositors of any bank included within the terms of the statute any deficiency there may be in the amount to be received by them from the assets of such bank in the event of its failure. By section 4 it is provided that any national bank in the said State, with the approval of the dapositor's guaranty fund,

While the language of the last-mentioned section is peculiar and somewhat involved, its meaning seems to be sufficiently clear, namely, that if a national bank in Oklahoma sees fit to submit itself voluntarily to the terms of the state banking law, in so far as the same may be deemed necessary in its case to secure harmony with the purposes of the said act by the board and commissioner, its deposits will be guaranteed by the board out of the fund provided by assessment as above explained, it being, of course, indispensable, for the purpose indicated, that such bank should contribute its quota toward the maintenance of the fund and, for this purpose, should submit itself to assessments to be levied against its capital by the commissioner for the purpose of meeting claims of depositors in state banks against those institutions and of depositors in other national banks which may likewise accept the terms of the act organizing them. In the papers transmitted to me in connection with your question, and in the memoranda which I have caused to be prepared for assistance in passing upon the questions involved, there is some discussion as to whether this can be considered an insurance of the bank's deposits and, as such, a legitimate if somewhat

novel feature in the conduct of its business. So far as I am aware there is no provision of law or rule of public policy forbidding a depositor in a national bank from obtaining insurance on the solvency of the bank and the consequent payment of his debt in accordance with its legal import; but the business of insuring deposits is a wholly separate business from that of banking, and a corporation organized for the latter business would have no greater right to embarrass its funds and risk its credit in the former than it would have to engage in life insurance or fire insurance, or casualty or marine insurance. Moreover, it is to be observed that the bank, and not the depositor, pays the premium or the equivalent of a premium, if the system of guaranty established by the Oklahoma law is to be regarded in the light of an insurance, and upon this assumption, therefore, the question would be whether the stockholders of a national bank, constituting, as they do, the corporation, are authorized to embark in the business of insuring their depositors against loss through the methods set forth in this state statute, in consideration, presumably, of the increased amount of deposits which they would thus obtain. I find no provision of the national banking law authorizing any such action on their part, and, in my opinion, a business of this nature would be essentially foreign to the legitimate functions of a national bank as

an instrument of government.

I do not, however, consider an application under this law by a national bank as, in any proper sense, an insurance of its deposits. This may be an incidental consequence of such action, but the action involves essentially a guaranty to the depositors of all state banks in Oklahoma and other national banks in that State which may accept the terms of the law that their respective deposits shall be paid in full. The satisfaction of this guaranty may, at least in theory, involve the complete exhaustion of the assets of the bank entering into it, for, although in the first instance, the assessment is to amount to only 1 per cent of the average deposits during the preceding year, yet a special assessment may be, and must be, made by the board in case there is any deficiency in the sum provided. These assessments might conceivably absorb the entire sum of the aggregate assets out of which they must be paid. It is generally recognized that a national bank has no power to guarantee the obligations of a third party unless in connection with a sale or transfer of its own property, and as an incident to the banking business. If it be the owner of a promissory note, or other negotiable obligation, it may sell such instrument and indorse it as a part of the transaction of sale, but a contract guaranteeing the payment by another corporation or an individual of obligations in nowise connected with the business of the bank is clearly ultra vires. (Bowen v. Needles National Bank, 94 Fed. Rep., 925; Flanagan v. California National Bank, 66 Fed. Rep., 959; Commercial National Bank et al. v. Pirie et al., 82 Fed-Rep., 799.) It has been argued that the bank in this case would not guarantee the obligations of other banks, but would only agree to put the State of Oklahoma, through its banking board, in funds to make effectual such a guaranty on its part. I think this is a distinction without a difference. If two banks were to mutually agree each to guarantee the obligations of the other it would surely make no difference in the import of such an agreement that the money necessary to give effect to the agreement should be paid to and disbursed by a third party. The result is that the property of each corporation becomes responsible for the debts of the other. In this instance the State of Oklahoma does not propose to raise any money by general taxation to meet the claims of these favored private creditors. The resources for their payment are to be derived entirely from the voluntary or compulsory contributions of the banks assessed, and the banking board constitutes a mere assessing, rebating, and distributing agency, whose existence can not in anywise affect the substantial incidents of the system thus established.

I have not overlooked the fact that, by the terms of the proposed contract between the bank in question and the State or its banking board, the said bank agrees to do nothing which shall be in conflict with the federal law; but this provision is not relevant, for the entire contract is ultra vires for a national bank, and prohibited by the necessary intendment of the statute. I hold that such is the fact with respect to the contract proposed in this case; that it is illegal for the officers of any national bank to enter into such an agreement as is contemplated by section 4 of the Oklahoma statute, and that persistent and willful action to this effect on the part of any such

bank would be just cause for the forfeiture of its charter.

I remain, sir, yours, very respectfully,

CHARLES J. BONAPARTE, Attorney-General.

# NATIONAL BANK LEGISLATION OF 1908.

On May 30, 1908, the act was approved providing for the formation of national currency associations, the issue of additional national bank currency, and the creation of a "National Monetary Commission." The salient provisions of the act are as follows:

Sec. 1. National banking associations each having unimpaired capital and a surplus of not less than 20 per cent, not less than ten in number, having an aggregate capital and surplus of at least five millions of dollars, may form voluntary associations to be designated as "national currency associations."

National currency associations shall have and exercise any and all powers necessary to carry out the purposes of this section, namely, to render available, under the direction and control of the Secretary of the Treasury, as a basis for additional circulation any securities, including commercial paper, held by a national banking association. For the purpose of obtaining such additional circulation, any bank belonging to any rot the purpose of obtaining such additional circulation, any bank belonging to any national currency association, having circulating notes outstanding secured by the deposit of bonds of the United States to an amount not less than forty per centum of its capital stock, and which has its capital unimpaired and a surplus of not less than twenty per centum, may deposit with and transfer to the association, in trust for the United States, for the purpose hereinafter provided, such of the securities above mentioned as may be satisfactory to the board of the association. The officers of the association when the computation to the Computa tion may thereupon, in behalf of such bank, make application to the Comptroller of the Currency for an issue of additional circulating notes to an amount not exceeding seventy-five per centum of the cash value of the securities or commercial paper so deposited. The Comptroller of the Currency shall immediately transmit such application to the Secretary of the Treasury with such recommendation as he thinks proper, and if, in the judgment of the Secretary of the Treasury, business conditions in the locality demand additional circulation, and if he be satisfied with the character and value of the securities proposed and that a lien in favor of the United States on the securities so deposited and on the assets of the banks composing the association will be amply sufficient for the protection of the United States, he may direct an issue of additional circulating notes to the association, on behalf of such bank, to an amount in his discretion, not, however, exceeding seventy-five per centum of the cash value of the securities so deposited: Provided, That upon the deposit of any of the state, city, town, county, or other municipal bonds, of a character described in section three of this act, circulating notes may be issued to the extent of not exceeding ninety per centum of the market value of such bonds so deposited: And provided further, That no national banking association shall be authorized in any event to issue circulating notes based on commercial paper in excess of thirty per centum of its unimpaired capital and surplus. The term "commercial paper" shall be held to include only notes representing actual commercial transactions, which when accepted by the association shall bear the names of at least two responsible parties and have not exceeding four months to run.

Sec. 2. That whenever any bank belonging to a national currency association shall fail to preserve or make good its redemption fund in the Treasury of the United States, required by section three of the act of June twentieth, eighteen hundred and seventyfour, chapter three hundred and forty-three, and the provisions of this act, the Treasurer of the United States shall notify such national currency association to make good such redemption fund, and upon the failure of such national currency association to make good such fund, the Treasurer of the United States may, in his discretion, apply so much of the redemption fund belonging to the other banks composing such national currency association as may be necessary for that purpose; and such national currency association may, after five days' notice to such bank, proceed to sell at public sale the securities deposited by such bank with the association pursuant to the provisions of section one of this act, and deposit the proceeds with the Treasurer of the United States as a fund for the redemption of the additional circulation taken out by such

bank under this act.

Sec. 3. That any national banking association which has circulating notes outstanding secured by the deposit of United States bonds to an amount of not less than forty per centum of its capital stock, and which has a surplus of not less than twenty per centum, may make application to the Comptroller of the Currency for authority to issue additional circulating notes to be secured by the deposit of bonds other than bonds of the United States. The Comptroller of the Currency shall transmit immediately the application, with his recommendation, to the Secretary of the Treasury,

who shall, if in his judgment business conditions in the locality demand additional circulation, approve the same, and shall determine the time of issue and fix the amount, within the limitations herein imposed, of the additional circulating notes to be issued. Whenever after receiving notice of such approval any such association shall deposit with the Treasurer or any assistant treasurer of the United States such of the bonds described in this section as shall be approved in character and amount by the Treasurer of the United States and the Secretary of the Treasury, it shall be entitled to receive, upon the order of the Comptroller of the Currency, circulating notes in blauk, registered and countersigned as provided by law, not exceeding in amount ninety per centum of the market value, but not in excess of the par value of any bonds so deposited, such market value to be ascertained and determined under

the direction of the Secretary of the Treasury.

The Treasurer of the United States, with the approval of the Secretary of the Treasury, shall accept as security for the additional circulating notes provided for in this section, bonds or other interest-bearing obligations of any State of the United States, or any legally authorized bonds issued by any city, town, county, or other legally constituted municipality or district in the United States which has been in existence for a period of ten years, and which for a period of ten years previous to such deposit has not defaulted in the payment of any part of either principal or interest of any funded debt authorized to be contracted by it, and whose net funded indebtedness does not exceed ten per centum of the valuation of its taxable property, to be ascertained by the last preceding valuation of property for the assessment of taxes. The Treasurer of the United States, with the approval of the Secretary of the Treasury, shall accept, for the purposes of this section, securities herein enumerated in such proportions as he may from time to time determine, and he may with such approval at any time require the deposit of additional securities, or require any association to change the character of the securities already on deposit.

Section 4 relates to the assignment and transfer of bonds to the Treasurer as security for circulation.

Sec. 5. That the additional circulating notes issued under this act shall be used, held, and treated in the same way as circulating notes of national banking associations heretofore issued and secured by a deposit of United States bonds, and shall be subject to all the provisions of law affecting such notes except as herein expressly modified: Provided, That the total amount of circulating notes outstanding of any national banking association, including notes secured by United States bonds as now provided by law, and notes secured otherwise than by deposit of such bends, shall not at any time exceed the amount of its unimpaired capital and surplus: And provided further, That there shall not be outstanding at any time circulating notes issued under the provisions of this act to an amount of more than five hundred millions of dollars.

Sec. 6. That whenever and so long as any national banking association has outstanding any of the additional circulating notes authorized to be issued by the provisions of this act it shall keep on deposit in the Treasury of the United States, in addition to the redemption fund required by section three of the act of June twentieth, eighteen hundred and seventy-four, an additional sum equal to five per centum of such additional circulation at any time outstanding, such additional five per centum to be treated, held, and used in all respects in the same manner as the original redemption fund provided for by said section three of the act of June twentieth, eighteen hundred and seventy-four.

Section 7 confers authority upon the Secretary of the Treasury to determine the method of distribution of circulating notes to be issued under authority of this act; and section 8 makes it the duty of the Secretary to obtain information with respect to the character and value of securities authorized to be accepted as security for circulation, and to furnish such information to national banking associations.

Section 9 relates to the semiannual duty payable on national bank circulation and amends section 5214 of the Revised Statutes wherein provision is made for a semiannual tax of one-fourth of 1 per cent on circulating notes secured by bonds bearing interest at the rate of 2 per cent per annum, including Panama Canal bonds, and one-half of 1 per cent semiannually upon circulation secured by United States

bonds bearing a higher rate of interest than 2 per cent. To this section is added the following:

National banking associations having circulating notes secured otherwise than by bonds of the United States shall pay for the first month a tax at the rate of five per centum per annum upon the average amount of such of their notes in circulation as are based upon the deposit of such securities, and afterwards an additional tax of one per centum per annum for each month until a tax of ten per centum per annum is reached, and thereafter such tax of ten per centum per annum, upon the average amount of such notes. Every national banking association having outstanding circulating notes secured by a deposit of other securities than United States bonds shall make monthly returns, under oath of its president or cashier, to the Treasurer of the United States, in such form as the Treasurer may prescribe, of the average monthly amount of its notes so secured in circulation; and it shall be the duty of the Comptroller of the Currency to cause such reports of notes in circulation to be verified by examination of the banks' records. The taxes received on circulating notes secured otherwise than by bonds of the United States shall be paid into the Division of Redemption of the Treasury and credited and added to the reserve fund held for the redemption of United States and other notes.

Section 10 amends section 9 of the act approved July 12, 1882, as amended by the act approved March 4, 1907, relating to the withdrawal of circulating notes and limiting the amount of lawful money that may be deposited for that purpose, to nine millions of dollars in any calendar month, by the addition of the following:

Any national banking association desiring to withdraw any of its circulating notes, secured by the deposit of securities other than bonds of the United States, may make such withdrawal at any time in like manner and effect by the deposit of lawful money or national bank notes with the Treasurer of the United States, and upon such deposit a proportionate share of the securities so deposited may be withdrawn: *Provided*, That the deposits under this section to retire notes secured by the deposit of securities other than bonds of the United States shall not be covered into the Treasury, as required by section six of an act entitled "An act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes," approved July fourteenth, eighteen hundred and ninety, but shall be retained in the Treasury for the purpose of redeeming the notes of the bank making such deposit.

Section 11 amends section 5172 of the Revised Statutes to read as follows:

In order to furnish suitable notes for circulation, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved, in the best manner to guard against counterfeiting and fraudulent alterations, and shall have printed therefrom, and numbered, such quantity of circulating notes, in blank, of the denominations of five dollars, ten dollars, twenty dollars, fifty dollars, one hundred dollars, five hundred dollars, one thousand dollars, and ten thousand dollars, as may be required to supply the associations entitled to receive the same. Such notes shall state upon their face that they are secured by United States bonds or other securities, certified by the written or engraved signatures of the Treasurer and Register and by the imprint of the seal of the Treasury. They shall also express upon their face the promise of the association receiving the same to pay on demand, attested by the signature of the president or vice-president and cashier. The Comptroller of the Currency, acting under the direction of the Secretary of the Treasury, shall as soon as practicable cause to be prepared circulating notes in blank, registered and countersigned, as provided by law, to an amount equal to fifty per centum of the capital stock of each national banking association; such notes to be deposited in the Treasury or in the subtreasury of the United States nearest the place of business of each association, and to be held for such association, subject to the order of the Comptroller of the Currency, for their delivery as provided by law: Provided, That the Comptroller of the Currency may issue national-bank notes of the present form until plates can be prepared and circulating notes issued as above provided: Provided, however, That in no event shall bank notes of the present form be issued to any bank as additional circulation provided for by this act.

The act of June 20, 1874, provided for the redemption of national-bank currency in United States notes; but section 12 of this act re-

quires redemptions in lawful money of the United States.

Section 13 provides that all acts and orders of the Treasurer of the United States and the Comptroller of the Currency authorized by the act shall have the approval of the Secretary of the Treasury, and confers power upon the Secretary to make such rules and regulations and exercise such control in the organization and management of national currency associations as may be necessary to carry out the purposes of the act.

Section 14 exempts national banks from holding reserve on deposits of public money by the United States in designated depositaries; and section 15 requires the payment of interest on public moneys at a rate to be prescribed by the Secretary of the Treasury, not less, however, than 1 per cent per annum, and requires that the rate upon such deposits shall be equal and uniform throughout the United States.

Section 16 provides for the appropriation of a sum sufficient to

carry out the purposes of the preceding sections of the act.

Sections 17, 18, and 19 provide for the creation of a "National Monetary Commission," and make it the duty of the commission to report to Congress at the earliest date practicable whatever changes are necessary or desirable in the monetary system of the United States or in the laws relating to banking and currency.

Section 20 provides that the act shall expire by limitation on June

30, 1914.

Under date of June 10, 1908, the Secretary of the Treasury issued a circular letter embodying the act of May 30, and containing the following information in relation to the formation of national currency associations and the issue of additional national-bank notes:

National banks occupying contiguous territory may organize a national currency association. There must be at least ten national banks in each national currency association, and the aggregate capital and surplus of such national banks must be at least \$5,000,000. No national bank may join a national currency association unless it has an unimpaired capital and a surplus of not less than 20 per cent. After the formation of an association any national bank belonging thereto, whose outstanding circulating notes actually issued amount to not less than 40 per cent of its capital, may obtain additional circulating notes in the manner provided in section 1 of the above act.

National banks possessing the same qualifications as to unimpaired capital and surplus required of banks joining a national currency association, and whose circulating notes outstanding and actually issued are equal to 40 per cent of its capital stock, may obtain additional circulating notes based upon the securities prescribed in said

section 3 and in the manner indicated therein.

In pursuance of the requirements of the above act, the following regulations are

hereby established:

The national banks located in any city in the United States containing ten or more such banks, having an aggregate unimpaired capital and surplus of not less than \$5,000,000, may form a national currency association. Ten or more national banks possessing an aggregate unimpaired capital and surplus of not less than \$5,000,000 may form a national currency association of the banks located within any contiguous territory outside of cities; but in order that all national banks in the United States possessing the qualifications of unimpaired capital and 20 per cent surplus prescribed in the act may, if they desire, be included within the membership of some national currency association, the Secretary hereby expressly reserves the right to add to, and include in, the territory of any national currency association formed in accordance with the provisions of the act any contiguous territory containing national banks which, but for such inclusion, would be excluded from, or inconveniently located as to, a national currency association.

National banks are advised that the names of the national currency associations must be indicative of the locality of the several associations. It is not feasible, for instance, to permit an association to style itself "First National Currency Association."

Accompanying herewith is a blank form of resolution which should be adopted by the board of directors of each of the national banks desiring to form a national currency association, empowering its president or vice-president, as the case may be, to act in the formation of such national currency association; also a blank form of application to be used by a bank desiring to join an association. These papers are to be presented at a meeting of national banks held for the purpose of forming a national currency association.

There has been prepared a blank form of certificate to be executed by the officers and executive committees of national currency associations and forwarded to the Secretary of the Treasury with the duly authenticated resolutions and applications

above mentioned.

Upon receipt of the certificate above mentioned, and the papers which should accompany the same, they will be examined under the direction of the Secretary of the Treasury, and notice of approval or disapproval will be promptly forwarded to the association. \* \* \*

National banks within some of the States are not eligible to form by themselves national currency associations, the aggregate capital and surplus being insufficient for the formation of such association. It is apparent, therefore, that the national banks in these States must affiliate with national banks in contiguous States in order

to effect the formation of an association.

The Secretary will not at this time allot any territory for the formation of national currency associations other than as is herein indicated. It is thought that the banks may prefer to come together of their own volition. It is preferable that state lines be observed as far as practicable, and due notice should be taken of the fact that each national bank desiring to become a member of a national currency association should be affiliated with the national banks in its neighborhood, and not apply for admission to an association not occupying contiguous territory.

Under the law national banks not taking part in the formation of a national currency association, but possessing the qualifications of membership, may apply to the Secretary of the Treasury for admission to some association, and upon his approval of their applications they may be admitted to membership in a national currency association

for their city or territory.

It will be observed that the foregoing relates only to the formation of national currency associations. The method to be followed in obtaining additional circulation through such national currency associations will be made the subject of a separate circular to be issued later. It should be stated in this connection, however, that national banks belonging to national currency associations and desiring to obtain additional circulation through their associations must apply therefor and submit their lists of securities to the officers of their respective associations, and not to the Secretary of the Treasury. Applications to the Secretary for additional circulation will be made by officers of the national currency associations.

Secretary of the Treasury. Applications to the Secretary for additional circulation will be made by officers of the national currency associations.

Applications for additional circulation under section 3, by individual national banks, may be addressed, when the circulation is desired, to the Comptroller of the Currency. That officer will advise any national bank as to the details of procedure.

National banks, by examining section 6 of the act, will see that the redemption fund to be deposited in the Treasury on account of additional circulation authorized by the act must consist of 10 per cent of such additional circulation.

Section 10 of the act provides that additional circulation issued under the provisions of the act may be retired at any time, without restriction as to the aggregate amount

retired in any one month.

Referring to section 15 of the act, the rate of interest to be paid by depositary banks is hereby fixed at 1 per cent per annum upon the average monthly amount of public deposits held, to be computed from June 15, 1908, and to be payable July 1, 1908, and thereafter on January 1 and July 1 of each year. Interest will be paid on the entire amount held by temporary or special depositaries, and on the amount held by regular depositaries in excess of the amount needed for the transaction of public business. Each bank will be advised by letter of the precise amount of its public deposits exempt from payment of interest.

The Secretary hereby reserves the right at any time, upon notice, to increase the rate

of the interest to be paid by depositary banks.

The following are copies of blank forms furnished by the Secretary for the submission of evidence of the formation of national currency associations:

RESOLUTION	Authorizing	NATIONAL	Banks	то	Join	NATIONAL	CURRENCY
Associations.							

Currency Association of \_\_\_\_\_\_, and to execute all papers in connection therewith as provided in section 1 of the act of Congress (Public No. 169) entitled "An act to amend the national banking laws," approved May 30, 1908.

REQUEST FOR AUTHORITY TO ISSUE ADDITIONAL CIRCULATION ON SECURITIES OTHER THAN UNITED STATES BONDS.

The COMPTROLLER OF THE CURRENCY, Washington, D. C.

Sir: The ..... National Bank of ....., unimpaired capital \$....., surplus \$....., United States bond-secured circulation \$....., requests authority to issue additional circulation, under section 3 of the act approved May 30, 1908, to the amount authorized, on the security of state, etc., bonds and other obligations hereinafter scheduled. The corporations issuing the bonds, etc., have been in existence for at least ten years, and in that period have not defaulted in the payment of any part of either representations. either principal or interest of any authorized funded debt.

Respectfully,

[Note.—In the column headed "Character" insert complete but brief description of bonds or other obligations tendered.]

Securities	Corporations issuing bonds or other obligations.				
Character.	Amount.	Interest rate.	Present market value per \$100.	Valuation of taxable property.	Net funded indebtedness.

The National Currency Association of Washington, D. C., is the only association so far formed and approved under authority of section 1 of the act of May 30, 1908, but this association has not applied to the Comptroller of the Currency for the issue of additional circulation to any of its constituent members.

Numerous inquiries have been received at the department with respect to the character of bonds available as security for circulation under the provisions of section 3, and the work of obtaining information with reference to the value and character of securities authorized to be accepted is now in progress, and when completed

the information necessary will be furnished to the banks.

Under authority of section 11 of the act, the work of preparing plates for the printing of bank circulation and the change of existing plates, to state upon the notes printed therefrom that the notes "are secured by United States bonds or other securities" was promptly undertaken by the Bureau of Engraving and Printing under directions of the Secretary of the Treasury and the Comptroller of the Currency. By October 31, of the approximately 10,000 plates in use 3,950 had been changed and circulating notes printed therefrom to the amount of \$277,742,700, of which, however, but \$27,080,220 have been issued to the banks, leaving notes of this issue on hand in the vaults of the Treasury to the amount of \$250,662,480. As rapidly as possible all of the plates will be changed and ultimately a permanent stock of circulating notes printed therefrom, equaling 50 per cent of the capital stock of the banks.

## INSOLVENT NATIONAL BANKS.

In the year ended October 31, 1908, the following-named national banks were closed and placed in the charge of receivers:

a Restored to solvency and resumed business.

Of the 33 national banks for which receivers were appointed during the year ended October 31, 1908, 9 banks with aggregate capital of \$1,290,000 were restored to solvency and authorized to resume business, while receivers proceeded to liquidate the assets of 24 banks found to be irretrievably insolvent. The nominal value of assets taken charge of by the receivers of these 24 banks was \$31,415,511, the liabilities, so far as reported, being \$19,342,610. Dividends to the amount of \$7,994,666 have been paid to creditors of the banks which failed during the year, and the affairs of one such bank having been finally settled the receivership was terminated.

Noting the cause of failure of banks placed in charge of receivers during the year, it appears that 7 banks were wrecked by the cashier, 1 by defalcation of officers, and 3 chiefly through fraudulent management, among other causes. Of the remainder, 4 failed from excessive loans to others and depreciation of securities, etc.; 3 by reason of injudicious banking; 2 from excessive loans to directors and others, and 2 from depreciation of securities; 1 from failure of large debtors,

and 1 from general stringency in the money market.

Since the organization of the national banking system to the close of the present report year, 499 national banks, including two which failed for a second time, have been placed in charge of receivers. Of this number, 21 have been restored to solvency and permitted to liquidate or to resume business; the affairs of 401 have been finally settled and the receiverships terminated, leaving 77 active

receiverships.

The capital of the 499 insolvent national banks at date of failure aggregated \$82,727,420, against which assessments were levied to the amount of \$44,361,240 to provide for estimated deficiency in the value of assets. The liabilities in excess of circulating notes were represented by assets of the nominal value of \$333,097,104. claims proved by creditors up to October 31, 1908, were \$175,058,171; collections from assets amounted to \$161,207,940; offsets were allowed and settled to the extent of \$26,215,257; and loss on assets compounded or sold under order of court aggregated \$107,414,837. Assets of the nominal value of \$12,045,174 have been returned to stockholders, the nominal value of the remaining assets being \$26,213,896. The assessment upon shareholders aggregating \$44,361,240 produced \$20,974,373, making the total funds collected from assets and shareholders \$182,182,313. From the collections, dividends have been paid to the amount of \$126,944,304; loans paid and other disbursements, \$37,606,836; legal expenses, \$4,660,472, and receivers' salaries and other expenses, \$8,213,772... The sum of \$2,876,554 in cash has been returned to shareholders, leaving a balance on hand October 31, 1908, with the Comptroller and receivers,

of \$1,880,375.

During the fiscal year ended October 31, 1908, the affairs of 14 national banks in charge of receivers were finally settled and the receivers discharged. The capital stock at failure of the 14 banks in question was \$5,500,000, and the assets taken charge of by receivers aggregated \$23,053,334. The collections from all sources aggregated \$13,737,491, from which dividends to the amount of \$7,611,351 were paid on claims proved amounting to \$7,761,053. Loans paid and other disbursements amounted to \$4,771,717; \$609,876 were returned to shareholders, the balance, \$744,547, being charged to expenses of administering the receiverships. The average percentage paid to creditors of the 14 receiverships closed during the year was 98.07 on claims proved. Four of the trusts paid 100 per cent and interest in full, and two paid 100 per cent and part of the interest; one paid 100 per cent; one 95.30 per cent; one 87.40 per cent; one 84.80 per cent; one 80.30 per cent; one 73.60 per cent; one 59.83 per cent, and one 51.02 per cent. Noting the length of the receiverships, one of these banks, viz, the Third National Bank of Chicago, Ill., had been in charge of a receiver for thirty years. The creditors of this bank, however, as far back as March 1, 1882, or within five years from the date of failure, had been paid 100 per cent of their claims and interest in full. Valuable assets coming into possession of the receiver after failure, the receivership was continued in the interests of the shareholders, who eventually received \$521,524 in cash, besides assets of the nominal value of \$689,362. Included in the receiverships terminated during the

year was the First National Bank of Little Rock, Ark., which failed in 1893, and the National Bank of Kansas City, Mo., which was placed in charge of a receiver in 1895. The creditors of the first-named bank received 73.6 per cent and those of the latter 100 per cent, with 78.54 per cent of the interest. The affairs of the National Bank of North America in New York, which failed January 27, 1908, were settled by the payment of creditors in full and the receivership terminated October 31, 1908, assets of the nominal value of \$2,370,250 having been turned over to an agent of the shareholders.

From statistics showing the results of liquidation of 401 insolvent national banks the affairs of which have been finally settled, some interesting facts with respect to the amount realized from assets and the cost of administration may be obtained. The capital stock at failure of these liquidated insolvent banks was \$65,162,420. United States bonds to the amount of \$22,360,900 held by the Treasurer of the United States in trust to secure circulation to the amount of \$20,083,783 were sold, the proceeds of which were \$23,992,350, leaving a balance transferred to the general assets of the trusts of \$3,908,567. The assessment of \$37,650,390 on stockholders produced \$18,273,754, which amount, added to the collections from assets of \$129,047,946 gave \$147,321,700 available funds from which dividends were paid to the amount of \$103,435,124, or 75.71 per cent on claims proved aggregating \$136,616,303. Taking into consideration offsets allowed and settled, and loans paid, etc., aggregating \$50,001,303, creditors received an average of \$2.22 per cent.

The liabilities as scheduled by the receivers of the 401 insolvent national banks the affairs of which have been finally settled, aggregated \$186,617,606, while from assets of the nominal value of \$262,432,836 (not including proceeds from assessments upon shareholders nor cost of collecting assessments), the sum of \$153,399,260 net, or 58.45 per cent, was realized in the final liquidation; this sum includes collections from assets less expenses, offsets, and assets not liquidated. The cost of administration, including legal expenses, was \$11,019,719, or 4.2 per cent of the nominal value of assets, and about 7.5 per cent of the total collections. The net loss to depositors is shown to be \$33,181,179, or 24.29 per cent on claims proved, or a

loss of 17.78 per cent on the total liabilities.

At the close of the fiscal year ended October 31, 1908, there were 77 insolvent national banks still in charge of receivers, with assets reported at the nominal value of \$70,664,268. From these assets the sum of \$32,159,994 had been collected, and offsets to the amount of \$6,315,998 allowed and settled. From assessments to the amount of \$6,710,850 levied upon shareholders, \$2,700,619 had been collected, making the total collections \$34,860,613. Of the total collections \$23,509,180 had been distributed to creditors in dividends; the sum of \$7,504,792 represented the loans paid and other disbursements; \$709,467 the legal expenses; \$1,145,058 receivers' salaries and all other expenses, and \$156,512 was returned to shareholders, leaving a balance of \$1,835,604 in the hands of the Comptroller and receivers for the benefit of creditors of these active receiverships.

The following table summarizing the reports of receivers of insolvent national banks from 1865 to October 31, 1908, will be found of interest:

SUMMARY OF REPORTS OF RECEIVERS OF INSOLVENT NATIONAL BANKS, 1865 TO OCTOBER 31, 1908.

	Closed receiverships,	Active receiverships, 77.	Total, 499.

a Includes 21 banks restored to solvency.
b Capital stock of 21 banks restored to solvency.

The reports of receivers of the insolvent national banks are published each year in the Comptroller's annual report. For this report an additional table has been prepared, containing similar information relative to insolvent national banks arranged by States. The statistics referred to will be found in the appendix to the report

of the Comptroller of the Currency.

In view of the fact that the loss sustained by creditors in national banks which have failed in the various States is of great interest, the following table has been compiled, showing the net loss to creditors of insolvent national banks the affairs of which have been finally settled, together with the balance required to pay claims proved, against national banks still in charge of receivers on October 31, 1908:

	Rec	eiverships closed.	Recei	verships not
State, etc.	Num- ber.	Net loss.	Num- ber.	Balance due creditors.

Total United States	a 422	33, 181, 179	77	14, 932, 688

The net loss to creditors of the 401 banks liquidated through receivers is therefore shown to be \$33,181,179, which represents 24.29 per cent of proved claims. The largest amount lost by creditors in any one State was \$4,592,829 in Pennsylvania. New York insolvent bank creditors lost \$3,389,939, while those in Montana national banks lost \$2,421,197. Creditors of insolvent national banks finally liquidated sustained no loss in Maryland, South Carolina, Kentucky, or Oklahoma. No failures occurred in the States of Maine, Rhode Island, Delaware, and Alaska. On October 31, 1908, creditors of the 77 insolvent national banks then in charge of receivers had proved claims aggregating \$38,441,868 and had been paid dividends thereon to the extent of \$23,509,180, or about 61.20 per cent, leaving a balance due of \$14,932,688 on face value of claims proved. The ultimate result to creditors of these receiverships still open is conjectural.

In the appendix to the report of the Comptroller of the Currency will be found a table showing the amount of claims proved, amount and per cent of loss to creditors of insolvent national banks which have failed in each year from 1865 to 1893, inclusive, and claims proved and estimated loss from 1894 to 1908, together with the amount of individual deposits in the active national banks at date of the fourth call for reports in each year. A summary of this data

gives the following results:

Annual average deposits, active national banks	\$1,597,987,400
Aggregate claims proved, insolvent national banks	\$175, 058, 171
Loss to creditors, actual and estimated	
Annual average claims proved	\$3, 978, 595
Annual average loss	
Annual average loss, per cent	29. 66
Annual average loss based on annual average deposits of active	
national banks, per cent	0.074

It will be noted that the above-estimated loss of 29.66 per cent is based on claims proved by depositors from 1865 to October 31, 1893, a period in which losses to creditors were far above the average. average loss to creditors of insolvent banks the affairs of which have been finally settled has been shown to be 17.78 per cent of the total liabilities of the banks at failure. The liabilities of all insolvent national banks, excluding circulating notes—that is, claims proved, offsets allowed and settled, loans paid and other disbursementsamount to \$238,880,264. The average loss to creditors in receiverships fully settled being 17.78 per cent of total liabilities, the estimated loss at this rate to creditors of all insolvent national banks is \$42,472,910. Upon this basis of calculation the annual loss to creditors is \$965,293, or 0.06 per cent of the annual average deposits in active national banks.

In addition to the tables in the appendix to the report of the Comptroller of the Currency showing the result of liquidation of each insolvent national bank to October 31, 1908, tables will be found therein showing a summary of reports of receivers of insolvent national banks arranged by years and by States.

LAWRENCE O. MURRAY, Comptroller of the Currency.

The Speaker of the House of Representatives.

## REPORT OF THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF THE REGISTER,
Washington, D. C., September 21, 1908.

Sir: I have the honor to make the following report of the business transacted in this office during the fiscal year ended June 30, 1908: The duties of the Register of the Treasury are thus defined: \* \* Signs and issues all bonds of the United States, the District of Columbia, the sundry loans of the Philippine Islands and the City of Manila, and transmits to the Treasurer of the United States schedules showing the name of every individual, corporation, etc., holding registered bonds and entitled to receive interest thereon. He receives, examines, and registers coupon bonds exchanged for registered bonds or redeemed, and registered bonds transferred and finally redeemed. He receives, examines, arranges, and registers the upper halves of all redeemed United States notes, gold certificates, silver certificates, and Treasury notes; fractional currency notes, detached interest coupons, interest checks on registered bonds, and all other United States securities redeemed and destroyed. He is represented on the committee having in charge the destruction, by maceration, of certain of the United States securities, etc., mentioned herein; also all customs, internal-revenue, and postage stamps condemned for imperfections and destroyed. He signs all the correspondence of the office. The work is performed in two divisions, as follows:

# Division of Loans.

This division primarily has charge of the interest-bearing debt of the United States. To this has been added the care of loans authorized by Congress for the District of Columbia, the Government of the

Philippine Islands, and the City of Manila.

The principal duties of this division are as follows: The receipt of new coupon and registered bonds after they have been printed and delivered by the Bureau of Engraving and Printing, together with the custody of the same; the preparation of registered and coupon bonds for issue, including the inscription of the names of the owners on registered bonds, and signing the same; writing the letter which accompanies each package or lot; preparing the receipt to be signed by consignees, and delivering the bonds for transmittal. Full records are kept: First, of all issues of bonds; second, of the transfer of registered bonds from one owner to another, and, third, of canceled

bonds which have been purchased, have been refunded, or have been redeemed at maturity. Accounts in detail are opened with each

holder of registered bonds.

The assignments of all registered bonds presented for transfer to other parties or for redemption are carefully examined. The assignments of much the larger part of the values involved being made by attorneys, executors, administrators, guardians, and representatives of banks and other corporations, it is necessary that the papers showing the authority of such agents shall be examined, indexed, and filed for instant reference. It is also necessary in every such transaction to see that the powers exercised by the attorney or representative are included among those granted him by his principal.

Quarterly schedules are prepared for the payment of interest on all United States registered bonds, on the three Philippine issues, and on the two issues of City of Manila sewer and water bonds. The schedules on the 3.65 per cent bonds of the District of Columbia are prepared semiannually. These schedules show the amount of registered bonds of each loan standing in the name of every owner at the date of the dividend, the amount due at each date of payment, together with the address to which the Treasurer of the United States is to

forward checks for interest.

The following table shows the number and amount of new bonds received from the Bureau of Engraving and Printing during the year:

NOTE.—All of the registered 4 per cent bonds of the funded loan of 1907 were delivered to this office for record at the time of settlement, and appear in the above table. The canceled coupon bonds do not reach this office until after they have passed through the office of the Auditor for the Treasury Department. The total amount of coupon bonds received from the Auditor was \$22,121,850, of which \$14,227,750 were received in time to be recorded in the books of this office. The remaining \$7,894,100 will be included in the report for the current year.

#### PANAMA CANAL LOAN.

During the period August 1 to September 15, 1906, this office issued \$30,000,000 in 2 per cent bonds under the act of June 28, 1902, as provided by the terms of a circular issued by the Secretary of the Treasury calling for bids for the above amount of bonds, the proceeds to be devoted to the providing of funds for the building of the Panama Canal. On November 18, 1907, a second circular was issued by the Secretary offering the public an additional \$50,000,000 of these bonds, but the amount was afterwards amended so that but \$25,000,000 of bonds were offered. The actual issue under this latter circular was \$24,631,980, making a total issue of \$54,631,980, a very small proportion of the bonds going to the public in coupon form.

This Panama Canal bond has proven to be a particularly attractive one to bankers who have need to deposit bonds with the Treasurer of the United States to secure circulating notes or deposits of public moneys. At the close of the fiscal year ended June 30, 1908, there were deposited with the Treasurer of the United States for purposes mentioned above, Panama Canal bonds amounting in the aggregate to \$53,847,880, leaving in the hands of individual holders, \$784,100.

#### PHILIPPINE ISLANDS AND CITY OF MANILA BONDS.

There has been no change in the status of the bonds issued under the auspices of the Government of the Philippine Islands during the fiscal year just ended. These bonds are issued under the auspices of the War Department (Bureau of Insular Affairs), but by an arrangement entered into between the Secretary of War and the Secretary of the Treasury the issues and transfers of the bonds are made by this office and all the records are kept here. Certified copies of the interest schedules at each dividend period are delivered to the Bureau of Insular Affairs, War Department, by this office, that bureau retaining a copy for its files and forwarding a copy to the Auditor for the Philippine Islands at Manila, for use in auditing the accounts as they reach him. The issues are as follows:

Philippine loan of 1914–1934, land purchase	\$7,000,000
Philippine loan of 1915–1935, public improvements, first series	2, 500, 000
Philippine loan of 1916–1936, public improvements, second series	1,000,000
City of Manila, sewer and water loan of 1915–1935, first series	1, 000, 000
City of Manila, sewer and water loan of 1917–1937, second series	1, 000, 000

# REDEMPTION OF 4 PER CENT BONDS, FUNDED LOAN OF 1907.

By the terms under which the bonds of the 4 per cent funded loan of 1907 (acts of July 14, 1870, and January 20, 1871) were issued, they were redeemable at the pleasure of the Government after July 1, 1907.

Previous to this date portions of the loan had been redeemed by purchase, refund, etc., under circulars bearing dates December 10, 1906, February 11, 1907, March 14, 1907, and April 2, 1907. The residue of the bonds were called for redemption after July 2, 1907, at which time interest on the loan ceased. At the close of the fiscal year ended June 30, 1908, there had been redeemed and closed out during the year on the books of this office \$30,754,350.

The original issue in this loan amounted to \$741,015,700, divided as follows: Registered, \$411,017,400; coupon, \$329,998,300. At the close of business on June 30, 1908, there remained outstanding \$3,065,550, the balance of the loan having been redeemed.

The amounts on which interest was paid on the regular dates

appear in the following table:

#### SPANISH INDEMNITY CERTIFICATES.

Under the treaty of February 17, 1834, there was awarded to certain citizens of the United States as due from the Kingdom of Spain the sum of \$599,850.16. About once a year since that time, until the past year, the sum of \$28,500, interest on the above amount, was received from Spain and divided among the holders of the certificates. While the Government of the United States was in no manner responsible for the payment of the principal or interest, it has always seen to it that the amount forwarded was distributed to the proper persons, and the transfers of stock have been recorded on the books of this office.

The last interest schedule was prepared in this office in November, 1907, in response to a notice from the Treasurer of the United States that the sixty-seventh installment of interest due from Spain, amount-

ing to \$28,500, had been deposited in the Treasury.

Early in the present year there was received from the Spanish Government the sum of \$570,000 in liquidation of the debt. The holders of the certificates agreed to divide this amount pro rata, and this office prepared and certified to the Treasurer of the United States a schedule showing the original amount of the claim of each holder and the amount to which each was entitled under the terms of settlement agreed upon. At this time there remain but twenty claims unsettled, and thus passes into history an indebtedness, the principal of which has been paid more than three times in interest.

## BONDS DELIVERED TO COMMITTEE FOR DESTRUCTION.

The 4 per cent funded loan of 1907 having matured, it was deemed best to destroy the unissued bonds of this loan remaining in the vault of this office. A request that the destruction might be brought about was made to the Secretary of the Treasury, who responded by ordering the bonds in question delivered to the destruction committee of the department. On April 23, 1908, 1,568 sheets of coupon bonds with coupons attached aggregating in value \$252,200, and 4,373 sheets of registered bonds of the face value of \$35,831,400 were delivered to the destruction committee. It is necessary to always keep a stock of unissued bonds of all current loans on hand, in order that transfer from one owner to another may be made. The above bonds represented the stock on hand when the loan was called.

During the year there were delivered to the destruction committee 211,392 canceled coupons representing a face value of \$814,195.50, clipped from bonds as they were issued from time to time, the interest period designated on the coupons having expired before issue was made.

## PACKAGES RECEIVED AND SENT.

There were received by registered mail during the year 2,167 packages containing bonds amounting to \$27,216,146.86, and there were sent from the office, also by registered mail, 3,443 packages containing bonds of the aggregate value of \$34,794,140.

## DIVISION OF NOTES, COUPONS, AND CURRENCY.

This division receives, counts, arranges, registers, examines, and files for future reference all redeemed, exchanged, and transferred coupon bonds, paid coupons, interest checks, and all United States interest-bearing securities, such as Treasury notes, seven-thirty notes, compound-interest notes, and gold and other certificates payable to order. It also makes the final count and examination of the upper halves of all redeemed United States currency prior to its final destruction. This division represents the Register on the various committees having in charge the examination and counting of customs, internal-revenue, and postage stamps condemned for imperfections, burnt and mutilated notes sent in for exchange and redemption, and witnessing the final destruction of the above by the process of maceration.

#### COUPON BONDS.

During the year there were received, counted, entered in blotters, examined, and scheduled 32,933 coupon bonds, with 778,668 coupons attached, amounting to \$17,303,670; and transferred from blotters to numerical registers 14,054 coupon and bond entries.

Note.—The office of the Register of the Treasury is the last to receive the redeemed securities of the Government, and therefore the amounts reported as "redeemed" will be less than the actual redemptions by the amount in transit, and the amounts reported as "outstanding" correspondingly increased.

During the year there were received, recorded, and filed in this division 923,578 redeemed vouchers, amounting to \$118,074,446.74, making a total of 127,779,001 redeemed vouchers, amounting to \$8,613,563,231.14 on file at the close of the year, as shown by the following table:

Total	11,676,279,357.3

In view of the coming necessity for additional space for the proper filing and care of coupon bonds of the later loans and other redeemed securities, and in view of the fact that this division has a complete and correct record of all redeemed, exchanged, and transferred coupon bonds, together with complete lists of outstanding bonds of the older matured loans of the Government, it would seem that this latter class of bonds might, without risk to the Government, be destroyed.

The act of Congress of July 14, 1870, authorized the destruction of redeemed coupon bonds, and under this act 2,363,085 bonds, amounting to \$1,421,687,450, were destroyed, but by act of Congress of March 3, 1881, these destructions were discontinued; consequently the great accumulation of this class of redeemed securities since that date has overtaxed the capacity of the files rooms of this division.

Respectfully submitted.

W. T. Vernon, Register.

The SECRETARY OF THE TREASURY.

## REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT, OFFICE OF COMMISSIONER OF INTERNAL REVENUE, Washington, D. C., November 1, 1908.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1908, accompanied also with a statement of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

#### RECEIPTS.

The receipts of this bureau for the past fiscal year were \$251,665,-950.04, a decrease of \$17,998,072.81 from the collections of the preceding year.

The receipts for the first three months of the current year show a decrease in collections of \$7,262,238.27 as compared with the same

months of the past fiscal year.

It is estimated that the total receipts for the fiscal year ending

June 30, 1909, will aggregate \$250,000,000.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected on distilled spirits \$133,626,276.45; on fermented liquors, \$58,747,680.14; on tobacco, \$49,862,754.26.

## RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States in the payment of internal revenue taxes for the past year are Illinois, \$46,122,844.97; New York, \$30,359,597.81; Kentucky, \$26,874,585.54; Indiana, \$26,546,753.39; Pennsylvania, \$21,250,640.91; Ohio, \$19,599,646.84.

Among the States paying the smallest amounts are Mississippi, New Mexico, North Dakota, Vermont, and Wyoming.

Of the 65 collection districts in the territory of the United States subject to internal-revenue laws, the Fifth district of Illinois reported

the largest collections, \$28,481,340.69.

In 1907 the total production of distilled spirits was 174,712,218 gallons; in 1908, 133,889,563. In 1907 in round numbers, 136,100,000 gallons of tax-paid spirits were withdrawn; in 1908, 121,400,000. There has been a decrease in the amount of tobacco and snuff manufactured and an increase in the production of beer.

519

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, 41,158,599 gallons; Indiana, 23,983,222 gallons; Kentucky, 16,995,973 gallons; Ohio, 10,323,194 gallons. The two collection districts having the largest output of distilled spirits are the Fifth district of Illinois, 29,393,037 gallons, and Seventh district of Indiana, 14,550,096 gallons.

The production of distilled spirits from materials other than fruit during the fiscal years ended June 30, 1897 to June 30, 1908, inclusive,

was as follows:

Fiscal year of production, ended—	Tax gallons.
June 30, 1897	62, 465, 647. 8
June 30, 1898	80, 762, 213. 4
June 30, 1899	97, 066, 554. 7
June 30, 1900	105, 484, 699. 8
June 30, 1901	124, 520, 599. 8
June 30, 1902	128, 623, 401. 9
June 30, 1903	141, 776, 202. 1
June 30, 1904	134, 311, 952. 0
June 30, 1905	147, 810, 794. 3
June 30, 1906	145, 666, 125. 1
June 30, 1907	168, 573, 913. 2
June 30, 1908	126, 989, 740. 1

During each fiscal year since the expiration of the fiscal year ended June 30, 1898, excluding the fiscal year ended June 30, 1908, the production of distilled spirits has been much in excess of the withdrawals for all purposes, and at the close of business June 30, 1907, had resulted in the accumulation of a stock in distillery and general bonded warehouses of 245,438,816 original gauge gallons, being an increase over a similar stock held in bond at the expiration of the fiscal year ended June 30, 1898, of 112,452,549.3 original gauge gallons, the quantity in bond at that time being 132,986,266.7 original gauge gallons. The quantity of distilled spirits in bond June 30, 1908, was 235,026,128.2 original gauge gallons.

The decrease in production during the fiscal year ended June 30, 1908, as compared with the fiscal year ended June 30, 1907, was 41,584,173.1 gallons distributed among the kinds as then known to

the trade as follows:

Decrease in—	Tax gallons.
Bourbon whisky	18, 970, 306, 7
Rye whisky	9, 962, 328. 1
Rum	126, 485, 4
Gin.	
High wines.	74, 873. 0
High-proof pure neutral or cologne spirits	
High-proof, pure, neutral, or cologne spirits	3, 117, 988, 8
TID COLUMN OUT TO THE TOTAL OUT TO THE T	0, 121, 000, 0
Total decrease	42, 309, 948, 0
Increase in—	12, 000, 010, 0
Alcohol	725, 774. 9
711CUIIUI	120, 171.0
Net decrease	41 584 173 1
1100 acceptable	11,001,110.1

This decrease in production, in the opinion of this office, is occasioned by the lack of demand for "high-proof spirits" for rectification purposes, the prohibition movement, the high price of grain during the year, and by an agreement entered into by many distillers to curtail the production during the year. The increase in the production of alcohol is caused by an increased demand for that class of spirits for denaturation purposes.

The tax-paid withdrawals of spirits distilled from material other than fruits during the fiscal years ended June 30, 1897, to June 30, 1908, inclusive, was as follows:

Fiscal year ended June 30—	Tax gallons.
1897	. 68, 661, 038. 5
1898	. 78, 246, 032. 9
1899	. 83, 694, 338. 1
1900	93, 391, 827. 8
1901	. 99, 191, 721, 5
1902	. 103, 304, 981. 5
1903	. 112, 788, 168. 0
1904	. 116, 033, 305. 6
1905	. 115, 994, 857. 5
1906	. 122, 617, 943. 1
1907	. 134, 031, 066. 7
1908	. 119, 703, 594. 4

From the foregoing it will be observed that the withdrawals on the payment of tax from bonded warehouses during the period from 1897 to 1907 increased approximately 100 per cent, but that there was a decrease in the tax-paid withdrawals for the fiscal year ended June 30, 1908, as compared with the fiscal year ended June 30, 1907, of (14,327,472.3 tax gallons) between 10 and 11 per cent.

This decrease in tax-paid withdrawals during the fiscal year ended June 30, 1908, was distributed among the different kinds of distilled

spirits as then known to the trade, as follows:

Decrease in tax-paid withdrawals of—	Gallons.
Bourbon whisky	1, 105, 241. 0
Rye whisky	1, 240, 878. 8
Alcohol	1, 131, 879. 8
Rum	338, 831. 5
Gin	174, 651. 9
High wines	74, 903. 1
High-proof, pure, neutral, or cologne spirits	10, 003, 454, 4
Miscellaneous	
M-4-1 J	14 997 479 9

In the opinion of this office, this decrease is not attributable to any specific cause, but to several, among which may be mentioned the following:

(1) The prohibition movement, which has restricted the area in

which the products of distillation may be legally sold.
(2) The unsettled condition of the "trade" in relation to the marking and branding of certain products of distillation under the "pure food and drugs act," pending the final adjudication of the same by the courts.

The four States which made the largest quantity of fermented liquors are New York, 12,963,905 barrels; Pennsylvania, 7,569,557 barrels; Illinois, 5,535,299 barrels; Wisconsin, 4,910,473 barrels. The two districts which produced the largest quantity of fermented liquors are the Third District of New York, 5,116,045 barrels, and the First District of Illinois, 4,702,664 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during

the year, are as follows:

Pennsylvania	1, 983, 595, 919
New York	1, 428, 251, 522
Ohio.	713, 273, 475
New Jersey	470, 255, 797

The two districts showing the largest production of cigars are the Ninth Pennsylvania, 837,091,088, and the First Pennsylvania, 695,302,855.

The States showing the greatest production of little cigars weigh-

ing less than 3 pounds per thousand are:

Virginia	441, 128, 940
Maryland	299, 010, 000
Pennsylvania	163, 861, 460

The greatest production by districts is as follows:

Maryland	299, 010, 000
Second Virginia	225, 378, 100
Sixth Virginia	215, 750, 840
First Pennsylvania.	161, 108, 560

The States of New York, Virginia, Louisiana, Pennsylvania, North Carolina, and California, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand.

New York produced	3, 311, 159, 858
Virginia produced	1, 203, 751, 870
Louisiana produced	456, 022, 240
Pennsylvania produced.	91, 544, 360
North Carolina produced	75, 496, 165
California produced	51, 417, 030

The three districts showing the greatest production of little cigarettes are the Second New York, which produced 1,582,439,826, the Second Virginia, which produced 1,185,359,260, and Third New York, which produced 1,177,433,482.

New York State produced the greatest number of large cigarettes, showing a production of 14,390,303; of which number 9,082,323 were manufactured in the Third district and 5,299,180 in the Second

district.

The States of Missouri, North Carolina, Kentucky, Ohio, and Virginia, in the order named, were the largest producers of both chewing and smoking tobacco, the quantity produced being as follows:

	Pounds.
Missouri	71, 212, 212
North Carolina.	65, 502, 107
Kentucky	45, 219, 830
Ohio	34, 795, 641
Virginia	28, 111, 558

The First Missouri district produced the largest quantity; the returns showing the manufacture of 70,952,420 pounds during the year, the next largest being the Fifth Kentucky, which produced 39,527,232 pounds.

#### COST OF COLLECTING THE INTERNAL REVENUES.

The cost of collecting the internal revenues for the past fiscal year was 1.92 per cent.

The average cost since the creation of the bureau is 2.71 per cent.

## DENATURED ALCOHOL.

In my annual report for the fiscal year ended June 30, 1907, will be found a synopsis of the laws<sup>a</sup> and regulations relating to denatured

 $<sup>^</sup>a\mathrm{Act}$  of June 7, 1906, which went into effect Jan. 1, 1907. Amendatory act of Mar. 2, 1907, which went into effect Sept. 1, 1907.

alcohol. As there shown, alcohol or rum, of the required proof, may be denatured at denaturing bonded warehouses on the distillery premises, or at centrally located denaturing bonded warehouses; and, when denatured, may be shipped in properly marked packages, tanks, or tank cars to manufacturers, dealers, or consumers. Alcohol completely denatured, by the addition of the required quantity of approved wood alcohol and benzine, or by the addition of wood alcohol and pyridin bases, may be used for light, heat, or power, or for any purpose other than for beverage or liquid medicinal purposes; and incompletely (specially) denatured alcohol, or rum, may be used by manufacturers for industrial purposes for which the same has been specially prepared. Under the regulations issued, denaturers, manufacturers, and wholesale dealers are required to keep the prescribed records; and such denaturers and manufacturers (except manufacturers using completely denatured alcohol and not recovering the same for reuse) are also required to give bond for the faithful compliance with the law and regulations on the subject. Redenaturers of recovered alcohol, and wholesale dealers in specially denatured alcohol are also required to keep the prescribed records and to give bond; but no record, bond, or return is now required in the case of retail dealers. Special regulations have been issued under the act of March 2, 1907, for the establishment of central denaturing warehouses, also for industrial alcohol distilleries, having a daily capacity not exceeding 100 proof gallons; but, thus far, no distilleries of this class have been registered, and but one central denaturing warehouse (located at New Orleans) has been established.

#### PRODUCTION OF DENATURED ALCOHOL.

As shown on page 43 of my report for 1907, there were denatured during the last six months of that fiscal year 1,780,276.35 wine gallons, consisting of 1,397,861.16 gallons of completely and 382,415.19 gallons of specially denatured alcohol, or at the rate of 3,560,552.70 gallons per annum. As shown by the tabulated statements to be found on pages 43 and 44 of this report, there were produced during the last fiscal year at the several denaturing warehouses (12 in number) 1,812,122.38 gallons of completely and 1,509,329.35 gallons of specially denatured alcohol and rum, or a total of 3,321,451.73 wine

gallons.

The slight decrease in the average production of last year, as compared with the production of the previous six months, may be attributed (1) to the fact that the reserved supply held by manufacturers and dealers, i. e., the quantity in excess of immediate needs, was in many instances procured during the first period referred to, and (2) to the large quantity of alcohol (872,151.29 gallons) recovered and reused by manufacturers during the year, which, it is found, exceeds that recovered during the preceding period by 746,054.60 gallons. The more noticeable decrease in the production of completely denatured alcohol may also be attributed in part to the fact that during the past year many manufacturers formerly using this class of spirits have substituted therefor specially denatured alcohol, which they have found to be better suited to their line of industries. As shown by the subjoined statement, there was a material increase during the past year in the total quantity of denatured alcohol re-

ceived by manufacturers from denaturers and dealers; also an increase in the number of manufacturers using such spirits.

		iths ended 30, 1907.	Fiscal year ended June 30, 1908.	
Kind of alcohol.	Number of manu- facturers.	Quantity received.	Number of manu- facturers.	Quantity received.
Completely denatured Specially denatured	777 130	Gallons. 583, 832. 97 348, 578. 12	607 385	Gallons. 895, 347.72 1,510,901.43
Total. Average for six months	907	932, 411. 09	992	2, 406, 249. 15 1, 203, 124. 57

## SPECIALLY DENATURED ALCOHOL.

The foregoing statements show not only a considerable increase in the total quantity of alcohol used for industrial purposes during the past year, but a very large increase in the use of specially denatured alcohol, such increase (computed on the basis of six months) being about 117 per cent. A statement showing the special formulas (16 in number) thus far prescribed by this office, the various industries for which these formulas have been prepared, and the quantity of alcohol denatured under each during the year will be found on page 48 of this report. As there shown, 768,476.63 gallons, or about 51 per cent of the entire output of specially denatured alcohol, was prepared under Formula No. 1 (5 gallons of approved wood alcohol to 100 gallons of ethyl alcohol), which formula, it will be noted, is adapted to many varied industries, including the manufacture of chemicals (not otherwise specially provided for), solid medicinal extracts, varnishes, lacquers, etc. It will also be noted that under other special formulas there were prepared during the year 288,981.36 gallons, or about 20 per cent, for use in the manufacture of smoking and chewing tobacco, and 213,077.83 gallons, or about 14 per cent, for use in the manufacture of sulphuric and nitrous ethers.

With the view of further facilitating the distribution of specially denatured alcohol among the smaller class of manufactures this office has by regulations authorized the shipment of such spirits to bonded dealers; and as shown by the reports received there were shipped to such dealers (12 in number) during the year 170,439.06 gallons. The reports also show that of the alcohol recovered by manufacturers for reuse there were shipped to a redenaturing plant (located in Danbury, Conn.) 40,284.18 gallons of completely and 65,569.62 gallons

of specially denatured alcohol.

The amendatory act, after it went into effect September 1, 1907, resulted in the withdrawal of considerable quantities of alcohol for the manufacture of definite chemical substances made therefrom, such as ether. On the day the law took effect the wholesale price of sulphuric ether for both manufacturing and medicinal uses dropped from 60 to 20 cents per pound. Other chemicals participating in the benefits of the law were acetic ether, nitrous ether, and ethyl chloride. No alcohol has yet been withdrawn for the manufacture of chloroform, doubtless because it can be produced from other sources which are as cheap as or cheaper than alcohol.

The provisions of the amendatory act allowing the withdrawal of rum of a strength of not less than 150° proof resulted in the use of 241,238.43 gallons after September 1, all of which was used in the manufacture of smoking and chewing tobacco.

## COMPLETELY DENATURED ALCOHOL.

The large decrease in this class of spirits, already referred to, further appears in the reported shipments to wholesale dealers. During the six months ended June 30, 1907, the quantity so shipped was 1,149,029.24 gallons, or at a rate of 2,298,058.48 gallons per year, while the shipments to such dealers during the last fiscal year are found to aggregate 1,703,239.89 gallons only. As against 784 wholesale dealers registered during the first period named, only 579 registered during the past year. There was, however, a very noticeable increase in both the number of retail dealers and the quantity of alcohol received during the year, the number being 10,550, and the quantity received 655,742.17 gallons, as against 7,038 registered dealers, receiving 295,670.19 gallons during the preceding period. The increase here noted indicates a growing demand for this class of spirits for domestic purposes. But, from reports received, there appears to have been no material increase in the total quantity entering into general use; and this condition is probably due to the fact that, owing to the high prices of distilling materials, the cost of production has not yet been sufficiently reduced to enable completely denatured alcohol to successfully compete with kerosene, gasoline, or gas. It is and has been the policy of this office to place no unnecessary restrictions on this business, and, as noted in my former report, practically no restrictions are now placed on the sale or use of alcohol which has been completely denatured.

## DENATURED ALCOHOL DISTILLERIES.

As already noted no advantage has yet been taken of the provisions of section 4 of the amendatory act, relative to the exemption from certain requirements and restrictions of distilleries having a daily spirit-producing capacity of not exceeding 100 proof gallons and producing spirits for denaturation only. This provision was undoubtedly intended by Congress to promote the production of industrial alcohol in agricultural districts, and this intent was emphasized by an appropriation made to enable the Secretary of Agriculture to carry on experiments in the production of alcohol. Under special regulations an agricultural experiment distillery has recently been established in Washington by the Department of Agriculture upon its own premises. The purpose is to determine the spirit-producing capacity of various materials, and to provide for the instruction and training of representatives from State agricultural experiment stations in the distilling industry, so that the possibilities of utilizing farm products and by-products in this way may be brought to the attention of the agricultural class in all parts of the country.

#### EUROPEAN INVESTIGATION.

In order to obtain more complete information concerning the character and operation of laws concerning the tax-free use of alcohol for industrial purposes in other countries, I made a trip to Europe this

summer, in accordance with instructions from the honorable the Secretary of the Treasury. This trip required about six weeks, from July 21 to September 8. I was accompanied by Chief Chemist Crampton of this bureau in order to have expert assistance upon the

numerous technical matters involved in the investigation.

The detailed report upon this investigation, which will shortly be submitted, is too lengthy for incorporation in this report. It will suffice here to say that the results obtained entirely justified the time devoted to it, if for no other reason than that it fully demonstrated that no possible ground exists for the assumption, which still prevails to some extent, that the slow development of the movement in this country is due to an unduly rigid official control over the production and sale of denatured alcohol. While laws allowing the tax-free use of alcohol in the arts and industries have been in operation in some of the countries of Europe for more than a quarter of a century, these laws are invariably accompanied by a strict system of control to guard against the misuse of the privilege, and experience has only strengthened the opinion of officials in charge of their administration of the necessity of such control. In some countries industrial alcohol enjoys certain fiscal advantages over beverage alcohol in the shape of rebates or remittances of taxes, but in no case does it obtain any special privileges in the way of exemption from official control until after it has been denatured or depotabilized. After this point the official surveillance varies in different countries, depending upon the sufficiency of the denaturing agents used, the character of the use to which it is put, and the manner of its sale. It would require too much space to go into a detailed analysis and comparison of the various systems in operation in Europe. It can be stated with full confidence, however, that in respect to the production and sale of alcohol for popular purposes, heat, light, and power, the official control now in operation in the United States is more liberal in many respects than that of any of the foreign countries we visited.

In respect to the use of alcohol in the manufactures, I found the same to be true in many respects, but not in all. Our system is the most liberal in the world in the matter of the cost of supervision and denaturing, which is borne entirely by the Government, whereas in all other countries a part, at least, of this expense is imposed upon the parties benefited, that is, the manufacturers using the alcohol. In the denaturing materials allowed, on the other hand, our system so far has followed English rather than German precedent. Germany is the most liberal in this respect; England the least liberal. But the conditions in England are more like our conditions than those which obtain in Germany. That is to say, the tax on alcohol is much higher in England and America than in Germany, consequently the inducement to fraud is greater. Moreover, the German manufacturer is careful and precise in the control of his process and exact in accounting for all material; he is accustomed to government supervision and submits to a system of inspection under which the American would probably prove very restive and impatient.

In Germany and France the denaturing is done at the factory in case of special denaturing; we denature at the distillery. This is in the direction of economy of administration, but it involves more transporation. Possibly the regulations could be liberalized in this

direction with advantage to the manufacturer, but it is doubtful whether it could be done under the present law, as the term used in section 2 of the amendatory act, viz, "central denaturing bonded warehouses" would hardly seem to justify the authorization of a

warehouse which would serve one manufacturer only.

The investigation further served to dispel the mistaken impression which has obtained very wide credence in America that the producer of alcohol for denaturing purposes in Germany was especially favored in the matter of government control by exemption from many of the restrictions thrown around the producer of beverage alcohol, and that the development of the use of denatured alcohol in that country was primarily due to this fact. It was supposed that this freedom from supervision and restraint was the main factor which had so greatly stimulated the production of alcohol in rural districts. This erroneous belief was even shared by this office up to the time of my personal investigation this year, as is shown by the following, quoted from page 7 of my last annual report:

It also appears that under this system there are some 70,000 farm distilleries in Germany producing industrial alcohol, etc.

As a matter of fact, of the 65,405 distilleries in operation in Germany during the campaign year 1906–7, 50,316 were what is known as "materialbrennereien," which use nonstarchy materials, such as fruits, berries, wine lees, etc., and which produce not industrial alcohol, but potable distilled spirits, such as brandy, kirsch, etc. One reason for the mistake of supposing that the product of these numerous stills was used as industrial alcohol may be found in the fact that the German official statistics state all distilled spirits in terms of pure alcohol, regardless of the strength at which they are produced and sold.

This class of distilleries in Germany, although great in numbers, produces less than 1 per cent of the total alcohol consumed in Germany. They are favored in the system of government control, just as fruit brandy distilleries are in this country, by a less rigid inspection, but they have absolutely nothing whatever to do with the question of denatured alcohol. There were in operation during the year 1906–7, however, 13,837 "landwirthschaftliche brennereien," or agricultural distilleries, of which 5,871 used potatoes as a raw material and 7,966 used various kinds of grain. These distilleries produced, in round numbers, 86,000,000 gallons out of a total production of 101,000,000 gallons, of which 78,000,000 gallons were made from potatoes. Not only is most of the alcohol used for industrial purposes made in these distilleries, but most of the beverage alcohol as well.

They are favored in a fiscal way over the industrial or commercial distilleries as to both kinds of alcohol by the method in which the taxes are laid, but they have very rigid requirements imposed upon them, which really gives them their designation as "agricultural" distilleries. They must use exclusively as raw material grain or potatoes grown on the farm or farms of their owner or owners, and must use all the residues or by-products as feeding materials or as fertilizers on the same farms. They are all fairly good sized plants, capable of producing high-proof alcohol, in continuous process, and with a daily capacity of from 300 to 900 liters of such alcohol (120 to 400 gallons proof spirit.) A plant of this kind may be owned by one man if he has a farm area large enough to supply the raw materials himself,

or by a combination of farmers, in which case it is called a "Genossenschafts-brennerei," or cooperative distillery. There were 398 of such distilleries in operation in Germany during the campaign year 1906-7, their total production being about 8,000,000 gallons of alcohol.

As already stated, more than 85 per cent of all the alcohol produced in Germany is made in these agricultural distilleries, comparatively few in number. So far as immediate official control is concerned, they are not favored in any way over the industrial distilleries. supervision is just as careful and close, and costs the same in both They are, however, favored in a fiscal way, their product paying less tax. Along with this concession goes a limitation of their output, called the "contingent" or estimated capacity, and a strict enforcement of the requirements for a return of the by-products to the land, which makes the operation of this class of distilleries a part of a broad system of soil improvement and crop rotation. Neither the whole nor any part of this system could be adopted in this country under present laws; it would require a complete change in the laws for the collection of tax upon distilled spirits and the introduction of discriminating and graduated taxes upon spirits produced under differing conditions.

The character of alcohol legislation embodied in section 4 of the amendatory act of March 2, 1907, whereby a separate and distinct class is made of distilleries producing alcohol solely for denaturing purposes is, contrary to general belief, unique of its kind, and does not find a counterpart, so far as I am aware, in the laws of any other

country than our own.

Of the three principal countries of Europe—England, France, and Germany—the last named was the only one in which the consumption of alcohol for heat, light, and power—that is, completely denatured alcohol-had materially increased during the past year. The consumption for manufacturing purposes—that is, specially denatured alcohol—had increased in all three countries. The price of denatured alcohol in Berlin at the time of our visit was, for a strength of 90 per cent, 30 pfennige per liter, equivalent to about 27 cents per gallon; and for a strength of 95 per cent, 33 pfennige per liter, equivalent to about 30 cents per gallon. A special price was quoted for alcohol denatured for use in internal-combustion engines for power purposes, which differs slightly in composition from the completely denatured alcohol sold for the production of heat and light, and contains some benzine. This price was 22.5 marks per hectoliter, equivalent to about 20½ cents per gallon. I was assured by the directorate of the "Centrale," however, the organization which handles and controls most of the alcohol sold for industrial purposes, that this price was below the cost of actual production and would necessarily be advanced very shortly.

# DEVELOPMENT OF THE USE OF DENATURED ALCOHOL IN THE UNITED STATES.

The use of denatured alcohol for purposes of fuel, light, and power in this country is increasing, notwithstanding the relative cheapness of petroleum products, as the necessary appliances for such use are being manufactured and introduced, and the merits of alcohol as a source of energy brought to the attention of the public.

The greatest ultimate advantages to be reaped from the denatured alcohol law, however, are its benefits to agriculture in the shape of increased diversification of crops, enhanced productiveness of unfertile soils, and utilization of what would otherwise be waste crops or by-products of crops. It must necessarily require much time and work for this development, but if the farming community in different parts of the country, instead of becoming impatient for direct and immediate results, will extend earnest sympathy and cooperation to the scientific workers in the several state experimental stations and in the federal departments engaged in the problem, much greater progress will be made.

The one thing we need in our country in this matter more than anything else is the reduction of the cost of making alcohol. The German, after forty years' experience and experiments, uses cheap potatoes, while we are yet compelled to use high-priced grain. Our western country—the Dakotas, Nebraska, Minnesota, Montana, Iowa, and Kansas—will be the first to produce alcohol from potatoes

and from molasses, the by-product of the sugar beet.

An extended use of denatured alcohol in our country may be brought about by the legislatures of the various states where prohibition prevails by some law authorizing the reopening of all the now idle and useless, and in many instances expensive, distilleries, under laws which would provide that the operations of these distilleries and a fixed percentage of their product should be used, under state as well as national official inspection and surveillance, for the purpose of turning practically all of the product of these distilleries into denatured alcohol for manufacturing and industrial purposes.

# RECEIPTS FOR FIRST THREE MONTHS, CURRENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first three months of the fiscal years ending June 30, 1908 and 1909. A comparison of the receipts for the two periods is also given.

#### COST OF COLLECTION.

The cost of collection for the fiscal year, distributed among the different items of appropriation, was approximately as follows:

Salaries and expenses of collectors of internal revenue, 1908	\$1,976,213.27
Miscellaneous expenses, Internal-Revenue Service, 1908	75, 593. 07
Salaries and expenses of agents and subordinate officers of internal reve-	
nue, 1908	2, 284, 215, 14
Paper for internal-revenue stamps, 1908	
Punishment for violation of internal-revenue laws, 1908	98, 926, 60
Salaries, Office of Commissioner of Internal Revenue, 1908	321, 664. 07
Total amount expended.	4, 830, 698, 65

Expenditures from appropriation "Withdrawal of denaturalized alcohol."—The expenditures from the appropriation for "Withdrawal of denaturalized alcohol" were as follows:

Salaries and expenses of agents and inspectors. Salaries and expenses of 15 deputy collectors. Salaries of 15 storekeepers $^a$ . Fees and expenses of 5 gaugers $^b$ . Salaries of office force. Office traveling expenses.	14, 541. 86 18, 798. 00 6, 960. 00 21, 315. 97 392. 68
Laboratory supplies.	340. 53
Total amount expended	153 719 35

### ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal-Revenue Service for the fiscal year ending June 30, 1910, as follows:

Office of Commissioner of Internal Revenue: For salaries of officers, clerks, and subordinate officers.	\$328, 510. 00
Salaries and expenses of collectors of internal revenue: For salaries and	40=0,010.00
expenses of collectors of internal revenue, and deputy collectors and	
surveyors, and clerks and messengers and janitors in internal-revenue	
offices	2, 075, 000. 00
revenue: For salaries and expenses of 40 revenue agents provided for by law, and fees and expenses of gaugers, salaries and expenses of	
storekeepers and storekeeper-gaugers	2, 400, 000. 00
Miscellaneous expenses, Internal-Revenue Service: For rent of offices	2, 100, 000. 00
outside of the District of Columbia, telephone service, and other mis-	
cellaneous expenses incident to the collection of internal revenue	100, 000. 00
Withdrawal of denaturalized alcohol, acts of June 7, 1906, and March 2,	
1907	200, 000. 00
Paper for internal-revenue stamps: For paper for internal-revenue	05 000 00
stamps, including freight.  Punishment for violation of internal-revenue laws: For detecting and	85, 000. 00
bringing to trial and punishment persons guilty of violating the inter-	
nal-revenue laws, or conniving at the same, including payments for	
information and detections of such violations	150, 000. 00
Refunding internal-revenue collections: To enable the Secretary of the	•
Treasury to refund money covered into the Treasury as internal-reve-	
nue collections under the provisions of the act of May 27, 1908	
Total	5, 368, 510.00
Salaries, Office of Commissioner of Internal Revenue (reimbursable):	
For salaries of two stamp agents and one counter	3, 400. 00

<sup>&</sup>lt;sup>a</sup> Where alcohol was produced at a distillery and only a portion of the product was denatured and the distillery was of that class where a storekeeper was assigned to perform all the work in connection with the entry and withdrawal of alcohol and denaturing the same, payment of salary and expenses was made from the appropriation for "Salaries and expenses of agents and subordinate officers of internal revenue."

b Where there was not a sufficient amount of alchol denatured at one distillery to employ the entire time of one gauger in such work, the compensation and expenses of such gauger were paid from the appropriation for "Salaries and expenses of agents

and subordinate officers of internal revenue."

#### SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1910, the sum of \$328,510 as salaries for the following officers, clerks, and employes in this bureau:

1	Commissioner of Internal Revenue.	\$6,000.00
	deputy commissioner	4,000.00
1	deputy commissioner	3, 600. 00
î	chemist	2, 500. 00
î	first assistant chemist	1,800.00
ī	second assistant chemist.	1,600,00
	third assistant chemist	1, 400, 00
	fourth assistant chemist	1, 200, 00
	heads of division, at \$2,500 each	5, 000, 00
	heads of division, at \$2,250 each	15, 750, 00
	superintendent of stamp vault	2,000.00
1	private secretary	1,800.00
28	clerks of class 4	50, 400. CO
	clerks of class 3	38, 400. 00
	clerks of class 2	50, 400. 00
	clerks of class 1	43, 200. 00
31	clerks, at \$1,000 each	31,000.00
	clerks, at \$900 each.	39, 600. 00
	packers, at \$840 each.	4, 200.00
- 5	messengers at \$840 each	4, 200. 00
11	assistant messengers, at \$720 each	7, 920, 00
19	laborers, at \$660 each	12, 540.00
		•
258		328, 510, 00

I also recommend the appropriation of the sum of \$3,400 as salaries of two stamp agents, one at \$1,600, one at \$900, and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

# SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualifications that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25,000 or less. \$25,001 to \$37,500. \$37,501 to \$50,000. \$30,001 to \$75,000. \$100,001 to \$125,000. \$100,001 to \$125,000. \$125,001 to \$175,000. \$125,001 to \$175,000. \$125,001 to \$275,000. \$225,001 to \$275,000. \$225,001 to \$325,000.	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	\$375,001 to \$425,000 \$425,001 to \$475,000 \$475,001 to \$475,000 \$550,001 to \$550,000 \$125,001 to \$700,000 \$700,001 to \$775,000 \$775,001 to \$850,000 \$850,001 to \$925,000 \$925,001 to \$999,999 \$1,000,000 and upward	3 500 3, 608 3, 700 3, 878 4, 000 4, 108 4, 250 4, 378

In addition to the salary based upon the above-mentioned scale, the collector shall receive a commission of one-half of 1 per cent on tax-paid spirit stamps, and may receive additional compensation on account of territorial extent, as provided by law, provided the gross compensation does not exceed \$4,500. (See secs. 3148 and 3314, Revised Statutes.)

## OFFICIAL FORCE.

At the close of the fiscal year ended June 30, 1908, 259 officers, clerks, messengers, and laborers were employed in this bureau, and the aggregate amount paid during the year for their salaries was \$321,664.07, which does not include office force paid from the appropriation "Withdrawal of denaturalized alcohol," from which was paid \$21,315.97, covering salaries of 18 employees.

The force connected with this bureau during the fiscal year which ended June 30, 1908, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 65 collectors, who received per annum salaries and commissions

as follows:

Number.	Salary.	Number.	Salary.
49	4, 372, 89 4, 250, 00 4, 101, 47	1	\$3, 575. 86 3, 511 59 3, 500. 00 3, 249. 58 3, 203 25 3, 000 29 2, 875 84 2, 875. 00

There were also employed 1,137 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
37	\$2,500 2,000	283	\$1,200 1,150	6	\$700 COO
3	1,900 1,800 1,700	149 1	1,100 1,050	12 6	500 480
6	1,600 1,550	1. 68	1,000 950 900	2. 24.	400 300 300
48	1,500 1,450 1,400	1	850 840 800	1	200 100 60
4	1,350 1,300	18	750 720		00

There were also employed in the offices of the different collectors 135 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$1,700 1,000 1,500 1,400 1,300 1,200	4	\$1,150 1,100 1,050 1,050 1,000 900 800	1	\$780 750 700 600

Also 13 messengers and 2 janitors, who received per annum salaries as follows:

' Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$900 750 720	5	\$600 480 450	12	\$400 300

## STOREKEEPERS, GAUGERS, ETC.

There were also employed 184 gaugers, who received fees not to exceed \$5 per day; 69 storekeepers, whose pay did not exceed \$4 per day; 2,006 storekeeper-gaugers, whose pay ranged from \$2 to \$5 per day; and 2 distillery surveyors. All the employees above enumerated were paid only when actually employed.
